Congressional Record

PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, SECOND SESSION

SENATE—*FRIDAY, OCTOBER 1, 1982*

(Legislative day of Wednesday, September 8, 1982)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Father in Heaven, as this body disperses, we commend to Thy care and keeping each one and each family. As Thou didst rest from Thy labors, so may they. As Thou hast ordained the family as the foundation of social order, may all families be strengthened and renewed.

We pray for those who face hard work in their campaigns. Insulate them against unfair attacks from opposition and a cynical press and public. Give them wisdom to respond wisely to legitimate issues and patience to endure nonissues which may be used against them. Encourage them when they are discouraged and give them the assurance that they may entrust their destiny to Thee, having done all that is right and proper to inform the people.

We pray for the electorate, that they will take their citizenship seriously and exercise their franchise wisely.

For those who remain to continue the work here, may there be times to relax, to rest, to be renewed personally and with loved ones. We pray this in the name of Him who promised rest to the weary, strength to the weak, and unconditional love to all. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. BAKER. Mr. President, after the recognition of the two leaders under the standing order, three Senators will be recognized under special orders for not to exceed 15 minutes each; to wit, Senators ABDNOR, GORTON, and PRYOR. After the execution of the special orders, there will be a brief period for the transaction of routine morning business to extend not past the hour of 10:30 a.m., in which Senators may speak for not more than 2 minutes each. After that, Mr. President, a variety of measures will be dealt with in the so-called wrap-up. I expect that the distinguished minority leader may be able to clear a number of items that have been cleared on this side. That may consume a fair amount of time and it may be necessary to extend the time for the transaction of routine morning business in order to accommodate that requirement.

After the so-called wrap-up—that is, the items that can be done by unanimous consent—has been cleared on both sides, a number of items suggest themselves as candidates for action by the Senate today such as the highway bill, S. 2574; the Commodity Futures Trading Corporation bill, S. 2109; the Securities and Exchange Commission bill, H.R. 6156; the export trading company conference report; the Nuclear Regulatory Commission reauthorization conference report, which is H.R. 2330; the missing children's con-

NOTICE

An interim issue of the daily Congressional Record for the Ninety-seventh Congress, second session, will be published on Wednesday, October 20, 1982, during the adjournment, unless otherwise ordered by the Joint Committee on Printing.

None of the material printed in the Congressional Record after adjournment may contain subject matter, or relate to any event, which occurred after the date Congress officially adjourned.

No provision herein shall be construed to supersede the two-page limitation rule.

All material must be signed by the Member and delivered to the respective Office of the Official Reporters of Debates, Room H-132 or S-220 of the Capitol, Monday through Friday, between the hours of 10:00 a.m. and 3:00 p.m., through Wednesday, October 20, except Monday, October 11.

Members of Congress desiring to purchase reprints of material submitted for Record printing during the adjournment may do so through the Congressional Information Division located at the Government Printing Office. That office may be reached by telephoning 275-2226 between the hours of 8:00 a.m. and 4:30 p.m. daily.

By order of the Joint Committee on Printing.

CHARLES McC. MATHIAS, JR., Chairman.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

ference report, H.R. 6976; the military pay bill, perhaps, S. 2936; and the Defense Production Act, if it can be reached, S. 2375.

Mr. President, all or some of those things need to be done today. Certainly, the highway bill, which has authorization that will expire today—or last night at midnight, I believe; the conference reports, which are privileged; and the other matters which we desire to deal with as we can reach them.

CONTINUING APPROPRIATIONS, 1983—CONFERENCE REPORT

Mr. President, the urgent business of the Senate today will be to await the action of the House of Representatives on the conference report on the continuing resolution making appropriations for 1983. I congratulate the conferees, especially the chairman of the Appropriations Committee and the distinguished assistant majority leader (Mr. STEVENS) for their good work in that conference and for the prompt resolution of the items in conflict so that both Houses of Congress can consider that conference report today. I have seen continuing resolution conference reports that went on for half a lifetime, it seems, but this was done promptly and in good manner. I congratulate them and all the other Senate conferees.

THE BALANCED BUDGET AMENDMENT

Mr. President, in addition to the conference report on the continuing resolution, we shall watch with great interest as the House approaches the issue of the balanced budget amendment to the Constitution. It is my understanding that the House has scheduled debate on the rule in respect to that amendment for today, and debate, of course, on the matter which emerges from the disposition of the debate on the rule.

In any event, the Senate may also have to deal with a message from the House on the constitutional amendment on the balanced budget and perhaps be prepared to go to conference with the House of Representatives if there is a disagreeing vote of the two Houses on that subject.

Mr. President, I think we can finish today. I guess it is now incumbent on me to make some kind of estimate about what time, since a number of Senators, particularly Western Senators, have planes they have to catch. I have talked to a number of Senators and I am keenly aware of that requirement. Therefore, I regret to say what I am about to say.

If the House acts as it looks now like they are going to act on the constitutional amendment on the balanced budget first, it does not look to me like we are going to get the continuing resolution conference report over here until midafternoon at the latest—3 p.m. or maybe later. If that is so, it is going to be 4 or 5 p.m. at the earliest before we can finish action on that matter. That, of course, does not make any provision for time for considering the balanced budget amendment if it reaches us in the form of a House bill or if there is a request for a conference, a conference report on that matter.

So, that is a looming and large element of uncertainty about our plans. But right now, for the benefit of those who have reservations, particularly to the West, it looks to me as if the House will not get us a continuing resolution until 3 p.m. or after. I know that is bad news, but I felt I had the obligation to share that information.

Mr. SYMMS. Will the distinguished majority leader yield for a question?

Mr. BAKER. Only if the Senator will promise to be gentle.

Mr. SYMMS. If the House does do something with respect to the constitutional amendment, does the leader anticipate that there might be action by the Senate on that, yet, today?

Mr. BAKER. Yes, Mr. President, I do. I think it would be unconscionable for the Senate to fail to act if, indeed, the House acts and we are called upon to act. Therefore, it will be my intention to take up the matter.

Mr. SYMMS. I thank the leader.

DEPOSITORY INSTITUTIONS AMENDMENTS

Mr. BAKER. Mr. President, a short time ago the House of Representatives passed H.R. 6267, a bill that increased the competitive position of all financial institutions. This legislation will help revitalize the housing industry and mortgage lending. It will produce an instrument that will permit all depository institutions to compete with money market mutual funds. The legislation produces many significant and sorely needed changes in the financial laws of our country.

The credit for this legislation should go to Senator JAKE GARN from Utah. For 2 years, Senator GARN has worked tirelessly to focus our attention on the changing environment for depository institutions. He succeeded. Senator GARN produced a bill which was endorsed by virtually every interested organization, passed the Senate by voice vote, and was changed very little by the House conferees. President Reagan has endorsed the legislation and declared that it is of "significant importance to the Nation."

I have been advised that Congressman STANTON of Ohio, the ranking member of the House Banking Committee felt so strongly that Senator GARN be given the credit for producing this legislation that as a member of the conference committee he insisted that the act be called the Garn-St Germain Act.

It is my pleasure as majority leader of the Senate to congratulate and thank him on behalf of the Senate. As necessary as this legislation was, 2 years ago most thought it would be impossible. As recently as 3 months ago, it was viewed unlikely. Today it is on its way to the President to be signed into law. Thank you to my good friend the senior Senator from Utah, JAKE GARN.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, is the Senator from Wisconsin or the Senator from Washington or the Senator from Ohio in the status of acting minority leader?

Mr. PROXMIRE. Mr. President, it is my understanding that I am to be using some of the time of the minority leader.

Mr. BAKER. Mr. President, I have no further use for my time under the standing order. I yield so the acting minority leader may have some time under the standing order.

Before I do that, Mr. President, will the Senator from Wisconsin allow me—I promised the Senator from Alaska some time under the standing order. Will the Senator permit me to reserve some time for his use sometime later today,

Mr. PROXMIRE. Certainly, Mr. President.

Mr. BAKER. Mr. President, I yield to the Senator from Wisconsin.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Mr. President, I yield to the Senator from Washington.

KIRKLAND NATIONAL ALL-STARS: WORLD CHAMPIONS

Mr. JACKSON. Mr. President, before we adjourn, I take this moment to recognize, and bring to my colleagues attention, a tremendous achievement by a group of youngsters from Kirkland, Wash., that brought honor to the United States and extended goodwill throughout the Nation and the world.

The boys, members of the Kirkland National All-Stars, won the Little League World Series this summer—bringing the championship to the United States for the first time in 7 years.

The team captured the imagination of America for more than a week as the boys worked their way through the tournament and finally beat the heavily favored team from Taiwan.

Members of the team are: Mike Adams, Erik Jonson, Taikan Sekine, Mark Swain, Mark Peterson, Bill Cook, Gibbie Black, Greg Miller, Greg Keller, Brian Avery, Travis Perry, Cody Webster, Shawn Cochran, and

Chad Hartvigson. Their league president is Warren Warrenotteson. The manager is Don Cochran, and the coach is Pat Down.

Winning the Little League World Series at Williamsport, Pa., brought international attention, distinction, and honor to the United States, to Kirkland, to the parents and supporters, and to the boys themselves.

They deserve to be congratulated and commended. Their success will serve as an inspiration to the millions of boys and girls throughout the United States and the world who participate and compete in athletics.

Congress recognized the value of encouraging youngsters to participate in America's favorite past time by approving a Federal charter for Little League Baseball, Inc., in 1964.

Since that time, the organization has grown to the point where now more than 50,000 teams involving 2.5 million youngsters from 30 nations participate each summer. This year, the Little League World Series attracted 40,000 spectators—more than most major league games.

In Kirkland, more than 1,000 youngsters—boys between 8 and 12 and girls between 8 and 18—compete each year. The community has the highest per capita rate of participation in the Nation.

Kirkland is a proud community—proud of its Little Leaguers—and proud of its commitment to helping young people. The real credit for the team's success goes not just to the youngsters, but also to the team officials, the coaches, the parents, the service clubs, and the business people who work tirelessly giving their time and their money to make it all possible.

I know my colleagues will join me in saluting the Kirkland National All-Stars and Little League Baseball, Inc., on this occasion.

I yield back to my good friend from Wisconsin.

GENOCIDE: PROPER SUBJECT FOR INTERNATIONAL TREATY

Mr. PROXMIRE. Mr. President, the goal of the Genocide Convention is simple: to make genocide a crime under international law. But, as we know, its ratification in the U.S. Senate is still pending, although the treaty was drafted more than 30 years ago.

Why has the Senate not ratified the Genocide Convention? Opponents argue that international treaties must deal with external affairs, and that the crime of genocide lies within domestic jurisdiction. Therefore, they conclude, genocide is not a proper subject for an international treaty.

Mr. President, there are three good reasons why the Genocide Convention is a proper topic for an international treaty. First, we know from commonsense and history that the acts of genocide are likely to spill over political boundaries. If they do, they will pose a serious threat to international stability. Therefore, the world community must take a firm stand together against the systematic annihilation of a racial, religious, or ethnic group.

Second, Mr. President, an international treaty on genocide is required for extradition purposes. If one of our nationals committed genocide and fled to another country, that country would be under no obligation to return him to us for trial and punishment. The Genocide Convention would guarantee to all nations the right to prosecute their nationals guilty of genocide, regardless of location.

Third, Mr. President, the United States must join 83 other nations and go on the record against genocide. We did this on the issue of slavery in 1967. If we can do it for slavery, we can do it for genocide; both are unacceptable actions in a civilized world.

Mr. President, there is widespread support in the United States for the Genocide Convention. Fifty-two labor, religious, and civic groups have asked the Senate to ratify it. I call upon the Senate to ratify the Genocide Convention—an action that is both politically justified and morally sound.

TRENDS IN CONVENTIONAL ARMS TRANSFERS TO THE THIRD WORLD BY MAJOR SUPPLIER 1974-81

Mr. PROXMIRE. Mr. President, recent announcements by the State Department emphasizing the increasing role of arms exports by the U.S.S.R. have once again focused attention on this worldwide phenomenon. Perhaps the most confusing new development in this field is the problem of redefinition. Just what is counted when compiling arms sales? The Carter administration used one formula and the Reagan administration used another. Should commercial sales be included in any analysis or just U.S. Government agreements, direct sales and financed, plus grants?

Another complicating development is the definition of to whom the sales and transfers are made. Various definitions of the Third World, for example, give rise to different dollar totals.

And should construction sales and deliveries be counted against U.S. arms totals? Or are these relatively nonmilitary in content and thus should be excluded?

Mr. President, in order to avoid policy biases from determining these factual matters, it is important to rely on statistics compiled and analyzed by an impartial, nonpolitical source of information. Luckily, such an analysis is available to Members of Congress in a recently completed study by the Congressional Research Service. The author of this report, titled "Trends in Conventional Arms Transfers to the Third World by Major Supplier, 1974-81," is a well-known expert on arms exports, Richard F. Grimmett.

In the first section of his report Mr. Grimmett looks at what data should be included in arms sales and delivery statistics. I ask unanimous consent, Mr. President, that part I of the CRS study be printed in the RECORD.

There being no objection, the study was ordered to be printed in the RECORD, as follows:

FIRST SECTION OF REPORT I

INTRODUCTION

This report is an update of previous reports by the Congressional Research Service (CRS) on the subject of conventional arms transfers. It provides unclassified background data on more recent trends in the transfer of conventional arms by major suppliers to the Third World. A more detailed discussion and analysis of U.S. conventional arms transfer policy by CRS can be found in "Changing Perspectives on U.S. Arms Transfer Policy." This committee print, prepared for the Subcommittee on International Security and Scientific Affairs of the House Foreign Affairs Committee, was published on September 25, 1981.

What data is included and why

There are various approaches that can be taken to provide useful data on conventional arms transfer activity by major suppliers. Deciding what to include or exclude can affect in important ways the impressions left by the final data set. In this report an effort is made to include most of the information that could reasonably be associated with U.S. and foreign conventional arms transfer programs. Some exclusions were made as a matter of analytic judgment. But such exclusions and inclusions are clearly indicated in the footnotes of the accompanying tables.

At this point it should be noted that U.S. commercial sales and deliveries data has been excluded from the U.S. agreements and deliveries values. This was done because the U.S. government's Foreign Military Sales (FMS) program accounts for the greatest percentage of U.S. conventional arms sales. Further, most of the commercial sales of any size from 1974-1981 went to Europe or to developed nations such as Japan or Australia. Commercial transfers to the Near East and South Asia did not average above $350 million a year from 1974-1981. U.S. commercial arms sales to Latin America and Sub-Saharan Africa were especially negligible during this period. Finally, the U.S. government does not track the totals and the cancellations of these commercially licensed sales with the same degree of precision that it does U.S. government-to-government sales—making the accuracy of commercial figures subject to question.

On the other hand, U.S. data on FMS construction sales and deliveries are included in the U.S. values totals. To exclude FMS construction data would eliminate billions from U.S. sales figures to the Third World. These billions involve almost exclusively one country—Saudi Arabia. From FY 1974-FY 1981 Saudi Arabia accounted for $15.541 billion of the $15.548 billion in worldwide FMS construction sales agreements for that period.

In short, the Saudis participated in nearly all of them.

The building of an airfield or a naval base and/or associated support facilities can be legitimately included in FMS totals as they are sales of items that can have a clear military application. If their purpose is intended to be non-military, it seems likely that they would be funded through other U.S. non-military programs. If FMS construction data is to be excluded it would seem more appropriate to exclude that part of it that has no potential military application. Unclassified Defense Department data makes clear that the overwhelming dollar value of Saudi FMS construction sales in the period from the early 1970s to the present have been for military related projects. Consequently, this category is included in the U.S. totals in its entirety.

Training is a smaller component of the U.S. foreign military sales program. But it is nonetheless an important part of it as it would be in the case of any foreign military sales program. It is not enough merely to sell a squadron of aircraft or a number of tanks. Purchasing nations need support in learning how to use the systems sold to them. If this training is part of the package associated with the original sale of the weapons systems or part of one such as the formal U.S. International Military Education and Training (IMET) program—the training provided serves both a military and policy end. In this context, counting military training in its broadest sense as part of the foreign military sales value of a country's program seems quite legitimate.

In this report, grant military assistance programs, training and construction are counted for all countries, not just the United States. In this way comparisons, although based on judgements regarding which categories to count, are reasonably consistent across the board. U.S. data on all these categories are readily available, unlike the same data regarding the foreign suppliers. Estimates by the U.S. government can be criticized because no one can guarantee that it has all the data regarding foreign arms transfers that it needs for complete comparisons. Some argue that foreign arms transfer data available to the U.S. government understates the facts in important ways. Nonetheless, that data which was provided by the U.S. government for this report do establish a reasonable if not perfect, basis for useful comparisons.

It is disingenuous to argue that the Soviet data regarding values of their arms transfers are misleading because of attractive financing terms the Soviets provide to Third World buyers while failing to note that the U.S. also provides various forms of concessional FMS financing to a number of countries. Furthermore, to win foreign sales contracts, it is clear that U.S. arms merchants also engage in competitive practices such as providing various pricing concessions in the "packaging" of their weapons systems—sometimes including co-production arrangements or other "offsets" on the system sold.

Yet this discussion of the merits of inclusion or exclusion of various categories of a foreign military sales program in the gross dollar value of that program would be remiss if a larger point regarding the relative value of the use of these aggregate dollar totals was not addressed. Simply put, the use of aggregate dollar values in evaluating a country's foreign military sales program are of relatively limited utility because of a number of factors. Some of these key factors are set out below.

First, due to the wide swings upward or downward from one year to the next in the total dollar value of arms transfer agreements of various countries, it is possible to pick a year or two at random and "prove" many things with the data available for those years. Two obvious examples shown in Table 1 are the U.S. and foreign agreement data for 1980 and 1981. If 1980 was discussed in a vacuum, it would seem that the French were on the verge of matching the U.S. in value of sales contracts. Likewise, the Soviet Union would seem to have a massive "lead" in sales over other individual suppliers—given its $14.7 billion sales figure. However, by reviewing the 1981 arms transfer agreement data, one can readily see that the agreement values for the United States, the French, and the Soviet Union dropped remarkably in that year.

These transfer agreement data are also subject to constant revision as purchasers chose to cancel contracts entered into a previous year. Until actual deliveries of items contracted for occurs there is no assurance that a large sales year will fulfill its initial promise. In the case of the U.S., for example, it is clear that had Iran not cancelled large orders of the mid-to late 1970s the total value of U.S. arms transfer agreements with the Third World from 1974–1981 would have been about $6.4 billion higher.

Furthermore, the artificial cut-off points for counting dollar values of sales can have a significant effect on the total picture. The Ujited States data is calculated in fiscal year terms. The foreigj data in calendar year terms. In either case(should a major sale be consummated one day after the given arbitrary cut-off point—be it the end of a fiscal or calendar year—the selling nation's agreement values may be notably lower or higher, depending upon the given circumstances. An obvious example of this is the AWACS–5–15 enhancement package of $8.5 billion for Saudi Arabia which cleared congressional review in October 1981, but is not counted in 1981 U.S. totals because the fiscal year ended on September 30.

Other sales clearing congressional review after September 30, 1981 include F-16's for Pakistan and Venezuela. Should they be counted in fiscal year 1982 U.S. agreements totals along with most of the Saudi AWACS package, the U.S. agreements values for that year will jump dramatically from 1981 totals. Estimates of the executive branch made in the fiscal year 1983 Security Assistance Program Congressional Presentation Document stated that roughly $17.7 billion in fiscal year 1982 sales agreements involving Egypt, Saudi Arabia, Pakistan, South Korea, and Venezuela were possible. In an August 2, 1982 press statement, Under Secretary of State James L. Buckley noted that at least $10.2 billion in sales agreements for fiscal year 1982 had been concluded with certain Third World nations, and that another $4 billion in FMS agreements ($2 billion in FMS construction) with Saudi Arabia alone was possible before the end of fiscal year 1982.

Once arms transfer agreements are concluded, it generally takes more than a year or two for the items sold to be delivered. For example, the Saudis purchased 60 F-15 fighters in the summer of 1978 and only received the first in-country delivery of an operational aircraft in January 1982. Thus the basic utility of the dollar values of arms transfer agreements is in indicating long-range trends in sales activity by arms suppliers. The gross dollar values indicate what is or has been in the delivery "pipeline." To use these data for purposes other than assessing general trends in seller/buyer activity is to risk drawing hasty conclusions that may be rapidly invalidated by events. This same generalization would apply to arms transfer delivery values provided in Table 2. Thus the answer to the perennial question: Who is number one in Third World arms sales is likely to vary from year to year depending on a wide range of circumstances.

A much more useful data set in assessing the arms transfers to the Third World by suppliers is that which indicates who has actually delivered numbers of specific classes of military items to a region. These data are relatively hard data inasmuch as they reflect events that have occurred. These data, will not, however, provide details relating the sophistication level of the equipment delivered. For example, they will not indicate whether supersonic aircraft delivered were F-5s or F-15s, MIG 21s or MIG 23s, or Mirage F-1s, or Mirage 2000s, but they will show relative trends in the delivery of various classes of equipment and will also indicate who the major suppliers are from region to region over time. In the end, it is this trend line data that can indicate who is or is not developing a market for a catagory of weapon in a region, and perhaps suggest whether or not an arms race is emerging.

In this context, the data in this report are set out in a series of tables. Table 1 shows the dollar values of arms transfer agreements with the Third World, by supplier from 1974–1981. Table 2 shows the dollar values of arms deliveries to the Third World by supplier for the same years. Tables 1A and 1B show the averages of agreement values of suppliers for 1974–1977 and 1978–1981 respectively in an effort to smooth out the highs and lows of the data over two periods roughly coinciding with the Nixon-Ford administrations (1974–1977) and the Carter administration (1978–1981). Tables 2A and 2B show the same averaged data for delivery values of supplies during the same two periods—1974–1977 and 1978–1981. Tables 3 through 7 provide delivery data of major suppliers to the Third World and to specific regions from 1974—1977, 1978—1981 and 1974–1981. These tables give detailed totals of specific weapons categories actually delivered to either the Third world or a specific region of it by specific major suppliers during the time periods noted.

Nations considered part of each region are listed at the end of the tables as are descriptions of items included in the twelve specific weapons categories used. Throughout, the Third World is considered to be all non-European nations and all countries not members of NATO or the Warsaw Pact. Excluded as well from the Third World category are Japan, Australia and New Zealand. None of the data included in the Third World deliveries tables includes items delivered to any country that is not considered to be a Third World nation by this definition.

Mr. PROXMIRE. Mr. President, I reserve the remainder of the minority leader's time for his use at a later time today.

THE SABRA AND SHATILA TRAGEDY

Mr. ROBERT C. BYRD. Mr. President, the wanton killing of Palestinian men, women, and children in the Sabra and Shatila Refugee Camps by

Christian Lebanese militia was a very tragic occurrence—an occurrence which horrified us all. It has horrified the people of Israel, and I know that it has horrified my friends in the Jewish community in this country.

It should be pointed out that the debate over whether or not this tragedy could have been avoided, or the inquiry into why it was allowed to happen, is taking place where it should appropriately take place—in Israel itself.

Unfortunately, the wrath of the international community has come down almost solely upon the head of Israel. As editorial writers and columnists have observed in the aftermath of this tragedy, there is a double standard set for Israel. But for all the international criticism aimed at Israel, one simple fact stands out as a beacon of light in a stormy sea. And that fact is simply this: There is not another country in the Middle East where such a wide-open debate and such national soul-searching over a tragedy like this could take place other than in that small democratic State of Israel.

When thousands of Syrians were killed by President Assad's own army in Hama earlier this year, any dissent was crushed in a crackdown by the Syrian regime.

When thousands of Lebanese Christians were killed by Syrian forces who shelled East Beirut off and on for nearly 100 days in 1978, there was not one country in the Arab world, that I can recall, which even questioned the Syrian action, let alone raised its voice in protest.

When the PLO and Leftist Muslim militias formed an alliance to crush the Christian community, precipitating the Lebanese Civil War of 1975–76 and resulting in thousands of deaths and massive destruction, the Arab world was silent.

When an estimated 20,000 Palestinians and Jordanians were killed in what became known as "Black September" 1970 and the PLO was driven into Lebanon by King Hussein, the world was silent. And in Jordan, there was not any searching public inquiry into how the bloodshed could have been averted.

When the Soviet Union sends Muslim troops into Afghanistan to slaughter Afghan Muslims, where is the voice of the Muslim world calling for international sanctions against the Soviets?

The Iran-Iraq war, pitting Muslim against Muslim, continues to drag on. Ayatollah Khomeini's regime continues its vicious policy of eliminating even supporters of the revolution who now dare to question the regime's policies. Yet, little world attention is devoted to the tragic human toll exacted by the Ayatollah.

I am not pointing to these incidents in an attempt to justify what happened in Lebanon. The tragedy in Lebanon cannot be justified. However, I am pointing to these incidents to illustrate that there is a difference between Israel and its severest critics. The government of Prime Minister Menachem Begin has bowed to public pressure in his own country and has agreed to establish a full-fledged, independent judicial commission to investigate the Beirut massacre. This commission will have the authority to subpena witnesses and documents and to hear sworn testimony under the threat of perjury.

Last Saturday night, an estimated 350,000 Israelis, representing 10 percent of the population of that country, demonstrated in Tel Aviv against the Begin government in reaction to what happened in Lebanon. Think about that for a moment. It would be the equivalent of some 23 million Americans descending on Washington to protest the Government of the United States.

I was moved by the following account which appeared in the October 4 issue of Time magazine.

> "My God, I was awake all night crying and despairing. What will become of us? What is happening to us?" That plaintive question could easily have come from a Palestinian woman grieving for her lost family following the massacre of Arab men, women, and children in the Palestinian refugee camps south of Beirut. In fact, the anguished speaker was an Israeli woman in Jerusalem who, the night before, had watched the television pictures of the aftermath of the killings by the Israeli-backed Lebanese Christian militiamen.

We all have read accounts of the torment in Israel, the torment within the Jewish community in this country, and the torment among the supporters of Israel over this tragedy. Yet, it was this widespread sence of anguish over the slaughter of innocent Palestinians among the Israeli populace which led to the establishment of the investigative commission.

I remind my colleagues that it was a free and unfettered press in Israel which broke the news of the Lebanon tragedy to the people of Israel. It was a free and unfettered press in Israel which has developed much of the information the world has available to it today concerning this tragic event. It was the President of Israel, Yitzhak Navon, who broke with tradition and called upon the government of Prime Minister Menachem Begin to establish an independent Commission of National Inquiry to investigate thoroughly the events surrounding this tragedy. And, finally, it was the people of Israel, resorting to that most profound instrument of democracy—the right to peaceably assemble to voice a people's grievance against their Government—which forced the creation of a judicial investigation of the massacre.

I think it is time we acknowledge—that the world community acknowledges—that Israel is a vibrant democracy, unafraid of seeking the truth. It is a tribute to the people of Israel that they have the strength and character to undertake what will be a most painful examination of their own national conscience. Not every country would have the courage to undertake such a course, particularly when the answers may be even more painful than the questions.

One might question why a country would choose such a course. I think the answer can be found in the essay written by Lance Morrow which appeared in the October 4 issue of Time magazine. Mr. Morrow observed:

> For Israel, for Jews around the world, the massacre was a moral nightmare. It penetrated to the deepest questions of the Jewish character and identity, to the core of the Jewish idea.

Morrow observed further:

> The Jewish conscience is often a splendid moral instrument, one of the most highly developed in the world. The internal anguish in Israel last week, with half the country calling for the resignation of Begin and Sharon, demonstrated that the conscience is obviously in good working order.

It is so easy to be numbed by a world so fraught with violence and the loss of human life. Yet, many have found it easy to accuse Israel so vigorously because, as Morrow so appropriately pointed out, "the massacre profoundly violated Israel's own moral standards." But that is just the point. How many other countries, other than our own, have established a standard of behavior that has provoked the reaction we are witnessing today in the aftermath of the Shatila and Sabra tragedy? Certainly, the countries surrounding Israel, where the human carnage papers the pages of history, do not hold themselves, nor are they held by others, to this standard.

There are many reasons for the support the United States has given to Israel over the past 34 years. Many of us point out the important security asset Israel has been over the years and the benefit the United States has derived from this relationship. But I also think the relationship is even more fundamental than this. Israel has demonstrated its resiliency as a fiercely democratic state. And I think the willingness of the people of Israel to hold their own government accountable in the investigation of this tragedy, no matter how painful this process might be, is ample evidence that the faith we have placed in the relationship between our two countries is well founded.

I cannot emphasize too strongly my shock over what happened in the Shatila and Sabra refugee camps. But I think it is incumbent upon us all—and I include the community of nations in my appeal—to refrain from interfering in what will be an anguished search for the truth in Israel itself. The Is-

raelis have taken it upon themselves to shoulder this awesome responsibility. Let us not make this burden heavier than it is already. The decision has been made by Israel itself. Let us respect the fact that this decision was made. Let us acknowledge that the people of Israel have launched themselves on an agonizing journey. Let us sympathize with this anguish and appreciate the fact that the Israelis cannot find it within themselves to turn their backs on Shatila and Sabra, as their detractors turned their backs on Ma'alot and Munich massacres.

And finally, Mr. President, it is imperative for all foreign forces to leave Lebanon just as expeditiously as possible. Lebanon must be returned to the Lebanese. The presence of foreign forces, beginning with the flight of the PLO into Lebanon from Jordan in 1970, has subjected that unfortunate country to 12 years of intercommunal strife and bloodshed which has taken the lives of Christians and Muslims alike.

The election of Amin Gemayel as President, around whom most factions in Lebanon have rallied—Christian and Muslim alike—is a clear signal that the Lebanese are determined to achieve a reconciliation among themselves. For the first time in 7 years, the so-called green line, separating Christian East Beirut from Muslim West Beirut, has ceased to exist. Beirut is no longer a divided city. Yet, reconciliation throughout all of Lebanon can be achieved only if the remaining PLO forces, the Syrian Army, and the Israeli Army are withdrawn completely from that country.

Lebanon must never again become the battleground of the Arab-Israeli dispute. The people of Lebanon have already endured too much suffering as a result of international indifference to their plight in the past. I welcome President Reagan's determination to bring about a return of Lebanon to the Lebanese.

Mr. President, if we have learned anything from the recent tragedy in Lebanon, it is that the peace process must move forward once again. It is time for all parties to the Arab-Israeli dispute to demonstrate their determination to break this unending cycle of violence. It is time for all peoples of the region to make peace among themselves and with their neighbors. Let us pray that this will be done.

ORDER OF BUSINESS

The PRESIDING OFFICER (Mr. SYMMS). The acting majority leader.

Mr. STEVENS. Mr. President, there has been an order for the transaction of routine morning business after the special orders, has there not?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. And what was that order?

The PRESIDING OFFICER. To last not beyond the hour of 10:30 a.m.

Mr. STEVENS. Are there three special orders?

The PRESIDING OFFICER. That is correct.

Mr. STEVENS. Of 15 minutes each?

The PRESIDING OFFICER. That is correct.

Mr. STEVENS. How much remains of the leader's time?

The PRESIDING OFFICER. Three minutes twenty-five seconds.

Mr. STEVENS. Very well, I see the Senators having the special orders are here. I reserve the remainder of the leader's time until after those special orders and will seek to change that routine morning business hour at that time.

Mr. METZENBAUM. Mr. President, I cannot hear the acting majority leader. Would he be good enough to use his microphone?

Mr. STEVENS. The next time the Senator should hear, I will.

PROFESSIONAL FOOTBALL STRIKE

Mr. STEVENS. Mr. President, the American public is deeply concerned about the current strike in professional football and about the apparent lack of progress to a solution. I share the public's concern.

President Reagan was asked a few days ago whether he thinks "the players and owners are being fair with us millions of fans." The President said that while he does not like to comment on professional football's affairs, "there doesn't seem to have been the consideration for the fan that there could have been, and should have been. They do seem to be very far apart, however, in their goals." President Reagan, I think, summed it up very well. The public wants a prompt resolution of this dispute.

The professional football strike does not simply mean that the American public loses a form of Sunday afternoon entertainment. Not only are there no NFL football telecasts, but the strike also impacts our communities and the economy. As the New York Times summarized this past Monday, the strike produced major economic disruptions and losses in all of the communities which host NFL teams. Mr. President, at this point I would like to ask unanimous consent that the article entitled "Impact of the Pro Football Strike: A Lost Sunday and Lost Dollars" be inserted in the record—as well as a letter I have received from the Commissioner of the NFL.

The materials ordered to be printed in the RECORD, follow:

[From the New York Times, Sept. 27, 1982]

IMPACT OF THE PRO FOOTBALL STRIKE: A LOST SUNDAY AND LOST DOLLARS

Football stadiums were deserted, 15,000 people were out of work, restaurant and hotel business plummeted, 800,000 fans stayed home, television stations ran re-runs and losses mounted to more than $70 million yesterday on the first weekend of the National Football League players' strike.

From small-change vendors of hotdogs and souvenirs to millionaire owners and municipal concessionaires, the impact of last Tuesday's walkout—the first midseason strike in professional football history—was felt in full as fans sought new diversions to take the place of the usual autumn fare of breath-taking passes and bone-jarring tackles.

The effects of the walkout were minimal in the New York area, whose teams, the Giants and the Jets, were not scheduled to play at home yesterday. But in Green Bay, Cleveland, San Diego and other cities where weekends mean football, revenues dried up and the tempo of life slowed to a scoreless crawl.

The non-economic impact of the strike was felt by a diversity of people—disappointed high-school marching bands, proud ball-boys whose fantasies were not unfolding and the squirming of countless armchair fans whose countdown to Sunday begins at the end of each Monday Night Football game.

But with negotiators far apart and no end of the walkout in sight, the major loss was monetary, and it appeared to be affecting everyone who had anything to do with pro-football. These included:

The owners of the league's 28 teams, who, by their own estimate, lost $29 million in revenues—$18 million in television money and $11 million in gate receipts—on the first week's 14 unplayed games, one last Thursday, 12 more yesterday and another tonight.

The 1,500 striking players—who are paid an average of $100,000 a year, or more than $6,000 a game in a 16-game season—lost about $9 million in salaries, which are usually paid the day after a game.

The 14 municipalities where the games were to have been played were said to have lost at least $2 million in taxes, stadium rentals and ancilliary revenues ranging from parking fees to bus, subway and train fares.

Concessionaires, who say the average football fan spends $2.50 to $3 on food, drink, programs and souvenirs, estimated their losses at more than $2 million.

In each city where a game was not played, the private sector of the economy was believed to have lost abut $2 million—as much as $28 million in all—on restaurant meals, hotel and motel accomodations and a panoply of business that depend heavily on football and its fans.

Beyond the effects on owners, players, cities and businesses, the losses were less calculable but no less real.

The pennant salesmen, hot-dog vendors, security guards, electricians, statisticians, ushers, parking lot attendants, grounds crews, clean-up men and a host of others—some 15,000 people with football-related livelihoods—were out of work and unpaid.

Most stadium operatcrs estimate that they hire 1,000 of these people for a game at salaries ranging from $15 to $100. About half of them have no other income. Many are retired and depend on their small weekly earnings from the games.

"I'd say the great majority of the 1,100 people we hire come from Foxboro" said Chuck Sullivan, the executive vice president of the New England Patriots, who were to have played the Seattle Seahawks at the Patriots stadium in Foxboro, Mass., yesterday.

The unplayed game cost the Church of the Emanuel in Foxboro about $1,800. The church, as a fund-raising effort, handles the stadium's clean-up operations after each game. In addition, about 20 local charitable groups are permitted to maintain the hot dog and souvenir stands at the park, each collecting about $1,000 on a football Sunday.

Since many of the stadiums are situated in older downtown urban areas, some of the walkout's most serious effects were being felt in central business districts.

For Cleveland, where civic groups have struggled for years to upgrade the city's image, the loss of tonight's nationally televised game against the Cincinnati Bengals was significant.

"It's of extreme importance," said Art Modell, the president of the Cleveland Browns, "It's a great civic stimulus—not just in money, but pride."

For the striking players, today will be a payless payday. There were no indications that any player was broke, but M. J. Duberstein, an economist with their union, the NFL Players Association, said that some players might be planning to borrow cash for the duration.

"There have been hundreds of new accounts opened in our credit union in the last couple of weeks" Mr. Duberstein said in Washington.

While the Management Council, the bargaining arm of the owners, estimates the weekly loss of television revenues at $18 million, it was revealed last week that the NFL's five-year contracts with ABC, CBS and NBC called for the networks to continue making payments to the league through the first two weeks of a work stoppage.

But the owners have noted that that money is nevertheless being lost because, under the contracts, it must be paid back to the networks next year.

On the asset side of the ledgers, the owners noted that traveling teams would not have to pay $40,000 each to charter a jet plane for their trips.

Except for Cleveland and New England, the stadiums are owned by municipalities and they stand to lose heavily in an extended strike. The City of San Diego, for example, lost about $122,000 yesterday because of the canceled home game between the Chargers and the Los Angeles Raiders.

John Lockwood, an assistant city manager, said that nearly $800,000 would have been paid by 53,000 fans at Jack Murphy Stadium. Of that total, the city would have got $63,600, or 8 percent, in taxes on tickets; $32,000 from parking, based on $2 to $3 on 16,000 cars, and $27,000 from concessions.

Mr. Lockwood said that his city and many other stadium operators had sought strike insurance but had finally rejected it as too expensive. "We were quoted $450,000 for insurance premiums," he said. "But even if we lost three games, that would be a push, so we decided to take a chance the strike would not last that long. For us to lose three games, the strike would have to be on for six weeks."

However, the Minnesota Vikings, who lost $930,000 for not playing its sold-out game with the Dallas Cowboys yesterday, will still have to pay $38,000—half their normal rent—to the commission that runs the new Metrodome.

In Houston, Harris County receives an annual fee of $250,000 from the Houston Sports Association, a private company which runs the Astrodome, and it is paid no matter how many games are played there.

The City of San Francisco will lose $177,200 on each canceled game; New Orleans will lose $100,000 in rental on the Superdome, and Washington, D.C. will lost $125,000 for each game that is not played at RFK Stadium.

WEEK ONE OF THE STRIKE: THE COST IN TICKET SALES

Following are estimated attendance and gross receipts figures for the National Football League games that had been scheduled this weekend, with average ticket price in parentheses.

Giants at Pittsburgh—54,000 ($13.75); $742,500.

Jets at Baltimore—40,000 ($10.72); $428,800.

Atlanta at Kansas City—55,000 ($12.10); $665,500.

Buffalo at Houston—47,000 ($14.30)—$672,000.

Chicago at San Francisco—61,185 ($15); $917,775.

Cincinnati at Cleveland—80,000 ($12); $960,000.

Dallas at Minnesota—62,000 ($15); $930,000.

Denver at New Orleans—55,000 ($13); $715,000.

Los Angeles at Philadelphia—72,204 ($13); $910,000.

Miami at Green Bay—56,189 ($12.75); $716,409.

Oakland at San Diego—53,000 ($15); $795,000.

St. Louis at Washington—53,000 ($15); $795,000.

Seattle at New England—50,000 ($11); $550,000.

Tampa Bay at Detroit—80,638 ($12.50); $1,007,975.

THE NATIONAL FOOTBALL LEAGUE,
New York, N.Y., September 29, 1982.

Hon. THEODORE F. STEVENS,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR STEVENS: I share your conviction that the public interest demands a fair and prompt settlement of the current NFL player strike. No evident solution is yet in sight, since the NFL Players Association and the NFL Management Council continue to hold sharply differing views of NFL economics—past, present, and future—and of the principles on which a professional football league must operate in order to present high quality and popular public entertainment.

My principal current concern is that any settlement must serve the interests of the NFL's fans and the public, not merely those of the clubs and players. One federal court of appeals emphasized this in approving an NFL labor-management settlement reached in 1977, with the court stating that "professional sports are set up for the enjoyment of the paying customers and not solely for the benefit of the owners or the benefit of the players. Without public support any professional sport would soon become unprofitable to the owners and the participants."

No party to the present dispute should lose sight of the ultimate consumers of the League's product. No settlement should, for example, create inordinate or inevitable pressures for ticket price increases. Between 1970 and 1980, steady increases in NFL television revenues made it possible for the NFL clubs to hold their ticket price increases well below the rate of inflation, so that the real cost of NFL game tickets actually declined in the decade. Stability and balance within the League also made possible a steadily increasing volume of telecasts of NFL games, greater rewards for the players, and the establishment of NFL teams in two additional American cities. It is my hope that these patterns can be repeated in the 1980's. But it will not be possible to do so without a reasonable settlement in collective bargaining.

As for means to resolve the current stalemate, there have been suggestions that the Federal Mediation and Conciliation Service could play a constructive role at this juncture. If the Management Council and the Players Association will consent to mediation under the auspices of the Service, it would, in my judgment, be a significant positive step because the neutrality of the Service could facilitate a resolution of the current dispute. I will be prepared to assist in that effort in any way likely to be useful.

Sincerely,

PETE ROZELLE,
Commissioner.

Mr. STEVENS. Mr. President, in most NFL cities, the stadiums have, in addition, been built with public funds, and the public authorities have a direct economic stake in the revenues generated by attendance at NFL games. So long as there is a strike and those games are not played, these direct and indirect economic benefits to our communities—which mean jobs to many people other than professional football players—will be lost.

Mr. President, in my judgment, we have an obligation to move the parties in this dispute to a prompt settlement. Congress has clearly established a history of promoting the public interest in professional sports. For example, in 1973, we adopted legislation calling for the telecasting of sold-out home games of professional sports teams. We also enacted legislation encouraging the stability of professional sports leagues by confirming, in 1961, the right of professional sport leagues to jointly sell their television rights to the national networks. In 1966, we authorized the consolidation of the American Football League and the National Football League so that football franchises could continue to operate on a stable basis in their resident communities. Thus we have long recognized the public interest in encouraging professional sports, and have affirmatively acted to encourage the financial stability of the leagues.

It is in the interest of fans and communities that we act to prevent further obstruction of professional sports activity. The legislative tack I am proposing we take to address this problem involves establishing an arbitration procedure. Under current law, the Federal Mediation and Conciliation Service can mediate labor-management disputes only upon the consent

of both parties to the dispute. As presently stated, Federal law (title 29 United States Code section 173(c)) apparently does not authorize the Federal Mediation Service to mediate upon the request of only one party to a dispute. My legislation would first require that the parties be returned to their status quo by requiring the players to return to work and then enter into mediation with the owners. If mediation is unsuccessful, then compulsory and binding arbitration would be required.

The total time involved for this procedure would be a maximum of 30 days. The procedure is based on a proposal that had, in the past, popular support of many Members of the Congress in other labor areas, because it does allow every opportunity for collective bargaining to work before resorting to binding arbitration. The bill would apply to the professional sports of football, baseball, basketball, and hockey.

Last year, the Nation experienced the major league baseball strike for a period of some 7 weeks. Now we will have missed 2 weeks of NFL football, and who can say when a solution will be reached?

Mr. President, I regret having to call this to the attention of the Senate, and I regret having to introduce this legislation. I do urge the parties to the current dispute in professional football to resolve their dispute on a fair and reasonable basis through voluntary collective bargaining without the need for congressional or other governmental intervention. The sports fans of America and the public expect no less, but if they receive less, then Congress must and should act.

I ask unanimous consent that the bill I have introduced be printed in the RECORD in full and that it be appropriately referred. If the strike is not settled by the time Congress returns, I shall press for action on this bill.

The PRESIDING OFFICER. Without objection, the bill will be appropriately referred.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3003

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Organized Professional Team Sports Labor Dispute Resolution Act of 1982".

FINAL OFFER ARBITRATION OF LABOR DISPUTES INVOLVING CERTAIN ORGANIZED PROFESSIONAL TEAM SPORTS

SEC. 2. Title II of the Labor Management Relations Act, 1947 (29 U.S.C. 171 et seq.) is amended by adding at the end thereof the following new section:

"FINAL OFFER ARBITRATION OF LABOR DISPUTES INVOLVING CERTAIN ORGANIZED PROFESSIONAL TEAM SPORTS

"SEC. 214. (a) The Congress finds that labor disputes involving certain organized professional team sports interferes with the normal flow of commerce and that such disputes can be avoided or substantially minimized through the establishment of a final offer arbitration procedure to resolve such disputes in accordance with this section.

"(b) This section shall apply only to the organized professional team sports of football, baseball, basketball, and hockey.

"(c)(1) Upon finding that a labor dispute involving an organized professional team sport intereferes with the normal flow of commerce, the President may direct each party involved in such dispute to submit a final offer to the Director of the Federal Mediation and Conciliation Service (hereinafter referred to as the 'Director') within a three-day period. Each party may at the same time submit one alternative final offer. The Director shall transmit the offers to the other parties simultaneously.

"(2) If a party refuses to submit a final offer, the last offer made by such party during previous bargaining shall be deemed that party's final offer.

"(3) Any offer submitted by a party pursuant to this section must constitute a complete collective bargaining agreement and resolve all the issues involved in the dispute.

"(d) The parties shall continue to bargain collectively for a period of five days after they receive the other parties' offers. The Director may act as mediator during the period of the final offer selection proceedings.

"(e)(1) If no settlement has been reached before the end of the period prescribed in subsection (d), the parties may within two days select a three-member panel to act as the final offer arbitrator.

"(2) If the parties are unable to agree on the composition of the panel pursuant to paragraph (1), the President shall appoint the panel.

"(3) No person who has a pecuniary or other interest in any organization of employees or employers or employers' organizations which are involved in the dispute shall be appointed to such panel.

"(f) The panel may engage in an effort to mediate or otherwise settle the dispute.

"(g) Beginning with the direction of the President to submit final offers and until the panel makes its selection of a final offer, there shall be no change, except by agreement of the parties, in the terms and conditions of employment, and no strike, lockout, or similar activity shall take place. In no instance shall such period exceed thirty days.

"(h) The panel shall not compromise or alter the final offer that it selects to resolve the dispute. Selection of a final offer shall be based on the content of the final offer and no consideration shall be given to, nor shall any evidence be received concerning, the collective bargaining in the dispute, including offers of settlement not contained in the final offers.

"(i) The panel shall select the most reasonable of the final offers submitted by the parties and shall state, in writing, the reasons for its selection. The panel may take into account—

"(1) past collective bargaining contracts between the parties, including the bargaining that led up to such contracts;

"(2) comparison of wages, hours, and conditions of employment of the employees involved, with wages, hours, and conditions of employment of other employees doing comparable work, giving consideration to factors peculiar to the industry involved;

"(3) security and tenure of employment;

"(4) the public interest; and

"(5) any other factors normally considered in the determination of wages, hours, and conditions of employment.

"(j) The final offer selected by the panel shall be deemed to represent the contract between the parties, except to the extent that any provision is determined, under procedures prescribed by the Director, to be not in accordance with applicable law.

"(k) The determination of the panel shall be conclusive unless modified pursuant to subsection (j) or found arbitrary of capricious by a district court of the United States having jurisdiction over the parties.".

CURRENT NATIONAL FOOTBALL LEAGUE STRIKE

SEC. 3. Consistent with the purposes of the Labor Management Relations Act, 1947 (29 U.S.C. 141 et seq.) to avoid industrial strike which interfaces with the normal flow of commerce—

(1) the parties to the labor dispute between the employers represented by the National Football League and the employees represented by the National Football League Players Association which existed immediately before the date of enactment of this Act shall take all necessary steps to resume activities; and

(2) the status quo of such parties shall return to that which was in effect prior to 12:01 antimeridian of September 21, 1982 and such status shall remain in effect until the dispute between such parties is resolved pursuant to subsection (b).

(B) The President shall, notwithstanding section 214 of the Labor Management Relations Act, 1947 and within five days of the date of enactment of this Act, direct such parties to submit final offers in accordance with such section.

RECOGNITION OF SENATOR GORTON

The PRESIDING OFFICER. Under the previous order, the Senator from Washington (Mr. GORTON) is recognized for not to exceed 15 minutes.

CORPORATE WARS HARM U.S. ECONOMY

Mr. GORTON. Mr. President, much of America watched, as I did, the latest saga of the corporate wars. Indeed, it was difficult to miss since the entire struggle between the Bendix Corp. and Martin-Marietta was prominently reported on a daily basis by the press and television. The event was treated as drama. A leading news magazine aptly headlined its story, "Merger Theater of the Absurd."

Following in this vein, I feel compelled to add my review to the others that have appeared recently. Most of the public attention that was paid to this latest battle of the corporate wars has been devoted to the strategy and tactics of takeovers. Surely much more of national interest is involved in merger wars than who wins, who loses, and how they did it. Indeed, if I did not believe that much more of national significance was involved here, I would not be addressing the Senate on this subject today.

The media, in reporting the Bendix-Martin-Marietta struggle often treated it as a soap opera: A struggle between corporate titans involving billions of dollars, the clash of personalities, stunning victories followed by equally stunning reversals, unexpected alliances that quickly fell apart, and even a romantic interest. It was almost as if we should not take this struggle any more seriously than we do daytime TV.

The colorful argot that has evolved to describe the tactics of corporate takeovers—white and gray knights, bear hugs, crown jewels, golden parachutes, the Pac-Man strategy—suggests that corporate wars and star wars are of equal importance. They are not, and we are making a grave mistake if we do not take the merger wars and the merger movement seriously. While on the surface the Bendix-Martin-Marietta struggle appears to contain all the elements of a comic opera, a close inspection reveals the elements of tragedy fully deserving of a serious review. A serious review goes beyond a description of the performers' behavior—to an exploration of the reasons for that behavior. When we do this for the latest example of corporate wars, we discover a serious national problem.

Consider first the absurd results of Allied's takeover of Bendix, and of Martin-Marietta, thereby maintaining its independence. A basic premise underlying a competitive economy is that both parties should gain from a trade. The economic basis for a corporate merger is that the assets of the acquired firm will be more efficiently used by the new owner, so that the successor will be more productive and profitable than it had previously been. The buying firm can therefore offer the seller more than the firm was previously worth, but still less than the assets will be worth when more productively employed. The theoretical basis for a profitable trade thus exists where both the buyer and seller benefit.

Yet, this did not happen in the Allied-Bendix-Martin-Marietta struggle. On Monday, September 27, after the dust had finally cleared and the stocks of the three companies were opened for trading, the share price of two of the firms, Allied and Martin-Marietta, the declared winners, actually fell. Allied, which acquired Bendix, had its stock price fall by almost 8 percent, and the price per share for Martin-Marietta, the independence of what was retained, plummeted almost 20 percent.

This decline in the share prices reflected the financial wreckage left in the wake of the Allied-Bendix-Martin-Marietta struggle. Martin-Marietta finds itself with $900 million in new debt used to repurchase its own stock for substantially more than it is worth today. In order to reduce this debt the company is considering selling some of its assets. Standard and Poor's has placed Martin-Marietta on its credit watch list along with Bendix and even Allied. Allied's purchase of Bendix caused its debt to capital ratio to rise from 23 percent to 43 percent—a level which endangers its credit rating and continued access to financing. Allied is also reported to be thinking of selling some assets to reduce the giant debt it has acquired. Where a month ago three relatively strong companies stood, now two financially weakened concerns remain.

Clearly something is wrong here: except for the shareholders of Bendix, and those of Martin-Marietta who had sold out earlier, the stockholders were made worse off, not better off, by this corporate merger. Furthermore, had Bendix prevailed in its management's strategy I suspect that its shareholders would also have been rewarded with lower share prices.

This is not a unique result. Research into the behavior of stock prices after mergers shows that while the stock price of the acquiring firm often rises a little bit, it frequently falls instead. The only clear winners in corporate takeovers are the owners of the firm that is sold. If the owners of the buying firm do not always benefit, why are there so many mergers?

Perhaps the answer to this question lies with an investigation into the question of who are the clear winners in merger wars. Clear winners in the Allied, Bendix, Martin-Marietta conflict were the investment banks, and legal firms, whose questionable advice reportedly will earn $20 million, and the executives at both Bendix and Martin-Marietta who were voted "golden parachutes" by their respective boards of directors.

A "golden parachute" is a guaranteed employment contract for an executive in the event the company they work for falls victim to a hostile takeover. It is a kind of executive incompetence insurance. Martin-Marietta's directors passed out 28 of these security blankets soon after Bendix made its initial offer. This was a reward for managing a company in which three of its five divisions are losing money and which stock has fallen from $72 a share 2 years ago to $22. It was the free fall of the share price, after all, that made Martin-Marietta vulnerable to a takeover.

Bendix, the management of which was restructuring the company, did not allow its executives "golden parachutes" until it appeared that Martin-Marietta had turned the tables on them and might actually acquire Bendix. Then Bendix passed out 16 no cut contracts worth $15.7 million. The biggest contract went to the chief executive officer who received a guarantee of $805,000 a year for the next 5 years.

Clearly something is wrong when the management principals can protect themselves in this way during a merger war. The press has often painted these same corporate executives as big risk takers in the tradition of Horatio Alger. Yet it does not take much of a hero to start a takeover battle when the winner gets to manage a multibillion-dollar business and the loser rides a golden parachute into a $4 million safety net.

No wonder millions of Americans have decided that the stock market is not for them. The whole Bendix-Martin-Marietta fiasco demonstrates that shareholders generally do not control the companies they own. Nor can they necessarily trust either the board of directors or the executive management to act in the owners' best interest.

One of the salutary effects of mergers is said to be that they promote good management: A hostile takeover need be feared only if another company's leaders believe that they can manage the assets more productively and more profitably. An efficiently managed company need not fear a hostile takeover. But according to recent reports 15 percent of our largest companies have provided golden parachutes for some of their executives. Certainly the golden parachute phenomenon substantially reduces any such positive motivational effect since even if their jobs cannot be protected their compensation will be.

I do not at this point wish to propose a solution, but I do wish to recommend to my colleagues that we should explore the legal relationships between the shareholder, who is the owner and ultimate risktaker, and the corporate management which should work for the owners, to see if a means can be found to make their interests better coincide. This problem of separation of ownership and control of the corporation did not, of course, originate with our current merger wars; it has existed for as long as we have had corporations. The recent Bendix-Martin-Marietta comedy illustrates, however, that it remains a serious problem.

As important as is this split between the interests of the managers and that of the owners, it is not the most important problem revealed by the Bendix-Martin-Marietta battle. Even more important is the answer to the question of why Bendix tried to do what it did. Why did Bendix believe that it was in its interest to purchase a high-tech company rather than to create one? After all, the economy clearly gains less from a game of corporate musical chairs than it would from the new investment and new jobs that would flow from expansion.

Not only did the managements of Allied and Bendix attempt to expand by merger rather than internal growth, they did so relying heavily on borrowed funds. It is reported that Bendix arranged a billion dollar line of credit to finance its offer for Martin-Marietta. Martin-Marietta fought back by borrowing $843 million. Finally Allied's $1.9 billion purchase of Bendix was partly financed by borrowed funds.

During the month-long struggle, literally billions of dollars were tied up which could not be used to finance expansion elsewhere. The cost to the economy of this merger is not confined to the damage done to the companies involved, but must include the benefits that were lost because this capital was not profitably employed elsewhere.

I agree with the frustrated industrialist quoted in the Wall Street Journal:

> Maybe there's something wrong with our system when those four companies line up large amounts of money in order to purchase stock, when it doesn't help build one new factory, buy one more piece of equipment, or provide even one more job.

I would only add that they were lining up to pay inflated prices for that stock, much more, as we have seen, than the ordinary investor was willing to pay.

There is clearly something amiss in an economy when corporate assets look more attractive to other corporations than to ordinary investors, and more attractive than internal expansion. It is not sufficient to try to explain all the mega-mergers which have occurred over the last 5 years by: Incompetent management, as we perhaps could in the case of the Bendix-Martin-Marietta fiasco. There have simply been too many. Rather, we should look at the woeful state of our general economy. It would be no surprise that mergers would be preferred to internal expansion during a recession when the economy has excess capacity. But our current merger movement has been going on for sometime now, during good times as well as bad.

There is a new development which probably helps explain the most recent surge in merger activity. The administration's chief antitrust officials have made numerous public statements indicating that they take a significantly narrower view of antitrust laws as applied to mergers than have previous Republican and Democratic administrations. These signals that bigness is not badness, and that the Federal enforcement approach will immediately reflect this new philosophy, have been received on Wall Street. It is the clear perception of the business community that some types of mergers which would have been prohibited in the past are now worth a try.

The major reasons, however, for the current merger movement and the motive for Bendix's aggressive behavior, as well as that of Occidental, American General, R. H. Reynolds, and others which have been involved recently in billion dollar mergers, lie in inflation and the accompanying stagnation which has afflicted our national economy for over a decade. Not only has inflation discouraged personal savings and reduced the supply of capital, it has redirected what capital was available to the purchase of high-interest-paying fixed securities rather than to the equity market. The price of corporate assets, as a result, have fallen to bargain basement levels. The urge to merge is a symptom of an ailing economy. When we restore the economic health of our Nation, as we are pledged to do, I believe the merger wave may well subside significantly through natural forces.

But can we afford to wait? Our country's industrial assets are becoming increasingly concentrated in the hands of a few giant corporations. Three decades ago less than half of our country's industrial assets were in the hands of the largest 200 corporations, today it is closer to two-thirds. Mergers clearly have been an important contributor to this increased concentration. It becomes extremely difficult to deconcentrate an already concentrated industrial structure.

I would submit that increased concentration and giant size that is brought about in response to and abnormal economy will prove to be contrary to the interests of our Nation. It is quite possible that when we have finally succeeded in returning the economy to prosperity, that we will possess an industrial structure that is well suited to survive inflation but ill-suited to function efficiently in a dynamic expanding economy.

If this possibility exists then we should at the very least be exploring ways of keeping this from happening. I will make some general suggestions along these lines. I offer them not as the ultimate solutions to this problem, but as preliminary ideas which I hope will foster open discussion in the Senate. I hope that such focus will lead to enactment of some reasonable type of corrective measure early in the 98th Congress. Reducing the attractiveness of mergers is obviously one way of attacking the problem. Corporate mergers are currently attractive because the stock market responding to an inflationary economy has placed an artifically low value on corporate assets. As a consequence, it is less expensive to buy corporate assets through mergers than to expand internally. The obvious solution is to raise the cost to a firm of acquiring another firms's assets.

One way to do this is through changes in the tax laws. One suggestion might be to remove the deductibility of interest on money borrowed specifically to acquire the assets of another firm. This would accomplish two desirable results: It would probably sharply reduce the number of mergers and at the same time free credit for more productive purposes. Those externally financed mergers that still occur would no longer be partially subsidized by the taxpayer as they are now. The tax deductibility of interest payments is a Government-granted benefit. If it encourages behavior that is not in the country's best interest, it should be repealed.

Another approach would be to establish a merger tax. Many mergers are financed by retained earnings, which if distributed to stockholders, would be subject to tax. In that sense the general taxpayer also subsidizes mergers. By subjecting all retained earnings used to acquire other companies to a minimum merger tax would eliminate this implicit subsidy.

Clearly, the adoption of these two tax measures would reduce the number of mergers, especially those with only marginal benefits. Yet mergers would not be prohibited. Any two firms willing to exchange stock or willing to pay the taxes could still merge. It might also be wise to tie the tax to the economic situation, allowing the taxes to disappear when prosperity and growth return.

In closing, let me say that like millions of my fellow citizens I was at first amused by the Bendix-Martin-Marietta struggle. This amusement soon turned to irritation when the "golden parachutes" were unfurled. Now I am disgusted by the clear disregard that boards of directors and the managements of all the firms involved have shown for the stockholders they represent and the Nation in which they live.

Above all, I am alarmed by the possibility that if the merger movement is allowed to continue unimpeded the result will be a highly concentrated industrial structure totally unsuited for the dynamic rapidly developing economy we in Congress are attempting to create.

Mr. METZENBAUM. Mr. President, will the Senator from Oregon yield?

Mr. GORTON. The Senator from Oregon is not here, but the Senator from Washington is.

The PRESIDING OFFICER (Mr. MATTINGLY). The time of the Senator from Washington has expired.

Mr. METZENBAUM. I apologize to the Senator from Washington. I should know better.

Mr. President, the time having expired, I yield myself time from the minority leader's time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I commend the very statesmanlike and erudite comments of the Senator from Washington. He has addressed himself to a very challenging problem that exists in this country at the present time. He has talked about not only the subject of mergers but also the odious practice of the "golden parachutes." It is a subject that I believe Congress has a responsibility to deal with.

I am not certain that in the closing days of the session we will have the opportunity to do that, but I do believe it should be a priority matter in the coming session.

I am pleased to see that the Senator from Washington has again taken a very forthright and courageous position on a subject that I believe is important to the American economy and the entire free enterprise system, as well as to those who trade in the marketplace.

I reserve the remainder of my time.

RECOGNITION OF SENATOR ABDNOR

The PRESIDING OFFICER. Under the previous order the Senator from South Dakota (Mr. ABDNOR) is recognized for not to exceed 15 minutes.

FARMERS—THE INFLATION FIGHTERS

Mr. ABDNOR. Mr. President, the inflation rate over the past 6 months, as measured by the Consumer Price Index (CPI), has been a remarkable 5.8 percent. President Reagan is justifiably proud of this accomplishment and deserves all the accolades being showered upon him. But who is really beating inflation? The farmer is. It is time the President and this Congress began handing out a few well-deserved bouquets to those in the economic trenches—or furrow, if you will.

Like all Americans, I was encouraged by the August CPI report which showed prices advancing only 0.3 percent over July levels. As a farmer in the Senate who represents the most rural State in the Nation, I had mixed emotions in noting that food and beverage prices actually declined between July and August by 0.3 percent. I looked a little deeper into the CPI report and found that the "food and beverages" category consists of three major subgroups, "food consumed at home," "food consumed away from home"—I am assuming this refers to restaurants, not picnics—and "alcoholic beverages."

As mentioned, prices for all three subgroups combined went down 0.3 percent. However, taking the subgroups separately presents a very different picture: prices associated with "food away from home," and "alcoholic beverages"each increased by 0.5 percent. "Food consumed at home"—the closest the average consumer gets to the farm gate—declined by 0.6 percent. Given the relatively high importance of food consumed at home versus the other two subgroups, there was a net decline in "food and beverage" prices of 0.3 percent. All other major expenditure categories went up in August: "transportation" went up 0.3 percent, "housing, apparel and upkeep," "entertainment," and "other goods and services," all advanced 0.4 percent and "medical care" prices, as usual, outpriced all other items showing an increase of 0.9 percent. It is interesting to note that the price decline in August for "food consumed at home" was almost enough by itself to compensate consumers for price increases in "apparel and upkeep," "entertainment," and "medical care," combined.

Also, had "food at home," prices been unchanged in August, the headlines would have read "August CPI advance 0.4 percent" rather than 0.3 percent. I am not sure what that 0.1 percent difference in August would mean to our annual inflation rate, but it certainly would have taken some of the glow off Secretary Regan's face.

So much for the month of August. What has the farmer's contribution been over the mid-term as a whole . . . say the last 6 months? As mentioned above, the inflation rate during the last 6 months has been 5.8 percent. During the past 6 months the prices of foods consumed at home went up only 0.8 percent. Had food prices gone up the same average percentage as all other prices in the CPI the increase in the index would have been 6.4 percent rather than 5.8. Americans on the average spend $31.3 billion per month on food and beverages, 65 percent of which is spent on food consumed at home, or $20.2 billion per month. The difference between a food price increase of 0.8 percent versus 6.4 is over $1.1 billion per month. Therefore, over the last 6 months, because of his tremendous contribution to reducing inflation, the U.S. farmer has provided the American consumer $7 billion of disposable income with which to purchase non-food goods and services.

And over the longer term? During 6 out of the last 8 years food and beverage prices have advanced at a slower pace than the Consumer Price Index.

Farmers, perhaps more so than any other business enterprise in our economy, have the most to gain from reduced inflation. Farmers are price-takers for both their purchased inputs and product sales. Farmers' incomes are not indexed to any cost-of-living adjustment and the highly competitive market in which he sells his product prevents the farmer from simply passing on production cost increases.

Inflation is therefore a direct out-of-pocket cost to the farmer. Fortunately, farm input prices have been stable during the current period of stable food prices. In contrast, during the last 2 years, 1980 and 1981, while prices received by farmers increased only 4.5 percent, the prices paid by farmers went up a staggering 21.9 percent.

Prices received by farmers would have to increase 8.6 percent in 1982 and prices paid by farmers would have to remain unchanged if farmers are going to catch up with the last 2 years of production cost increases. As the farm value of food represents only 35 percent of retail value, an 8.6-percent increase in prices received by farmers would yield an increase in retail food costs of only 3 percent.

In a particularly good year for agriculture, 1974, the ratio of prices received by farmers to prices paid by farmers stood at 130 percent. To obtain that level again prices received by farmers would have to go up 41 percent above 1981 levels with no change in production costs. Retail food costs would advance 14.4 percent. Of course, this 130-percent ratio could also be attained without an increase in retail food prices if farm production costs were to decline by about 30 percent in 1982.

Yet a third possibility would involve an 8-percent increase in retail food prices in combination with a 13-percent reduction in farm production costs.

In any event, in simplistic terms, these various scenarios give a perspective on the requirements and prospects of agriculture's economic recovery. Clearly, if our national goal is to keep food price inflation down—and it certainly appears to be—it is absolutely critical to the future economic viability of American agriculture that a concerted, comprehensive national effort be initiated to reduce the farmer's cost of producing food. Said another way, a zero rate of inflation reflecting no price changes for either food or farm inputs would only maintain farm economics at its currently very depressed state.

That just is not good enough.

I strongly suggest we begin to give credit where credit is due. With all due respect to President Reagan, Chairman Volcker, Secretary Regan, and this Congress: Who is whipping inflation?

The American farmer—that is who.

And I am not going to let my colleagues forget it.

NEW ENGLAND GOVERNORS' CONFERENCE SUPPORTS WATER POLICY BILL

Mr. ABDNOR. Mr. President, recently I received a copy of a letter which Governor Brennan of Maine sent to the Speaker of the House on behalf of the New England Governors'

Conference. This letter is in strong support of H.R. 3432.

Similar legislation—S. 1095—is pending on the Senate Calendar. Because of the significance of the views of the New England States on this important issue, I ask unanimous consent that the letter from Governor Brennan be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NEW ENGLAND GOVERNORS' CONFERENCE, INC.,
Boston, Mass., September 14, 1982.

Hon. Thomas P. O'Neill,
Rayburn House Office Building, Washington, D.C.

DEAR REPRESENTATIVE O'NEILL: The purpose of this letter is to ask your support for H.R. 3432, which was recently reported out of the Rules Committee. H.R. 3432 combines the "Water Resources Research Act of 1982" and the "Water Resources Policy Act of 1982" and would provide matching funds for water resources and for the support of state water and related land resources planning and management programs.

Prior to the recent federal budget cuts, the State of Maine benefitted from financial assistance provided by the Water Resources Planning Act of 1965. These funds supported not only basic water-related research conducted at the University of Maine, but also the development of a state ground water protection program, a rivers conservation effort, and a statewide policy on hydropower.

My fellow New England Governors have advised me that this federal assistance made possible similar achievements in their own states and was especially helpful in enhancing the ability of state agencies in the southern half of our region to deal with the recent drought they experienced.

The New England Governors are convinced that a continuing, coordinated program of water resources planning, management, and research is of the upmost importance not only to our citizens, but to the entire Nation. Your support of H.R. 3432 will help ensure that these programs, which have been so successful in the past, continue.

Very truly yours,
JOSEPH E. BRENNAN,
Governor of Maine, Chairman.

S. 1692—NEW OPPORTUNITIES FOR COAL

Mr. ABDNOR. Mr. President, my colleagues know of my great interest in the passage of legislation that would hasten the development of deeper harbors for our Nation. S. 1692 would accomplish this goal. That bill is presently on the Senate calendar. It has been ready for floor action since the end of last year.

Recently, the Heritage Foundation prepared a most interesting briefing paper entitled "New Opportunities for Coal." One of the conclusions of the paper:

The renovation of U.S. ports and harbors can be accomplished without spending a single federal dollar. Private sources of funds, within the U.S. and abroad, have already indicated a willingness to invest in such projects.

I agree. More significantly, such improvements can be achieved in a more rapid, more effective manner once the Federal role in new construction ends.

Because of the importance of the views expressed in this Heritage Foundation article, I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Backgrounder, June 16, 1982]

NEW OPPORTUNITIES FOR COAL

(By Milton R. Copulos)

INTRODUCTION

After fueling the early stages of the Industrial Revolution in the United States, the U.S. coal industry entered a prolonged period of decline. Following the Second World War, competition from cheaper oil and natural gas, widespread labor strife and growing concern over the environment combined to curtail sharply demand for America's most abundant resource. With the surge in world oil prices that began in the 1970s, though, "King Coal" gained a new lease on life. As a result, coal now promises to become one of America's most important export commodities.

Estimates compiled for the House Merchant Marine and Fisheries Committee show that the United States could increase its share of the coal export market from its present 18 percent to as much as 38 percent by the end of the century. If realized, the increased foreign currency earnings from the new coal trade could add $14 billion annually to the U.S. payments balance. Thousands of new jobs would be created. Most important, perhaps, the ability of the oil producing nations to disrupt the world's economy would be substantially diminished.

To accomplish this, America must take steps to ensure that its ports, railroads and loading facilities can accommodate vastly increased volumes of coal.

The need to do so is urgent. Although the United States' 1.7 trillion tons of recoverable coal reserves accounts for 30 percent of the world total, other nations too are in a position to be major coal exporters. Australia, South Africa, and Canada already provide stiff competition for U.S. firms. Colombia, China, Poland and even the U.S.S.R. are moving aggressively to market their coal. Given such alternate sources, there is no guarantee that the world will turn to the U.S. for coal in the coming decades.

Yet, U.S. coal companies enjoy one critical advantage: they are seen as a secure source of supply. It is this view which allows these firms to charge the $4 to $6 premium that U.S. coal currently commands. Should the price of American coal rise too far above its competitors, however, it may find its market fading. This makes the question of port modernization critical to the coal trade's future. Failure to act now could result in American coal costing as much as 40 percent more than its competitors. If this occurs, it is virtually certain that customers will turn to other sources.

Ports play a critical role because transportation charges account for the lion's share of what a customer pays for a delivered ton of coal. Anything affecting these charges thus has an enormous impact on marketability. In the case of coal, which reaches foreign markets by ship, the advent of the "Super-Collier" has sparked a revolution in coal transportation.

Super-Colliers are huge vessels averaging 150,000 dead weight tons (dwt) and requiring harbor depths of up to 55 feet. While these mammoth carriers comprise only about 7 percent of the world coal fleet, they are expected to account for 25 percent by 1985 and 44 percent by 1990. The trouble is, no coal port in the United States can load a vessel of this size; only one, Hampton Roads, Virginia, can even accommodate ships of up to 100,000 dwt.

By contrast, eighteen ports worldwide have the harbor depths of 55 feet or greater to handle the Super-Colliers; there are twenty-four ports with harbor depths of between 45 and 55 feet that can handle ships of up to 100,000 dwt. There are plans, moreover, to deepen several more ports outside the U.S. to allow them to serve these huge ships. Since many of these deep ports are located in countries that compete with the United States for the coal trade, it is clear that they will gain a major cost advantage over the U.S. unless American harbor facilities are upgraded.

The responsibility for dredging U.S. ports and harbors has traditionally rested with the federal government. Federal funds have financed port construction and the Army Corps of Engineers has done the work. The lead-time for such projects, however, can be up to twenty-one years—far too long to allow the U.S. to take advantage of the current opportunity to participate in the rapid expansion of the international coal market. Yet the private sector stands ready to step into the breach and take on the responsibility for making the port improvements. More important, the task can be accomplished without creating new, massive federal subsidies or imposing complicated regulatory regimens.

The renovation of U.S ports and harbors can be accomplished without spending a single federal dollar. Private sources of funds, within the U.S. and abroad, have already indicated a willingness to invest in such projects. In fact, Japan is currently involved in providing funds to renovate the port of Long Beach, California. Private capital in Germany and France has also expressed interest in financing port construction.

No new regulations are needed for such projects. Indeed, rather than new regulations, relief from old ones is needed, for regulatory impediments, such as those that create the twenty-one-year lead-times, constitute the single biggest obstacle to improving U.S. ports. What is needed most from government, therefore, is to get out of the way.

The only thing the federal government should do to encourage foreign capital to help pay for U.S. port renovations is to send a clear signal abroad that America is serious about expanding U.S. coal trade. Washington must also signal that it supports private initiatives to improve the coal transportation system. This signal is needed because, under the Carter Administration, support for coal exports was ambivalent—at best. Although there had been much rhetoric, little was done to make such trade possible, and a great deal was done to make it more difficult. What is needed now is to indicate clearly the renewed national commitment to coal exports and the federal sanction of private efforts toward that end. With these actions, foreign doubts would be dispelled, and America's role in the world coal market.

A program to revitalize American coal transport would include:

Coal Export Zones—Areas designed to take advantage of recent initiatives to streamline the regulatory process for port dredging.

Coal Export Investment Companies—Joint ventures, licensed by ports, to act as magnets for foreign capital and project managers for port renovations.

National Coal Exchange—A private clearinghouse for coal exports that would establish specifications for blends of coal, which would be mixed at the ports, and act as a mechanism to create a commodity market for coal similar to those that exist for other commodities. Its long-term goal would be to help standardize coal grades and establish a stable mechanism for ensuring long-term sources of supply.

Each element of this program is aimed at a particular part of the larger problem of encouraging U.S. coal exports. More important, each uses the private sector or local authorities rather than the federal government. Control of the port renovations would rest primarily with the ports themselves. Financing would come exclusively from private sources. The commodities exchange would also be an exclusively private enterprise. In this way, the three elements of this program would advance the Reagan Administration's goals of fostering a New Federalism and privatizing the energy market.

A PRESSING NEED FOR THE PROGRAM

In its review of the procedures employed in authorizing the maintenance and dredging of U.S. ports, Congress found that "The principal causes of regulatory delay . . . are the absence of any rational management approach to the conduct of system wide maintenance and the lack of interagency coordination . . ." (House Report 97-454). In short, there were too many fingers in the pie. To correct this, procedural reforms have been approved, including an "expedited authorization process or 'fast track' for certain deep-draft navigation improvements." The aim of these initiatives is to reduce the lead-time for port dredging from the present twenty-one years to around two and one-half years. The thrust of these reforms, the House Merchant Marine Committee said, is to "restore the traditional primacy of the state [governments] . . ." in port construction.

Accomplishing the necessary port renovations will take more than procedural reform; it will take a great deal of money. Outlays for single dredging project can easily run as high as half a billion dollars. It has been estimated that as many as ten deep-draft parts may ultimately be needed to accommodate the expanded U.S. coal trade. Other necessary improvements—such as the addition of loading facilities, storage yards and special blending areas—could cost twice again as much. In a time of budgetary constraint, the $15 billion expenditure that upgrading U.S. ports would entail most certainly would encounter strong opposition in the Congress. Only private sector alternatives, therefore, hold real hope of addressing this problem in a timely fashion.

Financing the necessary U.S. rail system improvements presents a similar problem. Although the federally controlled portions of the rail system, such as Amtrak, receive a subsidy, they represent only a small segment of the overall network. As such, the $10 to $12 billion needed to upgrade the non-federal sections of track must come from private sources.

Given the fact that $25 to $27 billion is likely to be needed over the long run to make America competitive in the international coal trade and that public funds are unavailable (but should not be) for this purpose, it is clear that private sector alternatives are needed. Coal Export Zones represent one approach to providing such alternatives.

COAL EXPORT ZONES

Coal Export Zones are designed to provide a mechanism whereby local port authorities can take advantage of the "fast track" procedural reforms approved in congressional committee. They would provide the infrastructure to facilitate the approval process, and would be a local licensing agency for Coal Export Investment Companies and Coal Exchanges. The Coal Export Zones would not, however, have any regulatory authority, so that the procedural reforms to expedite the port renovation approval process would not be undercut by regulations promulgated at the local level.

To establish a Coal Export Zone, the local port authority would select a board of governors of three to five members and apply to the Secretary of Commerce for designation as a Coal Export Zone. Approval would be automatic and would qualify the port to use the "fast track" procedures for dredging and maintenance. It would also allow the port to license Coal Exchanges and Coal Export Investment Companies. The port would also be allowed to use existing authority to issue Industrial Development Bonds in connection with such projects.

The designation would not be limited to specific ports or to any specific number of ports. This will allow as many port renovations as the market will support, eliminating the competition for the federal dollars that currently finance such projects.

COAL EXPORT INVESTMENT COMPANIES

Coal Export Investment Companies would be joint ventures that could be licensed by any U.S. port authority or combination of port authorities. Partners in the joint venture could include: (1) mining companies, (2) railroads, (3) barge lines, and (4) coal buyers, including foreign governments or corporations. Their purpose would be to invest in projects that would improve the physical infrastructure and marketing system for coal exports. These projects could include: (1) port and waterway improvements, (2) portside facilities and (3) coal preparation facilities such as blending stations and washing terminals. The Coal Export Investment Companies also would be allowed to invest in upgrading the "upriver" elements of the coal export transportation system such as railroad track and loading facilities.

The Coal Export Investment Company is intended to act as the "magnet" for foreign capital. It would give foreign investors an opportunity to participate not only in the financing of port renovations, but in the actual projects themselves. This would serve to reinforce foreign commitment to using U.S. coal in two ways. First, overseas interests would have an opportunity to own a portion of the terminal's loading facilities and other privately held operations at the port itself and would expect a profit from their use. Second, since their investment would be repaid through assessment of user fees, it would be in their interest to ensure that coal moves through the port.

Coal Export Investment Companies also would receive a congressional "charter." Although the charter would carry no special privileges, it would provide a governmental sanction for such ventures. Since most overseas purchasers of U.S. coal operate through governmental entities, they would place considerable credence in the legitimizing effect such sanctions would have. Therefore, this sanction is an important, albeit largely symbolic, stamp of approval.

COAL EXCHANGES

A basic flaw in the present system of marketing U.S. coal is that some ten thousand different grades are being sold. This situation is an anachronism dating from the time when coal boilers were far less sophisticated than they are today and when much of the coal produced was used relatively close to where it was mined. As a result, many large industrial and utility boilers actually are designed to burn coal from a specific mine. As the market for coal expands though, it is clear that the lack of standardization introduces a substantial and unnecessary inefficiency into the utilization of this fuel.

Coal Exchanges would permit a gradual process of standardization of coal. Instead of specifying a particular mine, a coal customer would instead specify a set of desired characteristics. Various types of coal could be analyzed to determine what combination would produce the desired effect, and they could be blended at the port before loading. Once a blend was established, it could then be listed on the exchange with a designation tying it to a particular blending station—say New Orleans #5. If another customer at a different port wanted to purchase coal with similar characteristics, it would be necessary only to blend the coals available in that region to achieve the mix of New Orleans #5. Over the long run, as boilers became more standardized and were designed for blends rather than for the coal from a specific mine, the number of grades would be sharply reduced, bringing down the cost.

An exchange also would allow customers to seek the lowest price. If a mine were underutilized and willing to discount its product, it could be used in a blend. As such, a potential buyer could make minor adjustments in the mix to take advantage of the discounted coal and offer the ultimate user a lower price.

The standardization of coal and use of blends also could help to utilize more fully America's coal resources. For example, coal from Wyoming's Powder River Basin has a very low sulfur content but has a low heat content as well. As a result, it is unsuitable in some applications. Conversely, coal from Ohio has a high heat content, but also has a high sulfur content. Blending these two could result in a coal with relatively high heat content and lower sulfur content. Other specialized blends could help use coal more efficiently. The key, however, is that a desired set of characteristics (say high heat content and low sulfur content) could be achieved through blending without linking a buyer to a particular mine.

CONCLUSION

Expanding U.S. coal exports is an opportunity for a private sector initiative. The port and harbor renovations and improvements to the rail transport system could be accomplished more efficiently by private firms than by the federal government. Since substantial foreign capital probably would be willing to underwrite these projects, moreover, the expansion could take place without adding to the federal deficit or to the tax burden on the public.

From the viewpoint of foreign investors, the projects should be very attractive. By being full participants in the port and the harbor renovations, they could profit from the actual construction and from the fi-

nancing. More important, they would be taking a crucial step toward assuring themselves a secure energy supply at a time when they are tempted to increase their dependence on the Soviet Union for energy.

For the Reagan Administration, the three-point program of Coal Export Zones, Coal Export Investment Companies and a Coal Exchange presents an opportunity to take a concrete step to implement its goals of privatizing the energy market and implementing the New Federalism. It could do this without adding new pressures on the budget.

According to the Draft Report of the Inter-Agency Coal Working Group, the U.S. could be exporting from 475 to 565 million tons of coal by the year 2000. To achieve this ambitious goal, the nation must have the port facilities and rail system these volumes will require. Should the U.S. fail to move now to put them in place, it may lose a golden opportunity.

Mr. ABDNOR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Will the Senator withhold?

RECOGNITION OF SENATOR PRYOR

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas (Mr. PRYOR) is now recognized for not to exceed 15 minutes.

S. 3001—OPERATIONAL TESTING AND EVALUATION ACT OF 1982

Mr. PRYOR. Mr. President, today I am introducing legislation to create within the Department of Defense an independent Office of Operational Testing. The office will be responsible for monitoring and passing independent judgment on new weapons long before they reach production and get to our soldiers. It will provide to the Pentagon, to the Congress, and most importantly, to the American people new guarantees that expensive, sophisticated weapons will not be sent to the battlefield prematurely.

Operational tests, designed to evaluate a weapon's capabilities under realistic and demanding battlefield conditions, are a sham when weapons are pampered and coaxed through the testing process by their own developers. We have seen ample evidence of unrealistic tests conducted by the Pentagon's research arm. We have also witnessed many examples of weapons pushed into production before they are ready. The General Accounting Office and numerous respected defense critics have called attention again and again to weapons failures which could have been detected and corrected through more thorough, unbiased operational tests. This area, defense critics insist, is the most sadly neglected and critical part of the weapons procurement process.

In our rush to secure the latest, most sophisticated weaponry, we are sending guns, tanks, ships, and other essentials to troops in the field before we know the weapons will work in battlefield conditions. The losers are the troops expected to defend their lives with undependable weapons, and the American taxpayers who must foot the bill for production of billion-dollar weapons systems that do not work.

The Pentagon has created an unavoidable conflict of interest by making researchers, developers, and defense contractors also responsible for operational tests of new weapons systems. The same industry responsible for pushing weapons into production also plays a role in passing judgment on the weapon's performance.

I could cite many examples, dating back to World War II, of weapons flops which could have been avoided through more thorough and demanding operational testing. These tests are one of the public's few protections against exorbitant investments in weapons systems which fail.

The M16 rifles issued to soldiers during the Vietnam war were perhaps the best publicized weapons disaster.

Men wrote home to their families of moments of horror on the battlefield when the weapons they depended on for protection failed to fire and jammed during the heat of attack. The weapons were considered so useless that Vietcong soldiers refused to pick up abandoned rifles on the battlefield.

Congressional inquiries after the war established without question that M16 rifles has been issued to frontline soldiers before they were thoroughly tested outside the laboratory.

Likewise, the M1 tank has been criticized extensively. In an April 1982 issue of Reason magazine entitled "We Pay for Duds: How the Pentagon Cheats on Weapons Testing," Dina Rasor carefully examined the limitations of the M1 tank and weapons testing generally.

Furthermore, the General Accounting Office reported on June 25, 1982, that the testing of the Maverick missile had not been conducted in such a way that we could be assured that the missile was suitable for effective use in combat.

Russell Murray, the former Assistant Secretary of DOD, presented an excellent summary of the situation during testimony at Senate Governmental Affairs Committee hearings last October.

Also, in the July 24, 1982 issue of National Journal entitled "Billion-Dollar Failures May Slip Through the Pentagon Weapons Testing Net," Michael Gordon has carefully analyzed this issue.

Only last week, there were new revelations of M-1 tank problems. I ask unanimous consent that certain news articles on this subject be placed in the RECORD following the printing of the text of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

Mr. PRYOR. Let me illustrate how the integrity of operational tests can be compromised:

First. Overly qualified crews and operators used during tests of new weapons. The General Accounting Office says this practice calls into question the "performance, maintainability and readiness of the system in a realistic operational environment."

Second. Combining low operational test scores with much higher developmental test results. Tests done under ideal conditions combined with operational tests pull up low battlefield scores. GAO has condemned the practice on several occasions.

Third. Discounting unfavorable test results. GAO charged that Army did this during testing of the M1, raising questions about the tank's reliability in the hands of soldiers.

Fourth. Incomplete reporting of test data to Congress. The GAO in a 1980 report complained that Defense was not giving Congress adequate data to aid in decisionmaking about major weapons systems. They said reports to Congress contained misleading or incomplete data in numerous instances.

A blue ribbon panel appointed by President Nixon concluded 12 years ago what defense critics have been saying ever since—that operational testing needs to be removed from the "researchers" and "developers" in the Pentagon and put into the hands of independent testers totally removed from the politics of weapons procurement.

That was 12 years ago, Mr. President.

The panel found that too much attention is devoted to developmental testing, conducted by scientists under highly controlled conditions, while too little time and money is set aside for operational tests. Operational tests are conducted out in the field by actual servicemen under conditions simulating wartime conditions as closely as possible.

This panel recommended establishment of an operational testing and evaluation group, with civilian leadership, within the office of the Secretary of Defense.

It urged allocation of a substantial budget for operational testing, which would be administered through the independent office. It also recommended that services be required to budget separately for operational testing, rather than including the estimated costs of tests in the total budget for a new weapons system. Finally, it called for more joint testing of weapons systems, a move which individual services have consistently resisted.

The report cited three major reasons for the recurrent problems we have

seen in testing conducted by the services with little direction from above. First, operational testing and evaluation in the services has lacked much of the independence which encourages objectivity and high level action. Second, throughout the services there has been little guidance from high levels as to what is desired from OT&E activities. Third, there has been too little support and encouragement of operational testing and evaluation from high levels within the services. This means that not only is more funding required to support operational testing but also that there should be the visible indication of how operational testing results are used in making important decisions.

Because of jealous turf guarding at the Pentagon, the recommendations for improving operational testing never have been fully implemented. I am convinced the time is long overdue for creating an independent oversight office to make certain weapons are thoroughly tested and scrutinized.

This legislation that I introduce, Mr. President, this morning is cosponsored by Senator ROTH of Delaware, who is the chairman of the Governmental Affairs Committee. It is also cosponsored by Senator LEVIN of Michigan, who is not only a member of the Governmental Affairs Committee but is a distinguished member of the Committee on Armed Services.

This bill would:

First, establish a new position at the Defense Department—a Director of Operational Testing and Evaluation who would be appointed by the President and confirmed by the Senate.

Second, assign responsibilities for operational testing and evaluation to the director of the new office.

Third, provide for direct reporting responsibility to the Secretary of Defense.

Fourth, require that the Director of the Operational Testing Office make an annual report to Congress and respond to requests from congressional committees about the status of testing.

Fifth, provide for separate budget requests for the Director's office.

Sixth, provide access by the General Accounting Office to records and data relating to operational testing and evaluation.

I also have asked the General Accounting Office, the investigative arm of Congress, to conduct an intensive review of the Defense Department's operational testing system. This request asks the GAO to look for weaknesses in the system and find out if test data compiled by the services gives us a valid and reliable indication of how weapons will perform in real-life situations.

This effort is not an attack on this country's commitment to a strong national defense, a commitment to which we will devote $1.6 trillion during the next 5 years. It could, however, guarantee that we get our money's worth when we decide to invest precious resources in new, advanced technologies.

This bill simply represents a demand for better quality control and objectivity. It is a step which defense analysts agree could bring about the most desperately needed improvement in the weapons procurement process. We cannot afford to pour precious resources into sophisticated weapons which fail our men on the battlefield. There is no place in any war effort for weapons which do not work. I urge your support for this long overdue change within the Department of Defense.

I ask unanimous consent that the text of the bill be printed in the RECORD.

S. 3001

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Operational Testing and Evaluation Act of 1982".

DEPARTMENT OF DEFENSE DIRECTOR OF OPERATIONAL TESTING AND EVALUATION

SEC. 2. (a)(1) Chapter 4 of title 10, United States Code, is amended by inserting after section 136 the following new section:

"§ 136a. Director of Operational Testing and Evaluation: appointment; powers and duties

"(a) There is a Director of Operational Testing and Evaluation of the Department of Defense, appointed from civilian life by the President, by and with the advice and consent of the Senate.

"(b) The Director performs all duties relating to operational testing and evaluation in the Department of Defense including—

"(1) being the principal adviser to the Secretary of Defense on operational testing and evaluation in the Department of Defense;

"(2) prescribing the administrative organization in each of the military departments for planning and conducting operational testing and evaluation;

"(3) prescribing policies and procedures for the conduct of operational testing and evaluation in the Department of Defense;

"(4) monitoring, reviewing, and providing guidance for all operational testing and evaluation in the Department of Defense;

"(5) determining in advance the adequacy of the plans and the available funds for operational testing and evaluation to be conducted in connection with each major development program and each potential major development program in the Department of Defense;

"(6) coordinating operational testing and evaluation conducted jointly by more than one military department;

"(7) analyzing the results of the operational testing and evaluation conducted for each major development program and each potential major development program in the Department of Defense and reporting to the Secretary of Defense on (A) whether the testing and evaluation performed was adequate, and (B) whether the testing and evaluation results confirm that the items or components actually tested were effective and suitable for combat; and

"(8) reviewing and making recommendations to the Secretary of Defense on all budgetary and financial matters relating to operational testing and evaluation, including operational testing facilities and equipment, in the Department of Defense.

"(c) The Director shall report directly, without intervening review or approval, to the Secretary of Defense. The Director and his staff are independent of all research and development offices or organizations in the Department of Defense.

"(d) The Director shall have access to all records and data in the Department of Defense, including the records and data of each military department, that the Director considers necessary to review in order to carry out his duties under this section.

"(e) The Director may require that such observers as he designates be present during the preparation for and the conduct of the testing part of any operational testing and evaluation conducted in the Department of Defense.

"(f) The Secretary of a military department shall report to the Director all results of all operational testing and evaluation conducted by the military department and of all studies conducted by the military department in connection with operational testing and evaluation in the military department.

"(g) The Director shall respond to requests from the Congress for information relating to operational testing and evaluation in the Department of Defense.

"(h) No funds may be obligated or expended by the Secretary of a military department to conduct any operational testing and evaluation if such operational testing and evaluation is not approved in advance by the Secretary of Defense, in consultation with the Director, or is not conducted within the scope, or in accordance with the conditions, specified by the Secretary of Defense in approving the operational testing and evaluation.

"(i) For the purposes of this section 'operational testing and evaluation' means the field testing, under realistic combat conditions, of any item of, or key component of, weapons, equipment, or munitions for the purpose of determining the effectiveness and suitability of the weapons, equipment, or munitions for use in combat by typical military users and the evaluation of the results of such testing.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 136 the following new item:

"136a. Director of Operational Testing and Evaluation: appointment; powers and duties.".

(b) For each fiscal year, the President shall include in the Budget transmitted to the Congress pursuant to section 201 of the Budget and Accounting Act, 1921, a separate request for new budget authority for, and an estimate of the outlays by, the Director of Operational Testing and Evaluation of the Department of Defense in carrying out the duties and responsibilities set forth in section 136a of title 10, United States Code (as added by subsection (a)).

(c) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"Director of Operational Testing and Evaluation, Department of Defense.".

SEC. 3. (a) The Comptroller General of the United States shall have access to all records and data in the Department of Defense, including the records and data of each military department, relating to operational testing and evaluation in the Department of Defense.

(b) The Secretary of Defense shall cooperate with the Comptroller General in carrying out subsection (a).

(c) For the purposes of this section, the term "operational testing and evaluation" has the same meaning as provided in section 136a(g) of title 10, United States Code (as added by section 2(a)—(1) of this Act).

EXHIBIT 1

[From the Boston Globe, Sept. 20, 1982]

M1 TANK'S PROBLEMS PERSIST, REPORT SAYS

(By Fred Kaplan)

WASHINGTON.—The Army's trouble-ridden $2.7 million M1 Abrams tank is still plagued with serious, seemingly insurmountable problems, according to the latest report on operational tests conducted by the Army's testing agency.

For the past year, Army officers have excused the M1's poor performance in previous tests by saying that the trial reports were out of date, that improvements had since been made, and that the next round of tests would prove the tank's true worth.

Yet the reports on the latest round-Operational Test III, or OT-III, the last series of tests before the weapon is massively deployed—have just been made available, and most of the same shortcomings still appear to exist. Some have even worsened.

The Army has not freely distributed two OT-III reports, one of them 121 pages, the other 131—but unclassified portions were obtained by the Project on Military Procurement, a Washington-based, non-profit watchdog group which provided copies to The Globe.

The most serious problems remain the tank's engine, transmission and final drive. The final drive is to a tank what the axle and steering are to a car. The M1's original requirements stated that 50 percent of the tanks must be able to go 4000 miles without a replacement or overhaul of any of these three parts.

In the previous series of operational tests, OT-II, only 22 percent of the tanks traveled 4000 miles without this type of breakdown. In OT-III, that figure dropped to 15 percent.

The tank's tracks also wore out after an average 1100 miles of use—just over half the durability of the requirement, which is 2000 miles. In fact, the OT-III report admits that "the 2000-miles goal does not currently appear to be attainable."

Various parts of the tanks break down so frequently that only 44 percent to 46 percent of the M1s were available for use at any given time during OT-III. By comparison, in similar tests, the M60A1 tank, the oldest version of the model that the M1 is designed to replace, has had an "availability rate" of 85 percent.

The report also notes that the M60 is generally more reliable than the M1 and that it has a substantially longer operating range even under the best of circumstances—158 miles versus 123 miles, a 28 percent difference.

The M60 costs about one-third the price of the M1.

During a 96-hour field exercise of a battalion of M1s, conducted at Ft. Hood, Texas, as part of OT-III, only 51 percent of the tanks were ready for use by the beginning of the fifth day. And this was in a situation where the M1s were not facing hostile fire. At this rate of natural attrition, all the tanks would be out of action by the end of the tenth day.

Such statistics are especially grim at a time when the Pentagon is trying to develop strategies to enable the US Army to fight a "protracted" conventional war against Warsaw Pact forces in Europe.

The Army plans to spend $2 billion in fiscal 1983 to buy 776 MI tanks. It wants to buy 7058 tanks in all at a total cost of $19 billion. plus another $27 billion over their 20-year lifetime for operations and maintenance. Three battalions of M1s have already been deployed, one of them in West Germany.

The source of the M1's problems is not only the tank's fragility, but also the difficulty in maintaining it. For every hour that the M1's engines are running 3.1 hours have to be spent in maintenance. It takes 3.3 hours just to clean the tank's air filters, which are frequently clogged with dust. The test equipment and maintenance manuals differ so much from one another that much more often than not repair crews cannot identify the source of a breakdown or they misdiagnose the problem so that still more time is spent in the shop.

The OT-III report does say that the M1's "firepower, mobility, agility, and survivability . . . make it clearly superior to the M60 series of tanks."

However, the report also notes that the tank can develop serious problems when moving cross-country at high speed. The driver's vision becomes restricted, depth perception distorted. Ammunition clips are unable to retain ammo rounds. They jam against the ammo door or fall out onto the turret floor. The computer-guided aiming system on the tank's gun slips, forcing the tank commander to make continual corrections, making the task of finding and hitting enemy targets much more difficult.

Other problems in OT-III included the difficulty of positioning and firing the tank's .50-caliber machinegun, vital for countering antitank fire, traction problems in mud and on wet roads; and the grating mounted on the rear grill doors, which tears off on "practically every" tank "under normal cross-country operation," causing the "exhaust to be directed down toward the ground, which blows up excessive amounts of dust" into the air filters, "causing premature clogging."

[From the Wall Street Journal, Sept. 20, 1982]

WORST ENEMY OF THE ARMY'S NEW M1 TANK MAY HAVE BEEN ITSELF, U.S. TESTING SHOWS

(By Amanda Bennett)

WASHINGTON.—To test its costly new M1 tank, the Army sent 41 of them on a tough, six-day field exercise. By the fifth day, only about half were working.

No one was shooting at them; they just broke down.

The tanks, which cost as much as $2.7 million each, were designed to be the world's finest defense against enemy forces. But one of the last Army tests before the tank went into full production in late 1981 shows that the tank's own worst enemy may have been itself.

In fact, one segment of an Army test showed that the engine, transmission or other powertrain gear had only a 15 percent probability at that time of going 4,000 miles without failing. The Army had sought a 50 percent chance of going that distance.

The tank is built by General Dynamics Corp., which took over production from Chrysler Corp. earlier this year after buying Chrysler defense operations.

CONTINUED CONTROVERSY

Almost since the M1 tank first entered production, controversy has raged over the quality of the Army's first all-new tank in two decades. Evidence has made its way into the public that the tank failed to meet many principal goals during the Army's own testing. The Army has acknowledged some data supporting these views and has provided additional data refuting other such claims, but never has made its internal test documents public.

The Army says that it has made many changes since those tests were completed last year and that the tanks currently are working well.

A copy of the results of the Army's final operational tests on the tank provides a fuller picture of the type of problems the M1 faced during Army testing. The test results were made available by the Project on Military Procurement, a nonprofit group of defense consultants and former weapons planners, which vehemently opposes the M1's production, preferring instead construction of a simpler tank.

These copies show, among other things, that during a series of operational tests, tanks were available for use for at most 54 percent of the time and as little as 36 percent of the time. The rest of the time, they were broken, being repaired or waiting for repair or maintenance.

In one set of examples, an Army agency summarizing and commenting on the operational-test results showed that one tank was down a total of 104 complete days out of 240 days.

The agency blamed in large part a troubleshooting system that frequently made wrong diagnoses, and repair procedures and equipment that it said weren't adequate. "The tank system availability" in the field "will be low unless aggressive action is taken to improve test and diagnostic equipment, manuals and troubleshooting capabilities," the analysis said.

The Army says it has done just that. "We've made a lot of improvements" since the tests were completed in the summer of 1981, an Army spokesman said. More than 150 M1 tanks are currently in operation with an Army division in Germany, the spokesman said, and "they're running very well," now that a "good, smoothly established system for repairs, parts and training" has been established. In addition, he said, "soldier acceptance is high" among tank personnel in Germany. "These are the guys that have to fight" with the tank, he added.

It would have taken a lot of fixes to satisfy some tank personnel during the operational tests. While those working with the tank were impressed with its speed and ma-

neuverability, they complained of numerous problems that they thought impeded their safety or comfort. Some handles inside the tank endangered crew members' eyes, evaluators believed. They complained that the .50-caliber machine gun could be fired accidentally, but that it was hard to focus precisely on target.

NECK AND BACK PAIN

Of 29 drivers during one test, 27 reported neck and back pain bad enough to require medical attention after operating the tank for several hours with the hatch closed.

The Army nonetheless maintains that with the fixes it has made, the M1 is a superior tank. "As it sits right now on the ground, it's as good as or better than any tank that's fielded in the world," the Army spokesman said.

Still, the Army spokesman conceded that some of the problems "maybe aren't fixable." The treads, which were supposed to go 2,000 miles, were averaging just over 1,000 miles in the tests. "It may be possible that at this point in our technology" the treads can't be made any better.

As for the durability of the power train, the Army said it has made corrections to a number of areas such as the drive shaft and gear boxes, and has just begun a series of tests to see if that increases longevity. Using a combination of different operational and developmental tests and throwing out failures that it doesn't consider to be the tank's fault, the Army figures the tank stands a 37 percent chance of going the 4,000 miles without a breakdown of critical drive-train parts.

In St. Louis, a spokesman said General Dynamics wouldn't have any comment.

● Mr. ROTH. Mr. President, I am pleased to join with Senator PRYOR in sponsoring this important legislation which would create an independent Office of Operational Testing in the Department of Defense. I believe improved operational testing procedures will help reduce the costs of major weapons systems while at the same time improve the reliability of the weapons we field. This bill represents a first step in the effort to reform testing procedures and will serve as the focal point of oversight hearings on DOD management of weapons testing programs.

This legislation is the result of extensive hearings I convened last year in my Committee on Governmental Affairs. These oversight hearings were designed to be an intensive review of the management of the acquisition process in the Defense Department. There were many weaknesses in the acquisition process the committee examined including unrealistic cost estimating for new weapons programs, noncompetitive and sole-source procurements, gold-plating of weapons systems and ineffective operational weapons testing programs. All of these problems have at least two things in common. They drive up the costs of weapons programs and they have been around for many, many years. I believe the legislation we are introducing today will begin the process of ending one of those problems which has festered in the depths of the Pentagon hallways for far too long.

Mr. President, this legislation is designed to improve and insure the reliability of the operational testing conducted on weapons systems and other highly technical military hardware. Such tests are designed to determine exactly how well a given system would perform in actual combat, usually by testing the system in simulated but realistic combat conditions. Other tests are conducted on the system to determine whether it meets the specifications and tolerances it was designed to meet and are called developmental tests. Together, developmental and operational test, if done correctly and thoroughly, can tell us whether or not what we plan to buy will work as advertised, both in battle and as measured by the specifications it was designed to meet.

Developmental tests are begun from the very moment a system is conceived. They are used to help define the concept of a weapons system and they establish how the weapons will have to be designed to meet the broad specifications set for it when it was initially approved for development. Engineering tests are conducted to determine what materials and system configurations will need to be built to insure that a weapons system will satisfy its design requirements. At some point in the development process a complete prototype is usually built and tested.

As the weapon is being developed, operational testing is begun. Such testing does not always require a working prototype. In some cases, tests using existing equipment can help determine whether a system will be able to fulfill its mission in the field as envisioned by military planners.

Mr. President, the testing process as currently structured in the Defense Department, and as I have outlined it, is seriously flawed. Accurate and realistic operational tests are crucial to the ultimate success of a weapons program but in most cases such tests are conducted too late in the process of developing the weapon to be of much use. Usually, operational tests are never done in time to influence the initial decision to develop a weapon and, consequently, many concepts for new weapons are approved before it is actually determined whether a proposed system could realistically work on the battlefield as well as it works on paper. Unfortunately, paper can not stop bullets and a weapon which passes the grade as an idea may never be able to meet the true test in actual use.

This lack of adequate forethought with respect to operational testing is aggravated by pressure from defense contractors, project managers, and service chiefs to push ahead with a new program. Decisions are often made years in advance by Pentagon planners on what weapons system they want to have in their arsenal. The pressure on the program manager to insure that a particular weapon is developed and built to fill the niche left for it is so intense that making sure a weapon works may lose out to making sure it is built, period.

Such pressure not only affects the effectiveness of weapons systems it also affects their costs. It is much more efficient to build it right the first time than it is to build it any way you can and be forced to come back later to fix up your mistakes. Effective operational tests can indicate whether it is realistic to expect a new weapon to be capable of performing in a certain way under battlefield conditions and can indicate where changes should be made before the concrete has set. The efficiency which results from effective operational tests can save the taxpayers' dollars from being spent on costly, unnecessary repairs.

Mr. President, there are numerous cases in which ineffective operational testing has cost the taxpayer millions of dollars. For example, the newest generation of the Maverick Missile, an antitank weapon, is designed to be fired from several miles away from its target so that the pilot is not required to put himself in danger by moving in close to a tank in order to destroy it. Unfortunately, even though this weapon is now reaching the final stages of development, it has become apparent to many experts, including GAO, that a camouflaged tank cannot be picked out of a chaotic battlefield at ranges of greater than 3,000 feet. A simple operational test would have revealed this problem before the weapon reached this late stage of development.

Another weapon which was developed even though it had serious battlefield deficiencies was the TOW antitank missile. Fired from a bazooka-like device, the TOW missile trails a thin wire which directs the weapon to the target. Unfortunately, the soldier must keep his sights trained on the target to insure that the weapon scores a hit which means that he must remain standing or kneeling in the face of enemy fire for several seconds. Only a soldier with a death wish would want to do that. Again, an adequate operational test would have uncovered this problem.

Mr. President, there are many other examples which could be used but the point is that these are disturbing signs that operational testing in the Defense Department is not working as it should. This problem may result, in part, because the testing operations in the Department are uncoordinated

and because the existing Office of Testing and Evaluation is not insulated from the pressure to develop and approve new weapons programs. Currently, the Office is a part of the responsibility of the Under Secretary for Research and Development, the agency in DOD responsible for developing and building new weapons programs. The Under Secretary and his personnel have a vested interest in seeing a weapon, once conceived, through to production. They do not want to hear from the Office of Testing and Evaluation that a new weapon will not work on the battlefield unless it is modified or sent back to the drawing board. As one Pentagon official put it, "For every voice that says, 'Don't proceed, fix first' there are nine that say, 'Move ahead and we'll fix the problems later.'" The one lonely voice of the operational testing office can hardly be expected to overcome such pressures, some subtle and some not.

Mr. President, Russell Murray, a former head of operational testing in DOD, testified before my committee last year that—

The objective of operational testing is to find out whether a new weapon, even if it does meet its specifications, will really be useful and needed in combat * * * People rightly worry about the acquisition process already taking too long, but wrongly try to speed things up by shortcutting the operational tests. That may get hardware into the field sooner, but not working hardware. The way to do that is to get the design right before—not after—it is built.

I agree with Russell Murray and I hope this legislation will serve as a stimulus to improvements in operational testing programs in the Defense Department.●

Mr. PRYOR. Mr. President, do I have any time remaining?

The PRESIDING OFFICER. The Senator has 2½ minutes remaining.

DEFENSE LOBBYING

Mr. PRYOR. Mr. President: I want to call to the attention of the Senate an article by Morton Mintz in this morning's Washington Post about a GAO report that "Pentagon and Air Force officials violated criminal and civil antilobbying laws * * *." This is an outrage.

As my colleagues know I have attempted to bring this subject to the attention of the Senate. I have been concerned that, contrary to a clear prohibition against such activity, Defense Department officials and contractors lobby Congress in support not only of particular programs, but also in support of products manufactured by defense contractors.

To this end, I proposed an amendment to the fiscal year 1982 defense appropriations bill which the Senate approved. But it was dropped in conference. I then proposed S. 1969, a bill which would apply a prohibition on the use of appropriated funds for lobbying purposes, not only to Defense but to all departments.

Mr. President, I believe it is imperative that the Congress express its voice on this matter. There is no reason for taxpayers to subsidize lobbying in any area of government, especially when cuts are being made in many programs across the board.

I urge appropriate legal and congressional action.

Mr. President, I ask unanimous consent that Mr. Mintz's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DEFENSE OFFICIALS HELD TO VIOLATE LOBBY LAW IN TRANSPORT CAMPAIGN

(By Morton Mintz)

Pentagon and Air Force officials violated criminal and civil anti-lobbying laws in waging a massive "cooperative" campaign with Lockheed Corp. to persuade the House to approve a $10 billion buy of C5B cargo aircraft, according to the General Accounting Office.

The auditing arm of Congress has asked the Justice Department to consider a prosecution under a 1919 law that provides fines and up to a year in prison for officials convicted of spending public funds to solicit outside pressures on Congress.

"Using contractors to do things that they could not do themselves," the officials spent "material, but undeterminable, amounts of appropriated funds to conduct the cooperative lobbying effort," the GAO charged in a report to Rep. Jack Brooks (D-Tex.), chairman of the House Government Operations Committee.

"The director of the Air Force Office of Legislative Liaison [Maj. Gen. Guy I. Hecker Jr.] with the knowledge and consent of the Secretary of the Air Force [Verne Orr], the Assistant Secretary of Defense for Legislative Affairs [Russell Rourke] and the Deputy Secretary of Defense [Frank C. Carlucci] invited officials of Lockheed and several C5B subcontractors to attend meetings held almost daily in his [Hecker's] office," the report said.

"The stated rationale . . . was to use the contractors' lobbyists and subcontractor network to get the 'right' information about the president's program to the Congress quickly and to get feedback on congressional views. In other words, the purpose was to do things the Air Force was restricted from doing by anti-lobbying and legislative liaison appropriation restrictions, by bringing pressure to bear on members of the Congress."

Brooks released the report with a request for "a thorough investigation" by the Justice Department, which has never brought a prosecution under the 1919 law. The civil anti-lobbying law, on the books for a quarter-century, is similar in intent.

Brooks asked for the report June 24, two days after newspaper stories based on leaked copies of a Lockheed computer printout that detailed the ultimately successful daily efforts of the C5B Pentagon-Air Force-Lockheed "team" over 19 days in May and June to overcome a Senate decision to substitute military versions of new or surplus Boeing 747 airliners for the C5Bs.

The report said that Lockheed, learning of the leaks at least four days before the stories appeared, "destroyed all computerized records." The company said yesterday that "we felt that it was no longer safe" to maintain a computerized data base possibly accessible to outsiders.

Lockheed estimated its lobbying outlay at $496,000. Unless prevented by the Pentagon, the GAO said, Lockheed could be reimbursed for $287,840. The half-million-dollar figure excludes $265,190 for newspaper advertisements as well as "lobbying costs of Lockheed subcontractors and other companies that supported Lockheed's efforts."

The GAO findings may conflict with some recent sworn testimony to a House Armed Services subcommittee in an investigation of allegations by Rep. Norman D. Dicks (D-Wash.) and other C5B foes that the 1919 law was disobeyed.

Hecker and Lockheed President Lawrence O. Kitchen, who attended the daily meetings, told the subcommittee that they knew of no impropriety. Kitchen said the sessions were "informational," that no one told anyone else what to do and that the printout was a record, not a guide to action. By contrast, the GAO said that "on at least one occasion, and Air Force official called a Lockheed employe to report progress made on 10 to 15 tasks that the Air Force was responsible for accomplishing."

Carlucci testified that Pentagon officials "adhere rigorously" to the 1919 law and "did nothing wrong." Yesterday, the Pentagon stood by his testimony.

Mr. STAFFORD. Mr. President, will the Senator yield?

Mr. PRYOR. I yield to the Senator from Vermont.

PRIVILEGE OF THE FLOOR—S. 2574

Mr. STAFFORD. Mr. President, I ask unanimous consent that the following members of the staff of the Environment and Public Works Committee may have the privileges of the floor during consideration and votes on the Federal Highway Aid Transportation Act of 1972: Mr. Dick Harris, Mr. John Yago, Mr. Bailey Guard, Miss Lee Fuller, and Miss Kathy Cudlipp.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHMITT. Mr. President, will the Senator yield?

Mr. PRYOR. Mr. President, I yield to the Senator from New Mexico.

THE C-5: TRAGEDY OR SCANDAL?

Mr. SCHMITT. Mr. President, a serious deficiency exists in our military airlift capability, particularly as it relates to a strategically mobile Rapid Deployment Force. Military airlift has been a low priority within the Air Force and the Defense Department for far too long. The current defense budget attempts to address that problem but, unfortunately, in the wrong way. I fear that the administration's proposal to procure 50 C-5B Galaxy airlifters will result in a costly program that fails to meet the require-

ments of both the Army and the Air Force in the 1980's and 1990's.

After years of study and a competition, the Air Force selected the C-17 as the best aircraft to meet the airlift needs of this Nation. In January, however, the decision was reversed and the C-5B was selected without a competition. Under Secretary of the Army James Ambrose, in a memo to Under Secretary of Defense Richard DeLauer, stated that this decision was "perpetuating a scandalous situation."

Mr. President, this Senator is a strong supporter of the concept of a strategically mobile Rapid Deployment Force. I have worked on this program within the Defense Subcommittee of the Appropriations Committee. There is no doubt that this Nation needs to quickly augment its military airlift capability. The administration's decision to procure the C-5B is not the way to meet this requirement.

The Senate in its wisdom voted against the C-5 in May of this year. The Armed Services Authorization Conference, however, restored funds for the C-5. Since the Senate vote in May, additional information has become available which supports the vote of the Senate against the C-5. This information includes major cost increases and technical problems with the C-5.

In the fiscal year 1983 budget submission, the total cost of the C-5 program was $8.8 billion. In a letter to Senator NUNN dated April 22, 1982, Gen. Kelly Burke reaffirmed that cost of $8.8 billion. By May 14, 1982, the cost of the C-5 program had risen to $9.3 billion. This figure comes from the planning documents for the fiscal year 1984 budget. According to these same documents, by August 2 a revised budget of $10.9 billion was arrived at. This is an increase of $2.1 billion or 24 percent within a 4-month period. It does not appear that we will know the true cost of 50 C-5B's until we have procured all of them; that's just a little too late.

The Pentagon has advertised that the C-5 will be procured on a firm fixed price contract with the manufacturer, Lockheed. What fails to be mentioned is that the Military Airlift Command (MAC), the operator of airlift, submitted over 140 recommended modifications to the C-5 prior to procuring more C-5's. These changes were recommended based on the experience of operating C-5's for over a decade and they could result in avoidance of the type of problems which have been plaguing the C-5. These changes have been disapproved since the Lockheed proposal did not include them in the price. Should that decision be reversed, the $10.9 billion C-5 will again grow in cost.

According to the analysis of the Air Force, the life cycle cost of the C-5 will range from between $4 billion to $7 billion in fiscal year 1980 dollars more than for the preferred C-17. This is based on the fact that the C-5 uses a third more fuel than does the C-17 it requires twice as much maintenance manpower per squadron, and twice as many aircrew members per squadron.

Mr. President, if the only problem with the C-5 was the cost, the situation would not be as severe as it presently is. The Congress has an obligation to procure the best equipment at the lowest cost. Procuring the best equipment at the highest cost is an unfortunate situation. However, when we allow the Pentagon to procure the worst equipment at the highest cost, the situation becomes scandalous. We owe our men and women in uniform the commitment to provide them with the best equipment available so that they can do their job well.

For over a decade now, the C-5 has stood as an example of how not to buy an aircraft. The C-5 has become synonymous with waste and abuse; it, frankly, has been a national scandal. We procured an aircraft that was rampant with cost overruns and schedule slippages. Not all the blame lies with the contractor. Changing Air Force requirements seem to also be at fault. Soon after procuring the C-5 we learned that the wings had to be replaced. Soon the joke started circulating that on the C-5, the wings were optional.

Mr. President, since June 7, the C-5 has experienced five engine fires, two of which were so severe that the aircraft would have been lost if they were not still in the airport flight pattern. One fire, at Clark Air Base, has been classified a class B flight mishap with a cost estimate of $331,116. Another fire at Altus Air Force Base has now been classified a class A flight mishap with a price tag of over $1.4 million. As a result of fires in June and July, inspection of the combustion chamber liner has been changed from each 450 days to each 30 days. This requirement will increase maintenance costs and decrease readiness and availability of the aircraft.

The Air Force conducted an inspection of all TF 39 engines in their inventory. As of June 21, 17 engines were found to have cracks in the compressor rear frame, the cause of the mishap at Clark Air Base. Of the 17 engines, 9 were TF 39-1C engines, new modified engines. The problem will simply not be solved by the ongoing modifications.

The C-5 is now undergoing a rewinging program to correct the problems that have plagued the aircraft since they came off the assembly line. That program, however, has experienced serious problems. AVCO, which is the contractor on the rewinging program, recently was preparing to ship eight outer wing boxes to Lockheed. Upon inspection, it was discovered that all eight new wing boxes had cracks. AVCO is currently running between 20 and 30 days behind in deliveries. This problem will compound the current schedule slip. In an attempt to get back on schedule, Lockheed has taken some of the work back from AVCO and AVCO has scheduled work on weekends and holidays until at least the end of the year.

Mr. President, one of the criticisms of increased defense spending is that industry cannot efficiently absorb all the additional work quickly. Here we have an example of that situation. AVCO is having serious problems in meeting the schedule for the C-5 rewinging program. They will be receiving B-1 bomber wing work soon and now we are proposing to provide additional work on the new C-5B. The only possible result can be continued slippage in schedule for all three programs with the resultant increase in cost for all three.

In this period of increased efforts to eliminate waste, fraud, abuse, and inefficiencies in the Pentagon, it would appear that the C-5 is an appropriate program to drop. Cost, schedule, and product guarantees should at least be demanded by the Department of Defense from all contractors involved in the C-5 program, not just the prime contractor. This Senator is not aware of any such guarantees being offered at this time.

Over the years the major problem facing our military has been one of readiness. The cost of procuring a weapons system or other military equipment is just a small fraction of its real cost. The cost of operation and maintenance must be considered. Just as the cost of an automobile includes the cost of service on it, an aircraft requires spare parts and a regular maintenance schedule. The Pentagon and the Congress must consider procurement of equipment that requires less maintenance man-hours and fewer spare parts. To do otherwise results in either major maintenance costs or equipment that is not operational due to lack of spares or manpower.

The C-5 has required a great deal of manpower to maintain it. As I pointed out earlier, the C-5 requires about double the manpower that the C-17 would require. This problem is compounded by the recent engine problems. Yet, we are proposing to purchase additional C-5's at a time when skilled manpower is at a premium and in short supply, particularly in the military.

The C-5 has required more spare parts than was ever anticipated. In the fiscal year 1981 supplemental and the fiscal year 1982 appropriations bills, additional funds were provided for spares for the C-5. Those additional funds have proven inadequate to meet

the needs. The cost of supplying spares for the C-5 has doubled in the last 2 years.

Mr. President, the shortage of spares is so severe that parts, including engines, are being removed from aircraft which are not rated operational for other aircraft to keep them in an operational status. Clearly, this is not the manner in which a truly ready military should operate.

The country has had over a decade of experience with the operation of the C-5. The program had problems from its beginnings. Those problems have continued and increased over time. It is about time that we learn from our past mistakes and not repeat them. Unfortunately, the Pentagon and the Congress seems intent on repeating those mistakes. We will all have to share in the responsibility when the proposed C-5B program runs into cost overruns, schedule slippages, and technical shortcomings.

Mr. President, we are not talking about just any Government program where, if we make a mistake it can always be corrected. We are talking about providing for our national security. If we are ever required to militarily defend our freedom and our security but we lack the airlift required to do so because we embarked on this program, how are we going to answer the American people.

Mr. President, the facts are all before us. The Air Force and the Army strongly recommended procurement of the C-17. Until January, the Air Force was on record as opposing the C-5 proposal. The C-17 meets the requirements; it was designed to these specifications. The C-5 not only fails to meet the requirements but it has already experienced major cost growth and continues to show major problems with the existing fleet. The C-5 is the wrong aircraft for this country. The Congress must revisit this issue or we will be faced with a national scandal far more serious than the one surrounding the C-5 originally.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 10:30 a.m. with statements limited to 2 minutes each.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum called be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask that the time for routine morning business be extended until not later than 11:30 a.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, a joint resolution is to be offered by the distinguished Senator from Pennsylvania (Mr. HEINZ), and other Senators, and has been cleared on both sides, I believe, I will ask the minority leader if he is in a position to proceed to the consideration of that matter at this time.

Mr. ROBERT C. BYRD. Mr. President, I am ready to proceed.

TRICENTENNIAL ANNIVERSARY YEAR OF GERMAN SETTLEMENT IN AMERICA

Mr. HEINZ. Mr. President, I send a joint resolution to the desk and ask for its immediate consideration.

Joining me as cosponsors of this joint resolution are: Mr. DOLE, Mr. DOMENICI, Mr. LUGAR, Mr. HART, Mr. SPECTER, Mr. HELMS, Mr. EAST, Mr. CANNON, Mr. STEVENS, Mr. GRASSLEY, Mr. METZENBAUM, Mr. MATHIAS, Mr. HEFLIN, Mr. SARBANES, Mr. THURMOND, Mr. BENTSEN, Mr. KASTEN, Mr. JOHNSTON, Mr. BUMPERS, Mr. SCHMITT, Mr. ROTH, Mr. D'AMATO, Mr. KENNEDY, Mr. BOSCHWITZ, Mr. HOLLINGS, Mr. DURENBERGER, Mr. STENNIS, Mr. LAXALT, Mr. RIEGLE, Mr. PRYOR, Mr. ZORINSKY, Mr. INOUYE, and Mr. DIXON.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 260) to designate the period commencing January 1, 1983, and ending December 31, 1983, as the tricentennial anniversary year of German settlement in America.

Mr. ROBERT C. BYRD. Mr. President, we have no objection to its immediate consideration.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration and, without objection, the joint resolution will be considered to have been read the second time at length.

The Senate proceeded to consider the joint resolution.

Mr. HEINZ. Mr. President, today I am introducing on behalf of myself and our cosponsors, a joint resolution to designate the period commencing January 1, 1983, and ending December 31, 1983, as the "Tricentennial Anniversary Year of German Settlement in America."

Our alliance with the Federal Republic of Germany is an important, indeed, an essential one. At a time when many are focusing on the differences between friends, it is important to remind people that our two countries are united in our joint faith in the democratic process and in our mutual commitment to the defense of our freedoms and common values.

President Reagan has extended an invitation to President Karl Carstens of the Federal Republic of Germany to visit our country during the tricentennial year. President Carstens has accepted that invitation. Both Presidents of these two great democracies will be taking part in local celebrations planned throughout the United States to honor the important contributions of German-Americans to the progress of America.

This resolution in addition to our support of the President's invitation, will also express our strong support for the President's youth exchange initiative. The concept of a United States-German teenage exchange sponsored by the Members of the U.S. Congress and the West German Bundestag, with an emphasis on home stays with families, is particularly commendable.

This resolution will demonstrate our appreciation of the contributions of German-Americans to our society, as well as underscore the historic friendship which has existed between our two nations. I believe that this resolution will be an important symbol of the underlying and enduring good will between the United States and the Federal Republic.

The joint resolution (S.J. Res. 260) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 260

Whereas October 6, 1983, is the three hundredth anniversary of German settlement in America at Philadelphia, Pennsylvania;

Whereas such date marks the beginning of the immeasurable human, economic, political, social, and cultural contributions to this country by millions of German immigrants over the past three centuries;

Whereas today the United States of America and the Federal Republic of Germany continue their close friendship based on the common values of democracy, guaranteed individual liberties, tolerance of personal differences, and opposition to totalitarianism; and

Whereas it is fitting that this historic event be commemorated in such a manner as to celebrate German-American friendship and to focus on the democratic values that bind us together: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the period commencing January 1, 1983, and ending December 31, 1983, is hereby designated as the "Tricentennial Anniversary Year of German Settlement in America", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the year with appropriate ceremonies and activities: Be it further

Resolved that, as a concrete demonstration of our commitment to the enduring U.S.-German relationship, and as an act of celebration to inaugurate the Tricentennial Year, we express our strong support for the President's Youth Exchange initiative, and especially the concept of a U.S.-German teenage exchange sponsored by the Members of the United States Congress and the West German Bundestag, and emphasizing home stays with families.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONTINUING APPROPRIATIONS CONFERENCE REPORT

Mr. BAKER. Mr. President, I have another announcement to make about the progress for today, and I would invite the attention of the minority leader because he might want to chart his course on this.

I talked to Congressman MICHEL, the minority leader of the House of Representatives, just now. He indicates to me that he thinks it may be as late as 10 o'clock tonight before they finish the continuing resolution.

I know that is bad news for a lot of Members of the Senate, because we cannot move a peg unless the House sends us that continuing resolution conference report.

I would judge, Mr. President, as much as I hate to say it, that it may be close to midnight before the Senate is able to adjourn. I would not dare say that if there were many people on the floor, but in the fine hope that I can escape before any bodily harm is done to me, I wanted to make the announcement at this time.

Mr. ROBERT C. BYRD. Mr. President, I am sure the majority leader's information is much more up to date than mine. I talked with Majority Leader WRIGHT about this matter last evening over at the so-called gala. He indicated that they ought to be finished with it by 5 p.m. today. I hope my recollection is not playing tricks on me, but the majority leader's information is more subsequent than that which I was able to get last night. Let us all hope that somewhere between 5 p.m. and midnight we will be able to get the message from the House.

Mr. BAKER. I like the minority leader's version better than my own. However, Mr. President, if I understood Congressman MICHEL correctly, I believe he had just conferred with the Speaker and that probably is their best consensus.

Mr. ROBERT C. BYRD. It probably is.

Mr. BAKER. Senators should be at least apprised of the fact that there is a possibility we will be in late tonight, as much as I regret to say that.

Mr. President, there are a number of things that we can do by unanimous consent, I believe. I would like to go ahead and try those at this time.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, I ask the minority leader if he would be prepared to consider one item on the Executive Calendar at this time and we will return to the others a little later, but there is a special reason for doing this involved in activities outside the Senate Chamber. I refer to Calendar Order No. 1016, the nomination of George G. Fagg of Iowa to be U.S. circuit judge for the eighth circuit.

Mr. ROBERT C. BYRD. Mr. President, that item has survived the clearance process on this side. We are ready to proceed.

Mr. BAKER. I thank the Senator.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering that nomination.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

THE JUDICIARY

The legislative clerk read the nomination of George G. Fagg, of Iowa, to be U.S. circuit judge for the eighth circuit.

The nomination was considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGAL SERVICES CORPORATION NOMINATIONS—TIME LIMITATION AGREEMENT

Mr. BAKER. Mr. President, I have a request in respect to a time limitation for debate on the Legal Services Corporation nominations.

I ask unanimous consent that when the Senate proceeds to the consideration of the Legal Services Corporation nominations, Executive Calendar Nos. 845, 846, 847, 848, 851, and 852, they be considered en bloc, under the following time agreement: 1 hour on the nominations en bloc to be equally divided between the chairman of the Committee on Labor and Human Resources and the ranking minority member or their designees; that following the conclusion or yielding back of that time, the Senate proceed to vote on the nominations.

Further, I ask unanimous consent that following the vote, a motion to reconsider, and tabling, and the informing of the President that the Senate has given its consent be pursued, and that the Senate, after the disposition of those matters, resume legislative session.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object—and I do not think I will object—I did not understand the last paragraph.

Mr. BAKER. Mr. President, let me restate the last paragraph of the request.

I ask unanimous consent that following the vote on the nominations en bloc and after the tabling of the motion to reconsider the vote on the nominations, and the immediate informing of the President, if that consent if given by the Senate, the Senate then resume legislative session.

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR S. 1210 TO BE RETURNED TO THE HOUSE OF REPRESENTATIVES

Mr. BAKER. Mr. President, the next item is a request in respect to S. 1210. I will state the request now for the consideration of the minority leader.

I ask unanimous consent that S. 1210, together with accompanying papers, be returned to the House of Representatives in compliance with House Resolution 605, requesting return thereof.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

INSURANCE PROGRAMS FOR HOUSING AND COMMUNITY DEVELOPMENT

Mr. BAKER. Mr. President, I am prepared to proceed to House Joint Resolution 612, if the minority leader has no objection.

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House Joint Resolution 612.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 612) to provide for the temporary extension of certain insurance programs relating to housing and community development, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

Mr. ROBERT C. BYRD. There is no objection, Mr. President.

There being no objection, the Senate proceeded to the consideration of the joint resolution.

Mr. RIEGLE. Mr. President, I should like to ask the chairman of the committee a question with respect to one of the provisions in House Joint Resolution 612.

The question concerns the extension of time for which certain metropolitan cities and urban counties will be considered as metropolitan cities and urban counties even though their populations may have dropped below the statutory threshold for eligibility according to the decennial census. As I recall, Mr. Chairman, we passed a similar extender last year.

Under this bill, several communities would have their eligibility for CDBG entitlement funds extended through fiscal year 1983. This extension will enable these communities—which include Lincoln Park, Mich.—to complete 3-year community development projects, which have already been approved by HUD. I strongly support that extension. Is it the intention of the chairman that this type of extension continue past fiscal year 1983 when these 3-year plans will be completed?

Mr. GARN. I state for the record that I have no intention of seeking a further extension next year. As the Senator knows, CDBG entitlement communities came into the program expecting funding based on the 3-year authorization cycle orginally adopted in 1974. This cycle, which has worked its way into the CDBG planning processes, was last reinstituted for fiscal years 1981, 1982, and 1983. Since that time, the results of the census would have required the exclusion of several communities from the entitlement program due to loss of population. Since these communities had already entered the cycle, and started projects based on the assumption of continued funding, it was a matter of equity and an effort to eliminate hardship that led to the last extension. The same rationale holds true today as these communities prepare for the third and last year of the funding cycle. There will not be the same justification after fiscal year 1983 and I will not support an extension beyond the date set forth in this resolution.

Mr. RIEGLE. I thank the chairman for his explanation.

The PRESIDING OFFICER. The question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 612) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I have a budget waiver in connection with calendar No. 773, S. 2671. The budget waiver is Senate Resolution 463. I advise the minority leader that if that budget waiver is adopted, it will be my intention to ask the Senate to proceed to the underlying measure, S. 2761, if there is no objection.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 463) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2671.

The resolution was considered and agreed to, as follows:

S. RES. 463

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 2671. Such waiver is necessary because S. 2671, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

This budget waiver will allow Senate consideration of S. 2671 which creates a Federal Commission to commemorate the Bicentennial of the Constitution. After hearings in the Constitution Subcommittee, S. 2641 was introduced by all members of the Subcommittee and approved by the Senate Judiciary Committee on a voice vote on August 4, 1982.

S. 2671 authorizes the appropriation of $300,000 for fiscal year 1983 and such sums as necessary for the subsequent years until the termination of the Commission in 1989. The $300,000 figure is less than half of the President's budget request for such a commission. The Judiciary Committee Report on S. 2671 expresses that the funding amount was left "unspecified for the years after 1983 . . . to provide the Appropriations Committee the discretion to adjust the $300,000 amount downward based on the success of the Commission's fundraising efforts." Senate Report No. 97-535, page 35.

In order to begin planning for the education and celebrative activities of the bicentennial, the Commission must get underway immediately. Delaying the inauguration of the Commission could be fatal to adequate planning of this important event. Moreover, since the appropriations bill in which this would appear has not been addressed by the Senate, this should not disrupt that budgetary process.

COMMISSION ON THE BICENTENNIAL OF THE CONSTITUTION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 773, S. 2671.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2671) to provide for the establishment of a commission on the bicentennial of the Constitution.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary with amendments, as follows:

On page 8, line 19, strike "September 30, 1988", and insert "December 31, 1989"; and

On page 8, line 25, strike "1988", and insert "1989".

So as to make the bill read:

S. 2671

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is established a Presidential Commission on the Bicentennial of the United States Constitution, hereinafter referred to as the "Commission".

FINDINGS

SEC. 2. The Congress finds that—

(1) the bicentennial of the Constitutional Convention's adoption of the Constitution occurs on September 17, 1987;

(2) the Constitution enunciates the limitations on government, the inalienable rights of man, and the timeless principles of individual liberty and responsibility for the people of the United States of America;

(3) this document has set an enduring example of representative democracy for the world; and

(4) the maintenance of the common principles that animate our Republic depend upon a knowledge and understanding of their roots and origins.

PURPOSE

SEC. 3. It is the purpose of this Act to establish a Commission to promote and coordinate activities to commemorate the bicentennial of the Constitution.

MEMBERSHIP

SEC. 4. (a) The Commission shall be composed of sixteen members as follows:

(1) thirteen members appointed by the President, three of whom shall be appointed upon the recommendation of the Speaker of the House of Representatives, three of whom shall be appointed upon the recommendation of the President pro tempore of the Senate and three of whom shall be appointed upon the recommendation of the Chief Justice of the United States;

(2) the chairman of the Committee on the Judiciary of the House of Representatives;

(3) the chairman of the Committee on the Judiciary of the Senate; and

(4) the Chief Justice of the United States.

(b) Such members shall be chosen from among individuals who have demonstrated scholarship, a strong sense of public service, and abilities likely to contribute to the fulfillment of the duties of the Commission.

(c) Members of the Commission shall be appointed for the life of the Commission.

(d) The Commission shall select a chairman from among its members who shall serve as Chairman for the life of the Commission.

(e) Eight members of the Commission shall constitute a quorum, but a lesser number may conduct meetings.

(f) A vacancy in the Commission shall not affect its powers, and shall be filled in the same manner in which the original appointment was made.

ADMINISTRATIVE PROVISIONS AND POWERS

SEC. 5. (a) The Commission shall appoint a staff director who shall be paid at a rate not to exceed the rate of basic pay provided for level V of the Executive Schedule pursuant to section 5316 of title 5, United States Code.

(b) The Commission is authorized to appoint and fix the compensation, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, of such additional publicly paid personnel up to five persons, as the Chairman finds necessary to carry out the purposes of this Act. Such personnel shall be compensated at a rate not to exceed a rate equal to the maximum rate for GS-18 of the General Schedule under section 5332 of title 5, United States Code. The Commission may hire additional personnel out of private donations.

(c) Each member of the Commission shall serve without compensation, except that each member shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties.

(d) The Commission may procure temporary of intermittent services under section 3109(b) of title 5, United States Code, at a rate of pay not to exceed the rate of basic pay for GS-15 of the General Schedule under section 5332 of title 5, United States Code.

(e) The Commission is authorized to procure supplies, services, and property, and make contracts, in any fiscal year, only to such extent or in such amounts as are provided in appropriation Acts.

(f) The Commission is authorized to enter into agreements with the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Chairman and the Administrator of the General Services Administration.

(g) The Commission is authorized to accept, use, solicit, and dispose of donations of money, property, or personal services.

(h) The Commission may use the United States mails in the same manner and upon the same conditions as other departments and agencies of the United States.

(i) The Commission shall have the authority to design and use a logo as the official emblem of the bicentennial. The Commission shall issue rules and regulations regarding the use of such logo, as they deem appropriate to carry out the purposes of this Act.

DUTIES OF THE COMMISSION

SEC. 6. (a) The Commission shall—

(1) plan and develop activities appropriate to commemorate the bicentennial of the Constitution, including a limited number of projects to be undertaken by the Federal Government seeking to harmonize and balance the important goals of ceremony and celebration with the equally important goals of scholarship and education;

(2) encourage private organizations, and State and local governments to organize and participate in bicentennial activities commemorating or examining the drafting, ratification, and history of the Constitution and the specific features of the document;

(3) coordinate, generally, activities throughout all of the States; and

(4) serve as a clearinghouse for the collection and dissemination of information about bicentennial events and plans.

(b) In planning and implementing appropriate activities to commemorate the bicentennial, the Commission shall give due consideration to—

(1) the historical setting in which the Constitution was developed and ratified, including such antecedents as the Federalist Papers, the Articles of the Confederation, and the ratification debates in the States;

(2) the contribution of diverse ethnic and racial groups;

(3) the relationship and historical development of the three branches of the Government;

(4) the importance of activities throughout all of the States regardless of when such State achieved statehood;

(5) the unique achievements and contributions of the participants in the Constitutional Convention of 1787 and the State ratification proceedings;

(6) the diverse legal and philosophical views regarding the Constitution;

(7) the need for reflection upon both academic and scholarly views of the Constitution and the principle that the document must be understood by the general public;

(8) the substantive provisions of the Constitution itself; and

(9) the impact of the Constitution on American life and government.

(c) The Commission shall seek the cooperation, advice, and assistance from both private and governmental agencies and organizations, including the National Endowment for the Arts, the National Endowment for the Humanities, the Library of Congress, the Smithsonian Institution, the National Archives, the Department of the Interior, State and local governments, learned societies, academic institutions, and historical, patriotic, philanthropic, civic, and professional groups, and bar associations.

(d) The Commission may, in carrying out the purposes of this Act, delegate authority to State advisory commissions to assist in implementing this Act.

(e) Within two years after the date of enactment of this Act, the Commission shall submit to the President and each House of the Congress and the Judicial Conference a comprehensive report incorporating specific recommendations of the Commission for commemoration and coordination of the bicentennial and related activities. Such report shall include recommendations for publications, scholarly projects, conferences programs, films libraries, exhibits, ceremonies, and other projects, competitions and awards, and a calendar of major activities and events planned to commemorate specific historical dates. Each year after such comprehensive report, the Commission shall submit an annual report to the President and each House of the Congress and the Judicial Conference until such Commission terminates.

TERMINATION

SEC. 7. The Commission shall terminate on December 31, 1989.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. There are authorized to be appropriated $300,000 for fiscal year 1983 and such sums as may be necessary for the subsequent fiscal years through fiscal year 1989.

Mr. BAKER. Mr. President, I ask unanimous consent that the committee amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, the committee amendments are considered and agreed to en bloc.

UP AMENDMENT NO. 1365

Mr. BAKER. Mr. President, I send an amendment to the desk on behalf of the distinguished Senator from South Carolina (Mr. THURMOND), and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. THURMOND, proposes an unprinted amendment numbered 1365.

Mr. BAKER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 1, following the word "Senate" insert the following: ", in consultation with the Majority Leader and Minority Leader of the Senate,".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1365) was agreed to.

Mr. HATCH. Mr. President, September 17, 1987, will be the 200th anniversary of the approval in Convention of the Constitution of the United States of America. Perhaps the significance of this historic event is best summarized by the findings in section 2 of S. 2671:

SEC. 2. The Congress finds that—

(1) The bicentennial of the Constitution Convention's adoption of the Constitution occurs on September 17, 1987;

(2) The Constitution enunciates the limitations on government, the inalienable rights of man, and the timeless principles of individual liberty and responsibility for the people of the United States of America;

(3) This document has set an enduring example of representative democracy for the world; and

(4) The maintenance of the common principles that animate our republic depend upon a knowledge and understanding of their roots and origins.

At the time of the Constitution's centennial commemoration, President Grover Cleveland remarked:

If the American people are true to their sacred trust another centennial day will come, and millions yet unborn will inquire concerning our stewardship and the safety of their Constitution. God grant they may find it unimpaired and as we rejoice today in the patriotism and devotion of those who lived 100 years ago, so may those who follow us rejoice in our fidelity and love for constitutional liberty. Public Papers of Pres. Cleveland, address of Sept. 17, 1887, in Philadelphia.

We are now swiftly approaching the second centennial of the Constitution when President Cleveland promised that "millions yet unborn" would "rejoice" because the American people have been "true to their sacred trust." Just as the United States paused a century ago under the leadership of President Cleveland to examine the "patriotism and devotion of those who lived 100 years" earlier and to chart a course for "those who follow," the bicentennial of the Constitution offers anew an opportunity for the Nation living under that document to educate itself, to evaluate itself, and to rededicate itself.

This educating, evaluating, and rededicating experience will be vital to insure that "those who follow us" a century hence will "rejoice in our fidelity and love for constitutional liberty."

The hearing held by the Constitution Subcommittee highlighted the importance of this bicentennial commemoration to educate, evaluate, and rededicate Americans to our constitutional Republic. The dire need for nationwide education about our system of constitutional freedoms was established by Mr. Richard B. Morris, professor of history emeritus, Columbia University:

Granted the Constitution's central place in American political life, it is hardly disputable that the public's understanding of the Constitution is at a low ebb, and that young people completing high school take with them an abysmal sum of ignorance about the constitutional system of this Nation.

In the two national assessments of performance on citizenship, made first in 1969 and the second as recently as 1976, it was disturbing to find that test scores declined. More disturbing was the revelation that scores on citizenship and social studies declined more than those in reading, writing, and science. The declines for the 17-year olds were by and large greater than for the 9-year olds and the 13-year olds.

Half the students of each age thought that the President could appoint Members of Congress. Only a little more than half of the 17-year olds and 32 percent of the 13-year olds knew that each State has two Senators. Less than half of the 17-year olds and less than one-fourth of the 13-year olds knew that appointments to the Supreme Court must be confirmed by the Senate, while a big majority of the 17-year olds felt that a two-thirds vote by the justices of the Supreme Court was necessary to declare a law unconstitutional. Hearing before the Subcommittee on the Constitution of the Senate Judiciary Committee on the Establishment of a Commission on the Bicentennial of the Constitution, 97th Cong., 1st Sess., Sept. 17, 1981 (hereinafter "Hearing").

This bicentennial offers an opportunity to correct this educational problem and foster a better understanding of our representative government. Because ours is a "government of the people, by the people, for the people," its function and survival very directly depend on the capacity of the people to convert an understanding of our constitutional system into self-government and citizen participation. The Republic depends on citizens to vote responsibly, to hold public offices, to serve in the Armed Forces, to give testimony at public hearings, to participate in juries, to engage in discussions of public affairs, to offer voluntary service in community settings, and to raise the responsible citizens of the future in family settings. Without a working knowledge of our charter of freedoms and voluntary activities in conjunction with such understanding, our participatory Government would soon perish. Our Government is only as strong as the understanding and will of the people who comprise it. In a very real sense, the educational aspect of this bicentennial commemoration is a "national defense" program.

This bicentennial offers also the opportunity to evaluate the successes of our governing institutions since their inauguration in 1787. The Founding Fathers set forth standards for assessment. They expected the "self-evident truth that all men are created equal" to guarantee that all "are endowed by their Creator with certain inalienable rights," including the rights to "life, liberty, and the pursuit of happiness." Indeed, they asserted, "that to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed." They further expected their efforts "to form a more perfect Union, establish justice, insure domestic Tranquility, provide for the common defense, promote the general Welfare, and secure the blessings of liberty." The success of our institutions could well be judged by how well they have accomplished these objectives. Such an assessment could only teach profound respect for the wisdom and insight of our Founding Fathers.

Finally, the bicentennial offers the opportunity for the American people to rededicate themselves to the common principles that have formed the basis for our national stength and prosperity. In the words of Gen. William C. Westmoreland:

As we begin the third century of the United States of America, the American people should renew their knowledge about our heritage and should rededicate themselves to the maintenance of a republic under the Constitution. Hearing, supra.

The Constitution, paradoxically, grows and becomes more effective over time not through a process of change and evolution, but instead through a process of study and application of its unchanging principles. The growth and effectiveness of the Constitution is most evident in the dedication of Americans to its changeless tenets. The Constitution has proven durable—not because it is an evolving or flexible document but because it addressed principles that were enduring and because it created institutions that were in accord with the realities of man's existence. (Hearing, supra.)

This time of rededication will, in a sense, strengthen the Constitution and its ability to perpetuate our system of ordered liberty.

Each of these purposes for a commemoration of the Constitution and a comprehension that "the maintenance of the common principles that animate our republic depend upon a knowledge and understanding of their roots and origins" were eloquently summarized by Senator CHARLES MCC. MATHIAS, a sponsor of S. 2671:

The Founding Fathers were able to distill their knowledge of the history of mankind in a way that resulted in the provisions of the Constitution. They had obviously read Herodotus . . . They had read the "Spirit of Laws" by Montesquieu. They knew Locke; they knew all of the great authors of both political theory and historical fact.

It is as the result of their knowledge and their preparation that we have a Constitution. It is . . .

A great Constitution; but it . . . has to be implemented day by day by the men and women of the United States of America . . .

We cannot implement the Constitution in the spirit in which it was written unless our knowledge of it is as intimate as the knowledge of the members of the Constitutional Convention . . .

Issues present themselves which demand resolution against the framework of the Constitution. We will be inadequate to the job of resolving those issues unless we know as much about the Constitution as the delegates to the Convention who wrote it.

Therefore, . . . it is vital that we stimulate interest . . . in its origins and antecedents and its spirit. Hearing, supra.

Thus, education, evaluation, and rededication are essential to focus America's attention on the legacy they inherited from those who lived 200 years ago and on their responsibility to pro-

tect it for those who will live 200 years in the future.

The hearing held by the Constitution Subcommittee devoted considerable attention to the question of the role to be played by the Federal Government in the bicentennial commemoration. Although conclusions about the degree of Federal involvement varied, all witnesses and Senators on the committee agreed that, in the words of Mr. Ronald Hoffman, Symposia Director, U.S. Capitol Historical Society:

> It is, after all, the anniversary of the founding of the National Government that we are celebrating in the bicentennial of the Constitution. Hearing, supra.

Therefore, the Federal Government should play at least some role in the commemoration of its own birth.

Federal involvement is also necessary for several practical reasons. Because no enterprise is likely to reach its own objectives without adequate planning, the essential goals of this commemoration depend on coordination and planning that will probably only be undertaken by a Federal body. Private and state authorities should not be responsible to undertake a project to coordinate the commemoration of the birth of the Federal Government, but will undoubtedly look to the Government itself to undertake the task. With all private and state entities deferring to the Federal Government, advance planning is likely to be postponed until too late. Already we are only 5 years away from the commemorative date for the Constitution and only 3 years away from the anniversary of the Mount Vernon Commercial Conference that was an important step toward the monumental meeting of the Constitutional Convention in Philadelphia May 25, 1787. If planning and coordination is to be undertaken in a timely fashion, the Federal Government will need to inaugurate the process.

A Federal presence in the commemoration effort is also necessary to attract funding from private corporations and foundations. In the absence of a demonstration of interest by the Federal Government, private sources of funding may not be easily persuaded of the importance of supporting this commemoration as they so generously backed the bicentennial of the Declaration of Independence.

Perhaps the most important reason for Federal involvement, however, was best stated by Gen. William Westmoreland:

> The Federal Government must be involved so that all the people throughout this Nation—from the people in Lexington and Concord, Mass., where the revolution began to the modernday pioneers on the frontiers of Alaska; from the descendants of the Jamestown settlers to the Vietnamese boat people; from the citizens of Northeastern Maine to the residents of Niihua Island in Hawaii—realize the great heritage of democracy and personal freedom formulated by the Constitutional Convention in 1787 and protected and strengthened by following generations.
>
> Only when there is a national focus can there be a genuine general commemoration or rededication at the 200th anniversary of the fundamental documents which have formed and maintained our democratic Government. Hearing, supra.

If this is to be a successful national celebration of all the people, then the only entity which expresses the will of all the people of the United States must acknowledge the anniversary of the document which has guaranteed the liberties of those people.

Accordingly, after months of contemplating the appropriate degree of Federal commitment to this objective, all Senators on the Subcommittee on the Constitution joined me in the introduction of S. 2671, a bill to establish a commission to coordinate the commemoration of the bicentennial of the Constitution. This bill contemplates a modest role for the Federal Commission of encouraging and coordinating commemoration activities.

S. 2671 further contemplates a commemoration consisting of more enduring activities than a series of pyrotechnic displays and parades. While celebrative activities are important to rekindle our national pride in the Constitution, a national reexamination of our Nation's common principles and their embodiment in the language of the Constitution is perhaps more important.

S. 2671 is true to the Constitution's enlightened principle of Federalism by recognizing a pivotal role for the States. The Federal Bicentennial Commission, under the plan envisioned in S. 2671, will play an important role as a coordinator, but will only undertake a "limited number" of worthy projects. States, on the other hand, should perceive no limits on the activities within the will of their citizens. The Federal Commission should encourage such State activities.

S. 2671 is also true to the Constitution's principle of limited national government in that it recognizes a leading role for the private sector. Private organizations throughout the Nation and in every community will perhaps carry the greatest weight in making this commemoration significant. The Federal Commission should encourage such private activities to make the Constitution's message meaningful in each of America's communities and homes.

S. 2671 is also true to the Constitution's respect for a diversity of thought and expression. The Federal Commission created by S. 2671 will not espouse any single, narrow view of what is most important about the Constitution or its historical development. The Federal Commission's focus should be the men and events of 1787, not controversial interpretations of 1987; the Federalist Papers and the ratification debates in the States, on the textbooks of modern law schools; the substantive provisions of our Nation's foundation document, not the proposed legislative agenda of any single party or group.

One final observation argues strongly for creation of a commission to commemorate the bicentennial of the U.S. Constitution. This point calls to mind the Declaration of Independence and the celebration of its bicentennial 6 years ago. The culmination moment of that celebration came on July 4, 1976, when we as a nation paused to rejoice and reflect upon the document that enunciated the intent of the American people to be free. We are all familiar with the aspirational language of that document:

> We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness.

With this elevating affirmation of purpose, the former colonies of Britain in the new world embarked on a course that would produce the United States of America. A war, a loosely bound confederation of sovereign States, and 11 difficult years came between the aspirations of the declaration and the contract between the people and the States to carry out its noble objectives.

These two documents, the declaration and the constitution, launched the free peoples of America upon a course of self-government—a course we have learned is fraught with responsibilities and obligations as well as opportunities and liberties. In the words of Abraham Lincoln:

> All this is not the result of an accident. It has a philosophical cause. Without the Constitution and the union, we could not have attained the result; but even these are not the primary cause of our great prosperity. There is something back of these, entwining itself more closely about the human heart. That something, is the principle of "Liberty to all"—the principle that clears the path for all—gives hope to all—and, by consequence, enterprise and industry to all. The expression of that principle, in our Declaration of Independence, was most happy and fortunate. (Fragment on the Constitution," Lincoln, A., quoted in "The Living Constitution," Padover, Saul, p. 65.)

As Lincoln realized, the declaration expressed the goal, the motivating philosophy; the Constitution created the structure to "attain the result." In one sense, the declaration was the "end," the Constitution the "means" of the American experiment in self-rule.

This brief discussion of the interrelationship between these two documents is relevant to S. 2671 because the United States has already committed vast resources to commemorating the inauguration of our independence with the signing of the "ends" docu-

ment. Soon the bicentennial of the signing of the "means" document will be upon us. S. 2671 does not ask for vast resources, but it does ask the Federal Government to recognize what Prime Minister William Gladstone of Britain, on the occasion of the Constitution's centennial, called:

> The most remarkable work known to me in modern times to have been produced by the human intellect.

At this point, I would like to share with my colleagues a brief and incomplete sketch of the history of the Constitution. Perhaps no history of the Constitution can ever be complete because countless lives and countless generations have contributed to its making. Nonetheless as we add daily to the history of the Constitution in this body formed pursuant to that document, we should pause occasionally to consider from another vantage point the origin of the foundation of our Republic.

A BRIEF SKETCH OF THE CONSTITUTION'S MAKING

The roots of the U.S. Constitution stretch back centuries: at least as far as the Magna Carta.

Though historical records are fragmented, it is evident that the early Anglo-Saxons who inhabited the British Isles claimed the right to be governed by written law. Theirs is a history filled with struggles against magistrates and Kings who from time to time seemed to usurp unreasonable authority from the people. During one of these disputes in 1215 A.D., feudal barons managed to force a great charter of rights; the Magna Carta, upon a reluctant King. This early document, which later formed the basis for English common law as well as providing ideas and phrases for the American Constitution, declared as "law of the land," fundamental, individual rights to liberty. Using the principles spelled out in the Magna Carta as a precedent, over a period of six centuries the Anglo-Saxon concepts of freedom were eventually extended to all English subjects. Two acts of Parliament, the Petition of Right of 1628 and the Habeas Corpus Act of 1679, for instance, quoted directly from charter in order to justify the validity of their legislation: "[N]o freemen shall be . . . imprisoned or [dispossessed . . . except by the lawful judgment of his peers [and] by the law of the land."

Among the other principles enumerated in the Magna Carta were the rights to assembly, representative government, petition of the government for grievances, bearing arms, trial by jury, religious freedom, and freedom of speech.

The English Bill of Rights, adopted by Parliament in 1688, provided even stronger and more specific guaranties against tyranny. In effect, it ratified many of the principles set forth in the Magna Carta, reasserting that the King, like his subjects, was bound to follow the law. No longer could the Crown arbitrarily dispense with the law in certain cases or suspend laws without Parliament's consent. Only Parliament, as a representative body of the people, could authorize new taxes for the maintenance of a peacetime army. The English Bill of Rights, however, notably excluded guaranteed liberties for the common man. Instead, it enumerated the rights and privileges of the nobility and gentry, vis a vis the Crown.

The preservation of the status quo caused even larger groups of English "commoners" to seek out freedom within the colonies of America. Although many left England embued with a love for written and binding constitutions, they were determined to remake their lives according to Constitutional principles that would also protect the common man. Jamestown, the first permanent British settlement in North America, established the first representative government on the continent in 1619. Meanwhile, in 1620, the Pilgrims, led by William Bradford, landed at Plymouth with a form of government already drawn up, known as the Mayflower Compact, and conceived for "just and equal laws". Nearly 170 years later, the Compact was a source of inspiration to the Framers of the United States Constitution.

As even larger numbers of immigrants journeyed to the American continent, experience with self-rule diversified.

The Constitution that would be framed during the summer of 1787 did not spring out of whole cloth, but was the product of nearly two centuries of colonial experimentation with self-government.

Virginia, Pennsylvania, and Massachussetts provide examples of continued refinements in colonial government before the Federal constitution. In Virginia, as already noted, elected representatives first met in a General Assembly in 1619 along with the governor and his council. The ordinance which authorized this new government ordered that "the forms of the law, customs and manner of trial, and the administration of justice used in the realm of England as near as may be" should be organized. Modeled after the laws of England as revised since the Magna Carta, Virginia established the first written constitution in the American colonies. This Virginia document created a General Assembly patterned after the English Parliament, which functioned until the Revolution initiating such legislation as land reform and taxation while remaining accountable to the people by way of the election process. As the verbal conflict between England and the colonies intensified, the General Assembly in Virginia began to call for more definitive protections of their "inalienable rights". Following the outbreak of hostilities, former members of the assembly such as George Mason, Patrick Henry, and James Madison, met in 1776 to draft a State document with constitutional guarantees that later served as a model for other states. A "Declaration" or "Bill" of rights served as preamble to the new Virginia constitution and included fundamental liberties that dated back to the Magna Carta as well as others made necessary by English colonial domination. Moderate bail and humane punishment; timely trials by jury, militias rather than standing armies, and freedom of conscience were derived from the Magna Carta while freedom of the press, free elections, majority rule, and other protections grew out of the colonial experience under English rule. These rights, of course, were later incorporated into the Federal constitution.

In 1682, the colony of Pennsylvania was founded by Quaker William Penn as a "holy experiment". He attracted large numbers of colonists with his promise of religious freedom, liberal government and inexpensive land. Penn himself provided Pennsylvania with its first constitution—the Frame of Government—which was revised and approved by the newly established legislature in 1683. The constitution provided for a bicameral legislature made up of a provincial council and a general assembly. Laws initiated by the appointed members of the provincial council were subject to veto by the elected members of the assembly. In 1701, during Penn's last visit to Pennsylvania, he instituted a new constitution, known as the charter of Privileges, which granted the chief lawmaking responsibility to the assembly. By the time of his death in 1718, Penn had succeeded in establishing a harmonious, democratic society in which almost complete religious freedom reigned. In 1778, Pennsylvania sought to draw up a constitution which adhered even more closely to democratic ideals. Led by George Byran, Thomas Young, and Benjamin Franklin, the framers abolished the provincial council as well as the property requirement for voting and office-holding.

Thus the experience of Pennsylvania greatly influenced the framers of the Federal Constitution. The early Pennsylvania system provided a model of religious freedom and majority rule as well as a system of separation of powers and checks and balances.

In Massachusetts, of course, colonial inspiration for the Federal Constitution originated with the Mayflower Compact. The Pilgrim philosophy of self government by "the body Politick" likewise extended to the Massachusetts Bay Colony who, in 1634, instituted a bicameral legislature to ini-

tiate and pass laws with the lower house elected by the people and granted the bulk of the legislative authority. Twelve years later, the General Court of Massachusetts submitted its governmental charter to the English Parliament, explaining that "for our Government itself, it is framed according to our charter, and the fundamental and common laws of England, and conceived according to the same."

Shortly after the "shot heard around the world" in Lexington Massachusetts, the colonial legislature deposed its British governor and transformed itself into a "provincial congress" concerned mainly with raising, equipping, and directing the Revolutionary militia. At the same time, however, this Congress formulated a state constitution which was submitted to the people. Because of its poor wording, the voters rejected it overwhelmingly. The Massachusetts Congress then devised another plan whereby they asked the people if they wanted a constitutional convention. In their town meetings, the voters agreed and elected representatives to draft a new constitution which was then returned to the people for discussion and a vote, the convention was empowered to ratify it by a two-thirds majority, which they did.

This deliberate ratifying process lasted more than 5 years and served as a procedures model for the national delegates meeting at Philadelphia in 1787. The concept of a constitutional convention, a written constitution, and popular ratification brought civility to the Revolution.

The spark which fostered cooperation between the separate colonies and eventually culminated in the Declaration of Independence did not, at first, come from a general discontent with the mother country. Indeed, the original impetus for intercolonial cooperation was almost exclusively derived from the need for a common defense. Both Indians and foreign powers posed a threat from the west as well as from the north and south. Troops, monies, and supplies had to be raised in a joint effort to protect all 13 English colonies. In addition, although the British regulated intercolonial commerce and exercised total control over intercolonial and foreign affairs, the colonists, bound by a common language and heritage, felt the need to promote interests which crossed colonial borders.

The first example of such cooperation occurred in 1643 with the union of Massachusetts Bay, Plymouth, Connecticut, and New Haven into the New England Confederation. Their united charter called for a firm and perpetual league of friendship and amity for offense and defense, mutual advice and succor, upon all just occasions, both for preserving and propagating the truth and liberties of the Gospel and for their own mutual safety and welfare.

A few years later Virginia, New York, and the New England Colonies made a similar treaty of mutual protection, friendship, and commerce. Virginia militiamen also came to the aid of the Carolinas on frequent occasions to assist against Indian attack.

By 1754, only 2 years before the start of the French and Indian War, many colonists seemed to sense the need for a permanent, federation which could provide for common protection. As a result, the British allowed an intercolonial conference to be held in Albany, N.Y. for the purpose of bringing the colonies under "articles of union and confederation with each other for mutual defense of his majesty'{ subjects and interests in North America in time of peace as well as war." Although the delegates, led by Benjamin Franklin, unanimously concluded that confederation was "absolutely necessary for their security and defense", neither the British Government nor the colonies actually enforced the "Albany Plan" provisions. Nonetheless, the plan provided for a workable, democratic form of intercolonial government that perhaps frightened the British leaders who had originally sanctioned the conference. The plan called for a general council of 48 members elected by the assemblies of the various colonies. The number of representatives from each State would be determined according to population and wealth. The legislature had authority to levy taxes "as appear equal and just" to support a militia, facilitate commerce, and effectively run the Government. The president of the united American colonies would be appointed by the Crown.

As British rule in colonial America became more oppressive, the colonies also began to unite spontaneously in their opposition to the Crown. Though passive at first, resistence eventually became more widespread and interspersed with violence. Even before the end of the French and Indian War, two court cases demonstrated just how far apart the colonists and the Crown were in their interpretation of the British Constitution. The first was the 1761 Writs of Assistance Case in which James Otis nearly convinced the Superior Court of Massachusetts that a general search warrant without an expiration date was unconstitutional. After the Court upheld the search authority, however, the messengers of the king were effectively prevented from carrying out their search orders because of mob intimidation. The second event was the 1763 Parson's Case in which Otis and Patrick Henry managed to persuade a Virginia court that both parliamentary and royal authority could at times be declared null and void on constitutional grounds. Both of these cases illustrated the increasingly incompatible philosophies of the American and English leadership with regard to individual rights and the Constitution.

After the French and Indian War, Parliament began to impose a series of taxes on the Colonies in order to support the large contingency of British forces stationed in America. The colonists, who already objected to quartering British troops in their homes, rose up in open rebellion against "taxation without representation". A complete British crackdown on individual liberty and free trade in retaliation for the famous "Boston Tea Party" of 1773 galvanized colonial determination to free themselves from "foreign" domination. In 1774, the First Continental Congress met in Philadelphia to decide the fate of the Colonies. At first, cooler heads prevailed and the Congress merely issued a statement that colonial opposition to recent acts of Parliament was necessary in order to preserve the spirit of the British Constitution. Following the clash of British troops with colonial militiamen in Lexington and Concord, however, Congress called on the militias in each Colony to prepare for the possibility of war. At the Second Continental Congress in June of 1775, George Washington was commissioned as Commander in Chief of the Continental Army.

As the war began in earnest, the great majority of the colonists seemed to favor independence. The Congress, on July 2, 1776, ratified the will of the people. Thomas Jefferson was thereby assigned the task of writing a Declaration of Independence which would outline the objectives of the new Republic and later be implemented into an American Constitution. Two days later, on July 4, 56 of the 58 Members of Congress pledged their "lives, . . . fortunes . . . and sacred honor" to the ennobling principles of that great document, the aspirational language of which we are all familiar:

> We hold these truths to be self-evident that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness.

The Declaration decried the abuse which the British Crown had inflicted and further declared:

> Whenever any form of government becomes destructive to these ends, it is the right of the people to alter or abolish it, and to institute new government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness.

With this elevating affirmation of purpose, the former Colonies of Britain in the New World embarked on a course that would produce the United States of America. The Declaration set forth the aspirations of the American people to establish a government of

liberty. At the time, those two words, "government" and "liberty" were mutually exclusive. The world knew powerful central governments which required citizens, or more accurately, subjects, to give all fealty to a sovereign leader or group of leaders. The struggle to find a form of government that protected, rather than abridged, liberty really began in 1776. Thus, the American Constitution would later become the "means" for carrying out the "ideal" capsulized in the Declaration.

The Articles of Confederation, ratified in 1781, merely legalized the powers that Congress had exercised since before 1775. Soon after its approval, weaknesses in the Articles of Confederation became apparent. For example, revenue, even for national defense, was not forthcoming. Congress under the Articles of Confederation lacked authority to levy taxes. It could request contributions by the States to help with the common debt, but in no way could compel contribution. Another weakness was the "liberum Veto" which each State possessed in relation to any legislation. Furthermore, Congress lacked authority to secure compliance with its laws and, therefore, found it difficult to negotiate with foreign powers. Disputes between States were prevalent due to the Congress' lack of authority to regulate foreign or interstate commerce.

Such a dispute over interstate commerce led to what has become known as the Mount Vernon Conference in March of 1785. Maryland and Virginia, in dispute over the waterways of the Potomac River, formed a commission to establish regulations that would be advantageous to both States. General George Washington invited the Commissioners to meet at Mount Vernon. While at this conference the Commissioners drafted a proposition for a future convention of all the States "to take into consideration the trade and commerce" of the Confederation. This proposal of a trade convention was well accepted by the various States. Nine States appointed Commissioners to the convention. Annapolis was designated as the place and the first Monday in September 1786 as the time. Attendance at the the convention turned out to be disappointing. Only five States—Virginia, Pennsylvania, Delaware, New Jersey, and New York—were represented with no Commissioners present from Massachusetts, New Hampshire, North Carolina, or Rhode Island.

Despite the poor attendance, the delegates met and, after an exchange of views, drafted a report to be submitted to the various States carrying a suggestion that a convention of representatives from all the States meet at Philadelphia on the second Monday in May of 1787 to review the problems in the existing government and formulated "a plan for supplying such defects as may be discovered."

New York and other States were reluctant to attend, fearing such a convention would be extra-legal without Congress' consent. After some hesitation Congress approved the Philadelphia convention with specific limitations:

> For the sole and express purpose of revising the Articles of Confederation and reporting to Congress and the several legislatures such alterations and provisions therein as shall when agreed to in Congress and confirmed by the States render the Federal Constitution adequate to the exigencies of Government and preservation of the Union.

Twelve States accepted the invitation of Congress and sent delegates to Philadelphia for the express purpose of "revising the Articles of Confederation." Although Rhode Island refused the invitation to appoint delegates to the Convention, a committee representing significant interests within the State sent a letter to the Convention promising to support its work.

Sixty-two delegates were appointed; 55 attended some of the sessions of the Convention; 39 put their names to the Constitution when completed. Most of the work was accomplished by 30 of the members.

Neither the Annapolis Conference nor the invitation of Congress had specified any particular procedure by which the delegates should be chosen. Since appointment by the State legislature was the method generally employed in selecting Representatives in Congress, it was adopted, in every State, as the means by which the delegates to the Convention were chosen.

Several men of notable influence who were chosen declined the invitation based on their suspicion that far more than a revision of the Articles was planned in Philadelphia. For example, the venerable Patrick Henry declined to attend because he "smelt a rat."

Among the delegates were men with wide experience in government and business. Half of them were lawyers or government officials trained in law. More than two-thirds had served in the Continental Congress. Some were governors. Many were highly educated and were scholars. Half of them were college graduates. The average age was forty-two, the oldest, Benjamin Franklin, being eighty-one, and the youngest, Jonathan Kayton, twenty-seven. Eight of them had signed the Declaration of Independence 11 years before. Their viewpoints ranged all the way from the tough conservatism of Alexander Hamilton, who thought that the best government was an aristocracy, to the warm democracy of James Wilson, who was dedicated to the idea of government by the people. But in spite of the immense diversity of outlook, the delegates shared a common American culture, a common language, and a common respect for the law against the whims of personal tyranny. Above all, most of them shared the great eighteenth-century belief in reason and regard for the individual. As reasonable men they could argue vehemently for their particular points of view, and as cultured gentlemen they were bound to come to a working compromise.

The start of the Convention was delayed until May 25, nearly 2 weeks after the date set for its meeting, as a result of both bad weather and the tardiness of some of the delegates in arriving.

At the beginning of the Convention, George Washington was unanimously elected President after Benjamin Franklin, Washington's only competition, nominated him to the position. Several days later, the rules of procedure were adopted. In line with the existing procedure employed by the Congress of the Confederation, each State, it was decided, would have one vote. The greatest political cleavage that existed in both the country and the Convention was between the large and small States over the most equitable means of apportioning representation in Congress, equally or on the basis of population size. In the actual convention the smaller States were given the advantage of an equal vote.

Seven States were needed to constitute a quorum. It was also decided to impose a rule of secrecy around the Convention in hopes that outside influence and pressure would be minimized by barring knowledge of the proceedings from the general public. This rule of confidentiality agreed to by the delegates at Philadelphia was strictly observed.

The official journal and other papers from the Convention were delivered to Washington just after the Convention and, in 1796, were deposited by him in the Department of State. Congress ordered these to be published in 1818, at which time John Quincy Adams, then Secretary of State, undertook the task of editing the information for publication. The final product was published in 1819 under the title "Journal, Acts and Proceedings of the Convention." This work proved disappointing at best in yielding any actual insight into the dynamics of the Convention. James Madison, however, had also kept extensive and detailed notes of the Convention proceedings. Although he was unwilling to have them published during his lifetime, Congress purchased the papers after his death in 1836. Madison's Convention notes were published in 1840.

Madison has often been called the "father of the Constitution" because of his work on the Virginia Plan, a series of resolutions which were presented to the Convention on May 29 by Governor Randolph, from this plan

with many additions and compromises, evolved the Constitution as we know it. Madison's Virginia Plan included provisions for the creation of a bicameral legislature in which the States would be represented in proportion to their population, a single executive chosen by the legislature, and judiciary chosen by the upper House.

On May 30, the Convention went into a Committee to consider the 15 propositions of the Virginia Plan. On July 13, the Virginia resolutions were reported out of the Committee. The smaller States were not content with their report. Patterson of New Jersey presented a new plan to amend the Articles of Confederation. At this point, heated debate ensued with a threat by the smaller States to withdraw. The Convention was deadlocked over giving each State an equal vote in the upper House.

The problem was referred to a committee composed of one delegate from each State. On July 5 the committee submitted its report, which became the basis for what is known as the "great compromise." The report recommended that each State should have an equal vote in the upper House and that in the lower House representation would be dependent on population. Included in the compromise was the motion by Governeur Morris of Pennsylvania that direct taxation should be proportional to representation. With the adoption of this compromise the smaller States began to shift their position in favor of the new Constitution.

Debate on the Virginia resolutions continued. On July 24, a committee was formed to draft a Constitution composed of the principles that had thus far been approved. This committee in preparing their draft turned to a host of existing materials including the Articles of Confederation, State constitutions, and other plans presented to delegates. Thus, the Constitution was not only the work of these men, but the product of accumulated experience of the Colonies over hundreds of years of progress toward self-rule. The committee presented their work to the full Convention who went over it paragraph by paragraph until they had developed the next draft of the Constitution.

On September 12 after the report had been revised by the "style committee", it was ordered printed. After three days of review and comparison with the proceedings of the Convention, the Constitution was ordered engrossed on September 15.

The Convention met on September 17 for its last session. Many of the delegates were not totally pleased, 39 of the 42 present subscribed to the document. George Mason abstained because the document lacked a Bill of Rights. Benjamin Franklin's comment reflects well the general feeling that memorable day:

> . . . but I am not sure I shall never approve them. For having lived long, I have experienced many instances of being obliged by better information or fuller consideration, to change my opinions even on important subjects, which I once thought right, but found to be otherwise . . .
>
> In these sentiments, Sir, I agree to this Constitution with all its faults, if they are such; because I think a general government necessary for us . . . I doubt, too, whether any other convention we can obtain may be able to make a better Constitution. For when you assemble a number of men to have the advantage of their joint wisdom, you inevitably assemble with those men all their prejudices, their passions, their errors of opinion, their local interests, and their selfish views. From such an assembly can perfect production be expected? It therefore astonishes me, Sir, to find this system approaching so near to perfection as it does; and I think it will astonish our enemies, who are waiting with confidence to hear that our councils are confounded like those of the Builders Babel; and that our states are on the point of separation, only to meet hereafter for the purpose of cutting one another's throats. Thus I consent, Sir, to this Constitution because I expect no better, and because I am not sure that it is not the best . . .
>
> On the whole, Sir, I cannot help expressing a wish that every member of the convention who may still have objections to it, would, with me, on this occasion abate a little of his own infallibility—and to make manifest our unanimity, put his name to this instrument.

Article VII of the new Constitution provided that nine out of thirteen States would be needed to ratify. Many of the larger States, especially New York and Virginia, seemed to be against the Constitution. A great debate pursued between the defenders and opponents of the Constitution. Much of this debate occurred in journals, with a series of eighty-five essays by Madison and Hamilton on the defense and Richard Henry Lee's "Letters from the Federal Farmers to the Republican", on the attack.

On September 28, 1787, the Constitution was submitted to the people for their vote with this proclamation for the Congress:

> That the said report, with the resolution and letter accompanying the same, be transmitted to the several legislatures in order to be submitted to a convention of delegates chosen in each state by the people thereof, in conformity to the resolve of the convention made and provided in that case.

Most of the smaller states had no problem with ratification. On the other hand there was bitter debate in the larger states.

In Virginia, anti-Federalists Patrick Henry, George Mason, Richard Henry Lee, and James Monroe, were pitted against James Madison, George Wythe, and Edmund Randolph, and John Marshall. Hugh Williams along with Benjamin Franklin defended the document in Pennsylvania.

In Massachusetts Hancock and Adams gave no support while Elbridge Gerry was strongly opposed. Paul Revere in an attempt to persuade Samuel Adams in favor of the Constitution, gathered the mechanics in a meeting at the Green Dragon Tavern. In reporting the meeting to Adams, Revere persuaded Adams to alliance by citing the great numbers that attended the meeting. With Adam's endorsement Massachusetts ratified the Constitution.

In New York a great battle ensued. Hamilton, almost single-handedly fought the great powers of New York, Governor Clinton, Yates, Lansing, and Smith. It was not until nine States had ratified and New York realized it would be cut off that it ratified.

Despite the debates and concern over the lack of a bill of rights the Constitution of the United States was finally ratified by the nine states needed in 1788 and soon after the other states followed suit, including Rhode Island which ratified last in 1790.

This briefly traces the history of United States Constitution, the most remarkable piece of legislative work ever produced by man. The Constitution has served as a framework for the growth of a few small insignificant States into the greatest power in the world. If our citizenry are properly dedicated to its inspired principles, it should perpetuate the greatness of the American Republic for countless centuries for its virtues are all the virtues of a people free to govern themselves.

Mr. MATHIAS. Mr. President, I am pleased to speak in support of final Senate passage of S. 2671, a bill to create a Commission to commemorate the Bicentennial of the Constitution. I have been sponsoring legislation since the 94th Congress to achieve this purpose, and it is a source of great satisfaction to me to see S. 2671 on the floor of the Senate ready for final passage. From here it will go to the House of Representatives, where I trust it will receive prompt and favorable consideration.

A significant and thoughtful constitutional bicentiennial observance is of major importance to our Nation. In recent years, this country has suffered increasingly from civic apathy and "consititutional illiteracy." The steady decline in the number of Americans exercising their right to vote is a clear indication that large segments of the population need a refresher course in participatory democracy and, I fear, the significance of the Constitution itself. I am reminded of a survey conducted by a seventh grade bicentennial study class just before the American Revolutionary Bicentennial. Of almost 3,000 adults questioned, less than half could identify a famous quotation from the Declaration of Inde-

pendence. One actually attributed it to Edgar Allan Poe, others thought it came from the Bible, the Boy Scout Oath, Patrick Henry, Abraham Lincoln, or John Kennedy.

I tremble to think what a similar survey would reveal of our Nation's knowledge of the Constitution. That is why S. 2671 is so important. The constitution. That is why S. 2671 is so important. The constitutional bicentennial period will give us an opportunity to raise the level of the American consciousness about the content and meaning of the Constitution. It will be a time to celebrate the Constitution as a living, vibrant document, not some arcane vestige of a past outgrown. The bicentennial will provide us with an opportunity to remind the citizens of this Nation that the Constitution belongs to all Americans, regardless of race, age or wealth; it protects equally the descendants of the earliest settlers and the children of our most recent immigrants. The Constitution is the source of our most cherished rights and liberties, but it is not a self-executing contract. It has to be implemented day-by-day by the men and women of the United States of America. But, we cannot implement the provisions of the Constitution unless we understand them and the underlying principles which animated the Framers. Issues present themselves which demand resolution against the framework of the Constitution. We will be inadequate to the job of resolving those issues unless we know as much about the Constitution as the delegates to the Convention who worte it.

Mr. President, I believe that S. 2671 is an appropriate vehicle for a thoughtful and effective commemoration of the Bicentennial of the Constitution. If enacted, this legislation will help insure a commemoration that goes far beyond mere fanfare and a prosaic review of historical events. S. 2671 will establish a Commission made up of individuals who have demonstrated historical and constitutional scholarship, as well as civic responsibility and commitment to public service.

The membership of the Commission will reflect the tripartite system of Government established by the U.S. Constitution. In celebrating the birthday of the Constitution, we are, after all, celebrating the birth of the three branches of our Government as well. It was in recognition of this fact that I offered an amendment to S. 2671, which was accepted by the Judiciary Committee, extending the Commission's termination date to December 31, 1989. Thus, the Commission will oversee events commemorating not only the drafting and ratification of the Constitution, in 1787, but events central to the creation of our constitutional Government which occurred in 1789. The First Congress was officially organized on April 6, 1789, and, later that year, Congress first debated and passed the package of amendments that became the Bill of Rights. George Washington was inaugurated on April 30, 1789. The Departments of Treasury, State, and War were created in 1789 and the first Cabinet secretaries, Attorney General and Postmaster General, were appointed. The Federal Judiciary Act was passed on September 24, 1789, and the Justices of the Supreme Court were confirmed soon thereafter.

The Commission created by S. 2671 is essentially a central coordinating body which will encourage and direct State, local, and private initiative and participation in a dignified and substantive celebration of the constitutional bicentennial. S. 2671 does authorize the Commission itself to undertake a "limited number" of worthy projects; however, its primary and fundamental focus will be to act as a clearinghouse or central repository for bicentennial information, and as a coordinator of the many diverse activities taking place across the country. In this role, the Commission will prove an invaluable resource to those in the private sector and State and local governments planning Bicentennial events.

Many private groups and organizations have expressed interest in the Bicentennial observance; several have already started planning, and a few are even implementing specific commemorative projects. Representatives of a number of these organizations testified before the Constitution Subcommittee last September 17. Others have gotten in touch with my office and, I am sure, the offices of my colleagues, urging us to enact legislation creating a Bicentennial Commission without delay. These groups have been unanimous in declaring that a Federal presence is urgently needed.

At the subcommittee hearing last year, Marna Tucker, Maryland lawyer and chairman of the ABA's Commission on Public Understanding About the Law, stated that,

> Despite the most concerted efforts of the private sector, the challenge of promoting constitutional literacy can never be adequately addressed without Federal leadership. Such leadership is particularly and uniquely appropriate in this endeavor, for the Constitution is the law of the entire land and not the law of the particular States or particular constituencies.

The existence of a national coordinating body created by the Federal Government is not only appropriate but essential to the success of the bicentennial celebration. On an organizational level, the Commission will enable diverse groups to see their endeavors in a broader context. Ideas and materials can be shared to the mutual benefit of the participants, and, at the same time, duplication of effort can be avoided. On a more practical level, the existence of a congressionally mandated commission will lend these projects credibility and legitimacy as they seek private funds to support their efforts.

In my view, the $300,000 authorized annually by S. 2671 is a modest figure. It is considerably lower than amounts spent on comparable activities in the past, and notably less than the authorization figures in earlier constitutional bicentennial bills. In fact, President Reagan provided for an $800,000 authorization for such a commission in this year's budget. S. 2671 will encourage the spirit of "voluntarism" among big corporations interested in sponsoring bicentennial events. These corporations are unlikely to commit their resources to bicentennial activities in the absence of a clear Federal interest—that is why we need a commission. At the same time, small private organizations and local governments may have difficulty in determining what funds are available and how to go about obtaining them without the help of a central commission.

The Bicentennial of the Constitution is only 5 years away. We have already lost valuable time. We cannot delay any longer. We must start planning now. Therefore, I urge you to support final passage of S. 2671, so that we can be sure to provide this Nation with a meaningful celebration of the 200th anniversary of the document William Gladstone called, "the most wonderful work ever struck off at a given time by the brain and purpose of man."

Mr. THURMOND. Mr. President, I am very pleased that the Senate today is taking action on S. 2671, a bill providing for the establishment of a Commission on the Bicentennial of the Constitution. In only 5 years, we will be celebrating the 200th anniversary of this most important document. If we are to have a thoughtful and proper commemoration, we must begin to make appropriate plans. S. 2671, which is cosponsored by the entire membership of the Constitutional Subcommittee, as well as Senator MATHIAS, will provide a sound framework within which to plan for the celebration and commemoration of our Nation's most significant document.

This legislation would provide for the appointment of a 16-member commission, with representation from each of the three branches of Government, charged with developing a specific plan for the celebration of events leading up to the signing of the Constitution and the subsequent ratification process. The Commission will undertake a limited number of Federal projects but is also directed to encourage State, local, and private participation in planning various activities. This is an aspect of S. 2671 which I believe is worthy of emphasis. While

Federal involvement is necessary for a variety of reasons which are carefully outlined in the committee report, S. 2671 recognizes a pivotal role for State and local governments and for the private sector. This is not to be a celebration and commemoration planned and implemented solely by the Federal Government.

Mr. President, I would like to stress how important i believe this legislation to be. If properly planned and carried out, this commemoration of the Bicentennial of our Constitution will provide an opportunity for all American citizens to reflect upon the philosophical underpinnings of that document and to learn more about our system of government. It will also serve as a time for Americans to rededicate themselves to their country and to the enduring principles which have kept it strong. In his testimony before the Committee on the Judiciary last September, Gen. William C. Westmoreland—from my State of South Carolina—summarized these points well:

As we begin the third century of the United States of America, the American people should renew their knowledge about our heritage and should rededicate themselves to the maintenance of a republic under the Constitution.

Mr. President, S. 2671 has been carefully drafted to accomplish these purposes with a minimal amount of Government expense. It authorizes a small amount—$300,000—for fiscal year 1983 and such sums as are appropriate through fiscal year 1989. There would be a permanent staff of up to only five members, although the Commission would be allowed to hire temporary staff during rush periods. Finally, the Commission would have authorization to accept and utilize private donations of money, property, or personal services.

I thank my distinguished colleagues and chairman of the Constitution Subcommittee, Senator HATCH, for his fine work in the drafting of this bill and his efforts in encouraging its passage by the Senate. I sincerely hope that the House will take prompt action on this legislation. As I stated earlier, it is imperative that we begin to make appropriate plans for this historic event.

S. 2671, ESTABLISHING A COMMISSIONER ON THE BICENTENNIAL OF THE CONSTITUTION

Mr. LEAHY. Mr. President, when the new Government of the United States was formed after the American Revolution, there were only the Thirteen Original States. Across the continent stretched a vast territory which was sparsely settled. If the United States would grow, it had to expand into this area. Vermont was the first of the new States to join the Union. The people of Vermont, whose exploits during the Revolution at the Battle of Hubbardton and elsewhere had a definite impact on the outcome of the war, came into the United States as the 14th State in 1791 because of the guarantees of personal liberties and responsibilities under the Constitution.

In 5 years, the United States will celebrate the 200th anniversary of the Constitutional Convention and the transmission of the charter by the Continental Congress to the individual States for ratification. Over the 2 succeeding years, we will have the bicentennial of the ratification, the first meetings of this body and the House of Representatives, the election and inauguration of President Washington, the passage of the Federal Judiciary Act, the selection of the Chief Justice and his Associates, the first meeting of the Federal courts, and the drafting, adoption, and submission to the States for ratification of the Bill of Rights.

The approaching years, 1987-89, are extremely important not only in our history, but in the history of the world. We are already the oldest existing democratic government in the history of man. Our Constitution and Government have been models for representative governments on most of the continents of the world. The Federal Government, the States, private groups, and local governments should all take part in planning for its bicentennial.

Vermont, as the 14th State, recognizes that the commemoration of the drafting and adoption of the Consitution is just as important to Hawaii, the 50th State, as it is to Delaware, the 1st. The rights of citizenship granted under the Constitution belong to all of us, no matter where we live, no matter when we arrived, no matter what the color of our skin, or no matter what religion we practice.

The Consititution Bicentennial bill, which I cosponsored, would establish a Federal Commission to join with other groups in planning for this important event. The bill provides for a Commission representing the executive, legislative, and judicial branches of Government, as well as the Chief Justice and chairmen of the Judiciary Committees of the Senate and House of Representatives. The role of the Commission would be to plan, coordinate, and serve as a clearinghouse for all activities commemorating the Bicentennial of the Constitution.

In recoginition of general fiscal restraints, the Federal appropriation called for in the bill is minimal. The sum for operations in the first year will be $300,000, and the Commission is directed to seek private moneys for its operations.

We do not need frills or extravagance, and in place of expensive ceremonials, this Commission will stress homage to ideas—ideas that have shaped a nation and might well help save a world from chaos.

I am happy and proud that the Senate can begin the process of honoring the Constitution by acting on S. 2671 today.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 2671) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2671

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is established a Presidential Commission on the Bicentennial of the United States Constitution, hereinafter referred to as the "Commission".

FINDINGS

SEC. 2. The Congress finds that—

(1) the bicentennial of the Constitutional Convention's adoption of the Constitution occurs on September 17, 1987;

(2) the Constitution enunciates the limitations on government, the inalienable rights of man, and the timeless principles of individual liberty and responsibility for the people of the United States of America;

(3) this document has set an enduring example of representative democracy for the world; and

(4) the maintenance of the common principles that animate our Republic depend upon a knowledge and understanding of their roots and origins.

PURPOSE

SEC. 3. It is the purpose of this Act to establish a Commission to promote and coordinate activities to commemorate the bicentennial of the Constitution.

MEMBERSHIP

SEC. 4. (a) The Commission shall be composed of sixteen members as follows:

(1) thirteen members appointed by the President, three of whom shall be appointed upon the recommendation of the Speaker of the House of Representatives, three of whom shall be appointed upon the recommendation of the President pro tempore of the Senate, in consultation with the Majority Leader and Minority Leader of the Senate, and three of whom shall be appointed upon the recommendation of the Chief Justice of the United States;

(2) the chairman of the Committee on the Judiciary of the House of Representatives;

(3) the chairman of the Committee on the Judiciary of the Senate; and

(4) the Chief Justice of the United States.

(b) Such members shall be chosen from among individuals who have demonstrated scholarship, a strong sense of public service, and abilities likely to contribute to the fulfillment of the Commission.

(c) Members of the Commission shall be appointed for the life of the Commission.

(d) The Commission shall select a chairman from among its members who shall serve as Chairman for the life of the Commission.

(e) Eight members of the Commission shall constitute a quorum, but a lesser number may conduct meetings.

(f) A vacancy in the Commission shall not affect its powers, and shall be filled in the same manner in which the original appointment was made.

ADMINISTRATIVE PROVISIONS AND POWERS

SEC. 5. (a) The Commission shall appoint a staff director who shall be paid at a rate not

to exceed the rate of basic pay provided for level V of the Executive Schedule pursuant to section 5316 of title 5, United States Code.

(b) The Commission is authorized to appoint and fix the compensation, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, of such additional publicly paid personnel up to five persons, as the Chairman finds necessary to carry out the purposes of this Act. Such personnel shall be compensated at a rate not to exceed a rate equal to the maximum rate for GS-18 of the General Schedule under section 5332 of title 5, United States Code. The Commission may hire additional personnel out of private donations.

(c) Each member of the Commission shall serve without compensation, except that each member shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties.

(d) The Commission may procure temporary or intermittent services under section 3109(b) of title 5, United States Code, at a rate of pay not to exceed the rate of basic pay for GS-15 of the General Schedule under section 5332 of title 5, United States Code.

(e) The Commission is authorized to procure supplies, services, and property, and make contracts, in any fiscal year, only to such extent or in such amounts as are provided in appropriation Acts.

(f) The Commission is authorized to enter into agreements with the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Chairman and the Administrator of the General Services Administration.

(g) The Commission is authorized to accept, use, solicit, and dispose of donations of money, property, or personal services.

(h) The Commission may use the United States mails in the same manner and upon the same conditions as other departments and agencies of the United States.

(i) The Commission shall have the authority to design and use a logo as the official emblem of the bicentennial. The Commission shall issue rules and regulations regarding the use of such logo, as they deem appropriate to carry out the purposes of this Act.

DUTIES OF THE COMMISSION

SEC. 6. (a) The Commission shall—

(1) plan and develop activities appropriate to commemorate the bicentennial of the Constitution, including a limited number of projects to be undertaken by the Federal Government seeking to harmonize and balance the important goals of ceremony and celebration with the equally important goals of scholarship and education;

(2) encourage private organizations, and State and local governments to organize and participate in bicentennial activities commemorating or examining the drafting, ratification, and history of the Constitution and the specific features of the document;

(3) coordinate, generally, activities throughout all of the States; and

(4) serve as a clearinghouse for the collection and dissemination of information about bicentennial events and plans.

(b) In planning and implementing appropriate activities to commemorate the bicentennial, the Commission shall give due consideration to—

(1) the historical setting in which the Constitution was developed and ratified, including such antecedents as the Federalist Papers, the Articles of the Confederation, and the ratification debates in the States;

(2) the contribution of diverse ethnic and racial groups;

(3) the relationship and historical development of the three branches of the Government;

(4) the importance of activities throughout all of the States regardless of when such State achieved statehood;

(5) the unique achievements and contributions of the participants in the Constitutional Convention of 1787 and the State ratification proceedings;

(6) the diverse legal and philosophical views regarding the Constitution;

(7) the need for reflection upon both academic and scholarly views of the Constitution and the principle that the document must be understood by the general public;

(8) the substantive provisions of the Constitution itself; and

(9) the impact of the Constitution on American life and government.

(c) The Commission shall seek the cooperation, advice, and assistance from both private and government agencies and organizations, including the National Endowment for the Arts, the National Endowment for the Humanities, the Library of Congress, the Smithsonian Institution, the National Archives, the Department of the Interior, State and local governments, learned societies, academic institutions, and historical, patriotic, philanthropic, civic, and professional groups, and bar associations.

(d) The Commission may, in carrying out the purposes of this Act, delegate authority to State advisory commissions to assist in implementing this Act.

(e) Within two years after the date of enactment of this Act, the Commission shall submit to the President and each House of the Congress and the Judicial Conference a comprehensive report incorporating specific recommendations of the Commission for commemoration and coordination of the bicentenial and related activities. Such report shall include recommendations for publications, scholarly projects, conferences, programs, films, libraries, exhibits, ceremonies, and other projects, competitions and awards, and a calendar of major activities and events planned to commemorate specific historical dates. Each year after such comprehensive report, the Commission shall submit an annual report to the President and each House of the Congress and the Judicial Conference until such Commission terminates.

TERMINATION

SEC. 7. The Commission shall terminate on December 31, 1989.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. There are authorized to be appropriated $300,000 for fiscal year 1983 and such sums as may be necessary for the subsequent fiscal years through fiscal year 1989.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I should like to proceed to the consideration of a message from the House on S. 1018, if the minority leader has no objection.

Mr. ROBERT C. BYRD. I have no objection.

BARRIER ISLANDS

Mr. BAKER. Mr. President. I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1018.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendments to the bill (S. 1018) entitled "An Act to protect and conserve fish and wildlife resources, and for other purposes," and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That the following Members serve as managers of the conference on the part of the House: From the Committee on Merchant Marine and Fisheries: Mr. JONES of North Carolina, Mr. BREAUX, Mr. STUDDS, Mr. HUGHES, Mr. SNYDER, Mr. FORSYTHE, and Mr. EVANS of Delaware. From the Committee on Public Works and Transportation: Mr. ROE, Mr. EDGAR, Mr. FARY, Mr. CLAUSEN, and Mr. HAMMERSCHMIDT.

Mr. BAKER. Mr. President, I move that the Senate disagree to the House amendments and agree to the request for a conference and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Mr. STAFFORD, Mr. CHAFEE, Mr. GORTON, Mr. RANDOLPH, and Mr. MOYNIHAN conferees on the part of the Senate.

HEAD START AWARENESS MONTH

Mr. BAKER. Mr. President, I am prepared now to proceed to the consideration of House Joint Resolution 588, if the minority leader is willing.

Mr. ROBERT C. BYRD. There is no objection, Mr. President.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House Joint Resolution 588 relating to Head Start Awareness Month.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 588) to provide for the designation of the month of October 1982 as "Head Start Awareness Month."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. HATCH. Mr. President, I rise at this time to speak about House Joint Resolution 588, denoting October as "Head Start Awareness Month." As chairman of the Senate Committee on Labor and Human Resources, I am concerned with the welfare of our greatest national resource—children and their future potential.

Information from several prominent leaders in child care in Utah, indicate Head Start programs have generally been beneficial, especially those with parental involvement. Children have been given the opportunity to learn cognitive and social skills who otherwise would be at a disadvantage when starting school. Parent involvement in many cases has resulted in improved parenting skills at home. I am a leading advocate in encouraging parental involvement in all Government programs.

Therefore, in acknowledging the fine work done in my home State and elsewhere, I support House Joint Resolution 588.

As chairman of the committee which is responsible for oversight of such programs, it is important to insure that no Federal program including Head Start will be exempt from evaluation and monitoring to maintain the intent of the law and quality results.

The joint resolution was ordered to be read a third time, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILLS HELD AT DESK

H.R. 5553

Mr. BAKER. Mr. President, I have a request that I believe has been cleared on both sides.

I ask unanimous consent that when the Senate receives H.R. 5553 from the House of Representatives, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

H.R. 5795

Mr. BAKER. Mr. President, I have another request that I believe has been cleared.

I ask unanimous consent that when the Senate receives H.R. 5795 from the House of Representatives, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

H.R. 6403

Mr. BAKER. I have another request which I believe has been cleared.

I ask unanimous consent that when the Senate receives H.R. 6403 from the House of Representatives, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

MILITARY MEDICAL FACILITIES SIZING CRITERIA

Mr. BAKER. Mr. President, I have a request with respect to H.R. 3278, if the minority leader is prepared to proceed.

Mr. ROBERT C. BYRD. Mr. President, I am prepared to proceed.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Armed Services be discharged from further consideration of H.R. 3278 and that the Senate proceed to its immediate consideration.

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3278) to amend title 10, United States Code, to provide additional standards for determining the amount of space to be programmed for military retirees and their dependents in medical facilities of the uniformed services, and for other purposes.

Mr. CHILES. Mr. President, I rise today to support the passage of H.R. 3278, the House version of S. 2834 to provide realistic sizing criteria for the construction of military medical facilities.

Under existing legislation and regulation, the military has been unable to use realistic criteria in making their size determinations on which to base construction.

They have been unable to consider total workload from all sources, not just active duty personnel. Retired personnel and their dependents are becoming a large and fast growing segment of the population of those eligible to receive services from military medical facilities. Yet the workload they represent cannot be considered today in sizing these facilities.

Criteria for planning the size of new military hospitals and clinics should be based on commonsense considerations of cost-effectiveness and realistic workload projections. And that is what this legislation allows.

What we are doing now is forcing our retired personnel out of military facilities and driving the costs of CHAMPUS inordinately upward.

The General Accounting Office studied this situation, and in a report recommended the changes embodied in H.R. 3278 and its companion bill S. 2834.

In hearings before the Congress, testimony by each of the services and the General Accounting Office endorsed this legislation, and for good reason. Two independent studies have been done to assess the cost of direct medical care by the military compared to the use of civilian facilities. The studies looked at the projected life cycle costs over a 20-year period. The analyses showed that it is considerably less costly to the Federal Government to provide services in its own facilities rather than providing care through local civilian providers under CHAMPUS.

Mr. President, we know what has been happening to the cost of CHAMPUS. Anything we can do to get control here, should be done, and this legislation is a move in the right direction. Our current policy regarding the treatment of retired personnel has been driving the costs of CHAMPUS upward and not providing them the services they deserve.

Mr. President, this legislation is long overdue, and I urge its passage.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EDUCATION BLOCK GRANT FUNDS

Mr. BAKER. Mr. President, next I wish to proceed to the consideration of Calendar Order No. 807, H.R. 5658, if the minority leader has no objection.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, then I ask the Chair to lay before the Senate H.R. 5658, Calendar Order No. 807.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5658) to authorize the use of education block grant funds to teach the principles of citizenship.

The Senate proceeded to the consideration of the bill.

Mr. RANDOLPH. Mr. President, it is a privilege to support H.R. 5658, a bill to provide elementary and secondary assistance grants to assist in the teaching of citizenship principles. This legislation amends an existing program, the education block grant authorized by chapter 2 of the Education Consolidation and Improvement Act, to allow these funds to be used to teach citizenship. In accordance with the block grant concept, State and local educational agencies will have discretion over whether to fund such an activity and the content of these programs.

There will be no additional cost to the Federal Government.

Thus, State and local flexibility to use Federal funds will be maintained while drawing attention to a vital area of learning.

One hundred and ninety-five years ago our Founding Fathers framed the Constitution of our United States. Thirty years ago the Congress designated September 17 as "Citizenship Day." Four years later "Constitution Week" was designated. Each year since the President of the United States has issued a proclamation calling on appropriate Government officials to display the American flag on all Government buildings on "Citizenship Day."

It is not enough to wave the flag. We need citizenship education.

Americans rally for picnics and firecrackers on Independence Day. And now we have "Citizenship Day" leading off "Constitution Week." It is printed on calendars. Yet how many Americans know or even care? What has happened to vital values in our country?

How many Americans consider the meaning of the words in our National Anthem when they rise before a football game? Next time you attend, watch the people around you. Most merely hum along, rush through or count ahead excitedly in anticipation of the gun, or horn, or buzzer that starts the competition on the field.

The Constitution of our United States is the finest example in all history of the principles of government by law in which every American citizen is guaranteed certain rights. We have a masterpiece that indeed continues to inspire freedom-seeking people all over the world we share. But do our own people really appreciate our democracy?

Why do Americans fail to use the ballot and few young people know even the names of their Representatives in the House and their Senators or even their local legislators?

Proclamations and holidays have no meaning without the substance and vision and spirit behind them. The historical facts are there, but is anyone really interested or concerned?

Youth crime is on the rise and symptomatic of an illness that is afflicting our schools and our society as a whole. This illness is a lack of knowledge and a lack of the principles of good citizenship.

Family life is fragmented and giving us a new generation of Americans who are no longer guided by the principles that have made our Nation great.

We must work together in this country and instill the values of American citizenship in our young people, or we will lose our precious heritage that has made us strong. We must stand against the evil winds that roar.

People often say, "Let's get back to basics." But the real question we need ask ourselves is: "How do we get back to basics?" Citizenship education in our public and private schools is the solution, at least in part.

Values in our culture vary somewhat from individual to individual and there are certain basic and accepted values of citizenship in America. Citizenship education is a process whereby local people experience what they believe and share in common. Through it citizens can influence what happens in their community and country. Before action can take place, decisions must be made that reflect the values held by those who decide.

Americans have freedoms and rights no other nation enjoys. But let us underscore in our lives a commitment to citizenship responsibilities.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 5658) was ordered to be a third reading, was read the third time, and passed.

Mr. BAKER. I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I wish to go now to H.R. 4476 and the budget waiver which accompanies it which is Calendar Order No. 922, S. Res. 475, if the minority leader is prepared to do that.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask first that the Senate proceed to the consideration of Senate Resolution 475, a budget waiver.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

A resolution (S. Res. 475) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 4476.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 475) was considered and agreed to, as follows:

S. RES. 475

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of H.R. 4476. Such waiver is necessary because H.R. 4476, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

This budget waiver is necessary to allow Senate consideration of H.R. 4476, a bill which authorizes appropriations for the Administrative Conference of the United States (ACUS). H.R. 4476 was approved by the House of Representatives on June 14 of this year. It was approved unanimously by the Senate Committee on the Judiciary, and on September 9 was reported to the full Senate.

The Administrative Conference was established in 1964 by the Administrative Conference Act. ACUS consists of between seventy-five and ninety-one members, who, with the exception of the Chairman, serve without pay. Members are appointed from Federal departments and agencies and from outside the Government. The Conference works with governmental agencies on a continuing basis to improve these regulatory, enforcement, and adjudicatory functions. Recommendations and reports on administrative procedure are issued when adopted by the Conference at its biannual plenary sessions.

H.R. 4476 authorizes $2,300,000 for the fiscal year ending September 30, 1982, and for each fiscal year thereafter through the fiscal year ending September 30, 1986. This essentially maintains the current authorization level for ACUS.

Congressional consideration of this authorization bill will in no way interfere with or delay the appropriations process since the 1983 appropriations process is not yet complete. Moreover, the Committee on Appropriations has included funding for the Administrative Conference in both the fiscal year 1982 appropriations bill for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year 1983 appropriations bill. The 1982 appropriations level was $1,103,000 and the 1983 level, recently approved by the Appropriations Committee in H.R. 4476, is $1,100,000. This amount approximates actual outlays by the Conference since 1979.

ADMINISTRATIVE CONFERENCE ACT AMENDMENT

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate the underlying measure, which was the object to the waiver, H.R. 4476, which is Calendar Order No. 775.

The PRESIDING OFFICER. The bill will be stated by title.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4476) to amend the Administrative Conference Act, by authorizing appropriations therefor.

The Senate proceeded to the consideration of the bill.

The PRESIDING OFFICER. The bill if before the Senate and open to amendment. If there be no amend-

ment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (H.R. 4476) was ordered to be engrossed for a third reading, was read a third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ARMS CONTROL AND DISARMAMENT AMENDMENTS ACT OF 1981

Mr. BAKER. Mr. President, I advise the minority leader that we are cleared to consider H.R. 3467 dealing with the Arms Control and Disarmament Act if the minority leader is ready.

Mr. ROBERT C. BYRD. Mr. President, that matter has been cleared on this side of the aisle.

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate H.R. 3467, Calendar Order No. 612.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3467) to authorize appropriations under the Control and Disarmanent Act, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Foreign Relations with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Arms Control and Disarmament Amendments Act of 1981".

SEC. 2. (a) Section 49(a) of the Arms Control and Disarmament Act (22 U.S.C. 2589(a)) is amended to read as follows:

"SEC. 49. (a) To carry out the purposes of this Act, there are authorized to be appropriated—

"(1) for the fiscal year 1982, $18,268,000,

"(2) for the fiscal year 1983, $19,893,852, and

"(3) such additional amounts, for each such fiscal year, as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law, and other nondiscretionary costs, and to offset adverse fluctuations in foreign currency exchange rates.

Amounts appropriated under this subsection are authorized to remain available until expended.".

SEC. 3. Section 45(a) of the Arms Control and Disarmament Act (22 U.S.C. 2535(a)) is amended by inserting the following new sentence after the second sentence thereof: "In the case of persons detailed from other Government agencies, the Director may accept the results of fullfield background security and loyalty investigations conducted by the Department of Defense or the Department of State as the basis for the determination required by this subsection that the person is not a security risk or of doubtful loyalty.".

SEC. 4. Section 31(c) of the Arms Control and Disarmament Act (22 U.S.C. 2571) is amended by inserting "and of all aspects of antisatellite activities" immediately before the semicolon.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

Mr. PERCY. Mr. President, H.R. 3467, the Arms Control and Disarmament Agency Act of 1982, authorizes appropriations for the Arms Control and Disarmament Agency for fiscal years 1982 and 1983. The sum authorized for fiscal year 1982 is $18,268,000, and the sum authorized for fiscal year 1983 is $19,893,852. In each case the sum authorized includes such additional amounts as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law, and other nondiscretionary costs and to offset adverse fluctuations in foreign current exchange rates.

The bill also amends section 45(a) of the Arms Control and Disarmament Act to streamline security review procedures. The bill also authorizes the Agency to conduct research, development, and other studies in regard to all aspects of antisatellite activities.

This authorization represents modest increases to the Agency's authorizations in previous years. Such increases reflect adjustments for inflation and for demands upon the Agency in several major arms control negotiations, including the Strategic Arms Reductions Talks (START) and the intermediate range nuclear force (INF) negotiations.

This bill was unanimously voted out of committee. As far as I know, there is no opposition to H.R. 3467.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 3467), as amended, was passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL SCHOOL BUS SAFETY WEEK OF 1982

Mr. BAKER. Mr. President, next in my file is a joint resolution, House Joint Resolution 486, dealing with School Bus Safety Week. Is the minority leader prepared to consder that?

Mr. ROBERT C. BYRD. Mr. President, that matter has been cleared on this side.

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of House Joint Resolution 486 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resoltuion (H.J. Res. 486) Authorizing and requesting the President to issue a procalmation designating the period from October 3, 1982, through October 9, 1982, as "National Schoolbus Safety Week of 1982".

There being no objection, the Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 486) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

APPOINTMENT AND AUTHORITY OF THE SUPREME COURT POLICE

Mr. BAKER. Mr. President, H.R. 6204, a House message, is prepared for action on this side. Is the minority leader ready to proceed?

Mr. ROBERT C. BYRD. Mr. President, the minority leader is ready to proceed.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 6204.

The Presiding Officer laid before the Senate H.R. 6204, an act to provide for appointment and authority of the Supreme Court Police, and for other purposes, which was read twice by its title.

The Senate proceeded to consider the bill.

UP AMENDMENT 1366

(Purpose: To provide for a 3-year expiration of the authority of the Marshal of the Supreme Court to protect Supreme Court Justices in any part of the United States, and to require an annual report on the cost of the protection)

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the distinguished President pro tempore of the Senate, the Senator from South Carolina (Mr. THURMOND) and Mr. LEAHY, and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Messrs. THURMOND and LEAHY, proposes an unprinted amendment numbered 1366.

On page 3, line 19, after "(c)" add the following: "The authority created under subsection (a)(2) shall expire three years after the date of enactment of this subsection. During the three-year effective period of subsection (a)(2), the Marshal of the Supreme Court shall report annually to the Congress on March 1 regarding the administrative cost of carrying out his duties under such subsection."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1366) was agreed to.

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a letter I received from Chief Justice Burger of the Supreme Court dated September 29, 1982.

There being no objection, the letter was ordered to be printed in the RECORD as follows:

SUPREME COURT OF THE UJITED STATES,
Washington, D.C., September 29, 1982.

Hon. STROM THURMOND,
U.S. Senator, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR THURMOND: In response to your request, I do not anticipate that H.R. 6204 will expand the use of security officers of the Supreme Court for protection of the Justices, since under current practice many security officers of the Supreme Court already have authority as Special Deputy United States Marshals to accompany Justices off the premises, for protection, if deemed necessary.

H.R. 6204 merely clarifies ambiguities under current law, and should not change existing practices regarding the use of Supreme Court police for the protection of Justices. Although the bill does provide necessary flexibility so that a member of the Supreme Ccurt police force could travel outside the greater Washington, D.C. area with a Justice if it is necessary to protect his or her life, I anticipate that this provision would only be used in unusual circumstances, if ever.

I cannot definitely predict the number of extraordinary situations in the future, but I seriously doubt that the trips would be any greater distance than a trip to Williamsburg for the annual Brookings sessions with the Senate and House Judiciary Committees. What we are concerned about is travel that would not go beyond a radius of 15 miles from the Capitol building, and as to those trips, our police need the same authority as the Capitol Police now enjoy.

A copy of the Report of the House of Representatives on H.R. 6204 is enclosed for your information. Page 6 of the Report contains the following statement from the Congressional Budget Office: "It is expected that no significant cost to the government would be incurred as the result of enactment of this legislation." I do not anticipate any additional cost at all.

Cordially,

WARREN E. BURGER,
Chief Justice.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read the third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 6204), as amended, was passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXCHANGE OF MATERIALS AND SERVICES BETWEEN DEPARTMENTS AND AGENCIES BY CONTRACT

Mr. BAKER. I wish to go next to H.R. 2528, if the minority leader is prepared to do that. That is Calendar Order No. 860.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I ask then that the Chair lay before the Senate H.R. 2528, Calendar Order No. 860.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2528) to amend the Economy Act to provide that all departments and agencies may obtain materials or services from other agencies by contract, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 2528) was ordered to a third reading, was read a third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DR. ROBERT H. GODDARD DAY

Mr. BAKER. Mr. President, next then I propose that we proceed to the consideration of House Joint Resolution 568 which will require a discharge of the Judiciary Committee from further consideration.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of House Joint Resolution 568, providing for the designation of October 5, 1982, as "Dr. Robert H. Goddard Day," and that the Senate proceed immediately to its consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 568) to provide for the designation of October 5, 1982, as "Dr. Robert H. Goddard Day."

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read twice by title.

Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. KENNEDY. Mr. President, on October 5, 1982, the people of Worcester, Mass., will celebrate the 100th anniversary of the birth of Dr. Robert H. Goddard—the father of modern rocketry. At Clark University in Worcester, where Dr. Goddard taught physics and conducted his research for many years, citizens from Massachusetts and all across the Nation will participate in 3 days of events honoring the late scientist and visionary.

Today, along with Senator GLENN, Senator SCHMIDT, and Senator MATHIAS, I am urging the Senate to pass a joint resolution so that Congress can go on record in recognizing Dr. Robert Goddard of Worcester, Mass., as an American of great vision and achievement.

The resolution, which designates October 5, 1982, as "Dr. Robert H. Goddard Day," was introduced in the House of Representatives by my colleague from Massachusetts, Congressman EARLY, and was passed on September 21, 1982.

Dr. Robert Goddard was an extraordinary individual and a scientist of great genius. Those who worked with him and who knew him as a friend, remember a kind, gentle man, who weathered the relentless skepticism of his peers and persevered to discover new worlds in science. Despite all those who counseled him to relinquish his scientific pursuits, he stayed the course and went on to make the dream of space exploration a reality.

Today, Dr. Goddard's dream is taking on a new dimension. With the development of the Space Shuttle and the success of the test flights, we are entering a new era in space exploration and travel. Yet, the new chapter we are beginning in 1982, could not have been written without the fundamental work done by the professor from Worcester, born in 1882.

His development of the theory of rocket propulsion and his many innovations continue to provide the basis for space exploration today. So it is appropriate, 100 years after his birth, that we honor Dr. Robert Goddard.

Mr. President, I am pleased to join today with my colleagues, Senator GLENN, Senator MATHIAS, and Senator SCHMIDT in sponsoring this resolution. I urge all of my colleagues to join us in its adoption, and I ask for its immediate consideration.

● Mr. GLENN. Mr. President, Robert H. Goddard's first liquid-fueled rocket reached only 184 feet into the air and attained a speed of only 60 miles-per-hour. But that 1926 launching, by which Goddard demonstrated what he and other farsighted pioneers in Russia and Germany had theorized, is an important landmark in man's conquest of space. Nor is it the only contribution made by this dreamer, this professor of physics, this man of vision. He was the first to prove by test that a rocket works in a vacuum and the first to develop rockets equipped with propellant pumps, gyro controls and instrumentation.

Indeed, Mr. President, Homer E. Newell, in his book, "Beyond the Atmosphere," published by the National Aeronautics and Space Administration in 1980, observed that—

So prolific was his output that those who followed could hardly take a step without in some way infringing on one or more of his patents, a fact recognized by the United States Government when in 1960 the military services and the National Aeronautics and Space Administration awarded $1,000,000 to the Goddard estate.

Robert Goddard, who financed much of his work himself, has indeed been honored more since his 1945 death than he ever was while living. It is fitting that we are about to honor this pioneer thinker and visionary physicist for his contributions to our Nation and mankind by setting aside October 5 as Dr. Robert Goddard Day. I am pleased to join my colleague from Robert Goddard's home State of Massachusetts (Mr. KENNEDY) in urging the Senate to adopt this resolution.●

The joint resolution (H.J. Res. 568) was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL TOURETTE SYNDROME AWARENESS WEEK

Mr. BAKER. Mr. President, I would like to inquire of the minority leader if he is prepared to consider discharging the Committee on the Judiciary from further consideration of Senate Joint Resolution 228 and to proceed to its consideration.

Mr. ROBERT C. BYRD. Mr. President, this side has no objection.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 228, National Tourette Syndrome Awareness Week, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. J. Res. 228) to provide for the designation of the week beginning on October 24, 1982, as "National Tourette Syndrome Awareness Week."

The Senate proceeded to consider the joint resolution.

The joint resolution was ordered to be engrossed and to be read a third time, was read the third time, and passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 228) together with the preamble are as follows:

S.J. RES. 228

Whereas Tourette Syndrome is a neurological disorder which occurs in children between the ages of two and sixteen and lasts for the remainder of the life of each afflicted child;

Whereas Tourette Syndrome is characterized by repeated tic movements and involuntary vocalizations which are physically debilitating, socially crippling, and emotionally devastating;

Whereas an estimated one hundred thousand Americans currently suffer from Tourette Syndrome and an additional three and one half million Americans suffer from less severe forms of this affliction;

Whereas the lack of knowledge about this disaster on the part of health professionals and the public causes additional hardships for those afflicted with Tourette Syndrome;

Whereas greater public understanding of Tourette Syndrome will encourage those persons currently diagnosed as suffering from this disorder and nurture hope for those who are suffering from the disorder but whose afflictions have not been diagnosed or have been diagnosed incorrectly; and

Whereas thousands of caring volunteers and the families of persons afflicted with Tourette Syndrome have devoted much time and energy to educate health professionals and the public about this disorder: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning on October 24, 1982, is designated as "National Tourette Syndrome Awareness Week" and the President of the United States is authorized and requested to issue a proclamation calling upon Federal, State and local government agencies, interest groups and organizations and all of the people of the United States to observe that week by engaging in appropriate activities and programs to show their support and concern for those Americans afflicted with Tourette Syndrome.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

NATIONAL WATER RESOURCES WEEK

Mr. BAKER. Similarly, Mr. President, I would like to move to discharge the Judiciary Committee from further consideration of Senate Joint Resolution 236, if there is no objection.

Mr. ROBERT C. BYRD. There is no objection to proceeding on this side.

Mr. BAKER. I thank the minority leader.

I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 236 and that the Senate proceed immediately to its consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 236) to designate the week of October 24 through 28, 1982, as "National Water Resources Week."

The Senate proceeded to consider the joint resolution.

The joint resolution was ordered to be engrossed and to be read a third time, was read the third time, and passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 236) together with the preamble are as follows:

S.J. RES. 236

Whereas water is the fundamental resource upon which we rely for our social and economic activities, as well as for our health and well-being; and

Whereas water is the necessary ingredient for the successful operation of every home, factory, city and farm; and

Whereas the continued growth and prosperity of this Nation is dependent on an adequate supply of water; and

Whereas development of needed sources of new energy will require further use of our water resources; and

Whereas expanded use of water for irrigation could increase farm production and hold down domestic food costs and provide additional commodities for export; and

Whereas without water, life itself is impossible; and

Whereas the National Water Resources Association has been an important and effective force in promoting the importance of our Nation's water resources and the wise and careful use thereof; and

Whereas 1982 marks the fiftieth anniversary of the National Water Resources Association: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is requested and authorized to designate, by proclamation, the week of October 24 through 28, 1982, as "National Water Resources Week", and urge all citizens in the States of the Union, the national and all local governments, and groups and organizations, especially officials who are responsible for the collection, treatment, distribution, and disposal of water, to conduct educational programs and otherwise alert the citizenry of the vital importance of water to every American.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PHYSICAL PROTECTION OF NUCLEAR MATERIAL

Mr. BAKER. Mr. President, I would like to ask the Senate to consider H.R. 5228, if the minority leader has no objection.

Mr. ROBERT C. BYRD. There is no objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5228.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate numbered 1 to the bill (H.R. 5228) entitled "An Act to amend title 18 of the United States Code to implement the Convention on the Physical Protection of Nuclear Material, and for other purposes."

Resolved, That the House agree to the amendment of the Senate numbered three to the aforesaid bill with the following amendment:

Strike out the matter stricken, and insert:

"(7) attempts to commit an offense under paragraph (1), (2), (3), or (4) of this subsection; or

"(8) is a party to a conspiracy of two or more persons to commit an offense under paragraph (1), (2), (3), or (4) of this subsection, if any of the parties intentionally engages in any conduct in furtherance of such offense;

Resolved, That the House agree to the amendment of the Senate numbered 5 to the aforesaid bill with the following amendment:

In lieu of the matter proposed to be inserted, insert:

"(b) The punishment for an offense under—

"(1) paragraphs (1) through (7) of subsection (a) of this section is—

"(A) a fine of not more than $250,000; and

"(B) imprisonment—

"(i) for any term of years or for life (I) if, while committing the offense, the offender knowingly causes the death of any person; or (II) if, while committing an offense under paragraph (1) or (3) of subsection (a) of this section, the offender, under circumstances manifesting

Resolved, That the House agree to the amendment of the Senate numbered eight to the aforesaid bill with the following amendment:

Strike out the matter stricken, and insert:

"(2) paragraph (8) of subsection (a) of this section is—

"(A) a fine of not more than $250,000; and

"(B) imprisonment—

"(i) for not more than 20 years if the offense which is the object of the conspiracy is punishable under paragraph (1)(B)(i); and

"(ii) for not more than 10 years in any other case.

Resolved, That the House disagree to the amendments of the Senate numbered 2, 4, 6, and 7 to the aforesaid bill.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments to the Senate amendments numbered 3, 5, and 8, and that the Senate recede from its disagreement to amendments numbered 2, 4, 6, and 7.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

PARTITIONING OF CERTAIN INDIAN LANDS IN KANSAS

Mr. BAKER. Mr. President, next a message from the House on S. 478 is available on this side if the minority leader is prepared to have it considered.

Mr. ROBERT C. BYRD. Mr. President, this side is prepared to proceed with it.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 478.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 478) entitled "An Act to provide for the partitioning of certain restricted Indian land in the State of Kansas", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That any owner of an interest in the following lands:

(1) the north half southeast quarter of section 25, and 14 acres on the south side of southeast quarter northeast quarter of section 25 township 11 south, range 22 east, sixth principal meridian, Kansas, containing 94 acres and also known as the Newton McNeer Shawnee Reserve Numbered 206;

(2) the southeast quarter northwest quarter of section 12, township 12 south, range 23 east, sixth principal meridian, Kansas, containing 20 acres and also known as the Black Snake Shawnee Allotment Numbered 69;

(3) the east half, southwest quarter, section 13, township 19 south, range 24 east, sixth principal meridian, Kansas, containing 80 acres and known as the Maria Christiana Miami Allotment, lands derived from a patent under the Act of March 3, 1859 (11 Stat. 430) may commence an action in the United States District Court for Kansas to partition the same in kind or for the sale of such land in accordance with the laws of the State of Kansas. Moneys resulting from a sale in lieu of partition shall be distributed and administered through trust accounts of the Bureau of Indian Affairs in the case of Indian heirs. Moneys of non-Indian heirs shall be turned over to the appropriate State court in Kansas for distribution and administration in accordance with the laws of Kansas. For the purpose of such action, the Indian owners shall be regarded as vested in the land and the United States shall be a necessary party to the proceedings. Any conveyance ordered by the court in such proceedings will be made in unrestricted fee simply to non-Indian grantees and in a restricted fee to Indian grantees.

Mr. COHEN. Mr. President, S. 478 was introduced by the senior Senator from Kansas, Senator DOLE. The purpose of this bill is to authorize the U.S. District Court for Kansas to entertain an action for partition of three parcels are known as the Newton NcNeer Shawnee Reserve No. 206; the Black Snake Shawnee Allotment No. 69; and the Maria Christiana Miami Allotment derived from a patent under the act of March 3, 1859. Over the years through the process of descent and distribution the ownership of these Newton McNeer allotment, for example, now has in excess of 50 heirs. Some of these heirs are of Indian descent, some are not, and only some of the Indian heirs are members of a federally recognized Indian tribe.

These parcels of land were originally patented by the United States to individual members of the Shawnee and Miami Indian Tribes to be held in a restricted fee status. A restricted fee patent is similar in almost all respects to a trust allotment in which legal title is held by the United States for the benefit of the Indian allottee. In either case, the land is generally exempt from the application of the laws of the State in which it is located, including State or local taxation, laws of adverse possession, or laws relating to partition or sale. The property cannot be alienated or transferred without the consent of the Secretary of the Interior.

The only witnesses relate to the power of the Secretary of the Interior to partition Indian-owned lands. Under existing law the Secretary may partition trust allotted lands but he does not have similar authority with

respect to lands held by a restricted fee patent. An additional complicating factor with respect to the parcels of land that are the subject of this bill is that substantial undivided fractional interests are also held by non-Indians and the Secretary has no jurisdiction or authority over their interests. For these reasons it is clear that the only way in which title to these properties can ever be cleared is by authorizing a court of competent jurisdiction to either order partition of the lands or their sale if partition proves impossible.

Mr. DENTON. Mr. President, I would like to express a concern on behalf of one of my constituents, Mr. Donald Oyler. Mr. Oyler has advised me that his brother, Jimmie Oyler, is presently living on the Newton McNeer allotment, one of the three properties that are the subject of this bill. I note that both Donald and Jimmie Oyler are retired naval officers: Donald a commander and Jimmie a lieutenant commander.

It is my understanding that both Donald Oyler and Jimmie Oyler tried for a number of years to get the Secretary of the Interior to take some action that would enable the heirs to make use of the property. As early as 1968 Donald Oyler wrote to the Department of the Interior, Bureau of Indian Affairs, expressing an interest that the title to this property be consolidated so it could be utilized. By letter dated February 21, 1968, Mr. Sidney Carney, the BIA Area Director for Anadarko, Okla., wrote Donald Oyler advising that major interests in the property are held by non-Indian heirs, that it would be a literal impossibility for the Department of the Interior to determine the heirs to the estate, and that under existing law it would be impossible to dispose of the estate in any manner so as to convey marketable title. Mr. Carney further stated that any reputable attorney, if apprised of the facts, would advise that the potential costs of any effort to consolidate title would be overwhelming and probably futile. Mr. Carney recommended that a special act of Congress be sought to remove the restrictions on alienation and extinguish the interest of the United States in this property, and this would allow for partition or sale through the courts of the State of Kansas.

Mr. President, to a person unfamiliar with the legal process and unfamiliar with the legislative process, these comments were obviously discouraging, and did not reflect any willingness on the part of the Department to work with the parties toward a solution. On September 22, 1974, Mr. Jimmie Oyler wrote the BIA Agency in Horton, Kans., asking whether, as one of the heirs to the property, he could go upon the land, build a home and occupy the same. By letter dated October 22, 1974, Mr. Jack Carson, Superintendent of the Horton Agency, replied by reiterating the information regarding the large number of heirs, but advised Mr. Oyler that as an heir or part owner he would not be in trespass; he would be immune from ouster but his right of possession would not be absolute. Mr. Carson further advised that if Mr. Oyler were to plan building on the allotment he would have to have his portion partitioned and this would involve consent of all of the adult owners.

In late 1975 Jimmie Oyler obtained quitclaim deeds from three of the owners of fractionated interests to this property and moved upon it. In early 1976 he obtained three more quitclaim deeds from three other owners, bringing his putative interest in the property to slightly over 6 percent of the whole. Five of the six deeds are from persons of Indian descent. At the time these deeds were acquired Mr. Oyler supplied copies to the Secretary of the Interior and requested that the BIA land records be changed to reflect his ownership interest. The Department refused to affirm any ownership interest of Jimmie Oyler based on the Indian quitclaim deeds but advised that if Mr. Oyler took possession based on a nonrestricted, non-Indian interest there would be no legal basis for the BIA to request his eviction.

Mr. President, Jimmie Oyler has resided with his family on this property since 1975. From my knowledge of the background of the ownership of this parcel of land, I can see no alternative to the legislation before us today which will permit the partition of this land. However, I do not believe it would be fair or just to compel Mr. Oyler to be removed from his homestead. Although his actions in occupying the property may have been precipitous, his frustrations arising from seeing the property lie vacant with no apparent willingness of the Government to work toward resolution of the title problem were understandable. I strenuously urge that the court give every consideration to allocating to Mr. Oyler his just portion of this estate in the area where Mr. Oyler has established his home.

Mr. DOLE. Mr. President, I would like to join my colleagues in their remarks. Senator COHEN has done an excellent job of outlining the legal difficulties that led to this bill and Senator DENTON has presented the factual problems that complicate title to the Newton McNeer property. As early as 1975 Jimmie Oyler contacted my office seeking help in this matter. In response to my inquiries to the Secretary of the Interior, I was advised that the authority of the Secretary has no statutory authority with respect to partition and sale of property held in restricted-fee patent instead of a general trust allotment.

I was advised at that time that the only practical solution which would recognize the rights of all Indian and non-Indian owners appeared to be a special act of Congress to authorize partition or sale of the property. In 1978 I was again contacted by another heir, Mr. John Todd of Wichita, Kans., who had recently inherited an interest in the Newton McNeer property. Mr. Todd had also written to the Secretary of the Interior and had received a reply similar to that regarding the Jimmie Oyler inquiry. Mr. Todd expressed a strong interest in pursuing special legislation to permit a resolution of the title to this property.

It appears that over the years many of the heirs to the Newton McNeer property, most now deceased, have attempted to have the land either partitioned or sold. According to Mr. Todd efforts were made by his grandfather as early as the 1920's to get the land sold. In the late 1950's his uncle, Paul Todd, obtained signatures of all but one of the then owners to sell the land, the sole holdout objecting to payment of any attorney fees. Mr. Todd has further advised me that an effort was made by the Crotzer family of Oklahoma, another descendant line, to obtain legislation in the 83d Congress to authorize partition or sale and this led to introduction of bills in each House of the Congress (H.R. 7318 and S. 2743) which were not enacted.

Mr. President, it is the problems of these heirs that led me to introduce this legislation. I would note that in 1978 the Bureau of Indian Affairs commissioned a study of the title to this property that led to a report on November 1, 1978, by Mr. V. T. Courtwright, an attorney in Checotah, Okla. This report lists some 49 heirs as having an interest. Indians and non-Indians are distinguished and addresses for all heirs are supplied.

Mr. President, it is certainly not my desire to displace heirs with legitimate claims to portions of this land. I trust the courts will allocate the 94 acres to the rightful owners. In the alternative it may be necessary to order a sale. I certainly hope that the Oyler family's interests and Jimmie Oyler's investments are preserved in these court proceedings. If title to this property is ever to be cleared, now is the time while the Courtwright report still provides leads to all the parties in interest.

Mr. COHEN. Mr. President, I join my colleagues in their desire and expectation that the judicial process achieve fairness and justice for all parties concerned. As a point of clarification I would like to add that this bill provides that the United States shall be a necessary party to the proceedings. There will be a problem in determining those heirs who are members of federally recognized tribes and

therefore eligible to receive their share in trust of restricted status. This will require the active participation of the Department of the Interior in this process.

Mr. President, I urge the favorable consideration of this bill by the Senate.

Mr. BAKER. Mr. President, I move that the Senate concur in the amendment of the House.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

NATIONAL RETIRED TEACHERS DAY

Mr. BAKER. Mr. President, I would propose to ask the Senate to discharge the Committee on the Judiciary from further consideration of Senate Resolution 237, if the minority leader will concur.

Mr. ROBERT C. BYRD. Mr. President, there is no objection to proceeding.

Mr. BAKER. I thank the Senator.

Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resoluition 237, the National Retired Teachers Day resolution, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 237) designating November 14, 1982, as "National Retired Teachers Day."

The Senate proceeded to consider the joint resolution.

● Mr. CHILES. Mr. President, I request that Senators CRANSTON, INOUYE, PELL, BOREN, WEICKER, HEINZ, BENTSEN, and PERCY be added as cosponsors of Senate Joint Resolution 237, a resolution designating November 14, 1982, as "National Retired Teachers Day."

This brings the number of sponsors for Senate Joint Resolution 237 to 41 Senators. I am pleased to see this large measure of support for our Nation's retired teachers.

Study after study has shown that the critical element in the educational process is not the textbook, the curriculum, the size of the classroom, or the audiovisual aides, but rather, the skills and character of the teacher. Let us show our appreciation and our understanding of the devotion shown by teachers who remain in the classroom to retirement by setting aside a day in their honor. Most of us, when asked why we chose a profession or achieved a worthy goal or adopted a positive value, can name a particular teacher who influenced us early in life. I hope we all take the opportunity on November 14 to say a word of thanks to the teachers who have meant a lot to us.●

The joint resolution was ordered to be engrossed and to be read a third time, was read the third time, and passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 237) together with the preamble are as follows:

Whereas education is the surest foundation for the preservation of freedom, justice, and happiness in our American democracy;

Whereas education transmits not only knowledge, but the values of a society;

Whereas America has always placed its major hopes for the future on education as a means of improving and developing the potentialities of the individual and society;

Whereas, as Henry Adams said, "a teacher affects eternity; no one can tell where his influence stops";

Whereas the approximately one million five hundred thousand retired teachers of America chose what should be recognized as the most important profession in the world, dedicated their working lives to the battle against prejudice, greed, and ignorance and received very little material remuneration for their dedication; and

Whereas it is fitting to acknowledge a debt of gratitude to these former teachers, who gave the country the most important gift of all, the instruction of its youth: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 14, 1982, is designated as "National Retired Teachers Day", and the President is authorized and requested to issue a proclamation calling on the people of the United States to observe such day with appropriate ceremonies and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EARTHQUAKE HAZARDS REDUCTION

Mr. BAKER. Mr. President, there is a House message on S. 2273, Earthquake Hazards Reduction Act which is available for action if the minority leader is agreeable.

Mr. ROBERT C. BYRD. Mr. President, this side is ready to proceed.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2273.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2273) entitled "An Act to amend section 7 of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706) to extend authorizations for appropriations, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause and insert:

TITLE I—EARTHQUAKE HAZARDS REDUCTION PROGRAM

SEC. 101. (a) Section 7(a) of the Earthquake Hazards Reduction Act of 1977 is amended by adding at the end thereof the following new paragraph:

"(4) There are authorized to be appropriated to the Director, to carry out the provisions of sections 5 and 6 of this Act, $1,281,000 for the fiscal year ending September 30, 1983, and such sums as may be necessary for the fiscal year ending September 30, 1984.".

(b) Section 7(b) of such Act is amended by striking out "and" after "1981;", and by inserting "; $33,843,000 for the fiscal year ending September 30, 1983; and such sums as may be necessary for the fiscal year ending September 30, 1984" before the period at the end thereof.

(c) Section 7(c) of such Act is amended by striking out "and" after "1981;", and by inserting "; $25,000,000 for the fiscal year ending September 30, 1983; and such sums as may be necessary for the fiscal year ending September 30, 1984" before the period at the end thereof.

(c) Section 7(d) of such Act is amended by striking out "and" after "1981;", and by inserting "; $475,000 for the fiscal year ending September 30, 1983; and such sums as may be necessary for the fiscal year ending September 30, 1984" before the period at the end thereof.

(e) Section 7(e) of such Act is amended by striking out "the fiscal year ending September 30, 1982" and inserting in lieu thereof "each of the fiscal years ending September 30, 1982, September 30, 1983, and September 30, 1984".

TITLE II—MULTIHAZARD RESEARCH, PLANNING, AND MITIGATION

SEC. 201. Section 302 of Public Law 96-472 is amended by adding at the end thereof the following new subsection:

"(c) For the fiscal year ending September 30, 1983, there are authorized to be appropriated to the Director—

"(1) $2,774,000 to carry out section 301, which amount shall include—

"(A) not less than $300,000 to carry out the purposes of paragraphs (1) through (6) of such section;

"(B) such sums as may be necessary, but in any case not less than $939,000, for use by the United States Fire Administration in carrying out paragraph (7) of such section; and

"(C) not less than $1,535,000 to carry out paragraph (8) of such section with respect to those large California earthquakes which were identified by the National Security Council's Ad Hoc Committee on Assessment of Consequences and Preparations for a Major California Earthquake and with respect to other high seismic risk areas in the United States; and

"(2) such further sums as may be necessary for adjustments required by law in salaries, pay, retirement, and employee benefits incurred in the conduct of activities for which funds are authorized by paragraph (1) of this subsection.

Amend the title so as to read: "An Act to amend the Earthquake Hazards Reduction Act of 1977 to extend authorizations of appropriations, and for other purposes.".

Mr. BAKER. Mr. President, I move that the Senate concur in the amendments of the House with an amendment which I send to the desk on

behalf of the distinguished Senator from New Mexico (Mr. SCHMITT).

UP AMENDMENT NO. 1367

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) on behalf of Mr. SCHMITT proposes an unprinted amendment numbered 1367.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Namely, in the House amendment to the Senate bill:

In section 101(a), in the amendment proposed to be made to section 7(a) of the Earthquake Hazards Reduction Act of 1977, and strike all after "1983" through "1984".

In section 101(b), in the amendment proposed to be made to section 7(b) of the Earthquake Hazards Reduction Act of 1977, insert "and" immediately before "; $31,843,000", and strike all after "1983" through "1984".

In section 101(c), in the amendment proposed to be made to section 7(c) of the Earthquake Hazards Reduction Act of 1977, insert "and" immediately before "; $25,000,000", and strike all after "1983" through "1984".

In section 101(d), in the amendment proposed to be made to section 7(d) of the Earthquake Hazards Reduction Act of 1977, insert "and" immediately before "; $475,000", and strike all after "1983" through "1984".

In section 101(e), in the amendment proposed to be made to section 7(e) of the Earthquake Hazards Reduction Act of 1977, strike all after "1982" and insert in lieu thereof " 'and September 30, 1983'.".

● Mr. SCHMITT. Mr. President, S. 2273, an act to amend section 7 of the Earthquake Hazards Reductions Act of 1977, was originally passed by the Senate on April 29, 1982. On September 14, 1982, the House of Representatives amended and passed S. 2273, authorizing funds for fiscal year 1983 and such sums as may be necessary for the fiscal year ending September 30, 1984, for the Federal Emergency Management Agency (FEMA), the U.S. Geological Survey (USGS), the National Science Foundation (NSF), and the National Bureau of Standards (NBS).

S. 2273 as amended and passed by the House of Representatives is acceptable to the Committee on Commerce, Science, and Transportation with certain modifications to the House amendments. The modification we recommend accomplishes two purposes:

Eliminates authorizations for such sums as may be necessary for the fiscal year ending September 30, 1984; and

Reduces the total authorization for fiscal year 1983 from $33,843,000 to $31,843,000.

In section 101(b) after "by inserting;" insert $31,843,000 in place of $33,843,000. In section 101(a)(4) after September 30, 1983, insert a period and strike ", and such sums as may be necessary for the fiscal year ending September 30, 1984."

In section 101(b) after September 30, 1983, insert a period and strike ", and such sums as may be necessary for the fiscal year ending September 30, 1984."

In section 101(c) after September 30, 1983, insert a period and strike ", and such sums as may be necessary for the fiscal year ending September 30, 1984."

In section 101(d) after September 30, 1983, insert a period and strike ", and such sums as may be necessary for fiscal year 1984."

In section 101(e) after September 30, 1982, strike ", September 30, 1983 and September 30, 1984" and insert "and September 30, 1983."

I have expressed concerns for several years about slow progress in developing a prototype short-term prediction and warning capability and earlier this year, recommended that a target date of 1988 be set for the operation of such a system. Such a system could collect valuable data for research purposes as well as to help protect the public and the economy. The House has authorized $3 million for the first phase of development of an earthquake prediction and warning network. I agree steps toward such a network should be initiated. However, investigations of the requirements of the program lead me to conclude that $1 million will be appropriate to the planning that can reasonably be accomplished in fiscal year 1983.

The USGS, in conjunction with other Federal agencies and the State of California, should submit a plan to Congress by July 1, 1983, indicating the tasks, responsibilities, and milestones required to have such a capability by 1988 and to be able to respond to information from such a capability.

It is essential in my opinion that a warning and prediction capability be developed jointly by the Federal Government and the States. Authorization for subsequent appropriations should be dependent upon the States making substantial contributions to the development and the operation of a prediction and warning network.

Mr. President, I recommend passage of S. 2273 with these amendments.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Tennessee.

The amendment (UP No. 1367) was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

FALSE IDENTIFICATION CRIME CONTROL ACT OF 1982

Mr. BAKER. Mr. President, next I would like to ask the Senate to treat with H.R. 6946.

Mr. ROBERT C. BYRD. Mr. President, there is no objection on this side.

Mr. BAKER. I thank the minority leader.

I ask then that the Senate proceed to the consideration of H.R. 6946. I ask unanimous consent to do so.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6946) to amend title 18 of the United States Code to provide penalties for certain false identification related crimes.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 1368

Mr. BAKER. Mr. President, I send to the desk an amendment by the distinguished Senator from South Carolina, the President pro tempore, Mr. THURMOND.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. THURMOND, proposes an unprinted amendment numbered 1368.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(1) On page 2, line 16, strike out the word "or".

(2) On page 2, following line 21, insert the following new paragraphs:

"(6) possesses an identification document that is or appears to be an identification document of the United States which is stolen or produced without authority knowing that such document was stolen or produced without authority; or

"(7) knowingly possesses an identification document (other than one issued lawfully for the use of the possessor) or a false identification document, with the intent such document be used in the commission of a crime that may be prosecuted in a court of the United States for which the penalty includes imprisonment for one year or more;".

(3) On page 4, line 13, following "(a)(4)" insert "or (a)(7)".

(4) On page 4, strike out lines 23 and 24 and insert in lieu thereof the following:

"the United States Government, a State, political subdivision of a State, foreign government, or political subdivision of a foreign government,".

(5) On page 5, line 2, following the word "type" insert "intended or".

(6) On page 5, line 14, following the word "includes" insert "any State of the United States,".

(7) On page 5, line 19, following the word "a" the second time it appears, insert the word "political".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 1368) was agreed to.

UP AMENDMENT NO. 1369

(Purpose: To provide penalties for interstate transportation of false identification documents)

Mr. BAKER. There is at the desk, Mr. President, an amendment by the distinguished Senator from New Hampshire (Mr. HUMPHREY) and I ask that the clerk state that amendment.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) for Mr. HUMPHREY proposes an unprinted amendment numbered 1369.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following:

SEC. 4. Chapter 83 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 1738. Identification documents bearing a false birth date

"(a) Whoever, being in the business of selling identification documents, and in furtherance of that business, uses the mails for the mailing, carriage in the mails, or delivery of, or causes to be transported in interstate or foreign commerce, any identification document which bears a birth date purported to be that of the person named in such identification document and which has not been verified pursuant to subsection (b) shall be fined not more than $1,000, imprisoned not more than one year, or both.

"(b) For purposes of subsection (a), an identification document is verified if the sender obtains adequate assurances stating that—

"(1) the birth date purported to be that of the person named in such identification document is the date of birth of such person; or

"(2) such person is twenty-one years of age or older.

"(c) It is a defense to this section if, with respect to the identification document involved—

"(1) the birth date purported to be that of the person named in such identification document is the date of birth of such person;

"(2) such person was twenty-one years of age or older on the date such identification document was mailed, shipped, or transported; or

"(3) such identification document was mailed, shipped, or transported in the course of business by—

"(A) the United States or an agency thereof, a State, or an agency thereof, or a unit of local government of a State;

"(B) a physician registered or licensed by a State; or

"(C) a hospital or medical clinic licensed by a State or a unit of local government of a State.

"(d) For purposes of this section—

"(1) the term 'adequate assurances' means an official certification or communication, in writing, from—

"(A) the United States or an agency thereof, a State or an agency thereof or a unit of local government of a State;

"(B) a physician registered or licensed by a State; or

"(C) a hospital or medical clinic licensed by a State or a unit of local government of a State.

"(2) the term 'identification document' means a card, certificate, or paper intended to be used primarily to identify an individual; and

"(3) the term 'State' includes any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

"(e) This section does not prohibit any lawfully authorized investigative, protective, or intelligence activity of a law enforcement agency of the United States, a State, or a political subdivision of a State, or of an intelligence agency of the United States, or any activity authorized under title V of the Organized Crime Control Act of 1970 (18 U.S.C. note prec. 3481).".

SEC. 5. The table of sections at the beginning of chapter 83 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"1738. Identification documents bearing false birth date.".

SEC. 6. Section 3061(b) of title 18, United States Code, is amended by striking the period at the end and inserting in lieu thereof ", and section 1738 of this title.".

SEC. 7. Section 3001(a) of title 39, United States Code, is amended by striking out "or 1718" and inserting in lieu thereof ", 1718, or 1738".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 1369) was agreed to.

The PRESIDING OFFICER. If there be no further amendments, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time. The bill was read the third time and was passed.

Mr. BAKER. Mr. President, I move that the Senate insist on its amendments and request a conference with the House and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer (Mr. MATTINGLY) appointed Mr. THURMOND, Mr. LAXALT, Mr. HATCH, Mr. SIMPSON, Mr. HUMPHREY, Mr. BIDEN, Mr. DECONCINI, and Mr. HEFLIN conferees on the part of the Senate.

GEOGRAPHIC DISTRIBUTION OF FEDERAL FUNDS

Mr. BAKER. Mr. President, I am prepared to ask the Senate to consider a message from the House on S. 2386, if the minority leader has no objection.

Mr. ROBERT C. BYRD. Mr. President, this side is ready to proceed.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2386.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2386) entitled "An Act to require the Director of the Office of Management and Budget to prepare an annual report consolidating the available data on the geographic distribution of Federal funds, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert:

SECTION 1. This Act may be cited as the "Consolidated Federal Funds Report Act of 1982".

SEC. 2. As used in this Act, the term—

(1) "Director" means the Director of the Office of Management and Budget;

(2) "State" means any State, the Commonwealth of Puerto Rico, the District of Columbia, Guam, American Samoa, the Virgin Islands, the Government of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands; and

(3) "municipality" means any subcounty unit of local government that received Federal assistance under the State and Local Fiscal Assistance Act of 1972 (31 U.S.C. 1221) for the appropriate fiscal year.

SEC. 3. (a) For fiscal years 1983, 1984, and 1985, not later than one hundred and eighty days after the end of each fiscal year, the Director shall prepare a Consolidated Federal Funds Report presenting the total amount of Federal funds that were obligated for expenditure in or expended in each State, county or parish, congressional district, and municipality of the United States in appropriate general categories of Federal funds during the preceding fiscal year. The report shall be in the form described in subsection (b) and shall be based on the data referred to in subsection (c).

(b) The Director shall include in each report required by subsection (a)—

(1) the total amount of Federal funds that were reported obligated for expenditure in each State, county or parish, congressional district, and municipality of the United States in appropriate general categories of Federal funds in the fiscal year preceding the fiscal year in which the report is made; or

(2) the total amount of Federal funds that were reported actually expended in each State, county or parish, congressional district, and municipality of the United States in appropriate categories in the the fiscal year preceding the fiscal year in which the report is made.

(c) The report required by subsection (a) shall be based on the data included in—

(1) the Federal Assistance Awards Data System established as a result of the study referred to in the first sentence of section 8;

(2) the Federal Procurement Data System referred to in section 6(d)(5) of the Office of Federal Procurement Policy Act (41 U.S.C. 405(d)(5));

(3) the appropriate data file of the Office of Personnel Management; and

(4) the records of the Office of the Secretary of Defense.

(d) For the purposes of subsection (b), the general categories of Federal funds presented in each report required by subsection (a) shall include data with respect to grants, loans, purchases and contracts, cooperative agreements, direct Federal payments to in-

dividuals, pay of civilian employees of the Government, military pay, annuities, retirement pay, pensions, and disability compensation.

SEC. 4. (a) The Director shall prepare a report setting forth the total amount of Federal funds that were obligated for expenditure in or expended in each State in appropriate general categories of Federal funds during each of the fiscal years 1981 and 1982. The report shall be in the form described in subsection (b).

(b) The Director shall include in each report required by subsection (a)—

(1) the total amount of Federal funds that were reported obligated for expenditure in each State in appropriate general categories of Federal funds in the fiscal year preceding the fiscal year in which the report is made; or

(2) the total amount of Federal funds that were reported actually expended in each State in appropriate general categories in the fiscal year preceding the fiscal year in which the report is made.

(c) For the purposes of subsection (b), the general categories of Federal funds presented in each report required by subsection (a) shall include data with respect to grants, loans purchases and contracts, direct Federal payments to individuals, pay of civilian employees of the Government, military pay, annuities, retirement pay, pensions, disability compensation, and other large programs or categories where data are available such as the National Aeronautics and Space Administration and the Army Corps of Engineers.

(d) The reports required by subsection (a) shall be available no later than one hundred and twenty days after the end of fiscal year 1982.

SEC. 5. (a)(1) The Director shall—

(A) prepare—

(i) printed copies of each of the reports required by this Act; and

(ii) computer tapes of such reports; and

(B) make the printed copies of the reports and the computer tapes available to the public for purchase at a price fixed under subsection (b).

(2) The Director shall transmit free of charge one of each of the printed copies of the reports required by this Act to—

(A) each Federal regional depository library;

(B) the Committees on Government Operations, the Budget, and Appropriations of the House of Representatives; and

(C) the Committees on Governmental Affairs, the Budget, and Appropriations of the Senate.

(3) The Director shall also promptly transmit, free of charge, one computer tape of the report required by section 3 annually and of the data in the System required by section 8 quarterly to the Committee on Rules and Administration of the Senate and to the Committee on House Administration of the House of Representatives.

(4) Subject to subsection (b), the Director may, at his discretion, waive all or part of the fee required by subsection (a)(1)(B) of this section.

(b) In carrying out subsection (a)(1)(B), the Director shall, based on the estimates made under paragraphs (1) and (2) of this subsection, fix the price of each printed copy and each computer tape of the report so that the aggregate revenues obtained in each fiscal year under subsection (a) will cover as much of the incremental costs incurred in making these reports and tapes available for purchase by the public as is feasible. In computing these costs the Director shall not consider the costs of the activities set forth in sections 7, 8, and 10, but shall consider—

(1) the cost of compiling the reports required by this Act; preparing the printed copies and computer tapes under subsection (a); and distributing the printed copies and the computer tapes of the report for each fiscal year; and

(2) the number of printed copies and the number of computer tapes of the report that will be purchased.

SEC. 6. In order to carry out sections 3, 4, and 5 of this Act, the Director may delegate to any authority of the executive branch of the Federal Government the responsibility for carrying out such sections. The Director shall oversee the activities of any authority to which responsibilities are delegated under this section and shall monitor the compliance of each authority with respect to the requirements set forth in section 7.

SEC. 7. Each head of any authority of the Government having custody of the data files and systems referred to in section 3(c) shall make available to the Director or other authority to which the Director has delegated the responsibility to carry out such section, such information, administrative services, equipment, personnel, and facilities as the Director or such authority requires to carry out such section.

SEC. 8. (a) The Director shall operate and maintain, and update on a quarterly basis, the Federal Assistance Awards Data System established as a result of the study conducted by the Director under section 9 of the Federal Program Information Act (31 U.S.C. 1701 note).

(b) In order to carry out subsection (a), the Director—

(1) may delegate to any authority of the executive branch of the Federal Government the responsibility for carrying out subsection (a), and

(2) shall review any reports submitted to him by Federal agencies in the process of carrying out subsection (a) and may validate, by appropriate means, the processes by which Federal agencies prepared such reports.

SEC. 9. The Director shall designate a single organizational unit to provide for data consistency and uniform reporting of data elements.

SEC. 10. The Comptroller General shall conduct a review of the data systems and reports required by this Act. This review shall include a determination of the accuracy of the data contained within the report required by section 3 and the costs of data collection, report preparation, and dissemination of such data and report. The review shall also include an analysis of the use and primary users of the data. In making this reviews, the Comptroller General shall consult with Members of Congress, the Congressional Budget Office, the Office of Management and Budget, the Committee on Rules and Administration of the Senate, the Committee on House Administration of the House of Representatives, the Census Bureau, representatives of State and local governments, and any other persons he deems appropriate. This review shall be submitted to the Committee on Governmental Affairs of the Senate and the Committee on Operations of the House of Representatives no later than October 1, 1984.

SEC. 11. (a) Each head of any executive department or establishment that has compiled or can readily compile data that would have been included in the reports entitled "the Geographic Distribution of Federal Funds" for fiscal year 1981 or fiscal year 1982, or both, shall forward a copy of such to the Committee on Rules and Administration of the Senate and to the Committee on House Administration of the House of Representatives. Delivery of such shall be made within 60 days after enactment of this bill for fiscal year 1981 and within 120 days of the close of the fiscal year for fiscal year 1982.

(b) Each head of any executive department or establishment who does not forward a copy of data as required by subsection (a) for fiscal year 1981 or fiscal year 1982 shall submit a statement to that effect, along with a statement of the reasons for the failure, to the Committee on Rules and Administration of the Senate and to the Committee on House Administration of the House of Representatives.

● Mr. SASSER. Mr. President, the bill before us, S. 2386, represents the cooperative effort of both Houses of Congress, and both sides of the aisle, to produce a bill that makes certain that comprehensive, high quality information on the geographic distribution of Federal funds remains available.

When I introduced S. 2386 on April 15, 1982, I did so to fill an information gap that yawned before the Congress at the worst possible time. Just when we were preparing to consider the New Federalism that President Reagan made the centerpiece of his state of the Union message, the Office of Management and Budget abruptly cancelled the compilation and publication of the geographic distribution of Federal funds report.

Without the information contained in the report, State-by-State and regional impacts of the New Federalism initiative could not be assessed by elected officials or others interested in the effects of changes in domestic programs.

The introduction of my bill was preceded by a resolution introduced on February 11, 1982 by Senator DON RIEGLE with my cosponsorship. Senator RIEGLE's resolution was intended to provide a short-term remedy by requiring that OMB inform the Congress and the public about the geographic distribution of Federal funds for 1981 and 1982.

I was pleased that Senator RIEGLE then cosponsored my bill, S. 2386, which set forth procedures to make these valuable data available through 1985.

Senator DAVID DURENBERGER made a great contribution to this legislation as he helped shape it during committee consideration. I was pleased that, with Senator DURENGERGER's able leadership, this bill moved quickly in the Senate.

My Tennessee colleague, Congressman BILL BONER of Nashville, introduced similar legislation in the House. With the able support of Congressmen BROOKS and HORTON, S. 2386, as amended, passed the House.

The version of that legislation that is acceptable both to the House and the Senate is now before us for a vote.

I refer my colleagues to the colloquy between Senator DURENBERGER and myself printed in the CONGRESSIONAL RECORD of July 29, 1982, on page 18511 concerning our expectation that the Office of Management and Budget would make information on the distribution of Federal funds to all levels of Government available to Congress along with any New Federalism proposal: I ask unanimous consent that this colloquy appear in the RECORD:

I wish to confirm my understanding that the Office of Management and Budget agrees to supply the Congress with adequate data on the distribution of Federal outlays for those programs affected by the President's New Federalism proposal when it is finally presented. It is my understanding that OMB agrees to provide information on the distribution of Federal funds by State, and by county and city levels where necessary, to determine the amount of money to be passed through to these levels of government. We need to have this information for 1981 and 1982 if we are to assess the geographic impact of the New Federalism for the rest of the decade. We must have this historical yardstick at this crucial time in congressional decisionmaking.

The interm report covering 1981 and 1982 required by S. 2386 which OMB is to issue will account only for the distribution of funds to the States. While this may be useful for other purposes, its utility to the Congress in assessing the New Federalism proposals is limited.

The interim report will not provide complete information on salaries, and it will not provide data on Federal spending in localities.

So, there is a real information gap for those programs involved in the New Federalism proposal for the 1981 and 1982 period unless the Office of Management and Budget agrees to supply the factual information to fill it. This, as I understand it, is the agreement that the Senators supported S. 2386 have with OMB.

Mr. DURENBERGER. The Senator's understanding is correct. The Office of Management and Budget has agreed that adequate data on the distribution of Federal funds necessary to evaluate the President's New Federalism proposal will be provided at the State level and at the county and city levels for 1981 and 1982 where local-level data will be necessary to determine and evaluate any passthrough provisions of the plan.

Mr. SASSER. I am pleased that OMB has agreed to supply this information to the Congress along with the New Federalism proposal.

I reiterate here that we expect this information to be provided.

The consolidated Federal funds report ordered by S. 2386 requires that the Office of Management and Budget compile information on the amounts of Federal funds spent in each State, each county, each congressional district, and each municipality. Since available information sources are to be used, no new appropriation of funds is needed.

The bill gives legislative authorization to the Federal assistance awards data system (FAADS) which is now at the pilot stage at OMB. This statutory underpinning gives the Congress an opportunity to oversee the use of this valuable information system.

The Office of Management and Budget will, over the next 3 years, combine information in this FAADS system with information on procurements reported by the Federal procurement data system, salaries and expenses from the central personnel data file of the Office of Personnel managenment and defense manpower data from the center at the Department of Defense.

For the 1981-82 period, OMB will provide information on State-level funding only.

I move passage of S. 2386.●

Mr. BAKER. Mr. President, I move that the Senate concur in the amendment of the House.

The motion was agreed to.

CONTRACT DISPUTES ACT AMENDMENT

Mr. BAKER. Mr. President, we passed over one item earlier in our proceedings. It was Calendar No. 859, H.R. 1371.

Is the minority leader prepared to clear that?

Mr. ROBERT C. BYRD. Yes, this side is ready to proceed.

Mr. BAKER. I thank the minority leader.

The Senate proceeded to consider the bill (H.R. 1371) to amend section 12 of the Contract Disputes Act of 1978, which had been reported from the Committee on Governmental Affairs with amendments, as follows:

On page 1, line 8, after "contractor", insert the following: ", without regard to the date of certification of the contractors claim pursuant to section 605(c)(1)";

On page 2, line 1, strike "1981", and insert "1983"; and

On page 2, line 2, strike "1981", and insert "1983".

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, a House message on Senate Joint Resolution 113 is here and available if the minority leader has no objection.

Mr. ROBERT C. BYRD. Mr. President, I am authorized to proceed.

NATIONAL HOME HEALTH CARE WEEK

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Joint Resolution 113.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S.J. Res. 113) entitled "Joint resolution to designate the week beginning November 8, 1981, as 'National Home Health Care Week'", do pass with the following amendments:

Page 2, line 3, strike "November 8, 1981", and insert: "November 28 through December 4, 1982".

Amend the title so as to read: "Joint resolution to designate the week beginning November 28 through December 4, 1982, as 'National Home Health Care Week.'".

Mr. PRYOR. Mr. President, as a member of the Special Committee on Aging I have long been a strong supporter of home health care which is a more humane and less expensive alternative to the placement of our elderly and disabled in nursing homes and other institutions.

On October 30 of last year the Senate recognized the importance of home health care by unanimously agreeing to enact Senate Joint Resolution 113, which designated November 8, 1981, as National Home Health Care Week.

Mr. President, the House of Representatives passed Senate Joint Resolution 113 last Tuesday with one amendment, which changes the designated week from beginning on November 8, 1981, to beginning on November 28, 1982. This change was at the request of the National Association for Home Care, which is the major trade association in the field.

The Senate resolution, which was cosponsored by 38 of my colleagues, was introduced by Senator HATCH, the distinguished chairman of the Committee on Labor and Human Resources, who has long been recognized as an advocate of home health care. The resolution in the House was enacted thanks to the efforts of Congressmen LEON PANETTA, CLAUDE PEPPER, BARBER CONABLE, and ROBERT GARCIA. The resolution was cosponsored by a majority of the House.

Mr. President, I would like to ask that the Senate accept the House amendment, and move for passage of Senate Joint Resolution 113, designating the week of November 28, 1982, as National Home Health Care Week, so that this important measure can be sent to the President for signature today.

Mr. JEPSEN. Mr. President, I rise in support of Senate Joint Resolution 113, a resolution which would make the week of November 28, 1982, National Home Health Care Week.

As my colleagues know, when the Senate adopted Senate Joint Resolution 113, we designated the week of November 8, 1981 as the appropriate week. Unfortunately, our colleagues on the House side were unable to pass the legislation until earlier this week which makes it necessary to change the effective date.

The importance of this legislation is not which week we designate, but rather that we recognize the importance of home health care. There are thousands of families who are caring for elderly or disabled relatives who deserve this recognition. We in the Congress should take this opportunity to praise these hardworking individuals.

In addition, Mr. President, we should take a moment to thank the thousands of health care professionals who provide the support services so essential to enabling families to remain together.

Without this cooperative effort, many elderly and disabled individuals would be needlessly forced into a nursing home or hospital. Even with the tremendous effort currently being made, many people are being forced into nursing homes even though they do not need this type of care.

I commend the Senator from Utah (Mr. HATCH) for his efforts in the area of home health and more importantly, for introducing this resolution. I trust all my colleagues in the Senate will take this opportunity to thank all those people involved in home health care. In addition, I would recommend that every Senator take some time to visit some of the home health agencies in your State. I think you will find it a worthwhile experience.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on the motion. Without objection, the motion is agreed to.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended until not past 11:45 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR PRODUCTION OF CERTAIN DOCUMENTS

Mr. BAKER. Mr. President, for myself and the distinguished minority leader, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 490) to establish a procedure during recesses and adjournments to authorize the production of Senate documents and testimony.

Mr. BAKER. Mr. President, is the minority leader prepared to proceed?

Mr. ROBERT C. BYRD. Yes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

Mr. BAKER. Mr. President, when a proper subpena is issued to the Senate or one of its committees, or a Member, officer, or employee of the Senate, to produce documents or testify in judicial or administrative proceedings, the Senate customarily adopts a resolution which authorizes such compliance with the subpenas as will promote the ends of justice consistently with the privileges and rights of the Senate.

The purpose of this resolution is to establish a procedure during recesses and adjournments for authorizing the production of documents and testimony. It is modeled after the provision in title VII of the Ethics in Government Act which authorized the joint leadership group to direct the Senate legal counsel to represent the Senate or one of its committees, or a Member, officer, or employee of the Senate, with respect to a judicial subpena to testify or produce documents.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 490) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 490

Whereas by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial or administrative process, be taken from such control or possession but by permission of the Senate;

Whereas when it appears that documents, papers, and records under control of or in the possession of the Senate, or the testimony of members, officers, and employees of the Senate concerning their official duties, are needful for the promotion of justice, the Senate will take such action, consistent with the privileges and rights of the Senate, as will promote the ends of justice;

Whereas the Joint Leadership Group, which consists of the majority and minority leaders of the Senate, the President pro tempore, and the chairmen and ranking minority members of the Committee on the Judiciary and the Committee on Rules and Administration, has been established by section 702 of the Ethics in Government Act of 1978, 2 U.S.C. § 288a (Supp. IV 1980);

Whereas the Joint Leadership Group, by two-thirds of its members, may direct the Senate Legal Counsel, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b and 288c(a)(2) (Supp. IV 1980), to represent the Senate or a committee, subcommittee, member, officer, or employee of the Senate with respect to any subpoena directed to the Senate or a committee, subcommittee, member, officer or employee of the Senate in their official or representative capacities;

Whereas there is no procedure for authorizing, during periods of recess or adjournment, the production of Senate documents or testimony by members, officers and employees of the Senate; Now, therefore, be it

Resolved, That the Joint Leadership Group, by two-thirds of its members, may authorize, during periods of recess or adjournment, the production of documents, papers and records under the control or in the possession of the Senate, and the testimony of members, officers, and employees of the Senate concerning their official duties, when needful for the promotion of justice and consistent with the privileges and rights of the Senate.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I am prepared now to ask the Senate to turn to the consideration of a Senate joint resolution designating National Housing Week if the minority leader has no objection.

Mr. ROBERT C. BYRD. Mr. President, that is cleared on this side.

Mr. BAKER. I thank the Senator.

NATIONAL HOUSING WEEK

Mr. BAKER. Mr. President, I send to the desk a joint resolution on behalf of the distinguished Senator from Utah (Mr. GARN), the chairman of the Banking Committee, for himself and others, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows:

Whereas Congress has repeatedly reaffirmed the national goal of a decent home and a suitable living environment for every American family;

Whereas millions of Americans, particularly young families, are finding the opportunity for homeownership and decent housing out of their reach;

Whereas excessive and duplicative government regulations at the federal, state and local level have increased the cost of housing throughout the country;

Whereas the nation's housing industry has been a major contributor to the national economy by creating jobs and generating revenue;

Whereas homeownership and decent housing promotes pride and contributes to the stability of the family in America;

Whereas it is appropriate to reaffirm our nation's historic commitment to housing as a national priority to preserve the American dream: Now, therefore, be it

Resolved, That October 24-31, 1982, be declared National Housing Week and that the President of the United States be authorized and requested to issue a proclamation calling upon all people of the United States

to observe this week with appropriate ceremonies and activities.

Mr. GARN's joint resolution (S.J. Res. 261) is cosponsored by Senators LUGAR, RIEGLE, ABDNOR, ARMSTRONG, BAUCUS, BOSCHWITZ, BURDICK, BUMPERS, CANNON, COCHRAN, D'AMATO, DIXON, DODD, DURENBERGER, EAGLETON, GRASSLEY, HEFLIN, HUDDLESTON, KASTEN, LEAHY, MCCLURE, PERCY, PRESSLER, PROXMIRE, PRYOR, RANDOLPH, SASSER, STAFFORD, WALLOP, WARNER, GOLDWATER, DOLE, CRANSTON, CHAFEE, NICKLES, THURMOND, BENTSEN, ROBERT C. BYRD, BAKER, and MATTINGLY.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that my name be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution (S.J. Res. 261) was considered, ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I have in my file a bill offered by the distinguished Senator from Vermont, Mr. STAFFORD.

Mr. ROBERT C. BYRD. Mr. President, that has been cleared on this side.

Mr. BAKER. Mr. President, it deals with the Allen Ellender Fellowship.

Mr. STAFFORD. Mr. President, that is better known as the Close Up program which has been in existence for about 10 years.

Mr. BAKER. Mr. President, did I understand the minority leader to say there is no objection?

Mr. ROBERT C. BYRD. The majority leader is correct.

Mr. BAKER. I yield to the Senator from Vermont so he may offer that measure at this time.

Mr. STAFFORD. Mr. President, I appreciate the majority leader yielding to me.

THE ALLEN J. ELLENDER FELLOWSHIP PROGRAM

Mr. STAFFORD. Mr. President, I send a bill to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 3002) to increase the authorization of appropriations for the Allen J. Ellender Fellowship program, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. STAFFORD's bill is cosponsored by Mr. PELL, Mr. DOLE, Mr. SIMPSON, Mr. BRADLEY, Mr. DURENBERGER, Mr. PRYOR, Mr. BOSCHWITZ, Mr. NUNN, Mr. JOHNSTON, Mr. LEVIN, Mr. WALLOP, Mr. RIEGLE, and Mr. SCHMITT.

Mr. STAFFORD. Mr. President, today, I have introduced legislation to extend and increase the authorization of the Allen J. Ellender Fellowship program to $1.5 million over fiscal year 1983, 1984, and 1985. It was established in honor of our late colleague, Senator Allen Ellender.

As many of my colleagues know, these fellowships provide the "seed money" necessary to support the Close Up program, which has brought more than 100,000 high school students and teachers to Washington for weeklong seminars on our Government and political system. Many of these students are from low-income families and receive fellowship which enables them to participate in Close Up.

I, myself, have met with hundreds of Vermont students, and the education in citizenship they receive through this program alone is worth this investment.

The Ellender program has other strengths. Most noteworthy, the Federal dollars provided for the program are used to raise significant donations from the private sector. In fact, the ratio of private contributions, foundations, and individuals to the Federal contribution is roughly 10 to 1. This interaction of private/public entities would be impossible, however, were it not for the fact that the Federal contribution provides the basis for attracting these other donations.

Since 1979, the authorization has been frozen; in the meantime, rising costs have prevented expansion of the program into all 50 States. The amount being recommended today will enable the program to reach many more students and will truly put it within reach of young people in every State in our Nation. Furthermore, the extended authorization will enhance the Close Up program's ability to do greater forward planning to attract increased and extended corporate support.

A similar piece of legislation has passed the House with bipartisan support, and I urge this measure be adopted. Unless there are others who wish to speak, I am prepared to move the adoption of the bill.

The PRESIDING OFFICE. If there be no amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 3002

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the total amount which may be appropriated to carry out the Joint Resolution of October 19, 1972 (86 Stat. 907), relating to the Allen J. Ellender fellowship program, shall not exceed $1,500,000 for each of the fiscal years 1983, 1984, and 1985.

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STAFFORD. I thank the majority leader.

Mr. BAKER. Mr. President, the next item I have is a message from the House on S. 2577. I wonder if the minority leader can clear that at this time.

Mr. ROBERT C. BYRD. Mr. President, that item has been cleared.

ENVIRONMENTAL RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACT OF 1983

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2577.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2577) entitled "An Act to authorize appropriations for environmental research, development, and demonstrations for the fiscal year 1983, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause, and insert:

SHORT TITLE

SECTION 1. This Act may be cited as the "Environmental Research, Development, and Demonstration Act of 1983".

GENERAL AUTHORIZATIONS

SEC. 2. (a) There are authorized to be appropriated to the Environmental Protection Agency for environmental research, development, and demonstration activities:

(1) $55,685,000 for fiscal year 1983 and $59,026,000 for fiscal year 1984 for activities authorized under the Clean Air Act;

(2) $40,790,000 for fiscal year 1983 and $43,237,000 for fiscal year 1984 for activities authorized under the Federal Water Pollution Act;

(3) $25,906,000 for fiscal year 1983 and $27,460,000 for fiscal year 1984 for activities authorized under the Safe Drinking Water Act;

(4) $31,579,000 for fiscal year 1983 and $33,474,000 for fiscal year 1984 for activities authorized under the Solid Waste Disposal Act;

(5) $6,469,000 for fiscal year 1983 and $6,857,000 for fiscal year 1984 for activities

authorized under the Federal Insecticide, Fungicide, and Rodenticide Act;

(6) $1,586,000 for fiscal year 1983 and $1,681,000 for fiscal year 1984 for radiation activities authorized under section 301 of the Public Health Service Act;

(7) $13,770,000 for fiscal year 1983 and $14,602,000 for fiscal year 1984 for interdisciplinary activities;

(8) $28,149,000 for fiscal year 1983 and $29,838,000 for fiscal year 1984 for activities authorized under the Toxic Substances Control Act;

(9) $53,530,000 for fiscal year 1983 and $56,742,000 for fiscal year 1984 for energy activities, of which—

(A) $20,128,000 in fiscal year 1983 and $21,336,000 in fiscal year 1984 is for the Energy Control Technology Research Program;

(B) $6,889,000 in fiscal year 1983 and $7,302,000 in fiscal year 1984 is for the Energy Health Effects Research Program;

(C) $11,484,000 in fiscal year 1983 and $12,173,000 in fiscal year 1984 is for the Energy Ecological Effects Research Program;

(D) $3,000,000 in fiscal year 1983 and $3,180,000 in fiscal year 1984 is for the Energy Monitoring Research Program; and

(E) $12,029,000 in fiscal year 1983 and $12,751,000 in fiscal year 1984 is for the Acid Rain Research Program; and

(10) $10,736,000 for fiscal year 1983 and $7,736,000 for fiscal year 1984 for hazardous waste activities authorized under the Comprehensive Environmental Response, Compensation, and Liability Act (Superfund).

(b) There are authorized to be appropriated to the Environmental Protection Agency, Office of Research and Development, $9,721,000 for fiscal year 1983, and $10,304,000 for fiscal year 1984, for program management and support.

(c) When the Administrator of the Environmental Protection Agency finds it in the public interest, the Administrator may utilize funds authorized in subsection (a) or (b) for the purpose of conducting appropriate scientific and professional reviews of research and development grant, contract, and cooperative agreement applications and to enter into cooperative agreements to conduct such reviews.

(d)(1) No funds may be transferred from or to any category listed in subsection (a) or (b) of this section or in subsection (a) of section 3, for any purpose, except as specifically permitted under paragraph (2).

(2) Funds authorized for any fiscal year in any category listed in subsection (a) or (b) of this section or subsection (a) of section 3 may be transferred (for the same fiscal year) from that category to any other category so listed; except that no funds may be so transferred from any particular category to another category if the total of all amounts so transferred from that particular category for the fiscal year involved would exceed 5 per centum thereof, or if the total of all amounts so transferred to such other category for such fiscal year would exceed 5 per centum thereof, unless—

(A) a period of thirty legislative days has passed after the Administrator (or the Administrator's designee) has transmitted to the Speaker of the House of Representatives, the President of the Senate, and appropriate committees of the House and Senate a written report containing a full and complete statement concerning the nature of the transfer involved and the reason therefor; or

(B) each committee of the House of Representatives and the Senate having jurisdiction over the subject matter involved, before the expiration of such period, has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

(3) If any funds are transferred from one category listed in subsection (a) or (b) of this section or subsection (a) of section 3 to another category so listed, and the transfer of such funds or any part thereof is not in full compliance with the requirements of paragraph (2), then (from and after the date of such transfer) none of the funds otherwise available for the fiscal year involved in the category to which the transfer is made (including but not limited to the transferred funds themselves) may be obligated, expended, or otherwise used, for any purpose, until such time as all of such requirements have been fully complied with.

(e) No funds appropriated pursuant to this Act shall be used by the Administrator for any payment for a reduction-in-force in any fiscal year, and no such reduction shall be finalized, unless at least thirty days prior to issuing any general notice of such reduction the Administrator informs the appropriate legislative and appropriation committees of the Senate and House of Representatives in writing of the reasons for such reduction, the impact of such reduction on carrying out the provisions of this Act, the details of such reduction, and other pertinent information.

(f) Appropriations made pursuant to the authority provided by this Act shall remain available for obligation for expenditure, or for obligation and expenditure, for such periods as may be specified in the Acts making such appropriations.

LONG-TERM RESEARCH

SEC. 3. (a) Unless otherwise specified by law, at least 20 per centum of the funds appropriated to the Administrator for fiscal year 1983 and fiscal year 1984 for salaries and expenses and for contracts, grants, and cooperative agreements, pursuant to the authorizations contained in section 2(a), shall be obligated and expended for long-term environmental research and development. Of the funds authorized under section 2(a), $54,344,000 is authorized in fiscal year 1983 and $56,876,000 is authorized in fiscal year 1984 for such long-term environmental research and development in accordance with the following distribution:

(1) $14,690,000 for fiscal year 1983 and $15,812,000 for fiscal year 1984 may be obligated and expended for peer-reviewed research performed inhouse,

(2) $26,513,000 for fiscal year 1983 and $27,355,000 for fiscal year 1984 may be obligated and expended for grants for peer-reviewed research,

(3) $7,928,000 for fiscal year 1983 and $8,164,000 for fiscal year 1984 may be obligated and expended for cooperative agreements with or block grants to university or nonprofit research institutes, and

(4) $5,213,000 for fiscal year 1983 and $5,545,000 for fiscal year 1984 may be obligated and expended for the exploratory research program, with $2,622,000 for fiscal year 1983 and $2,800,000 for fiscal year 1984 being obligated and expended for salaries and expenses.

(b)(1) Any amount which is obligated and expended for any fiscal year under subsection (a) shall be taken from the funds which were appropriated (for that fiscal year) for the category set forth in paragraph (7) of section 2(a), except that if the amount so obligated and expended exceeds the total amount of the funds appropriated for that category, the excess shall be taken from the funds which were appropriated (for that fiscal year) for the other categories set forth in section 2, in proportions which assure that each such other category will have contributed the same percentage of the total amount appropriated for that category under the applicable paragraph of section 2(a).

(2) The use under subsection (a) of any funds appropriated pursuant to authorizations contained in section 2 shall not constitute a transfer of such funds from one category to another for purposes of section 2(d), and shall not be taken into account in applying section 2(d) with respect to transfers of other funds.

(c) The Administrator shall take whatever steps are necessary and appropriate to ensure—

(1) that the programs listed in subsection (a) are organized and managed for maximum benefit to all the programs administered by the Environmental Protection Agency,

(2) that the research funded through the programs listed in subsection (a) are of high scientific quality and relevant, whether directly or indirectly, to the mission of the Environmental Protection Agency, and

(3) that the results of the research funded through the programs listed in subsection (a) are widely disseminated to those who would benefit therefrom.

(d) The Administrator shall prepare an annual report on the performance of the programs listed in subsection (a) and shall submit the report to the appropriate legislative and appropriation committees of the Senate and House of Representatives at the time the President's budget is submitted to Congress. The report shall include—

(1) a list of funded research projects by category of research,

(2) the nature, status, and major results of funded research projects,

(3) how the results of the research projects are likely to be used and what steps are being taken to foster their use, and

(4) other pertinent information on the performance of the programs listed in subsection (a).

ENVIRONMENTAL MONITORING

SEC. 4. (a) Of the funds authorized to be appropriated to the Administrator of the Environmental Protection Agency for environmental research and development under section 2, $43,253,000 for fiscal year 1983 and $46,030,000 for fiscal year 1984 are authorized for environmental monitoring activities which are authorized under the Federal environmental statutes and which support development of a continuing national environmental monitoring program. The Administrator, in consultation and cooperation with the heads of the National Bureau of Standards, the United States Geological Survey, the National Institutes of Health, the National Oceanic and Atmospheric Administration, and other Federal and State agencies involved in environmental monitoring activities, shall take such actions on a continuing basis as may be necessary and appropriate to ensure that the national environmental monitoring program called for in this subsection is comprehensive and national in scope and will allow effective and efficient implementation of the Federal environmental statutes, valid assessments of environmental quality in all media, and accurate determination of the impact of environmental protection programs on environmental quality.

(b) The Administrator shall proceed with the development of the national environmental monitoring program called for in subsection (a) by first developing a national monitoring program for air quality, the features of which shall be applied, where appropriate and useful, to monitoring programs for other media. The Administrator shall prepare, in consultation and cooperation with the heads of appropriate Federal and State agencies involved in environmental monitoring activities, a plan for the design and implementation of the monitoring program called for in this subsection. The plan shall—

(1) include a statement of objectives for the program which conform with and are supportive of the goals of such a program as set forth in subsection (a), steps to achieve these objectives, measures of program performance, program participants and their responsibilities and activities in support of the program, and any other pertinent information which may be necessary for successful implementation and appropriate evaluation of the program;

(2) be reviewed by the National Academy of Sciences, with the results of the review being included in the plan along with the Administrator's response to this review; and

(3) be submitted to the appropriate legislative committees of the Senate and House of Representatives one year after the enactment of this Act, and thereafter biannually, following review and update of the plan by program participants, the National Academy of Sciences, and the Environmental Protection Agency.

(c) On the last day of fiscal year 1984, the Administrator shall issue a report on the state of air quality and the factors affecting air quality based on data gathered through the monitoring program established under this section. The report shall be updated and reissued on the last day of each subsequent fiscal year.

(d) The Administrator shall take such actions on a continuing basis as may be necessary or appropriate—

(1) to promote the development and use of accurate and reliable procedures for gathering environmental data of verifiable accuracy; and

(2) to ensure that any environmental datum which is included in the data base of the environmental monitoring programs established pursuant to subsections (a) and (b) has been subjected to validated quality assurances procedures.

(e) No funds appropriated pursuant to this Act shall be used for special monitoring efforts to acquire data for specific, limited-duration health effects studies, or for estimates of the environmental concentration of recently discovered pollutants.

ENERGY RESEARCH

SEC. 5. (a) Appropriations authorized for energy research under section 2(a)(9) shall be used for environmental research associated with (1) synthetic fuels production; (2) the extraction, processing, transportation, and combustion of coal, oil, natural gas, and other fossil fuels; and (3) other energy development activities and their related problems, including indoor air pollution, that may pose a threat to public health and environmental quality.

(b) In complying with subsection (a) the Administrator is directed—

(1) to establish and thereafter maintain a long-term health and ecological effects research program on energy-related pollutants whose aim shall be to identify those pollutants most harmful to public health and environmental quality and to elucidate, for those pollutants found most harmful, the relationship between exposure and health effects;

(2) to take whatever steps are necessary and appropriate to ensure that the research program called for in paragraph (1) is effectively coordinated with related research programs of the National Institutes of Health, the Department of Energy, the Department of Commerce, and other Federal agencies involved in such research;

(3) to establish and thereafter maintain a monitoring program on energy-related pollutants which conforms with the requirements set forth in section 4;

(4) to include in the report on air quality required under section 4(c) a section reporting the emission and dispersion of energy-related air pollutants based on the data gathered from the monitoring program established under paragraph (3).

(c) The Administrator shall continue to be responsible for conducting, and shall continue to conduct, development and demonstration of energy-related pollution control technologies as necessary to fulfill the requirements of the Clean Air Act, the Federal Water Pollution Control Act, and other pertinent pollution control statutes.

(d) Energy-related environmental research projects authorized to be administered by the Environmental Protection Agency under this Act shall not be transferred administratively to any other Federal or State agency or reduced through budget amendment.

SCIENCE ADVISORY BOARD

SEC. 6. (a) Section 8(b) of the Environmental Research, Development, and Demonstration Authorization Act of 1978 (Public Law 95-155) is amended to read as follows:

"(b)(1) The Board shall be composed of at least nine members appointed by the Administrator from a list of nominees recommended to the Administrator by a nominating committee whose representation shall include the National Institute of Occupational Safety and Health, National Institute of Environmental Health Sciences, National Cancer Institute, National Science Foundation, and National Academy of Sciences. The nominating committee shall be established, chaired, and managed, in consultation with the Administrator, by the National Institute of Environmental Health Sciences. The nominating committee shall solicit from the general public, through notice in the Federal Register, candidates for nomination to the Board. The Administrator may require such information from the nominees to the Board as the Administrator deems necessary, and the Administrator shall publish in the Federal Register the name, address, and professional affiliation of each nominee.

"(2) Each member of the Board and nominee to the Board shall be qualified by education, training, and experience to evaluate scientific and technical information on matters referred to the Board under this section. The Administrator shall select persons nominated for the Board to ensure that Board membership is fairly balanced in terms of the points of view represented and the functions to be performed by the Board. In order to provide this balance, the Board membership must represent the States, industry, labor, academia, consumers, and the general public; and the nominating committee established under paragraph (1) shall make certain that this requirement is met when selecting nominees to the Board which in turn are recommended to the Administrator for selection as members of the Board.

"(3) The terms of the members of the Board shall be three years, and shall be staggered so that the terms of no more than one-third of the total membership of the Board and its committees shall expire within a single fiscal year. Each member of the Board shall serve the full length of that member's term unless that member is unable, for involuntary reasons, to discharge his or her duties as set forth in this section or has violated the regulations promulgated pursuant to paragraph (5).

"(4) If a vacancy on the Board is not filled by the Administrator within ninety days of the occurrence of that vacancy, the nominating committee established under paragraph (1) shall meet and appoint, within sixty days, a member of the Board to fill that vacancy from the list of nominees recommended to the Administrator under paragraph (1) in accordance with the selection criteria set forth in paragraph (2).

"(5) In order to ensure the objectivity of the Board, the Administrator shall promulgate, within one hundred and twenty days after the date of the enactment of this paragraph, regulations regarding conflicts of interest with respect to the members of the Board.".

(b) Section 8(e)(2) of such Act (Public Law 95-155) is amended by adding at the end thereof the following: "The Board's advice and comments and the response of the Administrator shall be included in the record with respect to any proposed rule and published in the Federal Register in accordance with the requirements of the environmental statutes and the authority of the Administrator.".

STUDY ON MANAGEMENT AND ORGANIZATION OF ENVIRONMENTAL RESEARCH

SEC. 7. (a) Of the funds appropriated pursuant to the authorization contained in section 2(b) of this Act for each of the fiscal years 1983 and 1984, the sum of $750,000 shall be available for a study and report, to be conducted outside of the Federal Government, on—

(1) the institutional structure and arrangements of the Federal Government established for the conduct of environmental research,

(2) the coordination of the Federal Government's efforts in environmental research,

(3) the application of the results of such efforts to environmental problems, and

(4) the appropriateness of environmental research in relationship to the mission of the Environmental Protection Agency, focusing particularly on the allocation of the Agency's research priorities.

The study shall focus on developing recommendations for improving the quality, cost-effectiveness, appropriateness and mission relevance, and utilization of environmental research sponsored by the Federal Government and for improving the scientific and technical justification for standards and regulations promulgated under authority provided in the environmental statutes administered by the Agency.

(b) The study shall be conducted under a contract or contracts let by the Administrator. Any such contract shall—

(1) be developed in consultation with an interagency advisory committee whose membership includes representatives of the Office of Management and Budget, the Office of Science and Technology Policy, and all agencies conducting or using the results of environmental research,

(2) be awarded to a contractor or contractors with demonstrated independence and

multidisciplinary capabilities in both scientific and regulatory areas of expertise, and

(3) provide for an oversight and review role by the National Academy of Sciences.

(c) The study shall conclude with a report to be submitted to the President, the Administrator, and the Congress within two years after the date of the enactment of this Act. The report shall include recommendations for action by the President, the Administrator, other agencies, and the Congress, as may be appropriate.

(d) The report called for under subsection (c) shall not be subject to any prior clearance or review (except as specifically provided in this section), nor shall any prior clearance be a part of any contract let under subsection (b).

RESEARCH PROGRAM CONCERNING INDOOR AIR QUALITY

SEC. 8. (a) The Congress finds, on the basis of reports prepared by the General Accounting Office and the National Academy of Sciences, that due to the absence of a statutory mandate for a single Federal agency to undertake and coordinate research, development, and demonstration efforts concerning indoor air pollution—

(1) Federal programs in this field are fragmented and underfunded; and

(2) an adequate information base concerning potential indoor air quality problems is not being developed by the Federal Government.

(b) The Administrator shall carry out a research program under this section with respect to indoor air quality. Such program shall be designed to (1) gather data and information on all aspects of indoor air quality in order to contribute to the understanding of health problems associated with the existence of air pollutants in the indoor environment, and (2) coordinate Federal, State, local and private research, development, and demonstration efforts relating to the improvement of indoor air quality.

(c) The Administrator may establish such committees, comprised of individuals representing Federal agencies concerned with various aspects of indoor air quality, and such advisory groups, comprised of individuals representing the scientific community, industry, and public interest organizations, as may be necessary to assist the Administrator in carrying out the research program required by this section. The Administrator shall also consult and coordinate with State and local officials and other interested parties having concerns related to the program carried out under this section.

(d) The research program required under this section shall include, but not be limited to—

(1) research, development, and demonstration concerning the identification, characterization, and monitoring of indoor air pollution sources and levels (including research, development, and demonstration relating to (A) the measurement of various pollutant concentrations and their strengths and sources, (B) high-risk building types, and (C) instruments for indoor air quality data collection);

(2) research relating to the effects of indoor air pollution on human health;

(3) research, development, and demonstration relating to control technologies to prevent or abate indoor air pollution (including the development, evaluation, and testing of individual and generic control devices and systems); and

(4) the dissemination of information to assure the public availability of the findings of the Administrator pursuant to the research, development, and demonstration activities under this section.

(d)(1) Not later than one year after the date of the enactment of this Act, the Administrator shall submit to the Congress a plan for the implementation of the research program required under this section.

(2) Not later than thirty-six months after such date of enactment, the Administrator shall submit a progress report, including an assessment of future research needs.

(3) Not later than fifty-four months after such date of enactment, the Administrator shall submit to the Congress a final report setting forth the results of the program, assessing the state of knowledge concerning the risks to human health associated with indoor air pollution, assessing the need for further research, and making such recommendations as may be appropriate.

(4) The progress report and the final report submitted under this subsection shall be submitted to the National Academy of Sciences within a reasonable period before the dates required for submittal to the Congress and, when submitted to Congress, such reports shall contain any comments provided by the National Academy of Sciences.

(e) Nothing in this section shall be construed to authorize the Administrator to carry out any regulatory program or any activity other than research, development, and demonstration and the related reporting, information dissemination, and coordination activities specified in this section. Nothing in this section shall be construed to limit the authority of the Administrator or any other agency or instrumentality of the United States under any other authority of law.

(f) Of the funds appropriated pursuant to the authorization contained in section 2(a)(9) of this Act for each of the fiscal years 1983 and 1984, the sum of $4,000,000 is authorized to be appropriated to carry out this section.

SENIOR ENVIRONMENTAL ASSISTANCE PROGRAM

SEC. 9. (a) To carry out the purposes of this Act, the Administrator of the Environmental Protection Agency is directed to develop a Senior Environmental Assistance Program, designed to assist Federal, State, and local environmental agencies in carrying out programs authorized under this Act.

(b) In providing assistance under subsection (a), the Administrator shall utilize, to the fullest extent possible, existing older American employment programs, as provided for in section 105(b)(4) of Public Law 95-478.

(c) The Administrator shall not make any grant to, or enter into any agreement with, any State, or local environmental agency for funding of any activities under this section unless such agency certifies that such activities will supplement and not supplant any existing jobs.

Amend the title so as to read: "An Act to authorize appropriations for environmental research, development, and demonstration for the fiscal years 1983 and 1984, and for other purposes.".

UP AMENDMENT NO. 1370

(Purpose: To authorize appropriations for environmental, research, development, and demonstration for the fiscal years 1983 and 1984, and for other purposes)

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments with a further amendment which I send to the desk on behalf of the distinguished Senator from Washington (Mr. GORTON) and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. GORTON, proposes an unprinted amendment numbered 1370.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter insert the following:

SHORT TITLE

SECTION. 1. This Act may be cited as the "Environmental Research, Development, and Demonstration Act of 1983."

GENERAL AUTHORIZATIONS

SEC. 2. (a) There are authorized to be appropriated to the Environmental Protection Agency for environmental research, development, and demonstration activities:

(1) $55,685,000 for fiscal year 1983 and $59,026,000 for fiscal year 1984 for activities authorized under the Clean Air Act;

(2) $40,790,000 for fiscal year 1983 and $43,237,000 for fiscal year 1984 for activities authorized under the Federal Water Pollution Act;

(3) $25,906,000 for fiscal year 1983 and $27,460,000 for fiscal year 1984 for activities authorized under the Safe Drinking Water Act;

(4) $31,579,000 for fiscal year 1983 and $33,474,000 for fiscal year 1984 for activities authorized under the Solid Waste Disposal Act;

(5) $6,469,000 for fiscal year 1983 and $6,857,000 for fiscal year 1984 for activities authorized under the Federal Insecticide, Fungicide, and Rodenticide Act;

(6) $1,586,000 for fiscal year 1983 and $1,681,000 for fiscal year 1984 for radiation activities authorized under section 301 of the Public Health Service Act;

(7) $13,770,000 for fiscal year 1983 and $14,602,000 for fiscal year 1984 for interdisciplinary activities;

(8) $28,149,000 for fiscal year 1983 and $29,838,000 for fiscal year 1984 for activities authorized under the Toxic Substances Control Act;

(9) $53,530,000 for fiscal year 1983 and $56,742,000 for fiscal year 1984 for energy activities which—

(A) $20,128,000 in fiscal year 1983 and $21,336,000 in fiscal year 1984 is for the Energy Control Technology Research Program;

(B) $6,889,000 in fiscal year 1983 and $7,302,000 in fiscal year 1984 is for the Energy Health Effects Research Program;

(C) $11,484,000 in fiscal year 1983 and $12,173,000 in fiscal year 1984 is for the Energy Ecological Effects Research Program;

(D) $3,000,000 in fiscal year 1983 and $3,180,000 in fiscal year 1984 is for the Energy Monitoring Research Program; and

(E) $12,029,000 in fiscal year 1983 and $12,751,000 in fiscal year 1984 is for the Acid Rain Research Program.

(b) There are authorized to be appropriated to the Environmental Protection Agency, Office of Research and Development, $9,721,000 for fiscal year 1983, and $10,304,000 for fiscal year 1984, for program management and support.

(c) When the Administrator of the Environmental Protection Agency finds it in the public interest, the Administrator may utilize funds authorized in subsection (a) or (b) for the purpose of conducting appropriate scientific and professional reviews of research and development grant, contract, and cooperative agreement applications and to enter into coooperative agreements to conduct such reviews.

(d) Funds may be transferred between the categories listed in subsections (a) and (b) except that no funds may be transferred to any particular category listed in subsection (a) or (b) from any other category or categories listed in any such subsection if the total of the funds so transferred to that particular category would exceed 10 per centum thereof, unless—

(1) a period of thirty legislative days has passed after the Administrator of the Environmental Protection Agency or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate a written report containing a full and complete statement concerning the nature of the transfer involved and the reason therefor; or

(2) each committee of the House of Representatives and the Senate having jurisdiction over the subject matter involved before the expiration of such period, has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

(3) no funds authorized for appropriation pursuant to this Act may be used for any activities other than those authorized by this Act.

(e)(1) The Administrator shall establish a separately identified program of continuing, long-term environmental research and development for each activity listed in subsection (a) of this section. Unless otherwise specified by law, at least 20 per centum of the total funds appropriated to the Administrator for each activity listed in subsection (a) of this section shall be obligated and expended for such long-term environmental research and development under this subsection.

(2) The Administrator shall prepare an annual report on the performance of the program established under paragraph (1) of this subsection and shall submit the report to appropriate legislative and appropriation committees of the Senate and House of Representatives at the time the President's budget is submitted to Congress.

The report shall include—

(A) a list of funded long-term research projects in each activity listed in subsection (a),

(B) the nature, status, and major results of funded long-term research projects,

(C) how the results of funded long-term research projects are likely to be used and what steps are being taken to foster their use, and

(D) any other pertinent information on the performance of the program established under this subsection.

(f) Appropriations made pursuant to the authority provided in section 2 of this Act shall remain available for obligation and expenditure, or for obligation and expenditure, for such period or periods as may be specified in Acts making such appropriations.

(g) At least thirty days prior to issuing any general notice of major reduction in force in any fiscal year, the Administrator shall inform the appropriate legislative and appropriation committees of the Senate and House of Representatives in writing of the reasons for the reduction and the impact of the reduction on carrying out the provisions of this Act.

ENVIRONMENTAL MONITORING

SEC. 3. (a) Of the funds authorized to be appropriated to the Administrator of the Environmental Protection Agency for environmental research and development under section 2, $43,253,000 for fiscal year 1983 and $46,030,000 for fiscal year 1984 are authorized for environmental monitoring activities which are authorized under the Federal environmental statutes and which support development of a continuing national environmental monitoring program. The Administrator, in consultation and cooperation with the heads of the National Bureau of Standards, the United States Geological Survey, the National Institutes of Health, the National Oceanic and Atmospheric Administration, and other Federal and State agencies involved in environmental monitoring activities, shall take such actions on a continuing basis as may be necessary and appropriate to ensure that the national environmental monitoring program called for in this subsection is comprehensive and national in scope and will allow effective and efficient implementation of the Federal environmental statutes, valid assessments of environmental quality in all media, and accurate determination of the impact of environmental protection programs on environmental quality.

(b) The Administrator shall proceed with the development of the national environmental monitoring program called for in subsection (a) by first developing a national monitoring program for air quality, the features of which shall be applied, where appropriate and useful, to monitoring programs for other media. The Administrator shall prepare, in consultation and cooperation with the heads of appropriate Federal and State agencies involved in environmental monitoring activities, a plan for the design and implementation of the monitoring program called for in this subsection. The plan shall—

(1) include a statement of objectives for the program which conform with and are supportive of the goals of such a program as set forth in subsection (a), steps to achieve these objectives, measures of program performance, program participants and their responsibilities and activities in support of the program, and any other pertinent information which may be necessary for successful implementation and appropriate evaluation of the program;

(2) be reviewed by the National Academy of Sciences, with the results of the review being included in the plan along with the Administrator's response to this review; and

(3) be submitted to the appropriate legislative committees of the Senate and House of Representatives one year after the enactment of this Act, and thereafter biannually, following review and update of the plan by program participants, the National Academy of Sciences, and the Environmental Protection Agency.

(c) On the last day of fiscal year 1984, the Administrator shall issue a report on the state of air quality and the factors affecting air quality based on data gathered through the monitoring program established under this section. The report shall be updated and reissued on the last day of each subsequent fiscal year.

(d) The Administrator shall take such actions on a continuing basis as may be necessary or appropriate—

(1) to promote the development and use of accurate and reliable procedures for gathering environmental data of verifiable accuracy; and

(2) to ensure that any environmental datum which is included in the data base of the environmental monitoring programs established pursuant to subsections (a) and (b) has been subjected to validated quality assurances procedures.

ENERGY RESEARCH

SEC. 4. (a) Appropriations authorized for energy research under section 2(a)(9) shall be used for environmental research associated with (1) synthetic fuels production; (2) the extraction, processing, transportation, and combustion of coal, oil, natural gas, and other fossil fuels; and (3) other energy development activities and their related problems, including indoor air pollution, that may pose a threat to public health and environmental quality.

(b) In complying with subsection (a) the Administrator is directed—

(1) to establish and thereafter maintain a long-term health and ecological effects research program on energy-related pollutants whose aim shall be to identify those pollutants most harmful to public health and environmental quality and to elucidate, for those pollutants found most harmful, the relationship between exposure and health effects;

(2) to take whatever steps are necessary and appropriate to ensure that the research program called for in paragraph (1) is effectively coordinated with related research programs of the National Institutes of Health, the Department of Energy, the Department of Commerce, and other Federal agencies involved in such research;

(3) to establish and thereafter maintain a monitoring program on energy-related pollutants which conforms with the requirements set forth in section 3;

(4) to include in the report on air quality required under section 3(c) a section reporting the emission and dispersion of energy-related air pollutants based on the data gathered from the monitoring program established under paragraph (3).

(c) The Administrator shall continue to be responsible for conducting, and shall continue to conduct, development and demonstration of energy-related pollution control technologies as necessary to fulfill the requirements of the Clean Air Act, the Federal Water Pollution Control Act, and other pertinent pollution control statutes.

(d) Energy-related environmental research projects authorized to be administered by the Environmental Protection Agency under this Act shall not be transferred administratively to any other Federal or State agency or reduced through budget amendment.

RESEARCH PROGRAM CONCERNING INDOOR AIR QUALITY

SEC. 5. (a) The Congress finds, on the basis of reports prepared by the General Accounting Office and the National Academy of Sciences, that due to the absence of a statutory mandate for a single Federal agency to undertake and coordinate research, development, and demonstration efforts concerning indoor air pollution—

(1) Federal programs in this field are fragmented and underfunded; and

(2) an adequate information base concerning potential indoor air quality problems is not being developed by the Federal Government.

(b) The Administrator shall carry out a research program under this section with re-

spect to indoor air quality. Such program shall be designed to (1) gather data and information on all aspects of indoor air quality in order to contribute to the understanding of health problems associated with the existence of air pollutants in the indoor environment, and (2) coordinate Federal, State, local and private research, development, and demonstration efforts relating to the improvement of indoor air quality.

(c) The Administrator may establish such committees, comprised of individuals representing Federal agencies concerned with various aspects of indoor air quality, and such advisory groups, comprised of individuals representing the scientific community, industry, and public interest organizations, as may be necessary to assist the Administrator in carrying out the research program required by this section. The Administrator shall also consult and coordinate with State and local officials and other interested parties having concerns related to the program carried out under this section.

(d) The research program required under this section shall include, but not be limited to—

(1) research, development, and demonstration concerning the identification, characterization, and monitoring of indoor air pollution sources and levels (including research, development, and demonstration relating to (A) the measurement of various pollutant concentrations and their strengths and sources, (B) high-risk building types, and (C) instruments for indoor air quality data collection);

(2) research relating to the effects of indoor air pollution on human health;

(3) research, development, and demonstration relating to control technologies to prevent or abate indoor air pollution (including the development, evaluation, and testing of individual and generic control devices and systems); and

(4) the dissemination of information to assure the public availability of the findings of the Administrator pursuant to the research, development, and demonstration activities under this section.

(d)(1) Not later than one year after the date of the enactment of this Act, the Administrator shall submit to the Congress a plan for the implementation of the research program required under this section.

(2) Not later than thirty-six months after such date of enactment, the Administrator shall submit a progress report, including an assessment of future research needs.

(3) Not later than fifty-four months after such data of enactment, the Administrator shall submit to the Congress a final report setting forth the results of the program, assessing the state of knowledge concerning the risks to human health associated with indoor air pollution, assessing the need for further research, and making such recommendations as may be appropriate.

(4) The progress report and the final report submitted under this subsection shall be submitted to the National Academy of Sciences within a reasonable period before the dates required for submittal to the Congress and, when submitted to Congress, such reports shall contain any comments provided by the National Academy of Sciences.

(e) Nothing in this section shall be construed to authorize the Administrator to carry out any regulatory program or any activity other than research, development, and demonstration and the related reporting, information dissemination, and coodination activities specified in this section. Nothing in this section shall be construed to limit the authority of the Administrator or if any other agency or instrumentality of the United States under any other authority of law.

(f) Of the funds appropriated pursuant to the authorization contained in section 2(a)(9) of this Act for each of the fiscal years 1983 and 1984, the sum of $4,000,000 is authorized to be appropriated to carry out this section.

SENIOR ENVIRONMENTAL ASSISTANCE PROGRAM

SEC. 6. (a) To carry out the purposes of this Act, the Administrator of the Environmental Assistance Program is directed to develop a Senior Environmental Assistance Program designed to assist Federal, State, and local environmental agencies in carrying out programs authorized under this Act.

(b) In providing assistance under subsection (a), the Administrator shall utilize, to the fullest extent possible, existing older American employment programs as provided for in section 105(b)(4) of Public Law 95-478.

(c) The Administrator shall not make any grant to, or enter into any agreement with, any State or local environmental agency for funding of any activity under this section unless such agency certifies that such activity will supplement and not supplant any existing jobs.

SEC. 7. Of the funds appropriated from the Hazardous Substance Response Trust Fund for fiscal year 1983 and fiscal year 1984, $15,000,000 may be expended for research and development activities for each fiscal year. It is the sense of the Congress that the costs of those research and development activities associated with or necessitated by the actual or threatened release of hazardous substances, as those terms are defined under Public Law 96-510, be paid for out of that fund created by Public Law 96-510, the Comprehensive Environmental Response Compensation and Liability Act of 1980.

SCIENCE ADVISORY BOARD

SEC. 8. (a) Section 8(b) of the Environmental Research, Development, and Demonstration Authorization Act of 1978 (Public Law 95-155) is amended to read as follows:

"(b)(1) The Board shall be comprised of at least nine members appointed by the Administrator from nominees recommended to the Administrator by a nominating committee. The nominating committee shall include representatives of Federal research agencies including but not limited to the National Institute of Occupational Safety and Health, National Institute of Environmental Health Sciences, National Cancer Institute, National Science Foundation and the National Academy of Sciences and the Executive Director and representative members and former members of the Science Advisory Board. The nominating committee shall be chaired, in consultation with the Administrator, by the National Institute of Environmental Health Sciences. The nominating committee shall solicit from the general public, through notice in the Federal Register, candidates for nomination to the Board. The Administrator may require such information from the nominees to the Board as the Administrator deems necessary, and the Administrator shall publish in the Federal Register the name, address and professional affiliation of each nominee.

"(2) Each member of the Board and nominee to the Board shall be qualified by education, training, and experience to evaluate scientific and technical information on matters referred to the Board under this section. The Administrator shall select persons nominated for the Board to ensure that Board membership is fairly balanced in terms of the points of view represented and the functions to be performed by the Board. In order to provide this balance, the Board membership must represent the States, industry, labor, academia, consumers, and the general public; and the nominating committee established under paragraph (1) shall make certain that this requirement is met when selecting nominees to the Board which in turn are recommended to the Administrator for selection as members of the Board.

"(3) The terms of the members of the Board shall be one to three years, and shall be staggered so that the terms of no more than one-third of the total membership of the Board and its committees shall expire within a single fiscal year. Each member of the Board shall serve the full length of that member's term unless that member is unable, for involuntary reasons, to discharge his or her duties as set forth in this section or has violated the regulations promulgated pursuant to paragraph (5).

"(4) If a vacancy on the Board is not filled by the Administrator within ninety days of the occurrence of that vacancy, the nominating committee established under paragraph (1) shall meet and appoint, within sixty days, a member of the Board to fill that vacancy from the list of nominees recommended to the Administrator under paragraph (1) in accordance with the selection criteria set forth in paragraph (2).

"(5) In order to ensure the objectivity of the Board, the Administrator shall promulgate, within one hundred and twenty days after the date of the enactment of this paragraph, regulations regarding conflicts of interest with respect to the members of the Board.".

(b) Section 8(e)(2) of such Act (Public Law 95-155) is amended by adding at the end thereof the following: "The Board's advice and comments and the response of the Administrator shall be included in the record with respect to any proposed rule and published in the Federal Register in accordance with the requirements of the environmental statutes and the authority of the Administrator.".

(c) The provisions of this section relating to the qualifications, appointments, and terms of members of the Board shall take effect upon the expiration of the terms of members serving on the Board as of the date of enactment of this Act.

Mr. GORTON. Mr. President, the Senate has before it today the bill authorizing appropriations for the Environmental Protection Agency's environmental research and development programs for 1983 and 1984. I encourage its adoption.

On June 10, 1982, the Senate passed S. 2577, authorizing programs for 1983 only. On August 17, 1982, the House of Representatives amended S. 2577 so that it authorizes 1984 programs as well and provided for a number of Environmental Protection Agency studies and reports to Congress. Generally speaking the authorization levels which the House of Representatives passed were at reasonable levels. The total authorized by the House of Representatives for 1983 was only $3,140,000, or less than 1½ percent,

higher than the Senate approved authorization. The House of Representatives 1984 authorization adds only a 6-percent inflation factor to the 1983 authorization total.

Because of the great extent of similarity regarding authorization levels of the House and Senate approaches to environmental research and development programs, the appropriate House and Senate authorizing committees have worked together to formulate a set of compromise Senate amendments regarding the balance of House of Representatives provisions. They are offered here today with my expectation that the House of Representatives will accept them. In essence they provide for programs of environmental monitoring, energy research, indoor air pollution research, and senior environmental assistance to Federal, State and local environmental agencies.

Several details of the House of Representatives bill placing spending limitations on the Environmental Protection Agency have been resolved. In particular, the Agency would be allowed under the amendments here offered to make transfers between spending accounts in the amount of 10 percent, rather than 5 percent, and would not be limited from spending in connection with reductions in force without approval by each congressional legislative or appropriations committee with jurisdiction over the Agency. The Agency would, however, even under the language of the amendments offered here, be required to report to Congress in the event of intended major reductions in force. Major reductions in force would be those which reduce personnel within a specific research program or project which would significantly alter its direction, purpose, or quality. Closure of a laboratory or research facility would be an example.

So often we are called upon in dealing with legislation on environmental issues to rely upon incomplete information about the scientific and technological implications of certain environmental policy alternatives. Environmental research, therefore, is not only valuable for discovering the unknown harmful implications of environmental pollutants, but also to provide us with more complete information regarding the implications of our policy choices. Hopefully, the passage of this bill will contribute to an active and sound research program at the Environmental Protection Agency.

Mr. BAUCUS. Mr. President, I join my colleague Senator GORTON in recommending support for an amendment to S. 2577, a bill to reauthorize the research and development program administered by the Environmental Protection Agency. This amendment is intended to address and reconcile some differences between the bill as passed by the Senate on June 10 and a similar measure approved by the House on August 17.

I will first direct by remarks to provisions that were not included in the Senate version of the bill and which merit some clarification.

Section 2(g) of the amendment requires written notification to appropriate congressional committees 30 days prior to a major reduction in force within the research and development program. The term "major reduction" is carefully chosen and would apply in the following circumstances.

A reduction in personnel for the purposes of effecting the closure of a laboratory, research facility, or other field component supported by the Office of Research and Development.

A reduction in personnel within a specific research program or project which would significantly alter the direction, purpose, quality, or anticipated duration of the program or project.

A reduction in force at headquarters which would alter or diminish a function currently being performed.

A reduction in personnel within the Office of Research and Development as part of any agencywide reduction in force to achieve personnel levels as projected in the President's budget request for the Agency.

This provision is not intended to require congressional notification of every voluntary or involuntary separation of personnel within the research and development program. It does provide for advance notice to Congress if a significant personnel reduction would affect the management, quality, or kind of research conducted by the Agency. Hopefully, it will assist in minimizing speculation regarding facility closings and changes in program direction by providing an open and forthright notification process.

Section 5 of this amendment establishes a research program on indoor air quality. This provision requires an assessment of the origin and characteristics of indoor air pollutants, and their impacts on human health. The Administrator of the Environmental Protection Agency is directed to coordinate this effort which will culminate in a final report to Congress 54 months after enactment.

I would like to note that the Senate Environment and Public Works Committee considered and adopted this provision as an amendment to the Clean Air Act. Since this provision simply requires additional research and does not confer new regulatory authority to the Agency, committee members are agreeable to incorporating it into this measure.

Section 6 of the amendment directs the Environmental Protection Agency Administrator to draw upon the expertise and experience afforded through older American employment programs in carrying out programs mandated by this measure. This provision complements a similar Senate bill that was introduced recently.

I would like to highlight a few of the other differences between this amendment and S. 2577. This amendment provides for a 2-year authorization. This is a deviation from the practice of doing an annual authorization. The intent is to lend consistency to the program and encourage the Agency to pursue long-term research projects. Additional directives are included to support this objective, including an annual report requirement on the status of long-term research projects. A model environmental monitoring program is required to establish a system for providing reliable data concerning environmental quality. Finally, a provision is included directing the Agency to pursue energy-related research. This area was slated for considerable reductions in funding and personnel in the fiscal year 1983 budget requests.

I would like to comment briefly on the authorization language respecting the use of the hazardous substance response trust fund moneys for research and development activities in section 7 of the amendment. Use of the fund to investigate and develop new technology, monitoring techniques, and study the effects of the release of hazardous substances into the environment is consistent with congressional intent in establishing the fund in the Comprehensive Environmental Response Compensation and Liability Act of 1980. The Agency should vigorously pursue a strong research program to complement cleanup and remedial efforts associated with contamination incidences.

There has been considerable concern expressed about the future and the direction of the EPA research and development program over the past 1½ years. As yet, this administration has failed to submit a nominee for the position of Assistant Administrator to Congress, which has contributed to the speculation. It is my belief that this amendment sends a clear signal to the Agency that Congress is very much interested in maintaining a sound and credible research program.

The amendment (UP No. 1370) was agreed to.

Mr. BAKER. Mr. President, is the motion before the Senate?

The PRESIDING OFFICER. The motion is pending. The question is on agreeing to the motion of the Senator from Tennessee (Mr. BAKER).

The motion was agreed to.

NATIONAL CHRISTMAS SEAL MONTH

Mr. ROBERT C. BYRD. Mr. President, on behalf of the distinguished majority leader and myself, I send to the desk a joint resolution designating

the month of November 1982 as National Christmas Seal Month and I ask for its immediate consideration.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 262) to designate the month of November 1982 as "National Christmas Seal Month."

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the joint resolution (S.J. Res. 262) was considered, ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 183), and its preamble, read as follows:

S.J. RES. 262

Whereas chronic diseases of the lung afflict well over 18 million Americans, cause more than 200,000 deaths annually, and cost the Nation more than $45 billion each year in lost wages, productivity, and in direct costs of medical care;

Whereas diseases such as emphysema, chronic bronchitis, and lung cancer are responsible for 340,000 premature deaths a year;

Whereas lung cancer is shortly expected to surpass breast cancer as a cause of death in American women, emphysema and other chronic obstructive pulmonary diseases have been the fastest rising cause of death in the United States in the last 14 years, and over six million Americans, including 2 million children, suffer from asthma;

Whereas, the American Lung Association, the Nation's first voluntary health organization providing services to communities with funds raised through private contributions, was founded in 1904 to combat tuberculosis when this lung disease was known in nearly every American family;

Whereas tuberculosis has been subdued, though not eradicated, and in this 109th anniversary year of the discovery of the tubercle bacillus, the American Lung Association, with other national and international health organizations, is pledged to eliminate tuberculosis from this country in the next decade; and

Whereas the American Lung Association now uses Christmas Seal dollars to support pulmonary research, advanced education of doctors and nurses in pulmonary medicine, and to provide services to thousands of Americans in their own communities: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of November 1982 is designated as "National Christmas Seal Month" and the President of the United States is authorized and requested to issue a proclamation calling upon all government agencies and the people of the United States to observe the month with appropriate activities supporting the Christmas Seal program.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I am advised that we have cleared for action Calendar No. 918, H.R. 5879. Could I inquire of the minority leader if he is prepared to consider that measure at this time?

Mr. ROBERT C. BYRD. Yes, Mr. President, I am prepared to proceed.

REFUGEE ASSISTANCE

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate H.R. 5879.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 5879) to amend chapter 2 of title IV of the Immigration and Nationality Act to extend for 1 year the authorization of appropriations for refugee assistance, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

● Mr. SIMPSON. Mr. President, the Refugee Act of 1980 which originated in the Committee on the Judiciary was initally authorized for 3 years. Those 3 years expire on this day, September 30, 1982.

The reauthorization bill before the Senate is H.R. 5879, which reauthorizes domestic resettlement funding for 1 year and further amends the Refugee Act to provide for 100 percent reimbursement of cash and medical assistance provided to refugees under any assistance or reimbursement programs authorized by the Office of Refugee Resettlement: it also provides that a refugee placement policy be developed; that State, local, and private sector representatives meet on a regular basis to plan and coordinate refugee placement; that records on refugee dependency rates be maintained; that voluntary agencies and local welfare offices exchange information on job offers and welfare applications of refugees; it provides that cash assistance to refugees shall terminate on refusal of an appropriate job offer or refusal of an appropriate social program, as well as be terminated for those refugees who become full-time students; that voluntary agencies shall expend reception and processing funds within 2 years of receipt; that the Office of Refugee Resettlement report to the Congress on various aspects of refugee programs; and finally that the GAO shall conduct annual audits of funds provided by the State Department to voluntary agencies under reception and placement agreements.

At a hearing held by the Subcommittee on Immigration and Refugee Policy earlier this month, these amendments appeared generally acceptable to most of the witnesses. The House held extended hearings on the amendments while we were heavily involved with the markup and debate of the Immigration Reform and Control Act in the Senate.

To avoid interruption of our domestic resettlement program, I recommend that we adopt the House amendments. During the first session of the 98th Congress, the subcommittee will more thoroughly address the refugee resettlement issues in additional hearings and consultations with a view toward reauthorizing the Refugee Act for an extended number of years in 1983. I think it is important that we get back to a multiyear reauthorization, if that is possible. Under the circumstances, it seems more practical, and certainly more realistic, to deal with it at this point on the basis of a 1-year reauthorization because of the crush of business here in the Senate.

The subcommittee reported this bill to the full committee by unanimous vote. The full committee has also reported this bill to the Senate by a unanimous vote.●

● Mr. HUDDLESTON. Mr. President, the Senate presently has before it the Refugee Assistance Amendments of 1982, H.R. 5879. In essence, this bill would reauthorize the assistance portion of the Refugee Act of 1980.

When the bill passed the House, the 3-year reauthorization was reduced to 1 year by Chairman MAZZOLI. He chose to reauthorize for 1 year because it would guarantee that the Congress would have to come back next year and give consideration to the many serious problems associated with the refugee program since time did not permit doing so during this Congress. Among these concerns are the definition of "refugee," the annual consultation process through which refugee allocations and ceilings are determined, and the role of the U.S. Coordinator for Refugee Affairs.

I believe that the Refugee Act of 1980 has failed to maintain reasonable control of refugee admissions and is in need of substantial modification. During the 3 years it has been in effect, the act has permitted refugee admissions of more than 300 percent of what Congress set as the "normal flow" for those years.

Unfortunately, the prospects for fiscal year 1983 are not greatly improved. Even though the normal flow has been reduced to zero due to a sunset provision, the admission level has been set by the administration at 98,000.

The partial Federal cost for domestic assistance for refugees in this country will be $1.08 billion, which is not much of a reduction compared to last year's cost of $1.09 billion. However, even these cost estimates are incomplete because they do not include many Federal programs refugees participate in and, more importantly, they do not include the State and local

costs associated with the refugee resettlement costs.

No one can deny that the United States should continue to provide reasonable assistance to the refugees of the world. However, there are limits to what we can do as a nation. According to the findings of the Senate Judiciary Committee, the United States permanently resettles more immigrants and refugees than the rest of the world combined. At a time when we are drastically cutting back on assistance programs for our own citizens, I believe that it is time that we recognize that we are doing more than our fair share.

The distinguished chairman of the Senate Immigration Subcommittee, Senator SIMPSON, has indicated on numerous occasions in the past that he too is concerned about the size of the refugee program and has indicated that there are problems with it which should be addressed.

While we probably do not agree completely on what these problems are or how they should be addressed, I have great respect for his concerns, compassion, and expertise. The distinguished chairman has stated that he intends to more thoroughly address the refugee resettlement issues in additional hearings next year. Would the chairman tell us more specifically what his plans are regarding these hearings?

Mr. SIMPSON. First, I would like to thank the distinguished Senator from Kentucky, Senator HUDDLESTON, for his continued interest in the immigration problems which this country faces. He has been extraordinarily attentive and extremely helpful in assisting us in focusing on these problems and in finding solutions for them.

Although we do not agree fully on the problems associated with the refugee program or the solutions to these problems, I do agree that enough serious questions have been raised about the program that it should be thoroughly reviewed. I plan to have hearings next year, in addition to a midyear consultation with the appropriate Cabinet officers, to focus on such issues as the interpretation of the definition of "refugee," the workability of the consultation process and the function of the voluntary agencies in resettling refugees.

Other areas could be reviewed and additional hearings could be held. I will be working with other Members of Congress, including the distinguished Senator from Kentucky and the ranking minority member of the subcommittee, Senator KENNEDY, to determine if additional hearings are necessary. I intend to hold these hearings before September when we will begin the consultation process.

Mr. HUDDLESTON. I know that the distinguished chairman has never pulled his punches in any of the many hearings he has conducted on immigration and refugee issues. However, I know from personal experience that we in Congress often spend too much time talking to the so-called policymakers and not enough time talking to those who must carry out the policy in the field.

From past experience we know that dedicated officials in the field have prevented us from carrying out policies in refugee resettlement which were at times contrary to the law. I would urge the distinguished chairman to seek the benefit of their experience in these hearings. For example, I think that INS officials in Southeast Asia could provide excellent information.

Mr. SIMPSON. I agree that this kind of information would be useful and the subcommittee will give serious consideration to this suggestion.

Mr. HUDDLESTON. I thank the distinguished chairman for sharing with us today his plans for thoroughly addressing the refugee resettlement issues. I commend the chairman for the outstanding job he has done so far on this very complex and emotional issue.

If the distinguished chairman will bear with me just 1 more minute, I do have a question about the bill.

The bill does address the problem of inadequate consultation with State and local governments. In fact, it attempts to assure this consultation process in a manner similar to that proposed in my bill, S. 2003. Although it does not use exactly the same procedures proposed in S. 2003, it is an attempt to solve the problems which necessitated the introduction of S. 2003.

State and local governments must have adequate and timely information in order to plan and budget for massive refugee resettlements. Although the bill establishes the procedure for consulting, it does not specify when information must be given, nor the kind of information which must be given.

Is it the intent of the chairman in proposing this bill that State and local governments shall be given timely and specific information in regard to the number of refugees to be resettled, the areas in which they are to be resettled, and the full economic impact of that resettlement?

Mr. SIMPSON. The Senator is correct when he states that State and local governments must be brought into the refugee resettlement process more actively. He is also correct when he says that they must assuredly have specific and timely information. That is my certain intent with regard to the bill.

In addition, I would wish to say that the Senator's bill, S. 2003, was extremely helpful to us in addressing the State and local government consultation problem.

Mr. HUDDLESTON. I again thank the distinguished chairman for taking these few minutes to clarify these matters. I also commend him for the exceptional job he has done and assure him that I am always ready to assist him in any way he deems appropriate.

Mr. SIMPSON. Thank you, Senator HUDDLESTON. Your efforts have also been exceptional. You may be assured that I will always continue to draw upon your expertise as we grapple with this never to end problem of humane immigration reform and control.●

● Mr. KENNEDY. Mr. President, I am pleased to join with Senator SIMPSON in expediting Senate passage of H.R. 5879, the Refugee Assistance Amendments of 1982. I had intended to offer several amendments, which I have outlined in my additional views included in the committee's report on this bill. However, in the spirit of moving this important reauthorization through Congress before the beginning of the fiscal year, I will not offer them at this time.

This authorization for refugee resettlement assistance expires unless we act—as we must—to reauthorize it. This legislation provides support for the full range of Federal programs to assist refugees coming into our country. Because the admission of refugees is a Federal decision, the Federal Government obviously has a responsibility to help States and local communities in absorbing the refugees—helping them become self-sufficient, contributing members of our society.

In this regard, I want to indicate my concern that this bill extends the reauthorization for only 1 additional year. Frankly, this defeats one of the basic purposes of the Refugee Act of 1980—of ending the year-by-year, ever-changing character of our refugee resettlement program.

Although Federal assistance should be carefully monitored by Congress, we can achieve this without requiring annual reauthorizations of what are long-term programs and multiyear Federal commitments to States and local communities.

I believe a 3-year authorization, with careful monitoring by Congress, would make far more sense.

I know that Senator SIMPSON has indicated he will consider this approach when we look at these and other issues involved in refugee resettlement early in the next Congress.

With that understanding, I urge the Senate to adopt H.R. 5879 and send it to the President's desk.●

The bill was ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended until not past the hour of 12 noon on the same terms and conditions as previously stated.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL-AID HIGHWAY ACT OF 1982—TIME LIMITATION AGREE- MENT

Mr. BAKER. Mr. President, I now have a unanimous-consent agreement limiting time for debate on the highway bill which has been cleared on both sides, I believe. I will state it now for the consideration of the Senate.

Mr. President, I ask unanimous consent that when the Senate proceeds to the consideration of S. 2574, a bill to authorize appropriations of certain highways in accordance with title 23 of the United States Code, and for other purposes, that the measure be considered under the following time agreement:

Thirty minutes of debate on the bill and an amendment in the nature of a substitute to be offered by Senators STAFFORD, RANDOLPH, SYMMS, and BENTSEN. The time to be equally divided and controlled by the managers of the bill, or their designees;

Twenty minutes of debate on an amendment to be offered by Senator ANDREWS relating to truck widths, the time to be equally divided and controlled by the mover of the amendment and the manager of the bill or their designees;

Twenty minutes of debate on an amendment to the Andrews amendment to be offered by Senators EAGLETON and SCHMITT, the time to be equally divided and controlled by the movers of the amendment and the Senator from North Dakota, Mr. ANDREWS.

After disposition of the Andrews amendment as amended, if amended, the Senate next consider an amendment by Senator DANFORTH to the committee substitute—dealing with ADAP but specifically not to include any earmarked funds for the St. Louis airport—debate on which to be 5 minutes equally divided between the mover of the amendment and the manager of the bill.

After disposition of the Danforth amendment, the Senate proceed without further debate to vote on the committee amendment in the nature of a substitute, as amended, if amended, and then to third reading of the bill without intervening motion or appeal provided that only the specified amendment be in order to this bill.

The PRESIDING OFFICER. Does the order provide for time for debate on the bill?

Mr. BAKER. Thirty minutes of debate on the bill and the amendment in the nature of a substitute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I have consulted with the minority leader on this. I hope it meets with his approval.

I ask unanimous consent that the Senate proceed to the consideration of Calendar Order 669, Senate Resolution 399, which is the budget waiver on the highway bill.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 399) waiving section 303(a) of the Congressional Budget Act of 1974 for consideration of S. 2574.

The PRESIDING OFFICER. Is there objection to the present consideration of this resolution?

There being no objection, the resolution (S. Res. 399) was considered and agreed to, as follows:

S. RES. 399

Resolved, That section 303(a) of the Congressional Budget Act of 1974 is hereby waived with respect to the consideration of S. 2574, the Federal-aid Highway Act of 1982.

SEC. 2. This waiver is necessary so that multi-year highway legislation may be considered by the Senate. Highway authorizations are contract authority which when enacted creates new spending authority. To consider this multi-year highway bill such a waiver is required by section 303(a).

Mr. BAKER. Mr. President, that is the last item of business I have to transact in morning business, unless some other Senator is seeking recognition. I would encourage the Chair to inquire if there is further morning business.

Mr. President, I am advised there is a requirement for a little more morning business.

FEDERAL-AID HIGHWAY ACT OF 1982

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of S. 2574, under the time agreement just offered. I further ask unanimous consent that the distinguished assistant majority leader (Mr. STEVENS) may be recognized during the debate on that measure or any measure related to it as in morning business to make a presentation for which he reserved time earlier today. The time remaining in morning business, at the time this request is made, will be 8 minutes. I ask that the time allocated to the distinguished Senator from Alaska, extended by that time remaining, be 8 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, the understanding is that the Senator from Alaska may claim the right to speak even though we are in debate on the highway bill when he reaches the floor. That is done purely as a matter of expediting the business of the Senate while accommodating the convenience of Members.

Mr. President, would the Chair please state the pending measure?

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2574) to authorize the appropriations for the construction of certain highways in accordance with title 23 of the U.S. Code and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. Who yields time?

Mr. STAFFORD. Mr. President, I am prepared to yield, under the order as I understand it, to the Senator from Alaska for 8 minutes.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Is there further time left, Mr. President?

The PRESIDING OFFICER. There are 6 minutes of the Senator's time left.

Mr. ROBERT C. BYRD. Is that my time, Mr. President?

The PRESIDING OFFICER. Yes.

EXPRESSION OF DESIRE FOR DIALOG

Mr. STEVENS. Mr. President, I had intended to enter into a further dialog with the Senator from Ohio, in view of the article in this morning's paper concerning the position of the Senator from Ohio as he deals with a series of bills that affect mainly the areas west of the Potomac. I can understand the Washington Post's position, because they are not affected by any of the legislation he is seeking to delay.

I also thought that I would have a chance to talk to the Senator from Ohio about the article that was reported in the morning paper to be in Penthouse magazine, but I ran down and bought a copy of the Penthouse magazine. The ladies in my office insisted that I keep it in this folder. Unfortunately, it does not have an article about Senator METZENBAUM. That will not come out for another 2 weeks.

I do hope that he will be present on the floor later. I think it would be improper for us to keep the Senate waiting long, now, but I do hope we can

have an extended dialog sometime before we recess tonight.

Mr. THURMOND and Mr. STAFFORD addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. STAFFORD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STAFFORD. I understand the pending business is S. 2574, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Is there any time left, Mr. President? I ask the Senator if he will yield.

Mr. STAFFORD. Yes, I yield.

Mr. STEVENS. Is there any time left of the time allocated to me?

The PRESIDING OFFICER. Yes, there are about 5 minutes.

Mr. STEVENS. Will the Senator object if I yield that time to the distinguished President pro tem? Apparently, there was a misunderstanding.

Mr. STAFFORD. I have no objection if that occurs without my losing my right to the floor.

Mr. STEVENS. I yield to the President pro tem.

OMNIBUS VICTIMS PROTECTION ACT OF 1982

Mr. THURMOND. Mr. President, I move to lay before the Senate a message from the House on S. 2420.

Mr. ROBERT C. BYRD. Mr. President, I wish the distinguished President pro tempore would not make this motion at this time. This may be a matter that has already been taken care of or, if not, I am not sure it has been cleared on our side.

Mr. THURMOND. It has been cleared, as we understand it.

Mr. ROBERT C. BYRD. I am sorry to have to delay the distinguished President pro tempore, but there is no indication on my side that this matter has been cleared. I am trying to check it out for him.

The PRESIDING OFFICER (Mr. JEPSEN). The Chair advises Senators that the Senate has before it S. 2574. Most respectfully, will the President pro tempore withhold until we dispense of S. 2574 that is before the Senate?

Mr. THURMOND. Mr. President, I would be pleased to do that.

Mr. ROBERT C. BYRD. Mr. President, I also thank the President pro tempore.

FEDERAL-AID HIGHWAY ACT OF 1982

The Senate continued with the consideration of the bill.

UP AMENDMENT NO. 1371

(Purpose: To authorize an extension of the Federal-aid highway program through fiscal year 1983)

Mr. STAFFORD. Mr. President, I send to the desk an amendment in the nature of a substitute to 2574. I do so on behalf of all of the original sponsors: myself, Mr. RANDOLPH, Mr. SYMMS, and Mr. BENTSEN. I ask for immediate consideration of the amendment in the nature of a substitute and ask that it may be considered original text for the purpose of further amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Vermont (Mr. STAFFORD), for himself, Mr. RANDOLPH, Mr. SYMMS, and Mr. BENTSEN, proposes an unprinted amendment numbered 1371.

Mr. STAFFORD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after enacating clause and insert:

That this Act may be cited as the "Federal-Aid Highway Act of 1982".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1984," and inserting in lieu thereof the following: "the additional sum of $3,300,000,000 for the fiscal year ending September 30, 1984,".

APPROVAL OF INTERSTATE COST ESTIMATE

SEC. 103. The Secretary of Transportation shall apportion for the fiscal year ending September 30, 1984, the sums authorized to be apportioned for such year by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table 5 of the committee print numbered 97-53 of the Committee on Public Works and Transportation of the House of Representatives.

OBLIGATION LIMITATION AND ALLOCATION FORMULA

SEC. 104. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1983 shall not exceed $8,200,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, and section 9 of the Federal-Aid Highway Act of 1981, except Chapter 3 of the Urgent Supplemental Appropriations Act of 1982 (Public Law 97-216), and obligations with respect to Union Station under Public Law 97-125. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code.

(b) For the fiscal year 1983, the Secretary shall distribute the limitation imposed by subsection (b) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) During the period October 1 through December 31, 1982, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1983, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

(e)(1) Section 1106(b) of the Omnibus Budget Reconciliation Act of 1981 is repealed.

(2) Section 1106(c) of the Omnibus Budget Reconciliation Act of 1981 is amended to read as follows:

"(c) For the fiscal year 1982, the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.".

(3) Section 1106(d) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "periods" and inserting in lieu thereof "period" and by striking out "and October 1 through December 31, 1982,".

(4) Section 1106(c)(2) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "and after August 1, 1983,".

AUTHORIZATIONS

SEC. 105. (a) For the purpose of carrying out the provisions of title 23, United States Code, the following sums are hereby authorized to be appropriated:

(1) For the Federal-aid primary system in rural areas, including the extensions of the Federal-aid primary system in urban areas, and the priority primary routes, out of the Highway Trust Fund, $1,500,000,000 for the fiscal year ending September 30, 1983. For the Federal-aid secondary system in rural areas, out of the Highway Trust Fund, $425,000,000 for the fiscal year ending September 30, 1983.

(2) For the Federal-aid urban system, out of the Highway Trust Fund, $775,000,000 for the fiscal year ending September 30, 1983.

(3) For Indian reservation roads and bridges, $83,000,000 for the fiscal year ending September 30, 1983.

(4) For carrying out section 215(a) of title 23, United States Code—

(A) for the Virgin Islands, not to exceed $5,000,000 for the fiscal year ending September 30, 1983;

(B) for Guam, not to exceed $5,000,000 for the fiscal year ending September 30, 1983; and

(C) for American Samoa, not to exceed $1,000,000 for the fiscal year ending September 30, 1983.

Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(5) For the Commonwealth of the Northern Mariana Islands, not to exceed $1,000,000 for the fiscal year ending September 30, 1983. Sums authorized by this paragraph shall be expended in the same manner as sums authorized to carry out section 215 of title 23, United States Code. Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(6) For the forest highways, out of the Highway Trust Fund, $33,000,000 for the fiscal year ending September 30, 1983.

(7) For public lands highways, out of the Highway Trust Fund, $16,000,000 for the fiscal year ending September 30, 1983.

(8) For economic growth center development highways under section 143 of title 23, United States Code, out of the Highway Trust Fund, $29,000,000 for the fiscal year ending September 30, 1983.

(9) For the Great River Road, out of the Highway Trust Fund, $19,000,000 for the fiscal year ending September 30, 1983, for construction or reconstruction of roads on a Federal-aid highway system.

(10 For access highways under section 155 of title 23, United States Code, $15,000,000 for the fiscal year ending September 30, 1983.

(b)(1) For each of the fiscal years 1984—no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditures for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended.

(c) In the case of priority primary routes, $125,000,000 of the sums authorized for the fiscal year ending September 30, 1983, by subsection (a)(1) of this section for such routes, shall not be apportioned. Such $125,000,000 of such authorized sum shall be available for obligation on the date of apportionment of funds for such fiscal year, in the same manner and to the same extent as the sums apportioned on such date.

(d) Section 163(p) of the Federal-Aid Highway Act of 1973 is amended by inserting after "September 30, 1982," the following: "and $50,000,000 for the fiscal year ending September 30, 1983,".

INTERSTATE RESURFACING

SEC. 106. Section 105 of the Surface Transportation Assistance Act of 1978 is amended by striking out "and not to exceed $800,000,000 for the fiscal year ending September 30, 1984." and inserting in lieu thereof "not to exceed $1,000,000,000 for the fiscal year ending September 30, 1984.".

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION

SEC. 107. (a) Subsection (e) of section 144 of title 23, United States Code, is amended by striking "and September 30, 1982," and inserting in lieu thereof "September 30, 1982, and September 30, 1983,";

(b) Subsection (g) of such section is amended by striking "and September 30, 1982," each place that it appears and inserting in lieu thereof "September 30, 1982 and September 30, 1983"; and

(c) Section 202(6) of the Surface, Transportation Assistance Act of 1978 is amended by striking "and $900,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof "$900,000,000 for the fiscal year ending September 30, 1982, and $1,000,000,000 for the fiscal year ending September 30, 1983.".

SAFETY CONSTRUCTION AUTHORIZATIONS

SEC. 108. Section 202(8) of the Surface Transportation Assistance Act of 1978 is amended by striking "and $200,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof "$200,000,000 for the fiscal year ending September 30, 1982, and $200,000,000 for the fiscal year ending September 30, 1983.".

RAIL-HIGHWAY CROSSINGS

SEC. 109. Subsection (b) of Section 203 of the Highway Safety Act of 1973 as amended by the Highway Safety Act of 1978 is amended by striking "and September 30, 1982." and inserting in lieu thereof, "September 30, 1982, and September 30, 1983.".

Mr. STAFFORD. Mr. President, on May 26 the Senate Environment and Public Works Committee reported S. 2574, the Federal-Aid Highway Act of 1982. This bill provided a 4-year authorization for the Federal-aid highway program.

While long-term funding is the committee goal for this program which requires long-range planning for greatest efficiency, it does not appear possible to move ahead with multiyear authorizations at this time.

The committee is proposing a substitute to S. 2574 which will provide authorizations for the Federal-aid highway program for 1 year. This legislation, if promptly enacted, will allow the States to continue their highway programs without any disruption.

This simple extension provides approximately $8.6 billion in new budget authority for fiscal 1983, plus $100 million for the emergency relief program. An obligation limitation of $8.2 billion would be placed on the program. Money would be provided for the interstate construction, interstate 4R, primary, secondary, urban and bridge programs. Funds would also be provided to continue several small categories.

This legislation continues the one-half percent minimum apportionment for the interstate construction program. I believe very strongly that those States which made an early commitment to expenditiously complete the Interstate System, often at the expense of the rest of their highway network, should not be penalized. This bill also provides a one-half percent minimum apportionment for the interstate 4R program. Repair and rehabilitation of the Interstate System is one of the most pressing problems facing the States today. It is important that each State receive adequate funds to assure at least a minimum program.

The Environment and Public Works Committee has held extensive hearings on the condition of the Nation's highway system and the revenues available to address the needs of the system. There is no doubt that we are at a crucial point in determining whether this country will continue to have the most extensive and effective transportation network in the world.

The program is in place which can preserve our transportation infrastructure. However, revenues have not kept pace with the increased cost of construction. For example, in 1959 it cost $4 million to build 1 mile of interstate while today it costs more than $20 million per mile. Many urban segments still to be built will cost considerably more per mile. Highway user fees have remained the same since 1959. Since that time fuel consumption has decreased because of higher gas prices and more fuel efficient cars. This translates into less revenue for the Highway Trust Fund. With inflation under control and construction costs stabilizing, the revenue shortfall must be addressed and resolved as soon as possible. We are finding that there is also a high price to pay for deferred maintenance.

The current Federal-aid highway program expires October 1 of this year. In order to maintain the fiscal year 1982 authorization level of $8.6 billion, a 1-year extension of the Highway Trust Fund is necessary. Without such an extension, only approximately $6.5 billion can be apportioned to the States.

As with all revenue legislation, the Highway Trust Fund extension is generally initiated by the House Ways and Means Committee and passed by the House prior to Senate consideration. With the expiration of the program only days away, the House has still not passed a simple 1-year extension of the Highway Trust Fund. I am pleased that the Senate Finance Committee has recognized the urgency of a simple 1-year trust fund extension and

reported such a measure out of committee. This will enable the Senate to go forward with authorizing legislation. I hope the House will also move expeditiously so the States' highway programs are not unnecessarily disrupted. I want to thank the distinguished chairman of the Finance Committee (Mr. DOLE) and the distinguished ranking member (Mr. LONG) for their efforts in addressing a difficult problem.

Mr. President, I thank the distinguished ranking minority member (Mr. RANDOLPH), and the distinguished chairman and ranking minority member of the Transportation Subcommittee (Mr. SYMMS and Mr. BENTSEN) for their continuing able leadership and diligent efforts in bringing this legislation before the Congress. I appreciate their support in making some very difficult decisions.

Mr. President, I ask my distinguished colleagues to support S. 2574, as amended.

I yield to the ranking minority member.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I support the amendment offered by the capable chairman of the committee (Mr. STAFFORD.)

Mr. STAFFORD speaks of a substitution amendment which would be for a 1-year extension of the Federal-aid highway program instead of the 4-year extension contained in S. 2574 as reported earlier this year by the Committee on Environment and Public Works.

At this point, I commend the attention given to matters before the Committee on Environment and Public Works by all 16 members of that committee. They are diligent as they study—at times amend—and report vital legislation to the Senate of the United States.

The products of the farm and factory and the field move to the consuming public because of actions taken in this body and in the House of Representatives. We give much time, and should give much time, to carefully considering transportation issues before this committee.

Sometimes people forget the importance of the inland waterways to this Nation as the products move on the bosoms of the rivers in this country. Certainly, we understand the responsibility as a committee, regardless of whether it is majority or minority. We are 16 members of that committee, working diligently, and we hope in good intent, to help the Congress of the United States reflect the thinking of the American people that we must have and continue to support the best transportation system in this shrinking world in which we live.

The funding for fiscal year 1983 is in the amount of $8.647 billion, to continue the vital categorical assistance provided under this program.

Funding is provided for continuation of the interstate construction program; primary, secondary, and urban roads; bridge replacement and rehabilitation; safety construction and repair; and rehabilitation of the Interstate System.

Mr. President, since its modern inception in 1956, the Federal-aid highway program has been the backbone of our national transportation system. Under this construction program, a substantial portion of the 42,500 miles of the national system of interstate and defense highways has been completed.

Sometimes people forget that the legislation, in the initial concept, carried the words "and defense highways." There is a value beyond the commerical, the movement of products, and people. Defense needs are an important part of our system of highways.

Mr. President, billions of dollars in Federal and State funds have been invested. I do not say they have been spent; they have been invested. When these dollars are invested, there is a return not only of 100 cents on the dollar spent but also a dividend to every American.

Sometimes we do not understand the background of this program as America, from the earlier days, thought in terms of transportation.

We are talking today in the city of Washington, D.C. How wonderful it is if we would take time to look back and to remember that George Washington was thinking about transportation. He proposed, with the help of others, to build a canal from what is now Georgetown to the Ohio River. Think of the daring of the man. Think of the vision. Think of the spirit of the man who would think that we could build a canal through those Blue Ridge Mountains, those Allegheny Mountains of West Virginia and across that country in which I live to the Ohio River.

When the work was completed as far as Cumberland, Md., what happened? The iron horse came in, the locomotive came in, and so the canal lost its usefulness and the tonnages began to decrease as the steam engine came to roll across the tracks westward.

So, Mr. President, without the authorizations contained in the amendment by our able chairman only one categorical program will have funds available for apportionment on October 1 of this year.

This would be an intolerable situation. It would reflect upon Congress and every Member of it.

And it would cause chaos, chaos—I use the word advisedly—in the highway construction program of this country.

The States have developed long range highway construction programs. These programs require the Federal-aid program be authorized on a timely basis.

Mr. President, without the authorizations for fiscal year 1983 for our noninterstate highway program, many vital, many crucial, many important projects will be delayed or canceled altogether.

As a supporter of highways during my entire effort in Congress, I turn aside to recall—and I say this with the able Senator, Mr. SYMMS, present—that we were thinking in the 1930's about something that was developed finally 20 years later and we had hearings in the House Roads Committee. We have no such committee now, but we had a Roads Committee in the House of Representatives. At the time Wilburn Cartwright of Oklahoma was its chairman and I was a member. We were to bring in something in the way of this Interstate System. I had a bill pending which I called the transcontinental highway program. I remember Representative Cartwright from Oklahoma saying to me, "Jennings, will you preside?" And I said, "Yes, I will preside."

He said:

> The reason is Mr. McDonald (then head of the Bureau of Public Roads) who is a very fine man, is against that sort of program, and I would just rather not preside. Will you take over?"

I took over. We did not get the bill passed but we were thinking then as it is necessary for us to think now not of the generation of which we are a part but of the generations which will follow.

Mr. President, returning to the present situation, if the Congress fails to provide new authorizations for the highway program, I cannot think of a more grave consequence for the country and particularly the construction industry which is already facing severe employment problems.

The State of West Virginia, for instance, would not have sufficient funds to continue its interstate construction program. Our State has been moving aggressively to complete the designated Interstate System within its boundaries. Under this bill as amended, we will receive approximately $72 million for interstate projects in fiscal year 1983. Overall, West Virginia will receive in excess of $110 million in Federal funds for highway construction.

The authorizations in this bill will be used for road rehabilitation work and for the replacement of deficient bridges. By approving the interstate cost estimate, the fiscal year 1984 interstate authorization can be apportioned to the States and major projects undertaken which will lead to

the eventual completion of our Interstate Highway System.

Last year, the Congress passed legislation to reduce the estimated cost of completing the Interstate System from $54 billion to $34 billion. This was a commitment to move forward toward the completion of this system. Without the continued authorizations and apportionments made possible in this bill, I say to Senator STAFFORD, this goal cannot be reached as quickly or as efficiently as anticipated when we took the action in Congress last year.

I assure every Member of the Senate not just those who are now in the Chamber, that following passage of this 1-year extension of the program our committee will consider and bring to the Senate next year legislation to meet the urgent highway needs of this country.

Congress can then consider increases in the taxes which will go into the Highway Trust Fund and a possible reallocation of the costs among the various classes of the users of our highways.

If the effort to increase revenues is successful, a significantly expanded program can be authorized by Congress which will assist the States in meeting the vital needs which have recently been identified in the surveys of the highways and the streets of America.

Mr. President, I again express my strong support for the pending amendment.

Mr. STAFFORD. I thank the most distinguished and most able Senator from West Virginia.

I say, Mr. President, that throughout my service in the Senate it has always been a matter of great satisfaction to me to serve with him. We serve together on virtually every committee to which either one of us belong. I have learned much from him in the years I have served with him.

Mr. President, I am going to yield the remainder of the time on the majority side to the distinguished Senator who is chairman of our Subcommittee on Transportation and who has done yeoman service in this field throughout his service in the Senate.

Mr. SYMMS. Mr. President, I thank the distinguished chairman of our committee for those kind remarks and I also add my thanks for the cooperation, help, and support that I have received from Senator RANDOLPH, the distinguished Senator from West Virginia.

I also commend our colleague, Senator BENTSEN, from Texas, with whom we have all worked very closely together, and I would say that without the help of these Senators I would not have been able to be here and have had the successes we have had in the past year with respect to the highway programs.

Mr. President, the highway needs in this country have been well documented. The Environment and Public Works Committee has held a series of hearings on the condition of the system both in Washington and across the country during the past 2 years.

During those hearings I did not find anyone who disagreed that something must be done to preserve the Nation's network of highways and bridges. States and localities have also realized that we have reached a critical point and have responsibly addressed this problem by raising additional revenues. The Federal Government must also do its part.

The Federal excise taxes which are collected into the highway trust fund have not been changed since 1959. The Federal excise tax on gasoline has been 4 cents per gallon since that time. During the same period construction costs have increased at an alarming rate. As revenues coming into the trust fund are declining, the highway system is wearing out. According to a report, "The Interstate Highway System: Issues and Options," recently completed by the Congressional Budget Office, mounting repair needs, escalating completion costs, and declining financial resesources are all contributing toward making completion of the Interstate System an unattainable goal.

The report states:

> Completion of all the construction, reconstruction and repair projects that qualify for Federal support under current programs would require an increase in annual authorizations of $8 billion.

This is more than double the current program level. The report goes on to say that to support such an increase we would have to nearly triple the current four cents per gallon gas tax.

Several months ago George Will, the distinguished syndicated columnist, wrote an article on "What Potholes Say About Us," in which he indicated that system "maintenance as well as original construction is a measure of a society's vitality. It is also a measure of maturity, of the willingness to make timely provisions for the future. By this measure, America is increasingly deficient."

While last winter's potholes may have been temporarily filled, the deterioration of our Nation's highway system continues. Newsweek magazine recently did a feature story on the "Decaying of America" which recounts the problems of our highway system and notes the cost to Americans of our decaying physical plant. The article states:

> In Houston, for example, city planners estimate that motorists pay a "traffic congestion tax" of $800 a year in time and gasoline wasted on the city's snarled expressways.
>
> TRIP, the road information program, estimates that bad roads cost the private sector upwards of $30 billion annually for everything from broken axles to lost business.

Last year the Government Accounting Office (GAO) completed a report on "Deteriorating Highways and Lagging Revenues." The report again cited the deterioration of our Nation's highways, particuularly the interstate system, and the need for billions of dollars to solve the problem. The report goes on to say that if the problem is not addressed in a timely manner it will cost even more.

The Senate Environment and Public Works Committee reported S. 2574, the Federal-Aid Highway Act of 1982, on May 26, 1982. This legislation provided authorizations for 4 years from fiscal year 1983 through 1986. This bill continued the shift in emphasis from new construction to the rehabilitation of existing roads and bridges. It also provided increased flexibility for the States so that scarce resources could be directed to their highest priorities.

At the same time, the Senate Environment and Public Works Subcommittee on Transportation held a series of hearings on the needs of the Federal-Aid Highway System versus the existing revenues coming into the highway trust fund, and allocation of highway costs among the various highway user classes.

I have supported an increase in the Federal highway user fees as one way of providin ; urgently needed revenues to support the completion of the interstate system, and to rebuild existing Federal-aid highways and bridges. The committee has collected a substantial amount of evidence which shows the large cost of deferred maintenance. I firmly believe that further postponing the necessary repairs and rehabilitation is false economy for all of us and for all the taxpayers whom we represent.

However, it appears that the revenue issue will not be addressed this year, and the consideration of increased revenues for the program must be done this year. Authorizations for the Federal-aid highay program will end on this October 1. We again find ourselves in the position of providing stop-gap legislation so that the States' highway programs can continue without serious disruption. In order to authorize the programs even for fiscal 1983 at the existing level of $8 billion, a 1-year extension of the highway trust fund is required. Without this extension only approximately $6.5 billion in new authorization can be made available to the States.

The Highway Trust Fund extension is within the jurisdiction of the House Ways and Means and Senate Finance Committees. The House has not yet passed a simple, 1-year extension of the highway trust fund. I hope they will do that very soon to that we can go forward with a 1-year authorization of the highway program. If this does not occur, we will make further adjust-

ments to remain within the available funds currently in the highway trust Fund. I want to express my appreciation to the distinguished chairman and ranking member of the Finance Committee (Mr. DOLE and Mr. LONG) for their cooperation and efforts in resolving a very difficult problem.

I believe the highway program works best when multiyear authorizations are provided to the States so the long range planning so critical for large, costly construction projects can be accomplished. Unfortunately, under the circumstances this cannot be done. It is my hope that Congress will begin early next year to provide long term funding for the highway program. I will certainly do everything I can as chairman of the subcommittee to make sure that happens.

Senator RANDOLPH has already touched on this subject and made the point that what the people need, the engineers and builders of the roads, is to have a program that is laid out over several years so that the best, wisest use of these dollars can be spent and the best and most amount of road per dollar can be achieved.

The amendment being offered to S. 2574 in the nature of a substitute provides a 1-year authorization for the Federal-aid highway program. It provides $3,300,000,000 for the interstate construction program, $1,000,000,000 for the interstate 4R program, $1,500,000,000 for the primary program, $775,000,000 for the urban program, $425,000,000 for the rural program, $1,000,000,000 for the bridge program and funds to carry on the emergency relief program, forest highways, public lands, territorial highways, Indian reservation bridges and roads, economic growth center roads, Great River Road, access highways to lakes, rail relocation demonstration projects, rail-highway crossings, and hazard elimination.

An obligation limitation of $8.2 billion is placed on the Federal-aid program. This is a $200 million increase over last year and a $500 million increase over the President's budget request. While the committee recognizes the need for budgetary restraint, it also believes that the necessity of preserving the reliability of our transportation system justifies this level of spending. This program is also a user fee funded program and the committee believes that revenues collected specifically for the purpose of constructing and rehabilitating highways and bridges should be spent for those purposes.

Mr. President, I want to thank my distinguished colleagues on the Environment and Public Works Committee, particularly our distinguished chairman (Mr. STAFFORD) and ranking minority member (Mr. RANDOLPH), and the very able and distinguished ranking minority member of the Subcommittee on Transportation (Mr. BENTSEN).

Mr. President, this legislation is not all we hoped it would be. It is not the multiyear authorization legislation which I believe is so necessary for this program. It does not provide the level of funds I believe are necessary to address the condition of the Nation's highways. However, I do believe it is the very best legislation that can be achieved at this time and it will continue the highway program without disruption. I urge my distinguished colleagues to pass S. 2574, as amended.

UP AMENDMENT NO. 1372

Mr. ROBERT C. BYRD. Mr. President, I send an amendment to the desk, which is an amendment to the substitute. I do it on behalf of my distinguished senior colleague (Mr. RANDOLPH) and myself, Mr. FORD, and Mr. HUDDLESTON of Kentucky, and I ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD), for himself, Mr. RANDOLPH, Mr. HUDDLESTON, and Mr. FORD, proposes an unprinted amendment numbered 1372 to the unprinted amendment numbered 1371.

Mr. ROBERT C. BYRD. Mr. President, I ask that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment, insert the following:

ENERGY IMPACTED ROADS

SEC. 110. (a) Section 105 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(h) In preparing programs to submit in accordance with subsection (a) of this section, the State highway departments may give priority to projects for the reconstruction, resurfacing, restoration, or rehabilitation of highways which are incurring a substantial use as a result of transportation activities to meet national energy requirements and which will continue to incur such use, and in approving such programs the Secretary may give priority to such projects.".

(b) Section 120 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(k) Notwithstanding any other provision of this section, the Federal share payable on account of any project under this title to reconstruct, resurface, restore, and rehabilitate any highway which the Secretary determines, at the request of any State, is incurring a substantial use as result of transportation activities to meet national energy requirements and will continue to incur such use in 85 per centum of the cost of such project.".

IMPROVEMENT OF ENERGY-IMPACTED ROADS

Mr. ROBERT C. BYRD. Mr. President, this amendment addresses a problem affecting communities throughout West Virginia and the Appalachian and midwestern regions of our country.

My amendment places greater emphasis on the improvement of energy-impacted roads. In particular, my amendment will contribute to greater efficiency in the coal transportation system and help alleviate congestion along highways throughout my State and other coal-producing regions.

The expansion of coal production that has occurred in the last decade has benefited the Nation by reducing our dependence on foreign oil and providing our citizens with employment.

The typical coal-hauling vehicle in the Appalachian region is a double rear axle tandem rig with a rear axle capacity of 55,000 pounds. These trucks often reach a gross weight of 80,000 pounds when loaded. The heavy use of highways by these kinds of vehicles increases the wear and tear on the roads.

However, the people who live along the roads are the ones who suffer the most from this situation. Many West Virginia communities are built along narrow valley walls with a single highway running through the middle of the town. With massive coal trucks traveling through the town almost continually, the resulting dust, noise, and congestion becomes severe.

My amendment provides a mechanism by which these people will be able to be relieved of the worst of these factors. Under my amendment, State highway officials will be able to receive an increase in the Federal share of road improvements when they affect highways used heavily for coal or other energy transportation. The increased Federal share will be 85 percent of the cost of the improvement projects; an increase from the 75-percent Federal share that States currently receive.

The improvement projects for coal-haul roads would be directed at resurfacing, restoration, reconstruction, and rehabilitation of the highways that are put to heavy energy transportation use. This includes a very substantial proportion of West Virginia's highways. More than 43 million tons of coal from West Virginia moved on the State's highways for at least one portion of its transportation from minesite to end user in the mid-1970's. That tonnage accounted for 58 percent of all coal produced at that time.

I would like to thank Senator RANDOLPH, the distinguished ranking member of the Committee on Environment and Public Works, for his diligence and assistance in connection with this matter. I also thank the very distinguished chairman of the committee for his cooperation on this amendment. The distinguished Senator from Kentucky, Mr. HUDDLESTON, deserves warm thanks for his knowledge and perseverance on this subject. As always, the majority leader has my thanks and appreciation for his efforts

to expedite consideration of my amendment.

Mr. HUDDLESTON. Mr. President, I am extremely pleased to join the distinguished minority leader in submitting this amendment, in which highways used to transport our Nation's energy supplies can receive the attention due them. This amendment is the latest in a long series of efforts on my part to see that we give that attention to problems caused in areas that provide the fuel to run the Nation's factories and heat our country's homes.

Mr. President, the energy transportation system of America is in a shambles. A 1978 study by the Department of Transportation, which was authorized by an amendment of mine to the 1976 highway bill, indicated that there is an approximately $4 billion backlog of reconstruction needs on this system.

The amendment we offer today provides no new money for these repairs; however, it does reemphasize the commitment of the Federal Government to redressing the problems resulting from the production and transportation of the Nation's energy supplies.

Our amendment would increase from 75 percent to 85 percent the Federal share of funding for those portions of the Federal Highway System which are designated by the Governor of the State and approved by the Secretary of Transportation as being part of the Energy Transportation System.

I am particularly pleased to be a cosponsor of this amendment because of my longtime involvement in attempting to secure Federal attention to the care and restoration of our vital Energy Transportation System.

The Department of Transportation report mentioned above also concluded that in the long run, a source of financing distinct from Federal highway-aid funds would be necessary in these areas. The National Transportation Policy Study Commission, in its final report, pointed to a projected sixfold increase in the use of energy impacted roads. The amendment that we present today does not, of course, establish a new funding mechanism outside of the trust fund for the repair and reconstruction of the highways in question. However, I do believe that it will, at the very least once again reemphasize the national nature of the deteriorating energy impacted road system.

Kentucky, for example, finds itself in the precarious position of being potentially unable to continue to effectively supply its share of the country's energy needs due to the rapidly deteriorating coal transportation system. Kentucky presently has approximately 3,000 miles on the Federal Highway System that are being used to haul coal.

Mr. President, in closing, let me once again say that this amendment is indeed a further recognition of the burden that will be placed on our transportation facilities by the activities required to meet national energy policy objectives. Examples of these activities are the search for and production of more domestic oil, the development of synthetic fuel from coal, and the conversion of facilities from oil to coal. Each of these activities, as well as the already clearly identified ones such as domestic coal production, will result in increased use by heavy vehicles on the Energy Transportation System. The change in the formula which we offer today should provide States with the opportunity to stretch already tight highway budgets, and I urge the support of my colleagues for this amendment.

● Mr. SCHMITT. Mr. President, I am pleased to cosponsor the Byrd amendment and urge its adoption as a fundamental building block in our national effort toward energy self-sufficiency.

Our national coal assets represent our most dependable energy resource. The United States presently imports one-third of its total energy supplies, and we can expect this figure to return or even surpass the levels reached just a few years ago when we were most radically at the mercy of foreign sources.

Our economy is on the road to recovery. Even with continued conservation efforts, our energy demands will increase to keep pace with expanding production and industrial growth.

Adoption of this measure means a commitment to the necessary infrastructure that is fundamental to stable energy supplies. Access to our coal reserves must be considered a priority that precedes and keeps pace with the expanding coal markets. In the West, this is particularly important as coal leasing on Federal lands begins to accelerate. Better transportation corridors, safer highways, and increased access are all part of our Federal commitment to energy self-sufficiency and I believe that this amendment is in accord with that commitment. I urge my colleagues to support this goal and vote in favor of this amendment.●

Mr. STAFFORD. Mr. President, we have examined this amendment on behalf of the majority, and we are prepared at this point to accept it.

The PRESIDING OFFICER (Mr. MATTINGLY). Is all time yielded back?

Mr. STAFFORD. I yield back our time.

Mr. ROBERT C. BYRD. I yield back ours.

The amendment (UP No. 1372), was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished manager of the bill Mr. STAFFORD.

UP AMENDMENT NO. 1373

Mr. DANFORTH, Mr. President, I send an amendment to the desk and ask that it be reported.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH) for himself and Mr. EAGLETON proposes an unprinted amendment numbered 1373 to the committee substitute, UP amendment No. 1371.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

"SEC. . Section 10526(a) of title 49, United States Code, is amended—

"(1) by striking 'or' at the end of paragraph (12);

"(2) by striking the period at the end of paragraph (13), and inserting in lieu thereof '; or'; and

"(3) by adding at the end thereof the following:

'(14) transportation of broken, crushed or powdered glass.'.

"SEC. . Section 508 of the Airport and Airway Improvement Act of 1982 is amended by adding at the end thereof the following new subsection:

"'(e) USE OF CERTAIN APPORTIONED FUNDS FOR DISCRETIONARY PURPOSES.—(1) Subject to paragraphs (2) and (3), if the Secretary determines, based upon notice provided under section 509(e) or otherwise, that any of the amounts apportioned under section 507(a) will not be obligated during a fiscal year, the Secretary may obligate during such fiscal year an amount equal to such amounts at his discretion for any of the purposes for which funds are made available under section 505.

"'(2) The Secretary may make obligations in accordance with paragraph (1) only if the Secretary determines that the total of obligations for such fiscal year for purposes of section 505 will not exceed the amount authorized for such fiscal year under section 505(a) and if the Secretary determines that sufficient amounts are authorized under section 505(a) for later fiscal years for obligation for such apportioned amounts which were not obligated during such fiscal year and which remain available under section 508(a).

"'(3) For purposes of amounts apportioned for fiscal year 1982, the Secretary may make the determinations under paragraphs (1) and (2) on or before October 30, 1982. For purposes of any limitation on obligations imposed by law, amounts obligated in accordance with this subsection on or before October 30, 1982, shall be deemed to have been obligated during fiscal year 1982 to the extent that such amounts, when added to amounts obligated on or after October 1, 1981, and before October 1, 1982, for purposes of section 505, do not exceed $450,000,000.'

Mr. DANFORTH. Mr. President, this amendment, which is offered by Senator EAGLETON and myself, will do two things: First, it will exempt from

Interstate Commerce Commission regulation the transportation of broken, crushed, or powdered glass. This part of the amendment I am offering on behalf of Senators GOLDWATER and HEFLIN.

Second, the amendment would clarify the intent of Congress concerning a provision in the recently passed ADAP legislation to continue the existing practice allowing the Secretary of Transportation to make discretionary grants to replace unused apportionment funds.

Mr. President, I believe this amendment is cleared on both sides of the aisle, and I move the adoption of the amendment.

Mr. STAFFORD. Mr. President, I know of no objections to the amendment on this side of the aisle. I am prepared to accept the amendment on behalf of the majority.

Mr. RANDOLPH. Mr. President, I join with the Senator from Vermont, who is knowledgeable in this field. We in the minority have checked the presentation of the able Senator from Missouri, and we are glad to accept the amendment.

The PRESIDING OFFICER (Mr. JEPSEN). Is all time yielded back?

Mr. DANFORTH. I yield back the remainder of my time.

Mr. STAFFORD. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri (Mr. DANFORTH).

The amendment (UP No. 1373) was agreed to.

Mr. DANFORTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Chair recognizes the Senator from North Dakota.

UP AMENDMENT NO. 1374

Mr. ANDREWS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Dakota (Mr. ANDREWS) proposes an unprinted amendment numbered 1374.

Mr. ANDREWS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the substitute add the following:

Section 127 of title 23, United States Code is amended by striking: "width in excess of ninety-six inches" and in lieu thereof inserting: "vehicle width limitation of not more or less than one hundred and two inches on any segment of the National System of Interstate and Defense Highways, or any other qualifying Federal-aid highways as designated by the Secretary of Transportation, with traffic lanes designed to be a width of twelve feet or more".

At the end of section 127 insert the following: "Notwithstanding any limitation relating to vehicle widths contained in this section, certain safety devices which the Secretary of Transportation determines as necessary for safe and efficient operation of motor vehicles shall not be included in the calculation of width, a State may grant special use permits to motor vehicles that exceed one hundred and two inches, and no withholding of apportionment shall be imposed upon a State by virtue of the width limitation provisions of this section prior to October 1, 1983.".

Mr. ANDREWS. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ANDREWS. Mr. President, my amendment is a simple one. It changes the truck width from the present 96 inches mandated some 2 decades ago when Federal highways were 22 feet in width to 102 inches on Federal highways which are now of 24 foot widths.

As the chairman of the Transportation Subcommittee, Mr. President, we have studied how we can better facilitate the transportation needs of our country. In our study, we found that this simple change, which allows trucks to be the same width as buses on the Federal highway system of 24 feet, would save upwards of $4 billion annually to the consumers of this country.

This amendment was passed out as part of an appropriations bill by a vote of 18 to 4 in the Appropriations Committee. We were thinking of referencing it to the continuing resolution last night. We felt, however, that to do so might add to the debate time on that measure, and so the majority leader and others graciously suggested that we add it as an amendment to this bill at this particular time.

Mr. President, for the past 25 years, as I said, since the passage of the Federal Aid Highway Act of 1956, the Federal Government has been involved in the regulation of truck size limits on the Interstate System. The genesis of the present 96-inch vehicle width evolved from an old railroad standard wherein the typical inside width dimension of a boxcar was 96 inches. Given the standard 22-foot, 2-lane highways that predominated prior to the massive highway construction activity that started in the 1950's, a 96-inch width appeared reasonable at that time, and the Federal-Aid Highway Act of 1956 froze the vehicle width standard at 96 inches.

No one realized at that time that a 96-inch outside width on trailers would preclude putting 96-inch wide loads inside those trailers. So you cannot accommodate two 4 by 8 pallets side by side

Mr. President, I think it is important to point out that my amendment constitutes a modernization of the existing Federal requirement rather than the imposition of a new one, and in no way infringes on States' rights. In addition, States are given a full year before uniform compliance is required.

Since passage of the 1956 Highway Act, 22 States allow trucks wider than 96 inches to travel on their interstates by special permit.

Greater incidents of accidents or fatalities on the interstates of these States because of the 6-inch width differential have not been documented. To the contrary, if one would separate reality from rhetoric, independent studies done by the State of Iichigan and the Western Highway Association, among others, indicate that wider trucks are safer trucks because they have a lower center of gravity which provides more stability and prevents fishtailing.

Mr. President, I think it is extremely important to point out that this would allow trucks to be the same width as buses that now travel these highways. So there is not an addition of some wider vehicle than is now allowed on the Nation's highways.

Further, the argument that an additional 6 inches would cause greater wear on our highways is totally specious. Goods like forest products, sanitary papers, glass products, grocery products, and household moving items, among many others, are shipped on 4 by 8 foot pallets. These pallets are impossible to fit side by side in the current, federally mandated 96-inch dry van. Many of these goods, especially forest products, must be shipped in half-empty vans or on equally inefficient flatbeds. Additionally, 4 by 8 foot pallets, placed end to end, "cube out" long before they "gross out." Quite simply, that means that the trucks fill by volume before they reach legally allowable weight limits.

Were is the logic and commonsense in shipping half-empty trucks West to East, using unnecessary amounts of fuel? Where is the logic, Mr. President, in adding the cost to the grocery customers? I have a telegram from the Grocery Manufacturers Association that they think this change would save the grocery industry $561 million a year. Where is the logic, Mr. President, in forcing an additional tax on the food cost of the consumers of this country of over a half billion dollars a year?

And, most importantly, to those who argue that 6 inches will ruin the highways, where is the logic in using more

trucks and traveling more miles half empty on the interstate system, bouncing up and down, because you have to make those extra trips? Where is the economy? Where is the commonsense? Most importantly, who pays the additional freight cost and suffers from the additional unnecessary use of the highways by increased numbers of trucks bearing half loads? The public, of course.

That is why, Mr. President, I think the time has come for the adoption of this simple change in updating truck widths on our Federal highways, which have gone from 22 to 24 feet. The standard law today says 96 inches on 22-foot double lanes. My amendment would say 102 inches on 24-foot double lanes. There is virtually the same passing room under my amendment as there is in the language that is now in the law.

Mr. President, I urge the adoption of my amendment.

Mr. STAFFORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. STAFFORD. Mr. President, I think, first, I would invite my dear friend and long-time colleague in both the House and the Senate, Senator ANDREWS, to drive up the New Jersey Turnpike to New York and back today and see what his impression is as a result of that drive in connection with the very large trucks that now exist and what it would be like if he was to be sandwiched in two lanes of trucks that are 6 inches wider than those that exist today.

Mr. President, there is at present a major public policy debate about our deteriorating highway system and the appropriate types of highway user taxes necessary to finance that system. There has been no change in the Federal highway excise tax structure since 1959, and in the more than 20 years that have passed since then, we have witnessed a number of troubling developments: First of all, many of our highways and bridges are in serious stages of deterioration; repair and construction costs are soaring; highway trust fund revenues now appear stagnated; and all the while heavy trucks are increasing in weight and size.

Earlier this year the Department of Transportation submitted to Congress a comprehensive study of highway cost allocation among the various vehicle classes—from motorcycles to the heaviest combination trucks. One of the most important conclusions of that study was that heavy trucks are paying only about 65 percent of their fair share of Federal road use taxes.

Tax rates on heavy trucks have, as I mentioned, not changed since 1959, and yet those vehicles are heavier, longer, wider, and traveling our Nation's highways in far greater numbers than before. Many pavement experts see a direct connection between heavy trucks and highway damage. There are, not incidentally, several safety questions posed particularly where the big combination wide trucks are concerned.

At a time when overall authorizations for the Federal highway program are about to expire, I believe this is not the time to consider a matter as controversial as increased truck widths. I firmly believe that if we are to increase Federal highway revenues to the levels necessary for repairing and maintaining our national highway system, we must insure that all vehicle classes, particularly those heavy trucks which are responsible for a large share of the damage done to our roads, pay their proper share of the costs. It is obvious to me that the issues of truck sizes and weights, pavement damages, road repair costs, and road user taxes are all related and should be considered as a major legislative package next year when there will be an opportunity for a thorough discussion of these important policy issues.

The existing subsidy to heavy combination trucks has been documented in numerous Federal and State cost allocation studies. Because of that subsidy, other highway users are forced to pay more than their cost responsibility making for an inequitable tax structure. The railroad industry is also at a significant disadvantage in competing with the motor carrier industry as rail rates are set correspondingly to truck rates. By some estimates as much as 70 percent of the rail revenue is derived from truck competitive freight. If trucks are, in fact, making as large an underpayment as the studies indicate, this obviously gives them an enormous competitive advantage.

The Andrews amendment would require all States to adopt a 102-inch width standard for trucks using interstate and primary roads. The penalty would be severe—loss of Federal highway aid. At present the Federal width standard is 96 inches. States are now allowed to set their own width standards for roads not on the Interstate System. They are also allowed to issue special permits for wider loads on the interstate on a one-time basis. This Senator is not convinced that we now have adequate information in this area to know what kind of impact such provision has on safety and on the entire Federal aid highway system.

I am also deeply concerned that States have the discretion to set their own width standards—indeed, that is part of the new Federal system concept—as they have been allowed to do in the past. To mandate truck widths at the Federal level seems to me to be unnecessary and unwise.

I urge my colleagues, therefore, with great regret, because of my great affection for my friend from North Dakota, Senator ANDREWS, to reject consideration of increased truck widths at this time.

Mr. RANDOLPH. Mr. President, how much time remains for the discussion of this amendment?

The PRESIDING OFFICER. The Senator from North Dakota has 3 minutes 38 seconds. The Senator from Vermont has 5 minutes 29 seconds.

Mr. PERCY. Would the distinguished Senator yield 1 minute?

Mr. STAFFORD. I yield with the request that the time not be taken from my remaining time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, for many years I have worked to make our Nation's highways more safe. I was a chief sponsor of the 55-mile-per-hour speed limit. I introduced a Truck Safety Act in an earlier Congress. Last year, with the generous support of the chairman of the Subcommittee on Transportation, Mr. SYMMS, I succeeded in deleting an amendment in the committee reported highway bill that would have mandated an 80,000-pound truck weight limit for all States. I have consistently opposed efforts to increase the weight and size limits on trucks.

The matter before us however, is not an issue of highway safety or truck sizes and weights. Rather, it is a question of whether we will make our transportation system more efficient; whether we will bring our standards for trucks in conformance with our standards for buses; whether we will bring our standards in conformance with our Canadian neighbors; and, whether we will modernize a width standard that was more appropriate in an era of narrower highways.

I fully support an increase in the Federal truck width limitation to 102 inches on Federal highways with lane widths of at least 12 feet. In my judgment, increasing the width limitation will lower trucking costs and prove to be beneficial to the national economy.

Not at issue here are truck length and weight limitations which, if increased, would expedite highway deterioration. That subject should be addressed during consideration of a gasoline tax increase—which I would support—and a more appropriate allocation of such a tax increase, or user charge—which I would support.

Mr. President, I ask unanimous consent that a letter from Illinois Transportation Secretary John Kramer in support of a 102-inch-width limit be placed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ILLINOIS DEPARTMENT
OF TRANSPORTATION,
Springfield, Ill., September 24, 1982.

Hon. CHARLES H. PERCY,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR PERCY: As you are aware, the FY 1983 US DOT Appropriations bill reported by the Senate Appropriations Committee, S. 2914, included a provision essentially requiring states to permit 102 inch wide motor vehicles to operate on any highway traffic lanes at least 12 feet wide. Illinois law currently restricts motor vehicles to 96 inches but the Illinois Department of Transportation is willing to support such a change. We agree with the arguments in the Senate Appropriations Committee Report that increasing the width limitation would lower trucking costs and thus be beneficial to the national economy. Our State would clearly benefit from such a change.

We feel that this change in the federal law must be scheduled to allow states time to amend their laws and to review their state revenue structures. The October 1, 1983 effective date in the bill would adequately solve this problem.

I want to emphasize that the width issue is entirely separate from the large issues of heavier and longer trucks. The heavy truck issue involves the question of additional revenue to pay for increased road damage and the longer trucks issue raises significant safety concerns.

Thank you for your continuing interest and cooperation in working toward adequate transportation funding for Illinois.

Sincerely,

JOHN D. KRAMER.

Mr. STAFFORD. Mr. President, I yield 3 minutes to my distinguished colleague from West Virginia.

Mr. RANDOLPH. Mr. President, I oppose the amendment that is presented to us by the able Senator from North Dakota (Mr. ANDREWS). He seeks to increase the maximum width of trucks or truck-trailer combinations to 102 inches.

Under our existing law, the maximum width, as we know, is limited to 96 inches.

There are two reasons why I am against the amendment.

The first would be explained very briefly, because we know that the existing requirement has been the law for over 20 years and has been effective. Many States which have a need for wider trucks have successfully used the permit system.

The second reason of opposition: If the Senate is to give consideration to wider trucks, this, I respectfully bring to the attention of the Senator, should be next year, not in the Senate today, when we in the Congress, as Senator STAFFORD has said, will consider the extension of the highway trust fund. That will associate itself with increased taxes.

This Congress is not the one to deal with this specific point that is raised, but the Congress next year will consider the issue of reallocation of taxes which go into the highway trust fund, because of the disparity of associated highway costs among the various classes of users.

I do know that there is a certain appeal—I recognize it—in this amendment. But the realistic look at it calls, I believe, for its defeat.

Mr. STAFFORD. I thank the distinguished Senator. I am prepared to yield the remaining time to my friend from New Mexico.

Mr. SCHMITT. Mr. President, I thank the distinguished Senator from Vermont.

I would like at this point to deal largely with the question of deterioration. We will have a discussion of other issues in connection with the Eagleton-Schmitt substitute.

It is important to realize that in spite of statements to the contrary, the average axle weight on trucks traversing the Nation's highways will increase under this amendment, even though it does not deal directly with weight. There will be greater loading in those trucks and the actual weight will increase.

The Department of Transportation estimates it takes an average of $5.9 billion a year to maintain just current conditions on the Federal highway system, not to mention the cost of the State systems, and that is just current conditions, again not to mention what it is going to take to repair our system which is deteriorating rapidly.

In 1978, more than 55 percent of the mileage or each type of highway, excluding the Interstate System, was rated as fair or poor by the Department of Transportation, and 42 percent of the interstate highways were rated fair or poor.

The deterioration of the roads stems from many factors, including weather, lack of maintenance funds, and lack of maintenance process, but also the increasing weight of heavy trucks on highways.

The five-axle combinations doubled their numbers from 4.2 percent in 1969 to 8.7 percent in 1979. Increased axle weight is important because it has an exponential effect in terms of danger caused on highways. What exponential effect means is that a change of 2,000 pounds, from 8,000 to 10,000 pounds, is equivalent to a few hundred extra cars on the highways, and a change of 2,000 pounds from 18,000 to 20,000 pounds is equivalent to a few thousand extra cars on the highways. It gets worse from there on up.

In addition, thousands of bridges are in inadequate condition in the State and interstate highways already and this will just increase that by thousands, literally thousands, more.

So it is an amendment whose time may come when we have a highway system, both the Federal and State highway system, capable of handling these increased weights, but its time has not come.

As the distinguished senior Senator from West Virginia has indicated, we will have to deal with that issue next year and then we can decide whether we can find a point in the future where it is appropriate to preempt State law. Let us remember what this amendment does. It preempts State law. As a consequence, the National Conference of State Legislatures and the National Governors Association both have taken a position in opposition to this amendment. They are not ready, Mr. President, and we ought to listen to them. This amendment should not be agreed to.

Mr. STAFFORD. Mr. President, is there any time remaining?

The PRESIDING OFFICER. There are 34 seconds remaining.

Mr. STAFFORD. Mr. President, I shall reserve 34 seconds if the proponent of the amendment has a statement he wishes to make.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. ANDREWS. Mr. President, let me reiterate in response to my distinguished collegues and good friends: There is always tomorrow. We have waited years and years for this change.

Let me also state that this would not affect weight by a single pound. Given trucks' modern suspension, a truck flows best over the road when it is loaded at its proper design weight. If the truck is empty, Mr. President, that truck hammers and bounces up and down and actually causes more deterioration than a properly weighted truck.

My amendment, in response to my good friend from Vermont—and I have been just as frustrated with those traffic jams around trucks as he has—would significantly reduce the number of trucks on highways by about 25 percent, because it would allow them to be more adequately loaded.

There is no sense in having an empty truck or half-empty truck bouncing along the highways, burning up fuel we have to import from the OPEC countries when we are concerned with what is happening in the Middle East.

Let me say one other thing we have found in our subcommittee; we cannot get away from the standard-size pallet. From testimony we have had in our committee—we have heard from the freight airlines, Pan Am, the Flying Tigers, and others—all point out that the cargo pods in the 747 are exactly 96 inches. When that load has to be transshipped 100 to 200 miles, it would save millions of dollars to the airlines of this country and to the consumers they serve if they could ship those pods to consumers in vehicles that could accommodate 96-inch-wide loads.

Let me point out again, Mr. President, that the standard unit of pallets for goods in this country is 96 inches. It is time we moved up to that standard, after 20 years of constructing 24-

foot highways to replace the old 22-foot, where we mandated a 96-inch-wide truck—I think it is time to move to a 102-inch-wide truck. Consumers have waited a long time. They are concerned about a do-nothing Congress. I think it is time we respond to their concerns.

I yield to my good friend from Idaho.

Mr. McCLURE. Mr. President, how much time remains?

The PRESIDING OFFICER. One minute, seven seconds.

Mr. McCLURE. I thank the Senator from North Dakota for yielding. I appreciate his initiative.

I say to my friend on the Environment and Public Works Committee, where I served for a number of years, that I understand their concern with respect to legislation coming from an appropriations committee. I suppose I am colored by both sides of that question, having served on the authorizing committee, now serving on the Appropriations Committee.

This is not a new issue, Mr. President. It has been around a long time. It was a painful and difficult road to progress with respect to bus widths. It took us years before we were able to break the barrier and allow buses to modernize on their widths, which was eventually accomplished against the opposition and against the arguments that have been presented here with respect to trucks, in many respects.

Let me ask: What has been the history of that, since the bus width change? Has it caused any problem? Have we had any adverse reaction? Have there been any accidents caused? Has there been congestion on the highways because of it?

The answer in every instance is "no." It has been a very good development with respect to buses.

The same thing is said with respect to trucks. I share the conviction of my friend from the Appropriations Committee (Mr. ANDREWS) that, indeed, this has the potential for relieving congestion on the highways, not enhancing it.

The PRESIDING OFFICER (Mr. ABDNOR). The Senator's time has expired.

Mr. McCLURE. Mr. President, I say to my friend from New Mexico that it simply does not have any direct effect upon weights.

The PRESIDING OFFICER. The Senator from Vermont has 34 seconds.

Mr. STAFFORD. Mr. President, in the remaining time, I say to my dear friend (Mr. McCLURE) that, of course, there is a difference between buses, which are not all that heavy and do not do that much damage to our highways, and very heavy trucks in the heaviest category, which truly are probably the principal source of deterioration of our Federal highway system, as the good Senator knows.

Mr. President, I am prepared to yield back what time I may have in opposition to the Andrews amendment.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

UP AMENDMENT NO. 1375

(Purpose: To provide certain discretion with respect to truck widths)

Mr. EAGLETON. Mr. President, I have a substitute amendment at the desk on behalf of myself and Senator SCHMITT which I ask to have immediately considered.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) for himself and Mr. SCHMITT, proposes an unprinted amendment numbered 1375 as a substitute for unprinted amendment numbered 1374.

Strike out all after "Viz:" and insert in lieu thereof the following:

At the end of the bill, add the following new section:

SEC. . (a) Section 127 of title 23, United States Code, is amended by adding at the end thereof the following: "Notwithstanding any other limitation relating to vehicle widths contained in this title, a State may permit trucks or combinations thereof having a width of not more than 102 inches to operate over interstate highways, National Defense Highways, or any other qualifying Federal-aid highway as designated by the Secretary of Transportation, with traffic lanes designed to be a width of 12 feet or more.".

(b) The width limitation described in the preceding subsection shall be exclusive of safety-related appendaces, such as rear view mirrors, turn signal lamps, marker lamps, steps and handholds for entry and egress, flexible fender extensions, mud-flaps and splash and spray suppressant devices, load-induced tire bulge, energy conservation devices or designs, refrigeration units or air compressors, which the Secretary of Transportation may interpret as necessary for safe and efficient operation of commercial motor vehicles.

(c) No State may enact or enforce any law denying reasonable access to commercial motor vehicles subject to title 23, United States Code, to and from the Interstate Highway System and the Federal-aid primary system and terminals and facilities for food, fuel, repairs, and rest.

Mr. EAGLETON. Mr. President, I ask for the yeas and nays on the Eagleton substitute.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. EAGLETON. Mr. President, I am somewhat bemused to see an amendment offered from the other side of the aisle which does such violence to the right of States to make their own decisions as to what is safe and what is unsafe on their own highways. After all the rhetoric about States rights, after all the talk about New Federalism, here we stand considering an amendment which would use the familiar old club of cutting off Federal aid if States do not knuckle under to dictates from Washington. In my own State of Missouri, the question of larger trucks goes beyond the right of States to decide themselves—it goes to the right of the people to be heard. In Missouri, the people have spoken by referendum against larger trucks on their highways, at least until there is some fairer sharing of costs for the highway damage that results.

It is true that the Missouri referendum did not specifically concern width. That was simply because Federal law did not permit any flexibility on this standard. But, I can assure the Members of this body that the width of trucks is every bit as controversial as length and weight from the point of view of someone trying to pass one of those dinosaurs on the highway.

The Department of Transportation, in its recent highway cost allocation study, concluded that heavy trucks are not now paying a fair share toward repairing the damage they cause.

My objection to the proposed Andrews amendment is threefold:

First. It would force States to adopt a width standard which may meet the convenience of certain specialized shippers, but which is strongly opposed by large segments of the driving public. The amendment ignores the fact that people are highway users too and should have some say about how our highways are used. High gasoline prices have forced an increasing number into smaller cars and they are, with reason, concerned about trucks getting larger and larger.

Second. The Andrews amendment trys to break off the question of truck width from all the other considerations—length, weight, and adequate user charges—which ought to be taken up as a package. This amendment does not even take effect until October 1, 1983, so there is nothing urgent about acting on it now. It is unnecessary and harmful to look at only one dimension of what is a much larger problem.

Third. Finally, Mr. President, the amendment offered by the distinguished Senator from North Dakota goes beyond the recommendations of the Senate Commerce Committee which in S. 1402, now pending on the Senate Calendar, called for a permissive—not mandatory—102-inch width standard. That was done by amendment in committee after careful consideration of all the testimony. I quote from the committee report:

The Committee believed that present Federal law on truck width is too restrictive. States should be allowed to permit trucks up to 102-inches in width to operate on the interstate highways within the State. The amendment agreed to by the Committee will give the States the flexibility to balance highway damage and cost, producitivity and safety.

Mr. President the Eagleton-Schmitt amendment simply incorporates the recommendation of the Senate Com-

merce Committee. It would allow those States which are willing to adopt a 102-inch standard to do so. Those who feel it is not appropriate, given the condition of their particular interstate highways and access roads, would have the discretion to stay with the 96-inch standard.

Finally, Mr. President, I ask that letters previously referred to by Senator SCHMITT for the National Governors Association, the Environmental Policy Center, and the National Associations of State Legislatures be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

[See exhibit 1.]

Mr. EAGLETON. Mr. President, I think any legislation at this time dealing with the width or with any other dimension of heavy trucks is inappropriate and unwise, but if we are going to yield to the convenience of certain industries who want wider trucks to carry their product, then I think we should give the States the flexibility to do otherwise when the interest of public safety and highway damage dictate. Therefore, the Eagleton-Schmitt substitute would make this amendment permissive, not compulsory.

EXHIBIT 1

NATIONAL CONFERENCE OF STATE LEGISLATURES,
Washington, D.C., September 20, 1982.

Hon. THOMAS F. EAGLETON,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR EAGLETON: On behalf of the National Conference of State Legislatures I would like to thank you for supporting the position of the states in opposing the provisions in the Department of Transportation and Related Agencies appropriations bill mandating a 102 inch width for trucks using federal aid highways with a twelve foot lane width. We appreciate your support both at the subcommittee and full committee level.

NCSL remains hopeful that the 102 inch truck width mandate will be removed from the transportation appropriations bill on the Senate floor or in conference committee. We hope you will continue your efforts to oppose this provision. If we can be of any help, please call our transportation staff director, Ralph Craft at 737-7004.

Sincerely,

WILLIAM F. PASSANNANTE,
Speaker Pro Tem and President.

ENVIRONMENTAL POLICY CENTER,
Washington, D.C., September 15, 1982.

Senator THOMAS EAGLETON,
Senate Appropriations Committee, U.S. Senate, Washington, D.C.

DEAR SENATOR EAGLETON: The Environmental Policy Center would like to express its opposition to the provision included in H.R. 7019, DOT 1983 appropriations bill, which would require all states to permit 102" width trucks on their federal-aid highways. While objections were raised in subcommittee mark-up, the provision remains in the bill.

We object to this provision on several grounds. First of all, it preempts legislation which was passed by the Senate Commerce Committee, S. 1402. S. 1402 would not require states to have 102" widths on their highways, but rather "permit" such widths. By requiring 102" widths, the federal government would be overriding 49 state legislatures which currently comply with the present 96" width. We do not believe the Commerce Committee should be preempted.

Secondly, we strongly believe that consideration of changes in truck size and weight should not occur before consideration of restructuring of the highway user fee system. As you know, action on such restructuring has been deferred due to President Reagan's expressed opposition to any increases in the federal gasoline tax at the present time. Secretary Drew Lewis, in transmitting the Department of Transportation's Final Report on Highway Cost Allocation to Congress, stated:

"I believe that highway user charges restructuring should be addressed at the same time as changes in allowable truck sizes and weights."

Given the findings of underpayment in taxes compared to cost responsibility of heavy trucks, we find that increases in truck size and weight are particularly inappropriate at the present time. If trucks are allowed to get wider, it is very likely that amendments to allow trucks to get longer and heavier will also be proposed.

Finally, another report by the Department of Transportation, Effect of Truck Size and Weight on Accidents and Traffic Operations (July 1981), points out that while most major highways have 12 foot lanes, many two lane highways have only 9-12 foot lane widths. Trucks of 102 inch widths could pose safety problems as they travel on such highways due to the small margin of safety they will allow. In this regard, the DOT report states:

"Given safety concerns, the Federal government and most states have not looked favorably on these proposals (102" width proposals of the trucking industry)."

We urge the Committee to deter any action on increased truck size or weight until consideration of the entire tax restructuring issue.

Sincerely,

HARRIET HOLTZMAN-PARCELLS,
Washington Representative.

WASHINGTON, D.C., *September 14, 1982.*

Senator THOMAS F. EAGLETON,
U.S. Senate, Dirksen Building, Washington, D.C.

DEAR SENATOR EAGLETON: On behalf of the States, we urge you to oppose language in the Department of Transportation and Related Agency appropriations bill that would force States to raise the allowable minimum width on trucks using the InterState and Primary highway systems to 102 inches. We understand that the full Appropriations Committee will consider the DOT and Related Agencies appropriations bill this week.

We oppose the preemption of State law unless a strong case has been made for preemption and the States have been consulted. Neither condition has been met with regard to mandating a minimum 102-inch truck width.

Forty States, the District of Columbia and Puerto Rico currently limit truck widths to 96 inches. Six additional States limit widths on the InterState System to less than 102 inches. Thus, 46 States would be required to change State law to conform to the 102-inch standard or lose federal highway funds.

No convincing case has been made to justify forcing State legislatures to change their State laws to permit wider trucks on our highways. Therefore, we urge you to withhold action on this issue until a full and thorough examination can be made in the context of multi-year highway improvement and financing legislation next year.

Sincerely,

WILLIAM F. PASSANNANTE,
Speaker Pro Tem, President of the National Conference of State Legislatures.

Gov. Scott M. Matheson,
Chairman, National Governors' Association.

Mr. EAGLETON. Mr. President, I yield the remainder of my time to the Senator from New Mexico (Mr. SCHMITT).

Mr. SCHMITT. Mr. President, I am happy to join with my distinguished colleague from Missouri in the offering of this substitute amendment. The reason is simple. Our amendment gives the States the option of increasing their width standards of motor vehicles to 102 inches but does not mandate the change. It does not preempt State law as the Andrews amendment would. This is a reasonable compromise, although I also agree that even this is premature. Under our amendment the vast majority of States that currently have 96-inch widths would be given the flexibility to carefully evaluate and balance highway damages and costs, productivity, and safety on all Federal-aid highways and State highways which will be indirectly affected before adopting a different standard. However, if the amendment of the Senator from North Dakota is accepted, they will be put in a position of making a Hobson's choice of either adopting the wider standard or lose Federal aid to highway funding. We should not impose this on our States, particularly since 46 States have standards less than 102 inches. 41 States have standards at 96 inches. According to the American Automobile Association, the amendment of the Senator from North Dakota would cause serious potential safety problems.

Although the 102-inch standard would apply only on traffic lanes having a width of 12 feet or more, the lanes do not actually have to be 12 feet. They only have to be designed to a width of 12 feet. The difference is critical. In New Mexico, for example, there are many highways that are part of the Interstate System as well as many more that are part of the State system which have very narrow bridges. We are trying to fix that problem but we have not fixed it yet. These lanes may be designed to a width of 12 feet but in many instances the roadway width is narrowed to 11 feet or less on the bridge deck.

Making the standard permissive rather than compulsory makes good sense. The Commerce Committee also chose to follow this reasonable approach when it considered S. 1402, the

Uniform Motor Vehicle Standards Act of 1981. The Senate should follow suit. I do not believe the Senator from North Dakota has presented a compelling case for preempting State law and mandating a change in the vehicle width limitations that will result in an indirect, I will admit indirect, but nevertheless real increase in average axle loading and will result in accelerated deterioration of our highways. I urge my colleagues to resist the temptation to make this standard compulsory, particularly since the States have not yet been consulted and the costs to the taxpayers in all our States will far outweigh the benefits that may come from larger truck widths.

I reserve the remainder of our time.

Mr. RANDOLPH. Mr. President, how much time remains?

The PRESIDING OFFICER. One minute for the Senator from Missouri, 10 minutes for the Senator from North Dakota.

Mr. ANDREWS. Mr. President, let me point out a couple of things. One, the questions was raised by my colleague and good friend from Missouri: Why the urgency? It cannot be urgent because this does not go into effect until the end of 1983. Let me assure my colleague that the reason for that is to allow the individual and separate State legislatures to take the appropriate action. This is customary in any such change as this. It was done when the 96-inch width was mandated across the country.

Let me also assure my colleague and and good friend from Missouri that those of us on the Republican side of the aisle occasionally do come up with good amendments, and oftentimes those amendments are not taking away the power of the States; that has already been taken away when we mandated 96-inch width trucks. My amendment does more to fall in line with the Constitution as the writers envisioned it some more than 200 years ago where, let me point out, in that famous article I, section 8, it says, "The Congress shall have the power to levy and collect taxes, duties, imports and excises," and it goes on to say, "and to regulate commerce with foreign nations and among the several States."

That was written into the Constitution, Mr. President, because some 200 years ago, we were a collection of rather independent and hardnosed colonies that were not too accommodating to our neighbors. If we had a certain width of carriage coming down the road, it did not necessarily mean that one colony would accommodate the same width. It used to be the same way with the gage of railroad tracks.

Standardization has been one of those things that we have slowly tried to accomplish over those 200 years. It was not too long after the Constitution was written that one of the great Chief Justices, John Marshall, held, as early as 1824, in Gibbons against Ogden that the Federal commerce power was supreme and that it "lawfully extended to all objects directly concerned with commerce even though such regulation might incidentally affect the internal affairs of the States."

Mr. President, coming from my side of the aisle, and I am sure coming from the other side of the aisle, we all realize the importance not only of the Constitution and the wisdom of the Founding Fathers but the interpretation put on it by our great Chief Justice in those early days when we were trying to meld one Nation out of many. We did that and we built a much stronger Nation because of it.

Let me also point out to my colleagues, Mr. President, that the Department of Transportation gave a great deal of study to the safety of 102-inch widths on our Federal highways when it studied exhaustively on September 18, 1973, the issue of the safety of wider buses on city streets and primary highways. One such study was jointly prepared by the National Highway Traffic Safety Administration Research Institute and the Federal Highway Administration Office of Research and Development. I have it here, and it concluded that 102-inch wide buses operating on these highways were not a safety hazard. As a matter of fact, they were something that improved the transportation of our Nation, and Congress went along with that safety report, Mr. President, done some 9 years ago, and allowed 102-inch buses. Now we have a system where you can go from Washington, D.C., to the State of California on a bus that is a wide, comfortable, and safe bus because Congress wisely followed these safety findings.

Mr. President, I mentioned earlier the importance of commerce and the importance of reduced grocery bills with respect to my amendment. I have a letter from Joe Viviano, who is the president of San Giorgio-Skinner Co., which makes pasta products from semolina they get from the State of North Dakota, which comes from our good Durham wheat. Whether he ships North Dakota products or not does not make too much difference, but I think it is typical of the thousands of companies that are going to be able to realize savings and pass them on to the consumers. He says:

> This letter is to let you know that our company endorses and supports completely the bill that has emerged from the Senate Appropriations Committee containing provisions favorable to more efficient trucking, specifically increasing truck size from 96 inches to 102 inches in width.
>
> As I think you know, I am also representing the National Pasta Association as their president and want you to know this association equally supports this bill.

The National Pasta Association, Mr. President, is the group that makes that protein-rich, low-cost, and very nutritious fantastic food for the average people of this country, and they recognize that their costs will be significantly lowered.

He says:

> While this bill may be considered a modest change as compared to most, the bill in my opinion represents those areas of costs that can be greatly reduced by some constructive imagination or ingenuity.

I love those words, because I think the people of this country are totally ticked off at a Congress that seems to be nonresponsive. The only time we can respond is when we get our own tail applied to the blowtorch. Here we have an opportunity to talk about saving $4 billion a year for the consumers of this country, and we hide our heads and say, "Not now." We have had only 15 or 20 years to address this.

I go on with Mr. Viviano's letter:

> Our company, San Giorgio-Skinner, a Division of Hershey Foods, ships pasta products such as macaroni, spaghetti and noodles all with varying density levels. Our normal assorted shipments always cube out before the truckload reaches weight, generally in the 22,000-24,000 pound range. We've calculated the additional 6 inches of allowance for travel on federal highways will add space equal to about 8 percent more weight depending on our final product mix.
>
> The additional 8 percent weight arrives at the destination at no increased cost. What a great way to add 8 percent productivity to the trucking system throughout the federal highways. I have no idea what the national savings might be, but I'm sure it's tremendous.
>
> Again, we endorse wholeheartedly the Bill and ask for your continued support. For your information, I am asking our Vice Presidents in charge of plants in Kentucky, Pennsylvania and Nebraska to in turn write their Senators asking for their support.

Mr. President, this is an isolated incident of one food company across our Nation. We have heard from groups ranging from pasta, to plywood to Pan Am, and it all illustrates the savings we can realize from this simple amendment, moving into the 1980's the law that was passed two decades ago, when we had 22-foot highways.

I yield such time as he may require to my colleague and good friend from the State of Idaho, Mr. McCLURE.

Mr. McCLURE. Mr. President, as I said earlier, this is not a new issue. It has been around a long while.

I respect the Senator from Missouri and others who argue the States rights issue, but that has not always prevailed. To draw the comparision to bus matters, that was not a States rights issue. That was uniformity.

On bridge formula, on length limitations and in many areas, we have allowed the States to vary because they have peculiar, different circumstances.

In my area of the country, we were granted a States right option on tri-

ples on the interstate system. We have them running out there, and we have no objection to them out there. As a matter of fact, it is working well and has lowered shipping costs and has been an advantage to the consumers and the shippers of this country. So that we have accommodated where it was reasonable to accommodate on issues such as truck length and the use of triples.

However, in this specific instance, just as it was necessary in buses, if you are going to make the width a viable alternative regardless of the length, you have a national standard.

To say that we will make it permissive is simply to restate the present. It is permissive now.

The amendment of the Senator from Missouri does nothing except prevent the adoption of the amendment offered by Senator ANDREWS. So I hope that the amendment to the amendment is not agreed to and that we adhere to the course that has been laid out here.

With respect to the question of weights, I think you can argue that since it will allow the trucks to be used more efficiently, they will put more in the truck rather than send it down the road half empty. They will be able to load the truck. But the weight is still governed by the weight limitation in the bridge formula. There is no question about that. I do not think anybody will argue that. It may increase the weights, but only within the weight limitations established already under Federal and State law and regulation. So it is a wholesale assault upon the weight limitation. It simply allows the trucks, because of the loading, to be able to do it more efficiently.

The PRESIDING OFFICER. The time of the opponents has expired.

The Senator from Missouri has 1 minute remaining.

Mr. EAGLETON. I yield 50 seconds to the Senator from New Mexico.

Mr. SCHMITT. Mr. President, it may not be a wholesale assault on the weight limitation, but it is a wholesale assault on existing State law, on existing highways, both Federal and State, and on the safety of other traffic on the highways.

It makes little difference if the buses are already at 102 inches. If you start adding truck after truck after truck that is 102 inches, on narrow State roads—and they will be on those State roads, as well as narrower than 12-foot interstate highway lanes—you are going to have a safety problem. There is no question about it.

Until that highway system is reasonably ready to take it, we should make this clearly permissive, and that is the intent of the Eagleton-Schmitt amendment, and I urge its adoption.

The PRESIDING OFFICER. The time of the Senator from New Mexico has expired.

Mr. EAGLETON. Mr. President, I do not argue that the Andrews amendment is unconstitutional. I argue that it is unconscionable.

The PRESIDING OFFICER. All time has expired.

The question is on agreeing to the amendment of the Senator from Missouri. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Connecticut (Mr. DODD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Montana (Mr. MELCHER) are necessarily absent.

I also announce that the Senator from Oklahoma (Mr. BOREN) is absent because of illness in the family.

The PRESIDING OFFICER. Are there any other Senators wishing to vote?

The result was announced—yeas 47, nays 45, as follows:

[Rollcall Vote No. 384 Leg.]

YEAS—47

Baker	Garn	Nunn
Biden	Hart	Pell
Bradley	Hatch	Proxmire
Brady	Hayakawa	Pryor
Bumpers	Heflin	Quayle
Byrd, Harry F., Jr.	Heinz	Randolph
	Hollings	Riegle
Chafee	Huddleston	Roth
Cranston	Humphrey	Rudman
Danforth	Laxalt	Sarbanes
DeConcini	Leahy	Schmitt
Denton	Levin	Stafford
Dole	Long	Stennis
Domenici	Mathias	Thurmond
Eagleton	Metzenbaum	Tsongas
Ford	Moynihan	Warner

NAYS—45

Abdnor	Exon	McClure
Andrews	Glenn	Mitchell
Armstrong	Gorton	Murkowski
Baucus	Grassley	Nickles
Boschwitz	Hatfield	Packwood
Burdick	Hawkins	Percy
Byrd, Robert C.	Helms	Pressler
Cannon	Inouye	Sasser
Chiles	Jackson	Simpson
Cochran	Jepsen	Specter
Cohen	Johnston	Stevens
D'Amato	Kassebaum	Symms
Dixon	Kasten	Tower
Durenberger	Lugar	Wallop
East	Mattingly	Zorinsky

NOT VOTING—8

Bentsen	Goldwater	Melcher
Boren	Kennedy	Weicker
Dodd	Matsunaga	

So Mr. EAGLETON's amendment (UP No. 1375) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SCHMITT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1374

The PRESIDING OFFICER. The question now recurs on the amendment of the Senator from North Dakota.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the yeas and nays be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from North Dakota.

The amendment (UP No. 1374), as amended, was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the committee substitute.

Mr. STAFFORD. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. Please return to your seats.

Mr. STAFFORD. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STAFFORD. Do I understand that the Andrews amendment, as amended by the Eagleton-Schmitt amendment, has been agreed to?

The PRESIDING OFFICER. Yes.

Mr. STAFFORD. Then the pending question is the adoption of the substitute offered by the Senator from Vermont and others to the original bill?

The PRESIDING OFFICER. That is correct.

Mr. STAFFORD. Mr. President, I move the adoption of the amendment, as amended.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1371), as amended, was agreed to.

SIDNEY C. LEWIS BRIDGE

Mr. BAKER. Mr. President, I would like to take this opportunity, during consideration of the Federal-aid highway legislation, to comment on a bridge project in my State—the Sidney C. Lewis Bridge at Dover, Tenn.

As we all know, there are numerous bridges throughout the country which have been designated functionally obsolete. Under current law, these bridges are prioritized for funding under the Federal Highway Administration's discretionary bridge program.

There are a number of bridges in the State of Tennessee which are functionally obsolete. However, it has been brought to my attention that the Sidney C. Lewis Bridge is one in need of immediate rehabilitation.

I have asked both Chairman STAFFORD of the Environment and Public Works Committee and Chairman SYMMS of the Transportation Subcommittee to give priority attention to this bridge and I thank them for their assistance.

The bridge carries U.S. 79 over the Cumberland River at Dover, Tenn. U.S. 79 is a major route across northern Tennessee. It is a major access to the land between the lakes recreation area which attracts numerous recreation and hunting enthusiasts from Tennessee, Kentucky, and other States.

The bridge has a steel-girded structure and was built in 1930. The existing structure is only 28 feet wide which is substandard for a two-lane bridge. Added to that, the average daily traffic (ADT) on the bridge is 5,580 vehicles per day. New standards require that a bridge with that ADT be a minimum of 68 feet wide, or four lanes.

Obviously, because of the steel girding, widening the bridge will require complete reconstruction.

In addition to the vehicle traffic problem, the bridge has a substandard navigational clearance. Heavy barge traffic passes under the bridge along the Cumberland River. The existing bridge has a clearance of only 322 feet which the Coast Guard rates as substandard.

Finally, the sufficiency rating on this bridge is 30.5. This rating is used by the Federal Highway Administration to prioritize bridge rehabilitation need. The Sidney C. Lewis Bridge rating indicates that it is sufficiently obsolete for total replacement.

Mr. President, reconstruction of this bridge is important to the State of Tennessee and the residents of Stewart County. I appreciate the assistance of the chairman and subcommittee chairman of the authorizing committee for their consideration of this bridge.

FRANKLIN STREET BRIDGE, PEORIA, ILL.

Mr. PERCY. Mr. President, the Franklin Street Bridge in Peoria, Ill. was built in 1907 and is a narrow, two-lane span which bends abruptly at a 24° angle. The poor condition of the bridge has required frequent closings for repair, and deterioration of the bascule span could require the bridge to be permanently closed. The Federal sufficiency rating for the structure is 32.0, which indicates its eligibility for rehabilitation or replacement under the Federal discretionary bridge replacement program. Illinois proposes to replace the currently hazardous structure with a new facility estimated to cost $28 million. Funding is needed to begin preliminary engineering soon to enable complete replacement within a reasonable time frame.

In line with this, Mr. President, I wish to inquire of the distinguished chairman of the Subcommittee on Transportation, Mr. SYMMS, whether Federal discretionary bridge funds are available to fund the replacement of the Franklin Street Bridge?

Mr. SYMMS. Such funds are indeed available, although it should be noted that several requests have been made for such discretionary funds and it is uncertain how swiftly the Franklin Street Bridge could be funded.

Mr. PERCY. I appreciate the Senator's candor. While recognizing the number of requests made for discretionary funds, I would hope that when such funds are made available the Franklin Street Bridge could be considered a priority project.

Mr. SYMMS. The Senator may be assured that I will see that in conference with the House on the bill, we will designate the Franklin Street Bridge a priority for Federal discretionary funding.

Mr. BAUCUS. Mr. President, I would like to bring to the attention of my colleagues a problem we are facing in Montana. It concerns the highway bridge that spans the Missouri River outside the city of Great Falls. This bridge which carries U.S. 87 across the Missouri River is known as the Warden Bridge. It serves as an important link in the transportation network of Montana by directly connecting Interstate 15 with the city of Great Falls and by providing the shortest and most direct line of travel between Interstate 15 and Malmstrom Air Force Base. I bring Warden Bridge to the attention of my colleagues because, like many other bridges in this Nation, it has outlived its useful life and needs to be upgraded. To do so, the State of Montana wishes to apply for discretionary bridge money.

Mr. STAFFORD. What is the current design capacity of the bridge?

Mr. BAUCUS. The existing structure was built in 1951 with a design capacity of 12,000 vehicles per day although it currently must accommodate 18,000 vehicles per day, many of them headed to or from Malmstrom Air Force Base. Traffic now enters the two-lane bridge from four-lane highways on each end creating a severe bottleneck situation that is very dangerous.

Mr. RANDOLPH. What plans are there to correct this situation?

Mr. BAUCUS. To correct the situation, the State highway department has planned the construction of an additional bridge mate as a two-step project. The first step, construction of the span across the Missouri River, has already been financed with Federal-aid primary funds and is due for completion next month. Work on the second step, spanning the flood plain and approaches, has yet to begin.

Mr. SYMMS. What will be the cost of this project?

Mr. BAUCUS. The cost of this project has spiraled from $1.5 million when the need for an additional two-lane structure was identified in 1961 to over $10.7 million in 1982.

Mr. STAFFORD. From the facts that you have presented, it would appear that Warden Bridge certainly meets the discretionary bridge criteria of being functionally obsolete and could be a candidate for funding.

Mr. RANDOLPH. I would agree with the chairman's conclusion.

Mr. SYMMS. I too, would agree with the chairman's conclusion.

Mr. BAUCUS. I thank the distinguished chairman and ranking minority member of the Environment and Public Works Committee and the distinguished chairman of the Transportation Subcommittee for their attention to this matter.

Mr. PRESSLER. Mr. President, before we proceed to final consideration of the extension of the Federal-aid highway authorization, I would like to ask a few questions of the distinguished Senator from Vermont, the chairman of the Environment and Public Works Committee, Mr. STAFFORD.

Mr. STAFFORD. Mr. President, I would be happy to answer the questions of my distinguished colleague from South Dakota.

Mr. PRESSLER. I thank the Senator from Vermont. This simple 1-year extension of the Federal-aid highway authorization is necessary, yet it is not as desirable as a multiyear authorization would be. A multiyear authorization would give the States an opportunity for long-range planning of road construction and repair work. However, I understand the unusual time constraint that this Chamber now faces and the impact of any delay on my home State of South Dakota and the entire Nation. Construction companies across the country face unprecedented hardships. They very much need the contract authority included in this extension to save them from bankruptcy. In addition, the money needed to cover highway costs has reached staggering levels. Legislative delays would drive up the eventual cost of materials and labor.

Recently, Eugene Rowen, South Dakota's secretary of transportation, submitted testimony to Senator SYMMS' Transportation Subcommittee detailing the interstate and primary road system needs in South Dakota. According to Mr. Rowen, $548.5 million is needed just for principal noninterstate roads and bridges. Secretary Rowen estimates that the Interstate System in South Dakota needs an additional $31,199,000 for 4R (resurfacing, restoring, rehabilitation, and reconstruction) work on roadways and structures. I would like to ask the distinguished Senator from Vermont of his plans regarding a new multiyear highway authorization?

Mr. STAFFORD. Mr. President, I would like to assure my colleague from South Dakota that I appreciate the problems facing State transportation secretaries who are responsible for drawing up road maintenance and con-

struction plans. The need for a multiyear extension is evident and, in fact, the Environment and Public Works Committee has introduced and pressed for multiyear authorizations during the past 2 years. However, as the Senator stated, because of a complication with a necessary extension of the highway trust fund, we do not have the time to complete consideration of such a measure this year. It is my full intention that the Environment and Public Works Committee will again submit a multiyear bill early next year so that much-needed improvements in the Nation's highways can be undertaken in an effective manner.

Mr. PRESSLER. Mr. President, I had intended to offer an amendment that would provide more money for rural States' Interstate Highway 4R programs. I have withdrawn my amendment so that the Senate can quickly approve this 1-year authorization extension. I am told that failure to pass this bill promptly would create chaos in the construction industry. However, when the multiyear authorization is next considered, I intend to fight for a modification of the Interstate 4R apportionment formula which would establish a funding formula more suitable for agricultural States. States like South Dakota face accelerated road deterioration because of rapid, temperature changes and heavy agricultural trucking. The simple fact is that the Interstate Highway System was not designed to last forever. May I ask the distinguished Senator from Vermont if it is his intention to consider basic apportionment formula changes in the next highway bill?

Mr. STAFFORD. Mr. President, without reservation I can say to Senator PRESSLER that the Environment and Public Works Committee has considered and will continue to consider all aspects of the highway apportionment formulas. The change the Senator from South Dakota is proposing is along the lines of what the committee proposed in S. 2574, with 60 percent of the apportionment based on lane miles and 40 percent on vehicle miles traveled, and I certainly support that. I might add that Senator PRESSLER served at one time as the ranking minority member on the Transportation Subcommittee of the Environment and Public Works Committeee. We would certainly welcome him back again to the Environment and Public Works Committee in order to provide additional testimony on the highway apportionment formula. Having worked with Senator PRESSLER on this issue in the past, I know what a fighter he has been in both the House and the Senate on this subject of fair allocation formulas for rural States. Senator PRESSLER has dramatically highlighted the highway funding concerns of rural areas, and I am sure it would be very helpful to the committee to hear his further testimony. I appreciate his willingness to help expedite the 1-year extension. I also appreciate his support for a multiyear bill which would consider an interstate 4R formula change more responsive to the needs of rural States like South Dakota.

Mr. PRESSLER. I thank Senator STAFFORD for his answers, and I look forward to testifying again before the Environment and Public Work Committee on behalf of South Dakota and other rural States. I appreciate the hard work of the Environment and Public Works Committee in this area, and particularly the leadership of its respected chairman in expediting this essential highway authorization. I remember well how vigorously Senator STAFFORD and I worked together in the past for a better deal for rural States.

Mr. RANDOLPH. Mr. President, our action today, if concurred in by the House of Representatives, will permit continuation of the Federal aid highway program in an orderly fashion. I realize that we are acting at a late hour, but there have been numerous problems to overcome. That we have worked out an acceptable substitute bill and a procedure for its consideration is a tribute to the members of the Environment and Public Works Committee who have given diligent attention to this subject in recent days. Senator SYMMS and Senator BENTSEN, the chairman and ranking minority member of our Subcommittee on Transportation, have devoted considerable energy to this successful effort.

I also commend our able chairman, Senator STAFFORD, for his active participation and thoughtful guidance in developing this highway legislation. Indeed, throughout this Congress his stead leadership has enabled our committee to continue its tradition of cooperative action in the development of reasoned legislation.

Mr. President, the Senate will recess for nearly two months. I may not have another opportunity today to express my appreciation to the Democratic members of the Committee on Environment and Public Works with whom I have been privileged to work for the past 2 years.

At the beginning of the 97th Congress, we became the minority party in the Senate and on the committee. The six Senators with whom I am associated on our side of the aisle assumed their new role with grace and dignity. They have continued to carry out their responsibilities as committee members with dedication, with fairness and in a cooperative manner. We have been full participants in the legislative and oversight activities of our committee.

For their attention to their duties and for their productive contributions to our work, I commend Senators BENTSEN, BURDICK, HART, MOYNIHAN, MITCHELL, and BAUCUS. They are an able and effective team, and I am honored to serve with them, not as their leader, but as their associate.

Mr. President, I call attention to the professional and energetic support we have received from the minority staff of the Committee on Environment and Public Works during this Congress. They have responded to our needs and have conscientiously assisted all members in performing their duties. On behalf of the Senators mentioned I extend our thanks to the members of the minority staff: John Yago, Phil Cummings, Richard Harris, Ann Garrabrant, Ric Fenton, Tanya Hart, Ann Underwood, Lee Fuller, Stephanie Clough, Bob Peck, Martha Pope, Keith Glaser, Margie Wright, Debbie Knopman, Anita Ruud, Mary Jo Vrem, Elizabeth Thompson, and Helen Kalbaugh.

Mr. DOMENICI. Mr. President, I rise in support of this legislation, which extends the Federal aid highway program for 1 additional year. We are amending S. 2574, which was reported from the Environment and Public Works Committee on May 26, 1982.

S. 2574, as reported, provides for a 1-year reauthorization of the highway program. Senator SYMMS, chairman of the Transportation Subcommittee and Senator BENTSEN, ranking member of the subcommittee, and other members of the committee should be commended for their fine work in reporting this comprehensive legislation. However, we must now amend that bill, and instead, push for a simple 1-year extension to insure that the highway program will be funded next year without disruption. In the remaining hours before we recess, it is impossible to consider a more comprehensive measure.

Mr. President, I do not want to see any unnecessary delays to this program because of a failure by the Congress to act. I urge swift passage of S. 2574, and urge our colleagues in the House of Representatives to act as expeditiously as we on this critical legislation.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 2574), as amended, was passed, as follows:

S. 2574

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That this Act may be cited as the "Federal-Aid Highway Act of 1982".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1984" and inserting in lieu thereof the following: "the additional sum of $3,300,000,000 for the fiscal year ending September 30, 1984,".

APPROVAL OF INTERSTATE COST ESTIMATE

SEC. 103. The Secretary of Transportation shall apportion for the fiscal year ending September 30, 1984, the sums authorized to be apportioned for such year by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table 5 of the committee print numbered 97-53 of the Committee on Public Works and Transportation of the House of Representatives.

OBLIGATION LIMITATION AND ALLOCATION FORMULA

SEC. 104. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1983 shall not exceed $8,200,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, and section 9 of the Federal-Aid Highway Act of 1981, except chapter 3 of the Urgent Supplemental Appropriations Act of 1982 (Public Law 97-216), and obligations with respect to Union Station under Public Law 97-125. Obligations constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code.

(b) For the fiscal year 1983, the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) During the period October 1 through December 31, 1982, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1983, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

(e)(1) Section 1106(b) of the Omnibus Budget Reconciliation Act of 1981 is repealed.

Section 1106(c) of the Omnibus Budget Reconciliation Act of 1981 is amended to read as follows:

"(c) For the fiscal year 1982, the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.".

(3) Section 1106(d) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "periods" and inserting in lieu thereof "period" and by striking out "and October 1 through December 31, 1982,".

(4) Section 1106(c)(2) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "and after August 1, 1983,".

AUTHORIZATIONS

SEC. 105(a) For the purpose of carrying out the provisions of title 23, United States Code, the following sums are hereby authorized to be appropriated:

(a) For the Federal-aid primary system in rural areas, including the extensions of the Federal-aid primary system in urban areas, and the priority primary routes, out of the Highway Trust Fund, $1,500,000,000 for the fiscal year ending September 30, 1983. For the Federal-aid secondary system in rural areas, out of the Highway Trust Fund, $425,000,000 for the fiscal year ending September 30, 1983.

(2) For the Federal-aid urban system, out of the Highway Trust Fund, $775,000,000 for the fiscal year ending September 30, 1983.

(3) For Indian reservation roads and bridges, $83,000,000 for the fiscal year ending September 30, 1983.

(4) For carrying out section 215(a) of title 23, United States Code—

(A) for the Virgin Islands, not to exceed $5,000,000 for the fiscal year ending September 30, 1983;

(B) for Guam, not to exceed $5,000,000 for fiscal year ending September 30, 1983; and

(C) for American Samoa, not to exceed $1,000,000 for the fiscal year ending September 30, 1983.

Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(5) For the Commonwealth of the Northern Mariana Islands, not to exceed $1,000,000,000 for the fiscal year ending September 30, 1983. Sums authorized by this paragraph shall be expended in the same manner as sums authorized to carry out section 215 of title 23, United States Code. Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(6) For the forest highways, out of the Highway Trust Fund, $33,000,000 for the fiscal year ending September 30, 1983.

(7) For public lands highways, out of the Highway Trust Fund, $16,000,000 for the fiscal year ending September 30, 1983.

(8) For economic growth center development highways under section 143 of title 23, United States Code, out of the Highway Trust Fund, $29,000,000 for the fiscal year ending September 30, 1983.

(9) For the Great River Road, out of the Highway Trust Fund, $19,000,000 for the fiscal year ending September 30, 1983, for construction or reconstruction of roads on a Federal-aid highway system.

(10) For access highways under section 155 of title 23, United States Code, $15,000,000 for the fiscal year ending September 30, 1983.

(b)(1) For each of the fiscal years 1984, no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended.

(c) In the case of priority primary routes, $125,000,000 of the sums authorized for the fiscal year ending September 30, 1983, by subsection (a)(1) of this section for such routes, shall not be appointed. Such $125,000,000 of such authorized sum shall be available for obligation on the date of apportionment of funds for such fiscal year, in the same manner and to the same extent as the sums apportioned on such date.

(d) Section 163(p) of the Federal-Aid Highway Act of 1973 is amended by inserting after "September 30, 1982," the following: "and $50,000,000 for the fiscal year ending September 30, 1983,".

INTERSTATE RESURFACING

SEC. 106. Section 105 of the Surface Transportation Assistance Act of 1978 is amended by striking out "and not to exceed $800,000,000 for the fiscal year ending September 30, 1984." and inserting in lieu thereof "not to exceed $1,000,000,000 for the fiscal year ending September 30, 1984.".

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION

SEC. 107. (a) Subsection (e) of section 144 of title 23, United States Code, is amended by striking "and September 30, 1982," and inserting in lieu thereof "September 30, 1982, and September 30, 1983,";

(b) Subsection (g) of such section is amended by striking "and September 30, 1982," each place that it appears and inserting in lieu thereof "September 30, 1982 and September 30, 1983"; and

(c) Section 202(6) of the Surface Transportation Assistance Act of 1978 is amended by striking "and $900,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof "$900,000,000 for the fiscal year ending September 30, 1982, and $1,000,000,000 for the fiscal year ending September 30, 1983.".

SAFETY CONSTRUCTION AUTHORIZATIONS

SEC. 108. Section 202(8) of the Surface Transportation Assistance Act of 1978 is amended by striking "and $200,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof "$200,000,000 for the fiscal year ending September 30, 1982, and $200,000,000 for the fiscal year ending September 30, 1983.".

RAIL-HIGHWAY CROSSINGS

SEC. 109. Subsection (b) of Section 203 of the Highway Safety Act of 1973 as amended by the Highway Safety Act of 1978 is amended by striking "and September 30, 1982." and inserting in lieu thereof, "September 30, 1982, and September 30, 1983.".

ENERGY IMPACTED ROADS

SEC. 110. (a) Section 105 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(h) In preparing programs to submit in accordance with subsection (a) of this section, the State highway departments may give priority to projects for the reconstruction, resurfacing, restoration, or rehabilitation of highways which are incurring a substantial use as a result of transportation activities to meet national energy requirements and which will continue to incur such use, and in approving such programs the Secretary may give priority to such projects.".

(b) Section 120 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(k) Notwithstanding any other provision of this section, the Federal share payable on account of any project under this title to reconstruct, resurface, restore, and rehabilitate any highway which the Secretary determines, at the request of any State, is incurring a substantial use as result of transportation activities to meet national energy requirements and will continue to incur such use is eighty-five per centum of the cost of such project.".

SEC. 111. Section 10526(a) of title 49, United States Code, is amended—

(1) by striking "or" at the end of paragraph (12);

(2) by striking the period at the end of paragraph (13), and inserting in lieu thereof "; or "; and

(3) by adding at the end thereof the following:

"(14) transportation of broken, crushed or powdered glass.".

SEC. 112. Section 508 of the Airport and Airway Improvement Act of 1982 is amended by adding at the end thereof the following new subsection:

"(e) Use of Certain Apportioned Funds for Discretionary Purposes.—(1) Subject to paragraphs (2) and (3), if the Secretary determines, based upon notice provided under section 509(e) or otherwise, that any of the amounts apportioned under section 507(a) will not be obligated during a fiscal year, the Secretary may obligate during such fiscal year an amount equal to such amounts at his discretion for any of the purposes for which funds are made available under section 505.

"(2) The Secretary may make obligations in accordance with paragraph (1) only if the Secretary determines that the total of obligations for such fiscal year for purposes of section 505 will not exceed the amount authorized for such fiscal year under section 505(a) and if the Secretary determines that sufficient amounts are authorized under section 505(a) for later fiscal years for obligation for such apportioned amounts which were not obligated during such fiscal year and which remain available under section 508(a).

"(3) For purposes of amounts apportioned for fiscal year 1982, the Secretary may make the determinations under paragraphs (1) and (2) on or before October 30, 1982. For purposes of any limitation on obligations imposed by law, amounts obligated in accordance with this subsection on or before October 30, 1982, shall be deemed to have been obligated during fiscal year 1982 to the extent that such amounts, when added to amounts obligated on or after October 1, 1981, and before October 1, 1982, for purposes of section 505, do not exceed $450,000,000.".

SEC. 113. (a) Section 127 of title 23, United States Code, is amended by adding at the end thereof the following: "Notwithstanding any other limitation relating to vehicle widths contained in this title, a State may permit trucks or combinations thereof having a width of not more than 122 inches to operate over interstate highways, National Defense Highways, or any other qualifying Federal-aid highway as designated by the Secretary of Transportation, with traffic lanes designed to be a width of 12 feet or more.".

(b) The width limitation described in the preceding subsection shall be exclusive of safety-related appendages, such as rear view mirrors, turn signal lamps, marker lamps, steps and handholds for entry and egress, flexible fender extensions, mud-flaps and splash and spray suppressant devices, load-induced tire bulge, energy conservation devices or designs, refrigeration units or air compressors, which the Secretary of Transportation may interpret as necessary for safe and efficient operation of commercial motor vehicles.

(c) No State may enact or enforce any law denying reasonable access to commercial motor vehicles subject to title 23, United States Code, to and from the Interstate Highway System and the Federal-aid primary system and terminals and facilities for food, fuel, repairs, and rest.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STAFFORD. Mr. President, I wish to express my thanks and my very deep appreciation to my colleagues on the committee and all of the staff who helped get this done today in a hurried fashion. I note for the record that at the time of the voice vote on the passage of this bill, this Senator was unable to hear any vote in the negative. It appears, therefore, that the bill passed by unanimous decision of the Senate.

I yield the floor.

The PRESIDING OFFICER. The Senate will please be in order.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I congratulate the managers of the bill for their good work in bringing this important measure to an appropriate conclusion. The debate was through, the issues were joined and resolved by the Senate in the best traditions of the Senate.

I offer my thanks to the distinguished chairman of the committee, Senator STAFFORD, for his unfailing cooperation and good work and to the distinguished ranking minority member, Senator RANDOLPH, who was chairman of the committee for so long and set an example for all of us who serve on that committee by his fairness and efficiency.

Mr. President, there are a number of other measures that we can take up this afternoon, I hope. While I try to get my wits about me and decide what is next, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate will be in order.

The Senator from Kansas.

BANKRUPTCY COURT JUDGES

Mr. DOLE. Mr. President, I would like to ask the distinguished majority leader if there is a chance to bring up the bankruptcy bill. It is not particularly controversial. There are about 90 Senators who are for it and the other 10 are undecided.

Mr. BAKER. I am willing to try to do that. I think maybe the Senator from Ohio has strong views on that subject.

Could I inquire of the Senator from Ohio if I do ask unanimous consent to go to the bankruptcy bill what his attitude will be?

Mr. METZENBAUM. I am not sure what my attitude will be, but I know what my vote will be. It will be no.

Mr. BAKER. What about an objection? Would there be an objection?

Mr. METZENBAUM. There would be an objection.

Mr. BAKER. Mr. President, the Senator is perfectly within his rights. I am by no means critical, but I think the answer to the Senator from Kansas is, as the Senator from Ohio has pointed out, he will object to proceeding to the matter at this time. I am afraid that effectively eliminates the possibility that we could take up the matter because, if we have to proceed to it by motion, the motion is debatable and, judging by the look in the eyes of the Senator from Ohio, I would expect that debate might continue for some time.

Mr. METZENBAUM. Mr. President, the Senator from Tennessee is a very perceptible individual. He certainly can read eyes.

Mr. BAKER. Mr. President, I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, I wish to ask the distinguished Senator from Ohio a question. We have a time problem. The Supreme Court has said we ought to do something or the bankruptcy judge is going to be without much authority. In fact, they are without much authority now.

What we had in mind was to add to the S. 2000 provision to make the bankruptcy judges article III judges, and another small provision with reference to grain elevator bankruptcy. A lot of farmers are in deep distress because of bankruptcies. There are people in Ohio in distress because of bankruptcies, including the White Truck Co.

We would like to move on it. We think if we can pass it in the Senate there is a good chance the House might act even today.

Mr. METZENBAUM. Mr. President, I will be happy to respond to the Senator from Kansas. And I do not respond with any levity because I know the Senator from Kansas is indeed interested in resolving this problem and it has to do with the Supreme Court decision on this subject.

I have no problem at all on resolving the problem, the matter of filling those vacancies or passing legislation on either article 3 judges or whatever kind of judges.

As a matter of fact, when the bankruptcy matter was first passed in 1978, I indicated at that time that I thought they ought to be article 3 judges and had so advised the Senator from Arizona, Senator DECONCINI. So I have no problem at all on that.

As it pertains to the matter of the grain elevator bankruptcies, I am not familiar with that particular provision because that is not my major concern. The Senator from Kansas knows that we have discussed this matter and there were about 10 or 11 matters in dispute between us. We attempted to compromise those matters and were successful in connection with 10 of them.

However, there is one that is particularly disturbing, and that really is the basic issue that pertains to the right of an individual to go bankrupt. Because, under the provision that is now in S. 2000, no individual would be permitted to go bankrupt if one of the creditors objected and indicated that he or she could pay off their debts within a future period of 3 to 5 years. That does not give the bankrupt that clean bill of health to which he or she is entitled.

That is a total change from the laws as we have had them in the last 150 years. It means that the individual's future would be mortgaged and mortgaged for a period of 3 to 5 years.

Now, I am perfectly happy to attempt to work with the Senator from Kansas to eliminate that section which, to the best of my recollection, is the major stumbling block between us. If we can eliminate that part of the proposal, with some understanding that it will not reappear in conference, then I think that we are in a position to discuss moving forward with the Bankruptcy Act.

I would want to check with my staff as to whether there are any other parts of the bill that cause me concern, but I think that is the one major stumbling block that we have had for a number of months.

Mr. DOLE. Mr. President, I appreciate the concerns expressed by the Senator from Ohio. I understand that one thing we do not want is for creditors to harass debtors. Right now we have debtors harassing creditors, pretty much leaving all the small business people and others without much resources.

It occurred to me that one way to resolve that is to suggest if, in fact, we had harassment by the creditors of any debtor who had taken bankruptcy, then you would have authority to assess attorneys' fees against the creditor. To me, that would preclude a lot of arbitrary and capricious efforts to try to tie up some future income of some poor debtor who was trying to get responsible relief in bankruptcy. But, if that is a possibility, we are faced with the October 4 deadline.

I am not certain whether or not a statement could be obtained to tide us over until after the election.

Mr. METZENBAUM. Can the Senator from Kansas consider eliminating this particular section from the bill? The critical issue we have before us has to do with the vacancies as of October 4. As far as that issue is concerned, and I cannot speak for the ranking member of our committee but it certainly can be brought to the floor, if we can eliminate that one section and then continue in the next section to attempt to deal with that, I think we could move this matter this afternoon, assuming that we had some understanding that it would not appear in the conference committee, of course.

I am perfectly willing to try to help the Senator from Kansas in every way possible in an attempt to move a bankruptcy bill to meet with this problem which is before us as of October 4.

Mr. DOLE. I understand that if, in fact, that were removed—and I am not suggesting that it should be—then there would be an objection to taking it up because it would have been in S. 2000.

Mr. METZENBAUM. I did not know there was anybody who felt that strongly that it had to be in. Maybe what we ought to try to do is to have a clean bill just dealing with the article 3 judges. I would be very happy to work with the Senator from Kansas in that respect only and not try to deal with the substantive bankruptcy law.

Mr. DOLE. As the Senator knows, there are some who think that the judges ought to be article 3 judges. That does not bother me but it bothers some, and it bothers the chief judges, I hear. It is all a matter of compromise.

What we are trying to do is to put together a package where everybody gave a little and contributed a little in an effort to resolve a rather delicate matter.

We are in a very tight timeframe. We could sunset certain provisions.

Maybe it is still worth pursuing for the remainder of the afternoon. I am certainly willing to discuss it with the Senator.

Mr. METZENBAUM. I will advise the Senator from Kansas it will not be difficult to find where I will be during the afternoon. I will be here.

NUCLEAR REGULATORY COMMISSION AUTHORIZATION—CONFERENCE REPORT

Mr. BAKER. Mr. President, the minority has cleared this matter.

Mr. President, I submit a report of the committee of conference on H.R. 2330 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

> The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2330) to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. SIMPSON. Mr. President, I am pleased to present for the consideration of the Senate the Conference report on the Nuclear Regulatory Commission authorization bill for fiscal years 1982 and 1983, H.R. 2330. The conferees have worked long and hard to resolve the many difficult issues contained in the House bill and the Senate amendment, and I am gratified to report that all issues committed to the conferees for consideration have been resolved. Accordingly, I now urge my colleagues to adopt the conference report on this measure.

Before the Senate actually moves to the question on agreeing to the conference report, Mr. President, I have a few brief comments that I would like to make about this bill. This bill contains a number of provisions of significance that, in my judgment, will enhance the ability of the Nuclear Regulatory Commission to carry out its fundamental statutory mission-protection of the public health and safety and the environment. In addition, this bill represents the first major piece of legislation to come out of this Congress regarding the regulation of the domestic nuclear power industry.

Mr. President, I should like to take a brief moment to mention a couple of the more important provisions of this bill. Section 11 of the conference report confers upon the NRC the authority to issue temporary operating licenses upon petition by a utility, in those cases where construction of a nuclear power reactor will be completed prior to completion of a required public hearing. After much discussion by the conferees, we have arrived at what I think is an equitable and much needed solution to the licensing backlog that developed at the NRC shortly following the Three Mile Island accident. This backlog has been addressed, to a significant degree, by administrative actions taken by the NRC, and I am gratified that these problems have been corrected in this fashion. Nevertheless, we are not out of the woods on this issue and the authority conferred upon the NRC under section 11 will insure that such delays will not be an impediment to the issuance of a license for a reactor that received all of the other necessary approvals.

The second major provision that I would like to bring to the Senate's attention, Mr. President, is the so-called Sholly provision. Section 12 of the conference agreement reverses a recent District of Columbia Court of Appeals decision requiring the NRC to hold hearings, upon request, whenever it issued a license amendment, regardless of the safety significance of such amendment. Both the House bill and the Senate amendment included provisions addressing this issue, and the breadth of support for the Sholly provision is a clear indication, Mr. President, that a requirement to hold a hearing in these types of cases simply did not make sense. Accordingly, the conferees have agreed upon the provision which is set forth in section 12 which confers upon the NRC the authority to issue "no significant hazards consideration" amendments in advance of a hearing, notwithstanding the pendency of a request for such a hearing.

The third provision that I want to point out, Mr. President, is section 23 regarding uranium supply. This was the last provision upon which the conferees reached agreement, Mr. President, and it was only after a great deal of discussion and accommodation by all of the conferees that we managed to resolve this difficult issue. The compromise that we have agreed upon does an excellent job, in my judgment, of reconciling a number of important interests associated with this issue. Without belaboring this issue, let me say that this provision is intended by the conferees to insure that this country's essential security interests are fully protected and, as agreed upon by the conferees, this provision accomplishes that important objective.

Finally, Mr. President, I would like to say a few words about sections 18, 19, 20, and 22 of the conference agreement, dealing with uranium mill tailings regulation.

Mr. President, the Senate bill included certain amendments to the Uranium Mill Tailings Radiation Control Act of 1978. These amendments had five principal elements. First, new deadlines were established for EPA to propose and finalize inactive and active uranium processing site standards. Under the 1978 act, EPA was given until November 8, 1979, and May 8, 1980, respectively, to promulgate inactive and active site standards. EPA having failed to meet these deadlines, the Senate bill extended the deadlines to April 1, 1982, for final inactive standards and to April 1, 1983, for final active standards. Second, NRC uranium mill licensing requirements, which were issued in advance of EPA's standards on October 3, 1980, were suspended pending promulgation of EPA active site standards and NRC conformance with those standards. To assure prompt action by NRC, a timetable for such conformance was established. Third, the Senate provision clarified that NRC has authority to consider all relevant factors in issuing regulations, including effects on public health and safety and the environment, as well as economic costs of its requirements. Fourth, the authority of agreement States that elect to regulate uranium mill tailings was clarified to confirm that such States could adopt alternative requirements where those of NRC were determined by a State to be impracticable under local conditions. Fifth, the Senate bill limited NRC's ability to impose additional requirements in agreement States where such States had regulatory programs governing mill tailings that adequately protect public health and safety.

These provisions were adopted following a hearing before the Senate Environment and Public Works Committee on June 16, 1981. At that hearing, and a subsequent hearing before the House Armed Services Committee, the Congress was made aware of certain problems that had arisen in implementation of the 1978 act. Notwithstanding the clear mandate of the act, EPA had failed to comply with deadlines for inactive and active site standards. NRC had proceeded to issue stringent standards and requirements in advance of EPA. NRC had also asserted that agreement States were required to adopt its uranium mill licensing requirements without consideration of the local practicability of such regulations. Substantial questions were also raised as to the need for NRC's stringent and costly regulations, particularly NRC's radon emanation and mill tailings cover requirements. Were these standards, which effectively reduced risks associated with mill tailings near zero, necessary, or were lesser requirements adequate to protect public health and safety and the environment in view of the isolated location of most, if not all, active uranium processing sites? Finally, questions were raised as to whether EPA in the proposed inactive site standards and NRC in mill licensing requirements had adequately considered the environmental and economic costs of their actions.

The House bill contained no provision amending the Uranium Mill Tailings Radiation Control Act or otherwise addressed the concerns of the Senate bill with respect to mill tailings.

The bill, as reported by the conference committee, represents a reasoned agreement that adequately addresses the concerns in the Senate bill. The conference agreement includes four essential elements.

First, new deadlines are established for EPA standards under section 275 of the Atomic Energy Act, as amended. Final inactive site standards should be promulgated by October 1, 1982; proposed active site standards should be issued by October 31, 1982; and final active site standards should be in place by October 1, 1983. If EPA fails to timely issue inactive site standards, the Department of Energy may proceed with its remedial action program as provided in title I of the Mill Tailings Act based on EPA's proposed standards. This change in existing law was made because the conferees believe that this program should not be further delayed by EPA inaction. When final inactive standards are issued by EPA they will become the operative standards to be followed by DOE in all subsequent remedial action. If EPA fails to timely issue final active standards, its authority to do so is terminated. Upon EPA's failure, NRC would assume EPA's authority to determine appropriate standards for active uranium processing sites.

Second, the conference agreement provides for a suspension of NRC's uranium mill licensing requirements. A full prohibition on enforcement or implementation of these regulations

will run only until January 1, 1983. After that date, NRC may implement and enforce all of its October 3 uranium mill licensing requirements except those that the Commission determines would require a major action or commitment by licensees which would be unnecessary if one, the active site standards proposed by EPA are promulgated in final form without modification, and two, the Commission's requirements are modified to conform to such standards.

The third major element of the conference agreement pertains to the responsibilities of EPA and NRC to promulgate, respectively, general environmental standards and uranium mill licensing regulations. In each instance, the conferees have agreed to include specific references in the appropriate sections of the Atomic Energy Act directing EPA and NRC, in promulgating such standards and regulations, to consider the risk to public health and safety, and the environment, the economic costs of such standards or regulations, and such other factors as EPA or NRC, respectively, determine to be appropriate. Essentially, we intend by this requirement that these agencies must balance the costs of compliance against the projected benefits to assure that there is a reasonable relationship between the two.

The fourth major element of the conference agreement involves implementation of the Federal standards and regulations of EPA and NRC at the State level. Under section 19 of the conference agreement, individual agreement States are authorized to adopt alternatives—including site-specific alternatives—to the Commission's regulations. These alternative State requirements, which may take into account local or regional conditions, must be submitted to the Commission for approval. If, after notice and opportunity for a public hearing, the Commission determines that the State alternatives will achieve a level of stabilization and containment of the site and a level of protection for public health and safety, and the environment, which is equivalent to, to the extent practicable, or more stringent than the level which would be achieved by the EPA and NRC standards and requirements, the State is to be allowed to implement such alternatives. The bill also corrects a deficiency in existing law which would allow NRC to terminate a State's authority over mill tailings without due process. In no other case does NRC have such authority over an agreement State. The conferees agreed that it should not have such authority with respect to mill tailings. Under the conference bill, a State regulatory program could be terminated only after application of the procedures provided in section 274 of the Atomic Energy Act. Section 20 of the conference agreement confers upon individual licensees a related but less independent ability to propose alternatives. Under this section, individual NRC licensees are authorized to propose alternatives to specific Commission requirements. The Commission may treat such alternatives as satisfying Commission requirements if it determines that such alternatives will achieve a level of protection of public health and safety, and the environment, which is equivalent to, to the extent practicable, or more stringent than the level which would be achieved by the EPA standards and requirements.

As I stated before, the conference agreement adequately addresses the concerns expressed in the Senate bill with implementation of the Mill Tailings Act. For this reason, I recommend the Senate's favorable consideration of the conference agreement.

Mr. STAFFORD. Mr. President, I am delighted that the conferees have reached agreement on a Nuclear Regulatory Commission authorization bill. I commend the conferees for their hard work and diligence in producing this report.

This bill is a major piece of legislation which will substantially improve the Commission's ability to pursue its most important responsibility regarding regulation of the health and safety aspects of nuclear facilities.

This bill is also important to those involved or affected by the nuclear industry, including those interested in improving the environment, and in improving this country's nonproliferation program.

I therefore strongly urge my colleagues to approve this report.

Mr. DOMENICI. Mr. President, on March 30 of this year the Senate passed the Nuclear Regulatory Commission authorization bill. In passing that bill the Senate approved an amendment offered by me relating to the use of imported uranium in domestic nuclear powerplants. As passed by the Senate, the amendment provided that the Nuclear Regulatory Commission develop criteria for the issuance of uranium import licenses that would provide for the maintenance of a viable domestic uranium industry. One of these criteria would have been a restriction on the use of foreign uranium in domestic nuclear reactors. More specifically, foreign uranium used in domestic nuclear reactors would have been limited to 20 percent of the total need for uranium for a given reactor in the course of its operation. The amendment provided further that the NRC would report annually on the amount of foreign uranium used and projected to be used in domestic reactors.

Mr. President, during the course of this long conference the uranium import restriction language I have just explained was the focus of a great deal of debate. The conference report before the Senate today contains a provision which is very different from that which passed the Senate and I would like to take this opportunity to explain the provision to my colleagues. For those who are concerned about the imposition of import restrictions, I believe that the provision I am about to describe will prove to be an acceptable combination of the use of existing law and provisions which recognize the unique national security implications of uranium production and use. Generally speaking, the Conference Committee compromise provides that the International Trade Commission study the economic consequences of imports as provided for in section 201 of the Trade Act of 1974, at such time as the Secretary of Energy believes that the imports may be a substantial cause of serious injury to the domestic industry. The compromise also provides that when imports reach a level of 37.5 percent of the domestic nuclear power demand for uranium that the Secretary of Energy request the Department of Commerce to investigate the national security implications of imports, as provided for by section 232 of the Trade Expansion Act of 1962. In addition, the Secretary of Energy would be required to encourage the increased use of domestic uranium through the modification of the operational policies employed in the Federal uranium enrichment plants. In doing this the Secretary would not be permitted to decrease the use of foreign uranium.

Before explaining the amendment in detail, I would like to review for my colleagues the legislative history of the issue of imported uranium and the maintenance of a viable domestic uranium industry. The provision before us is not the first time the Congress has spoken on the subject. In 1964 the President of the United States signed into law the Private Ownership of Special Nuclear Materials Act. That act amended the Atomic Energy Act so as to provide for the private ownership of special nuclear materials within the United States and to change the structure of the Atomic Energy Act in a way which would permit a civilian nuclear power program. As a part of that act a provision to the Atomic Energy Act was added which provided that the Secretary of Energy offer uranium enrichment services in a manner that would protect the viability of the domestic uranium industry. As a consequence of that legislation, the Atomic Energy Commission placed a total prohibition on the enrichment of foreign uranium which was intended to be used in domestic nuclear powerplants. The Joint Atomic Energy Committee said, in passing this legislation, that this measure was "in the national interest since the industry is closely re-

lated to our vital defense and security interests." In 1974 the Atomic Energy Commission decided to begin a phaseout of this enrichment restriction beginning in 1977. As of this year, the restriction stands at 60 percent and is scheduled to rise to 80 percent in 1983, with no restriction on the enrichment of foreign uranium for domestic use after 1984. Let me stress for my colleagues that we have in place today, at this moment, an import restriction. It stands at 60 percent of our domestic use. The provision that is before us in the Nuclear Regulatory Commission authorization is not, for those who take offense at such restrictions, as drastic as that.

Some of my colleagues might question why we need to address the issue of imports when the Atomic Energy Commission determined in 1973 that imports were no longer a threat to a viable domestic industry. One reason the finding of the Atomic Energy Commission can be called into question is that the projected demand calculated by the Commission turned out to be, for the year 1980, three times too high. As a consequence, demand has not grown as rapidly as projected and the domestic uranium industry is experiencing extreme economic hardship. In the past 2 years over half of the domestic miners have been laid off, exploration has dropped by 66 percent, and the number of operating mines in this country has dropped by over 63 percent. I do not stand here today arguing that these measures of the health of the domestic industry are being affected by uranium imports. What I would suggest to my colleagues is that, in the absence of some signal to the foreign producers of uranium that we in the United States will maintain a viable industry, those producers will capture our markets and discourage future development of the domestic uranium industry. This concern that foreign producers are rushing to capture our domestic market is not hypothetical. In the first 6 months of this year, well over 50 percent of the long-term contracts awarded for uranium were to Canadian producers alone. A recent update of the Department of Energy's "Uranium Marketing Survey" indicates that this trend toward increasing imports may be more real than the Department of Energy is willing to admit. As of January 1, 1982, the Department reported that approximately 24,800 short tons of uranium would be imported to this country over the next decade. The July 1, 1982 update of that survey indicates that that figure has grown to 38,700 short tons. Similarly, for the decade of the nineties, the previous figure had been 9,300 short tons. As of July 1, 1982, that figure had grown to 18,200 short tons. The Energy Information Administration has projected that such aggressive marketing could lead to foreign producers holding 80 percent of the domestic market by the late eighties.

Before I explain the import provision of this authorization bill, let me stress that the purpose of this legislation is to assure import independence for our domestic nuclear power industry. I need not remind my colleagues of the soaring price of electricity resulting from oil import dependence in New England. It might be necessary for me to point out that should this Nation decide sometime in the future, after a domestic production capacity has disappeared, that we do need to have production capability, it could take 5 to 10 years to bring on line sufficient production capacity.

Mr. President, the Conference Committee compromise provides that the President report to the Congress on the status of the domestic uranium mining and milling industry. This report would be done within 12 months of enactment of this provision. The report would include a number of factors to be considered in reviewing the industry.

First, the President would report on the projections of uranium requirements and inventories of the domestic utility industry for the future. To be meaningful, these projections would need to be done over at least a 10-year future period.

Second, the President would report on the present and future projected uranium production by the domestic mining and milling industry and again, this projection should be over at least a 10-year period. In the past, the Department of Energy has done reviews on the projected domestic production in their document entitled "Statistical Data of the Uranium Industry." What has been lacking in that report is a projection of future production.

Third, the President would report on the present and future probable penetration of the domestic market by foreign imports. Such calculation would be based on contracts executed, and I mean by that that they are signed, or executed options.

Fourth, the President would report on the size of domestic and foreign reserves, as they have been reported in the past by the Department of Energy, using a number of different forward cost categories.

Fifth, the President would report on present and projected uranium exploration expenditures and plans. In the past, those plans have been reported for only 1 year in the future. This report would need at least a 5-year forward projection.

Sixth, the report would include present and projected employment and capital investment in the uranium mining and milling industry.

Seventh, the report would have an estimate of the level of domestic uranium production necessary to insure the viability of the domestic uranium industry.

Eighth, the President should translate the information on the level of production necessary to maintain a viable domestic industry into that percent of the market needed to maintain this level of production which belongs to the domestic industry.

Ninth, the President should report on the price effects that import restrictions might have over what might be predicted to be the current price projections.

Tenth, the President should examine the effect that spent fuel reprocessing might have on the domestic uranium industry as reprocessing is likely to take place over the next 10 years.

The conference committee also provides that the Secretary of Energy monitor and report on the viability of the domestic uranium industry on an annual basis from now until 1992. In making that report the Secretary would be required to submit a determination as to whether or not the domestic uranium industry is viable. In the event that the Secretary were to find that the domestic industry was not viable, existing provisions in the Atomic Energy Act would provide the Secretary with the authority to help maintain the viability of the industry. In order to make this determination of viability the Secretary is required to promulgate criteria for such a finding. Those criteria would be promulgated within 9 months of enactment of this provision and a number of those criteria are specified in the compromise provision.

First, the Secretary would be required to assess whether or not executed contracts or options for source material or special nuclear material will result in 37.5 percent of the actual or projected domestic uranium requirements for any 2-consecutive-year period being supplied by foreign source material or foreign special nuclear material. The term domestic uranium requirements should be interpreted as the uranium necessary to fuel all operating domestic nuclear powerplants as licensed under section 103 and 104b of the Atomic Energy Act. In projecting future imports the Secretary should also include projected future nuclear powerplant operations and the demand for uranium which would result.

Second, the criteria would include projections of uranium requirements and inventories for domestic utilities for a 10-year period forward from the year in which the annual report was being prepared. Again, uranium requirements refers to the amount of uranium necessary to fuel domestic nuclear powerplants licensed under sections 103 and 104b of the Atomic Energy Act.

Third, the Secretary would review the present and probable future use by the domestic market of foreign imports, again with a projected future of 10 years to be examined from the date in which the annual assessment was being performed.

Fourth, the Secretary would determine whether domestic economic reserves can supply all future needs for a future 10-year period from the date of the assessment. Economic reserves have been measured in the past by determining those reserves that would be economic to be used at the time of the projected demand.

Fifth, the Secretary would review present and projected domestic uranium exploration expenditures and plans, again using projections similar to those made by the Department in the past but projected further into the future than the Department's past estimates.

Sixth, the Secretary would review present and projected employment and capital investment in the uranium industry.

Seventh, the Secretary would review the level of domestic uranium production capacity sufficient to meet all projected domestic nuclear power needs for a 10-year forward period. Again, that 10-year forward period should be from the date of the annual report.

Eighth, the criteria should include a projection of the domestic uranium production and price levels which would result under different levels of imports. The Secretary would also have the authority to provide such other criteria as deemed appropriate and also the authority to gather such information as is necessary to carry out the monitoring and reporting requirements required by the provision.

As restatement of existing law, the Conference Committee compromise provides that the Secretary of Energy may determine, at any time, that imports are a threat or substantial cause of serious injury to the domestic industry. In that event the U.S. Trade Representative would request the U.S. International Trade Commission to initiate an investigation under section 201 of the Trade Act of 1974 (19 U.S.C. 2251). Under the Trade Act, if the Commission finds that statutory criteria are satisfied, it submits a report to the President with a recommendation for import relief. The Commission can recommend an increase in duty, the imposition of an import restriction, or certain other remedies. The President has discretion as to whether to impose relief, or to impose no relief at all. The conferees did not intend to affect, in any way the manner in which such sanctions would be applied to future contracts or to existing contracts. In other words, the conferees expect that the Commission and the President would treat existing and future contracts for uranium procurement just as they would treat any contracts for imports, either existing or future, which might be investigated under the International Trade Commission's authority.

The conference committee compromise further provides that upon a finding that executed imports or executed options for source material or special nuclear material of foreign origin have reached a level of 37.5 percent of actual or projected domestic uranium requirements, the Secretary of Energy shall revise criteria for the operation of the uranium enrichment plants so as to encourage the use of domestic origin uranium in domestic nuclear powerplants. The Conference Committee statement of managers provides three examples of the kind of modifications envisioned by the conferees. To the extent that criteria modifications result in the greater use of uranium, it is intended that that uranium be of domestic origin. So, for example, if the Secretary of Energy were to modify the tails assay for the operation of the enrichment plants in such a way as to increase the use of uranium, the increased uranium required would be of domestic origin. The conferees did not intend that the modifications undertaken by the Secretary in any affect existing contracts for the use, possession, or enrichment of foreign source material or foreign special nuclear material in utilization facilities licensed, or required to be licensed under section 103 or 104b of the Atomic Energy Act.

Once the Secretary of Energy has made the determination that present or future use of foreign uranium or foreign source material or special nuclear material accounted for 37.5 percent of domestic demand in any 2 consecutive-year period, the Secretary would be required to request the Secretary of Commerce to initiate an investigation under section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862). The conferees intended that the Secretary make this determination based on the annual assessment of present or future use of uranium from foreign sources. Under the Trade Expansion Act, if the Secretary concludes that imports threaten the national security, the President can adjust imports to remove the threat. However, if the Secretary concludes that no threat to national security exists, the President has no power under the Trade Expansion Act to grant import relief. The Conference Committee compromise provides that during the course of this study, or 2 years, whichever is shorter, it would be unlawful to contract for imported uranium. I stress that this moratorium on contracting extends to new contracts only. Any foreign source material or special nuclear material previously contracted for would not be affected. The intent behind this provision is that, during the course of the investigation into whether or not imports are a threat to national security, it would not be appropriate to be contracting for more foreign uranium which might further threaten the national security. The conferees did not intend to affect, in any way, the manner in which such a study might affect future or existing contracts. In other words, the conferees expect that the recommendation of the Secretary of Commerce and the actions of the President would treat existing or future contracts for uranium procurement just as they might for any other commodity being imported to the United States which the Secretary found to be a threat to the national security. There would be no grandfathering of existing contracts from sanctions unless the Secretary of Commerce so recommended and the President instituted.

In conducting the investigation under section 232 of the Trade Expansion Act, the conferees intended that the Secretary of Commerce take into account the information provided by the Secretary of Energy. In particular, the Secretary of Commerce should take into account information regarding projected or executed contracts or executed options for foreign source material or special nuclear material. This prospective examination of the potential threat to our national security is necessary principally because of the long lead time involved in starting uranium mining and milling operations.

The provisions provides that the Secretary of Commerce could not initiate another investigation sooner than 3 years following the completion of any investigation by the Secretary of Commerce under the provision, if no recommendation had been made pursuant to such study for trade adjustments to assist or protect the domestic uranium industry. If the Secretary of Commerce were to undertake another investigation as triggered by the 37.5 percent level of imports, restrictions on contracting under the provision would not take effect unless the Secretary of Energy had determined that new information relating to the national security required that contracting be suspended.

Mr. SCHMITT. Mr. President, I compliment my colleagues who served on the conference committee on their efforts. Among many other essential issues addressed in this bill, two issues are of particular concern to me: The uranium import issue and the uranium mill tailings issue. I have followed these problems closely because of the large impact on my State and because of my background as a geologist. As you will recall, last year's NRC appropriation bill contained my amendment prohibiting the NRC from implement-

ing the uranium mill tailings regulations. Finally, today before the Senate we have a permanent reform that I hope will solve the serious problem of inconsistent, expensive and flawed uranium mill tailings regulations. The import restriction is also a vital concern to those of us familiar with U.S. strategic mineral requirements. Our domestic uranium industry is in a critical position. If we do not act now to preserve our domestic production capability, we will simply not have that capability without a 5-10 year leadtime warning. We need a viable domestic uranium industry.

We all support the principle that public health and safety must be protected from potential hazards of uranium mill tailings. The conference agreement seems to promote this goal, while also assuring a reasonable regulatory program for uranium mill tailings. Nonetheless, I believe some clarification is in order on certain aspects of the agreement. By requiring a consideration of environmental and economic costs, is my understanding correct that the Senator wants the regulatory agencies to consider more than just the feasibility of their standards and regulations?

Mr. SIMPSON. The Senator's understanding is correct. The direction to consider costs requires more than a perfunctory determination of whether a given cost can be borne by the uranium industry or a particular licensee. As indicated in the statement of managers, standards and requirements must bear a reasonable relationship to the expected benefits; that is, the costs to comply should be commensurate with the risks. This is not to say that an itemized cost-benefit optimization approach is required. In balancing costs and risks to assure a reasonable relationship between the two, judgment must be exercised by the agencies.

Mr. SCHMITT. In the statement of managers, I read the following: "The conferees note that this language reflects accurately the current regulatory approach of the agenices." Do I correctly understand this language to affirm as being sufficient to the prior agency consideration of costs of mill tailings stabilization and reclamation?

Mr. SIMPSON. The statement the Senator referred to must be taken in context of the preceding statement. Whether or not costs were sufficiently considered by NRC was disputed in litigation. We have expressly taken a neutral position on the issues raised in the litigation. By the amendments agreed to by the conference, the basis for consideration of costs by EPA in promulgating general standards and by NRC in issuing site specific regulations is now expressly established. Both of these agencies must establish that cost of compliance bears a reasonable relationship to expected benefits.

Mr. SCHMITT. I thank the Senator for his clarification. On this issue, I have but one further question. Should EPA fail to timely issue its final active standards, could NRC implement its existing mill licensing requirements?

Mr. SIMPSON. Only if the NRC determined after appropriate opportunity for comment and a public hearing that those regulations are reasonably related to the costs of implementation. In order to prevent such a potential result, the conference agreement requires both EPA and NRC to consider costs and be certain that they were reasonably related to expected benefits.

Mr. SCHMITT. The Senator's statements are reassuring. In view of those assurances, I am pleased to support the conference agreement.

Mr. WALLOP. Mr. President, I, too, compliment the conferees. A great deal of effort was expended on resolution of the differences between the Senate and House bills. The result appears worthy of the effort. I too, however, have a question on one aspect of the bill. I feel the provision that suspends NRC's regulations seems somewhat complex. Could the requirements of that provision be more simply stated?

Mr. DOMENICI. I believe I can answer that question. As the Senator will recall, the Senate bill suspended NRC regulations in full until that agency conformed to final EPA standards. The intent of the Senate suspension was to restore the order established in the 1978 act which called for EPA general standards followed by NRC site specific regulations. Some Members of the House felt that the Senate suspension was broader than was needed to achieve the purpose. On reflection, I had to agree with the House Members. Only those requirements which are dependent on EPA's standards should be suspended, and then only when reason exists to establish that NRC's requirements will be different than EPA's final standards and where licensees are required to take some significant action. As agreed to by the conference, a full suspension will be effective until January 1, 1983. After that date, the Commission must determine if a suspension is appropriate considering the factors I have just stated.

Mr. WALLOP. I thank the Senator for his explanation. It is my understanding that EPA and NRC have stated that they felt compelled by the Mill Tailings Act to impose stringent requirements, such as a 2-picocurie radon emanation standard, irrespective of costs, because of language in the preamble to the 1978 Mill Tailings Act. From my reading of the applicable provision, the 1978 act directed the agencies to take "every reasonable effort" necessary to protect public health. Implicit in that language is a direction to exercise reasonable discretion. Have the amendment dispelled the misapprehension of the agencies on this point?

Mr. SIMPSON. I say to my fine Wyoming colleague that in, my best estimate, they have. The statement of managers clearly states that it is the agreement of the conferees that EPA and NRC, in promulgating standards and regulations, should exercise their best independent technical judgments. The agencies should determine the risks associated will mill tailings and the significance of those risks. They should also examine various regulatory approaches to deal with significant risks that are identified. Of course, we expect the approach ultimately adopted to be reasonably related to the risks in terms of costs. In short, Congress has not directed any specific regulatory program. On technical issues relating to the regulation of mill tailings, EPA and NRC should both exercise reasonable judgment on the appropriate course to accomplish the basic purpose of the act, which is to protect the public health and safety from unreasonable risks.

Mr. WALLOP. I thank the Senator for his clarification, I, too, am pleased to support the conference agreement.

Mr. DOMENICI. The last paragraph of section 6 of the conference report refers to the 1980 NRC Authorization Act. Is it the Senator's understanding that the act, Public Law 96-295, has expired?

Mr. SIMPSON. That is correct, since its authorized funds have been appropriated and spent.

Mr. DOMENICI. The same paragraph expresses the conferees' support of a continued effort by the NRC to promulgate demographic requirements for siting. What is the intent of this?

Mr. SIMPSON. The Nuclear Regulatory Commission intends to promulgate a nuclear safety goal in the near future. It also will be refining and updating radioactivity source terms relating to nuclear power reactors. Settling these matters will enable the Commission to revise its existing regulations and issue new regulations for the better protection of the public health and safety. Demographic considerations are logical and necessary considerations to take into account in this process.

Mr. DOMENICI. The paragraph also makes reference to demographic requirements for siting that are independent of facility design. What is meaning of the report in this respect?

Mr. SIMPSON. It is expected that, in order to achieve an acceptable level of health and safety, siting, design and emergency planning features all will be used. In addition, there could be health and safety considerations that go beyond and therefore could be referred to as independent of design—for

example, some kind of accident that no one might ever anticipate and therefore engineer safeguards against. The NRC might also want to consider what, if any, demographic circumstances it would be worthwhile to take into account in relation to capabilities such as warning, evacuation, or sheltering in order to enhance public health and safety vis-a-vis such unknown contingency. However, it is expected that the Commission will implement its safety goals to achieve overall health and safety primarily by a combination of design, siting, and planning considered together.

Mr. DOMENICI. In the statement of managers, I direct attention to a paragraph in section 12, the so-called Sholly provision, wherein it is stated that in applying the authority which that provision grants the NRC "should be especially sensitive to the issue posed by license amendments that have irreversible consequences." Is that paragraph in general, or specifically, the words "irreversible consequences." intended to impose restrictions on the Commission's use of that authority beyond the provisions of the statutory language? Can the Senator clarify that, please?

Mr. SIMPSON. I shall. It is not the intention of the managers that the paragraph in general, nor the words "irreversible consequences," provide any restriction on the Commission's use of that authority beyond the statutory provision in section 189a. Under that provision, the only determination which the Commission must make is that its action does not involve a significant hazard. In that context, "irreversibility" is only one of the many considerations which we would expect the Commission to consider. It is the determination of hazard which is important, not whether the action is irreversible, Clearly, there are many irreversible actions which would not pose a hazard. Thus where the Commission determines that no significant hazard is involved, no further consideration need be given to the irreversibility of that action.

Mr. DOMENICI. I thank the Senator for the clarification. That is consistent with my readings of the language. It is my further understanding that the provision in question is entended to reverse the holding of the Court of Appeals for the District of Columbia in the case of Sholly against NRC. Thus, under this provision the NRC would be permitted to issue a license amendment prior to a public hearing for the type of activity which was the subject of that proceeding, assuming the Commission first determines that no significant hazard is involved. Is that correct?

Mr. SIMPSON. Yes, that is quite correct.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The confernce report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

OMNIBUS VICTIMS PROTECTION ACT OF 1982

Mr. BAKER. Mr. President, a message from the House on S. 2420 is here and available for action. May I inquire if the minority leader is prepared to consider that item?

Mr. ROBERT C. BYRD. Mr. President, this side is ready to proceed.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2420.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate, (S. 2420), entitled "An Act to protect victims of crimes," do pass with the following amendments:

Strike out all after the enacting clause, and insert:

That this Act may be cited as the "Comprehensive Victim and Witness Protection and Assistance Act of 1982".

VICTIM IMPACT STATEMENT

SEC. 2. Paragraph (2) of rule 32(c) of the Federal Rules of Criminal Procedure is amended to read as follows:

"(2) REPORT.—The presentence report shall contain—

"(A) any prior criminal record of the defendant;

"(B) a statement of the circumstances of the commission of the offense and circumstances affecting the defendant's behavior;

"(C) information concerning any harm done to or loss suffered by any victim of the offense; and

"(D) any other information that may aid the court in sentencing.".

PROTECTION OF VICTIMS AND WITNESSES FROM INTIMIDATION

SEC. 3. (a) Chapter 73 of title 18 of the United States Code is amended by adding at the end the following new sections:

"§ 1512. Tampering with a witness or an informant

"(a) Whoever knowingly uses physical force or threatens another person, or attempts to do so, or engages in misleading conduct toward another person, with intent to—

"(1) influence the testimony of any person in an official proceeding;

"(2) cause or induce any person to—

"(A) withhold testimony, or withhold a record document, or other object, from an official proceeding;

"(B) alter, destroy, mutilate, or conceal an object with intent to impair the object's integrity or availability for use in an official proceeding;

"(C) evade legal process summoning that person to appear as a witness, or to produce a record, document, or other object, in an official proceeding; or

"(3) hinder, delay, or prevent the communication, to a law enforcement officer or judge of the United States, of information relating to the commission or possible commission of a Federal offense or a violation of conditions of probation, parole, or release pending judicial proceedings;

shall be fined not more than $250,000 or imprisoned not more than five years, or both.

"(b) In a prosecution for an offense under subsection (a)(1) of this section, it is an affirmative defense, as to which the defendant has the burden of persuasion by a preponderance of the evidence, that the threat consisted solely of lawful conduct and that the defendant's sole intention was to compel or induce the other person to testify truthfully.

"(c) In a prosecution for an offense under this section, no state of mind need be proved with respect to the circumstance—

"(1) that the official proceeding before a judge, court, magistrate, grand jury, or government agency is before a judge or court of the United States, a United States magistrate, a bankruptcy judge, a Federal grand jury, or a Federal Government agency; or

"(2) that the judge is a judge of the United States or that the law enforcement officer is an officer or employee of the Federal Government or a person authorized to act for or on behalf of the Federal Government or serving the Federal Government as an adviser or consultant.

"§ 1513. Retaliating against a witness or an informant

"Whoever knowingly engages in any conduct and thereby intentionally causes bodily injury to another person or damages the tangible property of another person, or threatens to do so, with intent to punish any person for—

"(1) the attendance of a witness or party at an official proceeding, or any testimony given, or any record, document, or other object produced, by a witness in an official proceeding; or

"(2) any information relating to the commission possible commission of a Federal offense or a violation of conditions of probation, parole, or release pending judicial proceedings given by a person to a law enforcement officer;

or attempts to do so, shall be fined not more than $250,000 or imprisoned not more than five years, or both.

"§ 1514. Civil action to restrain harassment of a victim or witness

"(a)(1) A United States district court, upon application of the attorney for the Government, shall issue a temporary restraining order prohibiting harassment of a victim or witness in a Federal criminal case if the court finds, from specific facts shown by affidavit or by verified complaint, that there are reasonable grounds to believe that harassment of an identified victim or witness in a Federal criminal case exists or that such order is necessary to prevent and restrain an offense under section 1512 of this title, other than an offense consisting of misleading conduct, or under section 1513 of this title.

"(2)(A) A temporary restraining order may be issued under this section without written or oral notice to the adverse party in a civil action under this section, or such party's attorney, if the courts find, upon written certification of facts by the attorney for the Government, that such notice

should not be required and that there is a reasonable probability that the Government will prevail on the merits.

"(B) A temporary restraining order issued without notice under this section shall be endorsed with the date and hour of issuance and be filed forthwith in the office of the clerk of the court issuing the order.

"(C) A temporary restraining order issued under this section shall expire at such time, not to exceed 10 days from issuance, as the court directs; the court, for good cause shown before expiration of such order, may extend the expiration date of the order for up to 10 days or for such longer period agreed to by the adverse party.

"(D) When a temporary restraining order is issued without notice, the motion for a protective order shall be set down for hearing at the earliest possible time and takes precedence over all matters except older matters of the same character, and when such motion comes on for hearing, if the attorney for the Government does not proceed with the application for a protective order, the court shall dissolve the temporary restraining order.

"(E) If on two days notice to the attorney for the Government or on such shorter notice as the court may prescribe, the adverse party appears and moves to dissolve or modify the temporary restraining order, the court shall proceed to hear and determine such motion as expeditiously as the ends of justice require.

"(F) A temporary restraining order shall set forth the reasons for the issuance of such order, be specific in terms, and describe in reasonable detail (and not by reference to the complaint or other document) the act or acts being restrained.

"(b)(1) A United States district court, upon motion of the attorney for the Government, shall issue a protective order prohibiting harassment of a victim or witness in a Federal criminal case if the court, after a hearing, finds by a preponderance of the evidence that harassment of an identified victim or witness in a Federal criminal case exists or that such order is necessary to prevent and restrain an offense under section 1512 of this title, other than an offense consisting of misleading conduct, or under section 1513 of this title.

"(2) At the hearing referred to in paragraph (1) of this subsection, any adverse party named in the complaint shall have the right to present evidence and cross-examine witnesses.

"(3) A protective order shall set forth the reasons for the issuance of such order, be specific in terms, describe in reasonable detail (and not by reference to the complaint or other document) the act or acts being restrained.

"(4) The court shall set the duration of effect of the protective order for such period as the court determines necessary to prevent harassment of the victim or witness but in no case for a period in excess of three years from the date of such order's issuance. The attorney for the Government may, at any time within 90 days before the expiration of such order, apply for a new protective order under this section.

"(c) As used in this section—

"(1) the term 'harassment' means a course of conduct directed at a specific person that—

"(A) causes substantial emotional distress in such person; and

"(B) serves no legitimate purpose;

"(2) the term 'course of conduct' means a series of acts over a period of time, however short, indicating a continuity of purpose.

"§ 1515. Definitions for certain provisions

"As used in sections 1512 and 1513 of this title and in this section—

"(1) the term 'official proceeding' means—

"(A) a proceeding before a judge or court of the United States, a United States magistrate, a bankruptcy judge, or a Federal grand jury;

"(B) a proceeding before the Congress; or

"(C) a proceeding before a Federal Government agency which is authorized by law;

"(2) the term 'physical force' means physical action against another, and includes confinement;

"(3) the term 'misleading conduct' means—

"(A) knowingly making a false statement;

"(B) intentionally omitting information from a statement and thereby intentionally causing a portion of such statement to be misleading, or intentionally concealing a material fact, and thereby intentionally creating a false impression by such statement;

"(C) with intent to mislead, knowingly submitting or inviting reliance on a writing or recording that is false, forged, altered, or otherwise lacking in authenticity;

"(D) with intent to mislead, knowingly submitting or inviting reliance on a sample, specimen, map, photograph, boundary mark, or other object that is misleading in a material respect; or

"(E) knowingly using a trick, scheme, or device with intent to mislead;

"(4) the term 'law enforcement officer' means an officer or employee of the Federal Government, or a person authorized to act for or on behalf of the Federal Government or serving the Federal Government as an adviser or consultant—

"(A) authorized under law to engage in or supervise the prevention, detection, investigation, or prosecution of an offense; or

"(B) serving as a probation or pretrial services officer under this title.";

"(5) the term 'intentional', with respect to an individual's conduct or the results of that conduct, means that engaging in such conduct or causing such result is such individual's conscious objective;

"(6) the term 'knowing', with respect to an individual's conduct, the circumstances surrounding that conduct, or the results of such conduct means that such individual—

"(A) is aware such individual is engaging in such conduct, that such circumstance exists, or that such result is substantially certain to occur; or

"(B) has a firm belief that such circumstance exists or that such result is substantially certain to occur; and

"(7) the term 'bodily injury' means—

"(A) a cut, abrasion, bruise, burn, or disfigurement;

"(B) physical pain;

"(C) illness;

"(D) impairment of the function of a bodily member, organ, or mental faculty; or

"(E) any other injury to the body, no matter how temporary.".

(b) The table of sections at the beginning of chapter 73 of title 18 of the United States Code is amended—

(1) so that the item relating to section 1503 reads as follows:

"1503. Influencing or injuring officer or juror generally."; and

(2) by adding at the end the following:

"1512. Tampering with a witness or an informant.

"1513. Retaliating against a witness or an informant.

"1514. Civil action to restrain harassment of a victim or witness.

"1515. Definitions for certain provisions.".

(c) Section 1503 of title 18 of the United States Code is amended—

(1) in the heading of such section, by striking out ", juror or witness" and inserting in lieu thereof "or juror";

(2) by striking out "witness" the first place it appears after "impede any" and all that follows through "or any grand" and inserting "grand" in lieu thereof; and

(3) by striking out "injures any party or witness" and all that follows through "matter pending therein, or".

(d) Section 1505 of title 18 of the United States Code is amended by—

(1) striking out paragraphs (1) and (2);

(2) striking out "such" the first place it appears in the fourth paragraph and inserting in lieu thereof "any pending";

(3) striking out "such" the second place it appears in the fourth paragraph and inserting in lieu thereof "any"; and

(4) striking out "such inquiry" in the fourth paragraph and inserting in lieu thereof "any inquiry".

(e) Section 1510(a) of title 18 of the United States Code is amended—

(1) by striking out the comma immediately following "bribery" and all that follows through "thereof";

(2) by striking out the semicolon immediately following "investigator" the first place it appears and all that follows through "Shall be fined" and inserting "shall be fined" in lieu thereof.

RESTITUTION

SEC. 4. (a) Chapter 227 of title 18 of the United States Code is amended by adding at the end the following:

"§ 3579. Nature of sentence of restitution

"(a)(1) The court, when sentencing a defendant convicted of an offense under this title or under subsection (i), (j), (h), or (n) of section 902 of the Federal Aviation Act of 1958 (49 U.S.C. 1472), may order, in addition to or in lieu of any other penalty authorized by law, that the defendant make restitution to any victim of the offense for which the defendant is sentenced.

"(2) If the court does not order restitution under this section, the court shall state on the record the reasons therefor.

"(b) The order may require that such defendant—

"(1) in the case of an offense resulting in damage to or loss or destruction of property of a victim of the offense—

"(A) return the property to the rightful owner of the property or someone designated by the rightful owner; or

"(B) if return of the property under subparagraph (A) is impossible or impractical, pay an amount equal to the greater of the value of the property on the date of the damage, loss, or destruction, or the value of the property on the date of sentencing, less the value (as of the date the property is returned) of any part of the property returned under subparagraph (A) of this paragraph;

"(2) where an offense results in bodily injury to a victim—

"(A) pay necessary expenses of medical and related professional services and devices relating to physical or psychiatric care, including nonmedical care and treatment rendered in accordance with a method of healing recognized by the law of the place of treatment;

"(B) pay expenses necessarily incurred for physical and occupational therapy and rehabilitation; and

"(C) reimburse the victim for income lost by such victim as a result of such offense;

"(3) where an offense resulting in bodily injury also results in the dealth of a victim, pay necessary funeral expenses; and

"(4) in any instance, where the victim (or if the victim is deceased, the victim's estate) consents, make restitution in services in lieu of money.

"(c) The court shall not impose an order of restitution under this section if such imposition will unduly complicate or prolong the sentencing process.

"(d)(1) The court shall not impose restitution with respect to a loss for which the victim has received or is to receive compensation, except that if such compensation is received from an insurer against such loss, the court may order restitution to such insurer to the extent of such compensation. An order of restitution shall require that all restitution to victims under such order be made before any restitution to any insurer under such order is made.

"(2) Any amount paid to a victim under an order of restitution shall be set off against any amount later recovered as compensatory damages by such victim in—

"(A) any Federal civil proceeding; and

"(B) any State civil proceeding, to the extent provided by the law of that State.

"(e)(1) The court may require that such defendant make restitution under this section within a specified period or in specified installments.

"(2) The end of such period or the last such installment shall not be later than—

"(A) the end of the period of probation, if probation is ordered;

"(B) five years after the end of the term of imprisonment imposed, if the court does not order probation; and

"(C) five years after the date of sentencing in any other case.

"(3) If not otherwise provided by the court under this subsection, restitution shall be made immediately.

"(f) If such defendant is paroled under this title, compliance by such defendant with any order of restitution under this section shall be a condition of such parole. The Parole Commission may revoke such defendant's parole if such defendant fails to comply with such order. In determining whether to revoke such defendant's parole because of such a failure, the Parole Commission shall consider such defendant's employment status and financial resources, the financial needs of such defendant and the dependents of such defendant, such defendant's reason for noncompliance, and such other factors as the Parole Commission deems appropriate.

"(g) An order of restitution may be enforced by the United States or a victim named in the order to receive the restitution in the same manner as a judgment in a civil action.

"§ 3580. Procedure for issuing order of restitution

"(a) The court, in determining whether to order restitution under section 3579 of this title and the amount of such restitution, shall consider the amount of the loss sustained by any victim as a result of the offense, the financial resources of the defendant, the financial needs of the defendant and the defendant's dependents, and such other factors as the court deems appropriate.

"(b) The court may order the probation service of the court to obtain information pertaining to the factors set forth in subsection (a) of this section. The probation service of the court shall include the information collected in the report of presentence investigation or in a separate report, as the court directs.

"(c) The court shall disclose to both the defendant and the attorney for the Government all portions of the presentence or other report pertaining to the matters described in subsection (a) of this section.

"(d) Any dispute as to the proper amount or type of restitution shall be resolved by the court by the preponderance of the evidence. The burden of demonstrating the amount of the loss sustained by a victim as a result of the offense shall be on the attorney for the Government. The burden of demonstrating the financial resources of the defendant and the financial needs of the defendant and such defendant's dependents shall be on the defendant. The burden of demonstrating such other matters as the court deems appropriate shall be upon the party designated by the court as justice requires.".

"(b) The table of sections at the beginning of chapter 227 of title 18 of the United States Code is amended by adding at the end the following new items:

"3579. Nature of sentence of restitution.

"3580. Procedure for issuing order of restitution.".

FEDERAL GUIDELINES FOR FAIR TREATMENT OF CRIME VICTIMS AND WITNESSES IN THE CRIMINAL JUSTICE SYSTEM

SEC. 5. (a) Within two hundred and seventy days after the date of the enactment of this Act, the Attorney General shall prescribe and implement guidelines for the fair treatment of crime victims and witnesses in criminal cases. In preparing the guidelines the Attorney General shall consider the following objectives:

(1) A victim of crime should routinely receive emergency social and medical services as soon as possible and information on—

(A) the availability to the victim of any crime victim compensation and of community-based victim-treatment programs;

(B) the crime victim's role in the criminal justice process; and

(C) stages in the criminal justice process of significance to a crime victim, and the manner in which information about such stages can be obtained.

(2) A victim or witness should routinely receive information on steps that law enforcement officers and attorneys for the Government can take to protect victims and witnesses from intimidation.

(3) A victim or witness should receive timely advance notice of all proceedings such victim or witness must attend.

(4) A victim of, or witness to, a serious crime should be able to request advance notification of—

(A) the arrest of an accused, if such notification is feasible;

(B) the initial appearance of an accused before a judicial officer;

(C) the initial bond decision relating to the accused; and

(D) proceedings in the prosecution of the accused (including entry of a plea of guilty, trial, sentencing, and, where a term of imprisonment is imposed, the release of the accused from such imprisonment).

(5) The victim of a serious crime, or in the case of a minor child or a homicide, the victim's family, should be consulted by the attorney for the Government in order to obtain such victim's or such family's views about the disposition of any Federal criminal case brought as a result of such crime, including such victim's or family's views about—

(A) dismissal;

(B) release of the accused pending judicial proceedings;

(C) plea negotiations; and

(D) pretrial diversion program.

(6) Victims and witnesses should be provided with a secure waiting area during court proceedings.

(7) Property held for evidentiary purposes should promptly be returned to the owner of such property unless there is a compelling law enforcement reason for retaining such property.

(8) A victim or witness who so requests should be assisted by law enforcement agencies and attorneys for the Government in informing employers that the need for victim and witness cooperation in the prosecution of the case may necessitate absence of that victim or witness from work. A victim or witness who, as a direct result of a crime or of cooperation with law enforcement agencies or attorneys for the Government, is subjected to serious financial strain, should be assisted by such agencies and attorneys in explaining to creditors the reason for such serious financial strain.

(9) Victim assistance education and training should be offered to persons taking courses at Federal law enforcement training facilities and attorneys for the Government so that victims may be promptly, properly, and completely assisted.

(10) Any other important means of assisting victims and witnesses that the prescribing official deems appropriate.

(b) Nothing in this section shall be construed as creating a cause of action against the United States.

PROFIT BY A CRIMINAL FROM PUBLICITY RELATING TO CRIMINAL CONDUCT

SEC. 6. Within one year after the date of enactment of this Act, the Attorney General shall report to Congress regarding the desirability of legislation necessary to assure that no Federal felon derives any profit from the sale of the recollections, thoughts, and feelings of such felon with regard to the offense committed by such felon until any victim of such offense receives restitution.

BAIL

SEC. 7. Section 3146(a) of chapter 207 of title 18, United States Code, is amended in the matter preceding paragraph (1)—

(1) by inserting after "judicial officer," the second place it appears the following: "subject to the condition that such person not commit an offense under section 1503, 1512, or 1513 of this title,"; and

(2) by inserting after "impose" the following; "a condition of release that such person not commit an offense under section 1503, 1512, or 1513 of this title and impose".

EFFECTIVE DATE

SEC. 8. (a) Except as provided in subsection (b), this Act and the amendments made by this Act shall take effect on the date of the enactment of this Act.

(b)(1) The amendment made by section 2 of this Act shall apply to presentence reports ordered to be made on or after March 1, 1983.

(2) The amendments made by section 4 of this Act shall apply with respect to offenses occurring on or after January 1, 1983.

Amend the title so as to read: "An Act to provide additional protections and assistance to victims and witnesses in Federal cases.".

UP AMENDMENT NO. 1376

(Purpose: To resolve certain differences between S. 2420 and H.R. 7191)

Mr. THURMOND. Mr. President, we had debate on this bill earlier in the day. It seems there were some question as to whether it had been cleared. It had been cleared, but it seems that both sides were not certain about it. At any rate, since the bill is cleared and now before us, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND) proposes an unprinted amendment numbered 1376.

Mr. THURMOND. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Victim and Witness Protection Act of 1982".

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds and declares that:

(1) Without the cooperation of victims and witnesses, the criminal justice system would cease to function; yet with few exceptions these individuals are either ignored by the criminal justice system or simply used as tools to identify and punish offenders.

(2) All too often the victim of a serious crime is forced to suffer physical, psychological, or financial hardship first as a result of the criminal act and then as a result of contact with a criminal justice system unresponsive to the real needs of such victim.

(3) Although the majority of serious crimes falls under the jurisdiction of State and local law enforcement agencies, the Federal Government, and in particular the Attorney General, has an important leadership role to asume in ensuring that victims of crime, whether at the Federal, State, or local level, are given proper treatment by agencies administering the criminal justice system.

(4) Under current law, law enforcement agencies must have cooperation from a victim of crime and yet neither the agencies nor the legal system can offer adequate protection or assistance when the victim, as a result of such cooperation, is threatened or intimidated.

(5) While the defendant is provided with counsel who can explain both the criminal justice process and the rights of the defendant, the victim or witness has no counterpart and is usually not even notified when the defendant is released on bail, the case is dismissed, a plea to a lesser charge is accepted, or a court date is changed.

(6) the victim and witness who cooperate with the prosecutor often find that the transportation, parking facilities, and child care services at the court are unsatisfactory and they must often share the pretrial waiting room with the defendant or his family and friends.

(7) The victim may lose valuable property to a criminal only to lose it again for long periods of time to Federal law enforcement officials, until the trial and sometimes the appeals are over; many times that property is damaged or lost, which is particularly stressful for the elderly or poor.

(b) The Congress declares that the purposes of this Act are—

(1) to enhance and protect the necessary role of crime victims and witnesses in the criminal justice process;

(2) to ensure that the Federal Government does all that is possible within limits of available resources to assist victims and witnesses of crime without infringing on the constitutional rights of the defendant; and

(3) to provide a model of legislation for State and local governments.

VICTIM IMPACT STATEMENT

SEC. 3. Paragraph (2) of rule 32(c) of the Federal Rules of Criminal Procedure is amended to read as follows:

"(2) REPORT.—The presentence report shall contain—

"(A) any prior criminal record of the defendant;

"(B) a statement of the circumstances of the commission of the offense and circumstances affecting the defendant's behavior;

"(C) information concerning any harm, including financial, social, psychological, and physical harm, done to or loss suffered by any victim of the offense; and

"(D) any other information that may aid the court in sentencing, including the restitution needs of any victim of the offense.".

PROTECTION OF VICTIMS AND WITNESSES FROM INTIMIDATION

SEC. 4. (a) Chapter 73 of title 18 of the United States Code is amended by adding at the end the following new sections:

"§ 1512. Tampering with a witness, victim, or an informant

"(a) Whoever knowingly uses intimidation or physical force, or threatens another person, or attempts to do so, or engages in misleading conduct towards another person, with intent to—

"(1) influence the testimony of any person in an official proceeding;

"(2) cause or induce any person to—

"(A) withhold testimony, or withhold a record, document, or other object, from an official proceeding;

"(B) alter, destroy, mutilate, or conceal an object with intent to impair the object's integrity or availability for use in an official proceeding;

"(C) evade legal process summoning that person to appear as a witness, or to produce a record, document, or other object, in an official proceeding; or

"(D) be absent from an official proceeding to which such person has been summoned by legal process; or

"(3) hinder, delay, or prevent the communication to a law enforcement officer or judge of the United States of information relating to the commission or possible commission of a Federal offense or a violation of conditions of probation, parole, or release pending judicial proceedings;

shall be fined not more than $250,000 or imprisoned not more than ten years, or both.

"(b) Whoever intentionally harasses another person and thereby hinders, delays, prevents, or dissuades any person from—

"(1) attending or testifying in an official proceeding;

"(2) reporting to a law enforcement officer or judge of the United States the commission or possible commission of a Federal offense or a violation of conditions of probation, parole, or release pending judicial proceedings;

"(3) arresting or seeking the arrest of another person in connection with a Federal offense; or

"(4) causing a criminal prosecution, or a parole or probation revocation proceeding, to be sought or instituted, or assisting in such prosecution or proceeding;

or attempts to do so, shall be fined not more than $25,000 or imprisoned not more than one year, or both.

"(c) In a prosecution for an offense under this section, it is an affirmative defense, as to which the defendant has the burden of proof by a preponderance of the evidence, that the conduct consisted solely of lawful conduct and that the defendant's sole intention was to encourage, induce, or cause the other person to testify truthfully.

"(d) For the purposes of this section—

"(1) an official proceeding need not be pending or about to be instituted at the time of the offense; and

"(2) the testimony, or the record, document, or other object need not be admissible in evidence or free of a claim of privilege.

"(e) In a prosecution for an offense under this section, no state of mind need be proved with respect to the circumstance—

"(1) that the official proceeding before a judge, court, magistrate, grand jury, or government agency is before a judge or court of the United States, a United States magistrate, a bankruptcy judge, a Federal grand jury, or a Federal Government agency; or

"(2) that the judge is a judge of the United States or that the law enforcement officer is an officer or employee of the Federal Government or a person authorized to act for or on behalf of the Federal Government or serving the Federal Government as an adviser or consultant.

"(f) There is extraterritorial Federal jurisdiction over an offense under this section.

"§ 1513. Retaliating against a witness, victim, or an informant

"(a) Whoever knowingly engages in any conduct and thereby causes bodily injury to another person or damages the tangible property of another person, or threatens to do so, with intent to retaliate against any person for—

"(1) the attendance of a witness or party at an official proceeding, or any testimony given or any record, document, or other object produced by a witness in an official proceeding; or

"(2) any information relating to the commission or possible commission of a Federal offense or a violation of conditions of probation, parole, or release pending judicial proceedings given by a person to a law enforcement officer:

or attempts to do so, shall be fined not more than $250,000 or imprisoned not more than ten years, or both.

"(b) There is extraterritorial Federal jurisdiction over an offense under this section.

§ 1514. Civil action to restrain harassment of a victim or witness

"(a)(1) A United States district court, upon application of the attorney for the Government, shall issue a temporary restraining order prohibiting harassment of a victim or witness in a Federal criminal case if the court finds, from specific facts shown by affidavit or by verified complaint, that there are reasonable grounds to believe that harassment of an identified victim or witness in a Federal criminal case exists or that such order is necessary to prevent and re-

strain an offense under section 1512 of this title, other than an offense consisting of misleading conduct, or under section 1513 of this title.

"(2)(A) A temporary restraining order may be issued under this section without written or oral notice to the adverse party or such party's attorney in a civil action under this section if the court finds, upon written certification of facts by the attorney for the Government, that such notice should not be required and that there is a reasonable probability that the Govenment will prevail on the merits.

"(B) A temporary restraining order issued without notice under this section shall be endorsed with the date and hour of issuance and be filed forthwith in the office of the clerk of the court issuing the order.

"(C) A temporary restraining order issued under this section shall expire at such time, not to exceed 10 days from issuance, as the court directs; the court, for good cause shown before expiration of such order, may extend the expiration date of the order for up to 10 days or for such longer period agreed to by the adverse party.

"(D) When a temporary restraining order is issued without notice, the motion for a protective order shall be set down for hearing at the earliest possible time and takes precedence over all matters except older matters of the same character, and when such motion comes on for hearing, if the attorney for the Government does not proceed with the application for a protective order, the court shall dissolve the temporary restraining order.

"(E) If on two days notice to the attorney for the Government or on such shorter notice as the court may prescribe, the adverse party appears and moves to dissolve or modify the temporary restraining order, the court shall proceed to hear and determine such motion as expeditiously as the ends of justice require.

"(F) A temporary restraining order shall set forth the reasons for the issuance of such order, be specific in terms, and describe in reasonable detail (and not by reference to the complaint or other document) the act or acts being restrained.

"(b)(1) A United States district court, upon motion of the attorney for the Government, shall issue a protective order prohibiting harassment of a victim or witness in a Federal criminal case if the court, after a hearing, finds by a preponderance of the evidence that harassment of an identified victim or witness in a Federal criminal case exists or that such order is necessary to prevent and restrain an offense under section 1512 of this title, other than an offense consisting of misleading conduct, or under section 1513 of this title.

"(2) At the hearing referred to in paragraph (1) of this subsection, any adverse party named in the complaint shall have the right to present evidence and cross-examine witnesses.

"(3) A protective order shall set forth the reasons for the issuance of such order, be specific in terms, describe in reasonable detail (and not be reference to the complaint or other document) the act or acts being restrained.

"(4) The court shall set the duration of effect of the protective order such period as the court determines necessary to prevent harassment of the victim or witness but in no case for a period in excess of three years from the date of such order's issuance. The attorney for the Government may, at any time within 90 days before the expiration of such order, apply for a new protective order under this section.

"(c) As used in this section—

"(1) the term 'harassment' means a course of conduct directed at a specific person that—

"(A) causes substantial emotional distress in such person; and

"(B) serves no legitimate purpose; and

"(2) the term 'course of conduct' means a series of acts over a period of time, however short, indicating a continuity of purpose.

"§ 1515. Definitions for certain provisions

"As used in sections 1512 and 1513 of this title and in this section—

"(1) the term 'official proceeding' means—

"(A) a proceeding before a judge or court of the United States, a United States magistrate, a bankruptcy judge, or a Federal grand jury;

"(B) a proceeding before the Congress; or

"(C) a proceeding before a Federal Government agency which is authorized by law;

"(2) the term 'physical force' means physical action against another, and includes confinement;

"(3) the term 'misleading conduct' means—

"(A) knowingly making a false statement;

"(B) intentionally omitting information from a statement and thereby causing a portion of such statement to be misleading, or intentionally concealing a material fact, and thereby creating a false impression by such statement;

"(C) with intent to mislead, knowingly submitting or inviting reliance on a writing or recording that is false, forged, altered, or otherwise lacking in authenticity;

"(D) with intent to mislead, knowingly submitting or inviting reliance on a sample, specimen, map, photograph, boundary mark, or other object that is misleading in a material respect; or

"(E) knowingly using a trick, scheme, or device with intent to mislead;

"(4) the term 'law enforcement officer' means an officer or employee of the Federal Government, or a person authorized to act for or on behalf of the Federal Government or serving the Federal Government as an adviser or consultant—

"(A) authorized under law to engage in or supervise the prevention, detection, investigation, or prosecution of an offense; or

"(B) serving as a probation or pretrial services officer under this title; and

"(5) the term 'bodily injury' means—

"(A) a cut, abrasion, bruise, burn, or disfigurement;

"(B) physical pain;

"(C) illness;

"(D) impairment of the function of a bodily member, organ, or mental faculty; or

"(E) any other injury to the body, no matter how temporary.".

(b) The table of sections at the beginning of chapter 73 of title 18 of the United States Code is amended—

(1) so that the item relating to section 1503 reads as follows:

"1503. Influencing or injuring officer or juror generally."; and

(2) by adding at the end the following:

"1512. Tampering with a witness, victim, or an informant.

"1513. Retaliating against a witness, victim, or an informant.

"1514. Civil action to restrain harassment of a victim or witness.

"1515. Definitions for certain provisions.".

(c) Section 1503 of title 18 of the United States Code is amended—

(1) in the heading of such section, by striking out ", juror or witness" and inserting in lieu thereof "or juror";

(2) by striking out "witness" the first place it appears after "impede any" and all that follows through "or any grand" and inserting "grand" in lieu thereof; and

(3) by striking out "injures any party or witness" and all that follows through "matter pending therein, or".

(d) Section 1505 of title 18 of the United States Code is amended by—

(1) striking out paragraphs (1) and (2);

(2) striking out "such" the first place it appears in the fourth paragraph and inserting in lieu thereof "any pending";

(3) striking out "such" the second place it appears in the fourth paragraph and inserting in lieu thereof "any"; and

(4) striking out "such inquiry" in the fourth paragraph and inserting in lieu thereof "any inquiry".

(e) Section 1510(a) of title 18 of the United States Code is amended—

(1) by striking out the comma immediately following "bribery" and all that follows through "thereof";

(2) by striking out the semicolon immediately following "investigator" the first place it appears and all that follows through "Shall be fined" and inserting "shall be fined" in lieu thereof.

RESTITUTION

SEC. 4. (a) Chapter 227 of title 18 of the United States Code is amended by adding at the end the following:

"§ 3579. Order of restitution

"(a)(1) The court, when sentencing a defendant convicted of an offense under this title or under subsection (h), (i), (j), or (n) of section 902 of the Federal Aviation Act of 1958 (49 U.S.C. 1472), may order, in addition to or in lieu of any other penalty authorized by law, that the defendant make restitution to any victim of the offense.

"(2) If the court does not order restitution, or orders only partial restitution, under this section, the court shall state on the record the reasons therefor.

"(b) The order may require that such defendant—

"(1) in the case of an offense resulting in damage to or loss or destruction of property of a victim of the offense—

"(A) return the property to the owner of the property or someone designated by the owner; or

"(B) if return of the property under subparagraph (A) is impossible, impractical, or inadequate, pay an amount equal to the greater of—

"(i) the value of the property on the date of the damage, loss, or destruction, or

"(ii) the value of the property on the date of sentencing,

less the value (as of the date the property is returned) of any part of the property that is returned;

"(2) in the case of an offense resulting in bodily injury to a victim—

"(A) pay an amount equal to the cost of necessary medical and related professional services and devices relating to physical, psychiatric, and psychological care, including nonmedical care and treatment rendered in accordance with a method of healing recognized by the law of the place of treatment;

"(B) pay an amount equal to the cost of necessary physical and occupational therapy and rehabilitation; and

"(C) reimburse the victim for income lost by such victim as a result of such offense;

"(3) in the case of an offense resulting in bodily injury also results in the death of a victim, pay an amount equal to the cost of necessary funeral and related services; and

"(4) in any case, if the victim (or if the victim is deceased, the victim's estate) consents, make restitution in services in lieu of money, or make restitution to a person or organization designated by the victim or the estate.

"(c) If the court decides to order restitution under this section, the court shall, if the victim is deceased, order that the restitution be made to the victim's estate.

"(d) The court shall impose an order of restitution to the extent that such order is as fair as possible to the victim and the imposition of such order will not unduly complicate or prolong the sentencing process.

"(e)(1) The court shall not impose restitution with respect to a loss for which the victim has received or is to receive compensation, except that the court may, in the interest of justice, order restitution to any person who has compensated the victim for such loss to the extent that such person paid the compensation. An order of restitution shall require that all restitution to victims under such order be made before any restitution to any other person under such order is made.

"(2) Any amount paid to a victim under an order of restitution shall be set off against any amount later recovered as compensatory damages by such victim in—

"(A) any Federal civil proceeding; and

"(B) any State civil proceeding, to the extent provided by the law of the State.

"(f)(1) The court may require that such defendant make restitution under this section within a specified period or in specified installments.

"(2) The end of such period or the last such installment shall not be later than—

"(A) the end of the period of probation, if probation is ordered;

"(B) five years after the end of the term of imprisonment imposed, if the court does not order probation; and

"(C) five years after the date of sentencing in any other case.

"(3) If not otherwise provided by the court under this subsection, restitution shall be made immediately.

"(g) If such defendant is placed on probation or paroled under this title, any restitution ordered under this section shall be a condition of such probation or parole. The court may revoke probation and the Parole Commission may revoke parole if the defendant fails to comply with such order. In determining whether to revoke probation or parole, the court or Parole Commission shall consider the defendant's employment status, earning ability, financial resources, the willfulness of the defendant's failure to pay, and any other special circumstances that may have a bearing on the defendant's ability to pay.

"(h) An order of restitution may be enforced by the United States or a victim named in the order to receive the restitution in the same manner as a judgment in a civil action.

"§ 3580. Procedure for issuing order of restitution

"(a) The court, in determining whether to order restitution under section 3579 of this title and the amount of such restitution, shall consider the amount of the loss sustained by any victim as a result of the offense, the financial resources of the defendant, the financial needs and earning ability of the defendant and the defendant's dependents, and such other factors as the court deems appropriate.

"(b) The court may order the probation service of the court to obtain information pertaining to the factors set forth in subsection (a) of this section. The probation service of the court shall include the information collected in the report of presentence investigation or in a separate report, as the court directs.

"(c) The court shall disclose to both the defendant and the attorney for the Government all portions of the presentence or other report pertaining to the matters described in subsection (a) of this section.

"(d) Any dispute as to the proper amount or type of restitution shall be resolved by the court by the preponderance of the evidence. The burden of demonstrating the amount of the loss sustained by a victim as a result of the offense shall be on the attorney for the Government. The burden of demonstrating the financial resources of the defendant and the financial needs of the defendant and such defendant's dependents shall be on the defendant. The burden of demonstrating such other matters as the court deems appropriate shall be upon the party designated by the court as justice requires.

"(e) A conviction of a defendant for an offense involving the act giving rise to restitution under this section shall stop the defendant from denying the essential allegations of that offense in any subsequent Federal civil proceeding or State civil proceeding, to the extent consistent with State law, brought by the victim.".

(b) The table of sections at the beginning of chapter 227 of title 18 of the United States Code is amended by adding at the end the following new items:

"3579. Nature of order of restitution.
"3580. Procedure for issuing order of restitution.".

FEDERAL GUIDELINES FOR FAIR TREATMENT OF CRIME VICTIMS AND WITNESSES IN THE CRIMINAL JUSTICE SYSTEM

SEC. 5. (a) Within 270 days after the date of enactment of this Act, the Attorney General shall develop and implement guidelines for the Department of Justice consistent with the purposes of this Act. In preparing the guidelines the Attorney General shall consider the following objectives:

(1) Services to victims of crime.—Law enforcement personnel should ensure that victims routinely receive emergency social and medical services as soon as possible and are given information on the following—

(A) availability of crime victim compensation (where applicable);

(B) community-based victim treatment programs;

(C) the role of the victim in the criminal justice process, including what they can expect from the system as well as what the system expects from them; and

(D) stages in the criminal justice process of significance to a crime victim, and the manner in which information about such stages can be obtained.

(2) Notification of availability of protection.—A victim or witness should routinely receive information on steps that law enforcement officers and attorneys for the Government can take to protect victims and witnesses from intimidation.

(3) Scheduling changes.—All victims and witnesses who have been scheduled to attend criminal justice proceedings should either be notified as soon as possible of any scheduling changes which will affect their appearances or have available a system for alerting witnesses promptly by telephone or otherwise.

(4) Prompt notification to victims of major serious crimes.—Victims, witnesses, relatives of those victims and witnesses who are minors, and relatives of homicide victims should, if such persons provide the appropriate official with a current address and telephone number, receive prompt advance notification, if possible, of judicial proceedings relating to their case, including—

(A) the arrest of an accused;

(B) the initial appearance of an accused before a judicial officer;

(C) the release of the accused pending judicial proceedings; and

(D) proceedings in the prosecution of the accused (including entry of a plea of guilty, trial, sentencing, and, where a term of imprisonment is imposed, the release of the accused from such imprisonment).

(5) Consultation with victim.—The victim of a serious crime, or in the case of a minor child or a homicide, the family of the victim, should be consulted by the attorney for the Government in order to obtain the views of the victims or family about the disposition of any Federal criminal case brought as a result of such crime, including the views of the victim or family about—

(A) dismissal;

(B) release of the accused pending judicial proceedings;

(C) plea negotiations; and

(D) pretrial diversion program.

(6) Separate waiting area.—Victims and other prosecution witnesses should be provided prior to court appearance a waiting area that is separate from all other witnesses.

(7) Property return.—Law enforcement agencies and prosecutor should promptly return victim's property held for evidentiary purposes unless there is a compelling law enforcement reason for retaining it.

(8) Notification to employer.—A victim or witness who so requests should be assisted by law enforcement agencies and attorneys for the Government in informing employers that the need for victim and witness cooperation in the prosecution of the case may necessitate absence of that victim or witness from work. A victim or witness who, as a direct result of a crime or of cooperation with law enforcement agencies or attorneys for the Government, is subjected to serious financial strain, should be assisted by such agencies and attorneys in explaining to creditors the reason for such serious financial strain.

(9) Training by federal law enforcement training facilities.—Victim assistance education and training should be offered to persons taking courses at Federal law enforcement training facilities and attorneys for the Government so that victims may be promptly, properly, and completely assisted.

(10) General victim assistance.—The guidelines should also ensure that any other important assistance to victims and witnesses, such as the adoption of transportation, parking, and translator services for victims in court be provided.

(b) Nothing in this title shall be construed as creating a cause of action against the United States.

(c) The Attorney General shall assure that all Federal law enforcement agencies outside of the Department of Justice adopt guidelines consistent with subsection (a) of this section.

PROFIT BY A CRIMINAL FROM SALE OF HIS STORY

SEC. 6. Within one year after the date of enactment of this Act, the Attorney General shall report to Congress regarding any laws that are necessary to ensure that no Federal felon derives any profit from the sale of the recollections, thoughts, and feelings of such felon with regards to the offense committed by the felon until any victim of the offense receives restitution.

BAIL

SEC. 7. Section 3146(a) of chapter 207 of title 18, United States Code, is amended in the matter preceding paragraph (1)—

(1) by inserting after "judicial officer," the second place it appears the following: "subject to the condition that such person not commit an offense under section 1503, 1512, or 1513 of this title,"; and

(2) by inserting after "impose" the following: "a condition of release that such person not commit an offense under section 1503, 1512, or 1513 of this title and impose".

EFFECTIVE DATE

SEC. 8. (a) Except as provided in subsection (b), this Act and the amendments made by this Act shall take effect on the date of the enactment of this Act.

(b)(1) The amendment made by section 2 of this Act shall apply to presentence reports ordered to be made on or after March 1, 1983.

(2) The amendments made by section 4 of this Act shall apply with respect to offenses occurring on or after January 1, 1983.

Mr. THURMOND. Mr. President, I move to concur in the amendment of the House with the amendment which I have sent to the desk and which has just been stated.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

AMENDMENT TO S. 2420, THE OMNIBUS VICTIM PROTECTION ACT

Mr. THURMOND. Mr. President, this amendment is in the nature of a substitute to S. 2420, the Omnibus Victim/Witness Protection Act. The substitute has been reviewed by a number of my colleagues on the Committee on the Judiciary, and by Members of the other body who have worked with equal diligence to enact a landmark victim rights bill this session. I am assured that my proposal has the support of all concerned as a reasonable accommodation between what the two Houses have proposed.

Basically, the legislation before us would: require that a "victim impact statement" be made part of the report filed with the sentencing judge; make it a Federal offense to intimidate or retaliate against victims or witnesses of Federal crimes; require, for the first time, a Federal judge to order restitution when passing sentence for crimes involving bodily injury or property loss, or state for the record the reasons for not ordering restitution; require the Attorney General to develop guidelines for the fair treatment of crime victims and witnesses; and require the Attorney General to recommend legislation to restrict the ability of a Federal felon to profit because of the notoriety of his crime.

The distinguished Senator from Nevada (Mr. LAXALT), has been working many years for the enactment of legislation to provide protections for victims and witnesses, and I would like to take this opportunity to applaud him for his attention and persistence to this issue. Senator HEINZ, my distinguished colleague from Pennsylvania, first become interested in victims' rights through his chairmanship of the Aging Committee, where his hearings on crime and the elderly alerted to the second victimization to often suffered by crime victims. It is through their determination that this legislation will be swiftly enacted. I commend both of them. I would also like to thank the ranking minority member of the Senate Judiciary Committee, who helped get this bill through committee, and Senator MATHIAS, chairman of the Criminal Law Subcommittee, who held hearings on S. 2420 and processed it through the subcommittee as quickly as possible. Other members of the Judiciary Committee were extremely helpful and I also thank them.

Mr. HEINZ. Mr. President, will the Senator yield for 3 minutes?

Mr. THURMOND. I would be delighted to yield to the able Senator from Pennsylvania who did such a magnificent job on this amendment.

Mr. HEINZ. Mr. President, it is I who should thank the distinguished Senator from South Carolina, the distinguished President pro tempore of the Senate, for his extraordinary work on this measure. It gives me great pleasure to speak on behalf of final congressional approval of the most comprehensive package of victims' rights legislation yet to come before the Congress.

I believe this legislation, S. 2420, will have an immediate, positive impact on individuals throughout our country. I commend the rapidity with which both Houses of the Congress have considered and approved this legislation.

I would first like to thank my colleagues who have contributed to the success of this bill. My good friend and ally in this cause, the distinguished Senator from Nevada (PAUL LAXALT), deserves great praise for his longstanding recognition of the problems faced by victims and his perseverance in seeking the enactment of remedial legislation. Senators THURMOND and BIDEN, the chairman and ranking minority member of the Judiciary Committee, were of invaluable assistance in guiding it through the committee. Senator MATHIAS, who chairs the Subcommittee on Criminal Law, prepared the hearings which fully documented the need for this legislation. Senator LEAHY provided critical assistance when necessary to insure a successful outcome to negotiations with various interest groups.

The manager of this bill, Mr. President, Senator THURMOND, has had clearly the greatest impact in bringing it before this body and in sheparding it through. I again express my heartfelt thanks to my most distinguished colleague, the senior Senator from South Carolina.

I would be entirely remiss, Mr. President, if I did not acknowledge the dedicated and persistant work on behalf of this bill of Catherine Milton of the Aging Committee staff. More than any other single person, she has been the catalyst for congressional action on this subject and the uniting force behind those who have contributed to the bill. We owe her an enormous debt of gratitude.

I also want to thank those victims who came forward to make public their painful experiences with a system gone wrong deserve a very special thanks. They are continuing their work alongside the President's task force to insure others do not have to suffer as they did; I take my hat off to these people.

With the passage of this bill, we have taken an important step to assure those who are victimized that they will receive at least the same considerations and protections which are currently extended to the accused.

I recognize that this bill will not be the final answer to all the problems victims face after a crime has occurred. But I do view this legislation as a constructive Federal approach designed to rebalance the scales of justice in favor of the valid interest of the victim.

In the final version of this legislation, some of the provisions of S. 2420 as introduced have been altered or deleted in the spirit of compromise with the House of Representatives. As a result, this bill does not address three outstanding issues which will need to be addressed in a meaningful fashion in the futue. One is the compensation to victims for their losses incurred as a result of the crime. A great need exists for a Federal policy on victim compensation which assures that a reasonable reimbursement will be paid to innocent victims of violent crime, or their survivors, when no offender is convicted who is capable of restituting such victims. Second, we must also address ourselves to the problem of relocation of witnesses to protect them from the harassment and retaliation which often follows the decision to offer testimony, identify suspects, or otherwise cooperate with the cirminal justice system in the attempt to bring offenders to justice. Finally, some legal redress must be made available to those who have a legitimate cause of action against a negligent Government offi-

cial—due to the early release of a dangerous person from a Federal prison, for example—but who are blocked by the blanket or sovereign immunity. All of these problems are ones which have been described in compelling testimony before the Judiciary Committee by witnesses and victims, and I believe the appropriate responses to them are before us.

Luckily, we have an official body now convened which, I am assured, will take up these three issues and make substantive recommendations for their solution. The President's task force on victims of crime is now conducting public hearings and research in order to report to the President by December 31 on steps the Federal Government can and should take to redress the wrongs perpetrated against crime victims by the criminal justice system itself. Ably led by Chairperson Lois Herrington, the task force is more than likely to deal with all three of these issues in a thoughtful and realistic fashion. I look forward to their report, and to preparing legislation based upon it.

Mr. President, it is, unfortunately, not too strong a statement to make that most crime victims are victimized twice—the second time by the insensitivity of a criminal justice system which fails to acknowledge that people, too, are victims. This bill takes a long step forward in preventing that second crime. I am proud to be able to urge its passage today.

I thank my friend from South Carolina for every bit of the help he gave.

The substitute bill has been reviewed by a number of my colleagues on the Judiciary Committee, and by Members of the other body who have worked with equal dilligence to enact a landmark victim rights bill this session. I am assured that my proposal has the support of all concerned as a reasonable accommodation between the two similar bills which the two Houses have proposed.

This substitute includes a number of improvements both to our earlier proposal and to the House version of this legislation. Changes in the two proposals can be summarized as follows.

The substitute version of the section of the bill relating to intimidation of victims and witnesses does not (except in the catchline of the section) refer to "victim" or "witnesses" (the Senate passed bill did use those terms). This change from the Senate bill was agreed to in order to insure the broadest possible coverage of this provision. The purpose of section 1512 in the legislation now being considered is to broaden the universe of protected individuals to anyone who might suffer intimidation or injury because of his knowledge of a commission of a crime. Any victim (victims, of course, are nowhere specifically protected in current law) would be covered, as would witnesses who would not be scheduled to testify because, for example, the testimony would constitute hearsay, be privileged, or be otherwise inadmissible.

Subsection (3) of section 1512(a) of the Senate passed bill, general obstruction of justice residual clause of the intimidation section, was taken out of the bill as beyond the legitimate scope of this witness protection measure. It also is probably duplicative of abstruction of justice statutes already in the books.

In line with the ABA's recommendations regarding witness protection, the Senate proposed penalties for intimidation and retaliation of victims and witnesses have been changed. Acts of intimidation and retaliation which involve violence, threats of violence, or "misleading conduct" will be treated as felonies and will have a penalty of not more than 10 years' imprisonment or not more than $250,000 in fines (which is higher than the fine proposed in the Senate passed bill), or both. Less serious acts will be treated as misdemeanors and shall carry the penalty of imprisonment of not more than 1 year or fined not more than $25,000, or both. The penalties attached to the more serious crimes underline the view that such intimidation of victims and witnesses cannot be tolerated and will be treated as such; the lesser penalties for crimes which are in the nature of harassment will make prosecutions more likely, and more likely to result in convictions, for such crimes.

The House version of the section on "civil action to restrain witness or victim intimidation," has the same objectives as earlier Senate proposal. However, the House bill is closely based on the system working well in California and elsewhere, and, more significantly, in conformity with current Federal rules of civil procedure. That means it will be easier to implement, and therefore can go into operation sooner. The House version does not require a hearing to get a temporary restraining order issued. However the person subject to the order may thereafter contest it in an adversarial proceeding before a judge.

As mentioned above, 18 U.S.C. 1503 already provides some witness protections—but only as to witnesses under subpena in active cases. The Senate passed bill allowed a slight overlap between old section 1503 and new sections 1512 and 1513. The House version amends section 1503 so it will make no mention of, and provide no protection to, supenaed witnesses. The compromise accepts the House position. By amending section 1503 in this way, the proposal will contribute to a clearer and less duplicative law.

The restitution section draws from both proposals to provide more detailed procedures, and to make it easier to use and understand. The basic concept in both bills is retained that the sentencing court, in the event that restitution is not ordered, must state for the record its reasons. Thus, restitution to the victim will be the expected norm, and no longer an afterthought.

The Senate passed bill proposed, limited its restitution provisions to title 18 crimes. The House version extended the provisions to aid people victimized during an airline hijacking. That addition is just and meritorious, and is included in the new proposals.

The Senate passed version of this legislation stated that any order of restitution would be given precedence over any Federal lien. This provision was deleted because it was the view of both House and Senate sponsors that such a change in current law merited hearings, and there have never been any. We do believe, however, that this issue should be subject to further examination and, we hope, congressional hearings.

The restitution section has also been altered since the version originally passed by the Senate in that it no longer delineates a number of regulatory offenses not subject to the restitution provision. This section was found to be superfluous, because earlier in the bill, it is stated that restitution orders will be limited to title 18 offenses.

The Senate passed bill making it clear that a Federal conviction is res judicata as to the underlying facts in any subsequent civil proceeding. The only changes the substitute would make in that provision is to make clear that it applies only to Federal civil actions and to State cases when such treatment is consistent with State law.

In the section of the legislation calling for the Attorney General to develop and implement guidelines for the fair treatment of victims and witnesses in the criminal justice system, the time period in which the Department of Justice must act has been extended from 6 to 9 months.

The section on Federal accountability for the premature release or escape of dangerous offenders has been dropped from the bill. The Department of Justice would like more time to examine the issue, and many interested parties would like further hearings on it. We are hopeful that such examination will take place soon, and that legislation to address this very serious problem will be considered in the near future.

The section expanding the witness protection program was dropped because of the controversy surrounding the program as it now exists. Consequently, the issues in this bill must await a broader examination of the operation of the current program.

The Senate-passed proposal called for a fresh look at compensation for the victims of Federal crimes, as well as innovative methods of financing such a program. The study proposal was dropped on the assurance that both the Department of Justice and the President's Task Force on Victims of Crime will give views on these matters.

● Mr. LAXALT. Mr. President, by its action today, the Senate takes an important step in correcting the systemic and needless abuses that the criminal justice system deals to victims of crime. The Victim Witness Protection Act is the result of intense bipartisan efforts in both the House and the Senate to send a bill to the President this Congress. I commend my colleagues in both Houses for their cooperation.

As a former prosecutor, I am personally aware of how indifferent the criminal justice process can be to the very real needs of the victim of crime. The victim after suffering the trauma of the crime itself, then must face the agony of their case working its way through the criminal justice system. Oftentimes, the victim is not told when the criminal is apprehended, and if apprehended, not told when he is released prior to trial. Today, cases can be dismissed, plea bargains agreed to, and court dates changed, all without a consultation with the victim of the crime. This bill would end these abuses.

Under current law, there are provisions which allow the court to order restitution. However, the reality is that it is rarely ordered. This is due, in part, to the inability of the court to order restitution under present law, when a prison sentence is ordered, but it is due to the fact that judges have not taken advantage of the opportunity to do so. This bill will remedy this injustice. When this bill becomes law, judges that fail to order restitution will have to state on the record their reasons for not doing so. It is the intent of Congress that judges order restitution in each and every case where the court finds there has been property loss or injury to the victim. The purpose of this bill is to attempt to make the victim whole once again. It is the duty of the court to insure that the convicted criminal be the one who pays. As a member of the Senate Judiciary Committee, which is charged with oversight of the Department of Justice, I will be watching the courts closely to determine whether theses changes are implemented. The time for ignoring the needs of the crime victim is over.

Another troublesome area this bill attempts to clear up is the area of victim/witness intimidation. There is probably no crime which is more offensive to the integrity of the criminal justice system than one which seeks to prevent the reporting of another offense, or one which attempts to stop someone from testifying in a court of law. S. 2420 deals with this problem by broadening and rewriting the intimidation sections of our Federal criminal law. Conduct which in the past was unreachable by the law, but nonetheless intimidating to the victim of the crime, will be punished severely. If this does not act as a deterrent, another provision in this bill will allow the court to inject itself into the process whenever harassment of a victim or witness is likely to occur. The court is empowered to restrain harassment using the considerable power inherent in the judicial branch of our Government.

There are a large number of other changes in the law which will be accomplished by the passage of this legislation. Suffice it to say that they are meritorious and long overdue. I would like once again to commend my colleagues on both sides of the aisle for their cooperation and sensitivity to the problems this bill will remedy.●

Mr. THURMOND. Mr. President, again, I commend the distinguished Senator from Pennsylvania for the work he has done. Also, we thank the able Senator from Nevada for the work he did on this bill.

TIME LIMITATION AGREEMENT—S. 2109

Mr. BAKER. Mr. President, I am happy to say that I believe we have an agreement now on the CFTC bill, S. 2109. I wish to state a unanimous-consent request with respect to that agreement for the consideration of the minority leader and other Senators. This request will include a limitation on the time for debate on the CFTC bill, as well as a limitation for debate on H.R. 6156. The two will be considered in tandem, one after the other.

Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar Order No. 543, S. 2109, the CFTC bill, and that it be considered under the following time agreement: 30 minutes on the bill, equally divided between the chairman of the Committee on Agriculture and the ranking minority member or their designees; 40 minutes on a route user fee amendment equally divided; 20 minutes on a D'Amato amendment on security aspects; 20 minutes on a Durenberger amendment dealing with the sanctity of contracts; 20 minutes on all remaining amendments; 5 minutes on any debatable motion, appeal, or point of order if the same be submitted to the Senate; and that the agreement be in the usual form.

I further ask unanimous consent that, following the conclusion of the Senate's deliberation on the CFTC bill, the Senate immediately turn to the consideration of H.R. 6156, the SEC bill, under the following time agreement: 15 minutes on the bill, equally divided between the chairman of the Banking Committee or his designee and the ranking minority member or his designee; provided that no amendment be in order and that the agreement shall be in the usual form.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Reserving the right to object, Mr. President, I do not intend to object. When the majority leader asks for consent in the usual form, does that mean that all amendments must be germane?

Mr. BAKER. It means that all amendments not specified must be germane.

Mr. METZENBAUM. And that all second-degree amendments must be germane?

Mr. BAKER. Yes, Mr. President.

Mr. METZENBAUM. I thank the majority leader.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

COMMODITY FUTURES TRADING ACT OF 1982

Mr. BAKER. Mr. President, will the clerk please state the matter before the Senate?

The PRESIDING OFFICER. The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (S. 2109) to extend the Commodity Exchange Act, and for other purposes.

The Senate proceeded to consider the bill, which had been reported from the Committee on Agriculture, Nutrition, and Forestry with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Futures Trading Act of 1982".

DEFINITIONS

SEC. 2. Section 2(a) of the Commodity Exchange Act (7 U.S.C. 2, 4) is amended—

(1) by redesignating subsection (a)(1) as subsection (a)(1)(A);

(2) by inserting immediately after the sentence defining the term "futures commission merchant" in subsection (a)(1)(A), as so redesignated, a new sentence to read as follows: "The term 'introducing broker' shall mean any person, except an individual who elects to be and is registered as an associated person of a futures commission merchant, engaged in soliciting or in accepting orders for the purchase or sale of any commodity for future delivery on or subject to the rules of any contract market who does not accept any money, securities, or property (or extend credit in lieu thereof) to margin, guarantee, or secure any trades or contracts that result or may result therefrom."; and

(3) by amending the definition of the term "commodity trading advisor" in subsection (a)(1)(A), as so redesignated, to read as follows: "The term 'commodity trading advisor' shall mean any person who, for compensation or profit, engages in the business

of advising others, either directly or through publications, writings, or electronic media, as to the value of or the advisability of trading in any contract for future delivery of a commodity made or to be made on or subject to the rules of any contract market, any commodity option authorized under section 4c, or any leverage transaction authorized under section 19 of this Act, or who, for compensation or profit, and as part of a regular business, issues or promulgates analyses or reports concerning any of the foregoing; but such term does not include (i) any bank or trust company, (ii) any news reporter, news columnist, or news editor of the print or electronic media, or any lawyer, accountant, or teacher, (iii) any floor broker or futures commission merchant, (iv) the publisher or producer of any print or electronic data of general and regular dissemination, including its employees, (v) the fiduciary of any defined benefit plan which is subject to the provisions of the Employee Retirement Income Security Act of 1974, (vi) any contract market, and (vii) such other persons not within the intent of this definition as the Commission may specify by rule, regulation, or order: *Provided,* That the furnishing of such services by the foregoing persons is solely incidental to the conduct of their business or profession: *Provided further,* That the Commission, by rule or regulation, may include within this definition, any person advising as to the value of commodities or issuing reports or analyses concerning commodities, if the Commission determines that such rule or regulation will effectuate the purposes of this provision.".

JURISDICTIONAL ACCORD WITH THE SECURITIES AND EXCHANGE COMMISSION

SEC. 3. (a) Section 2(a)(1)(A) of the Commodity Exchange Act (7 U.S.C. 2, 4), as redesignated by section 2 of this Act, is amended by inserting in the third sentence the words ", except to the extent otherwise provided in subparagraph (B) of this paragraph," after the words "exclusive jurisdiction".

(b) Section 2(a)(1) of the Commodity Exchange Act (7 U.S.C. 2, 4) is amended by adding a new subparagraph (B) to read as follows:

"(B) Notwithstanding any other provision of law—

"(i) This Act shall not apply to and the Commission shall have no jurisdiction to designate a board of trade as a contract market for any transaction whereby any party to such transaction acquires any put, call, or other option on one or more securities (as defined in section 2(1) of the Securities Act of 1933 or section 3(a)(10) of the Securities Exchange Act of 1934 on the date of enactment of the Futures Trading Act of 1982), including any group or index of such securities, or any interest therein or based on the value thereof.

"(ii) This Act shall apply to and the Commission shall have exclusive jurisdiction with respect to accounts, agreement (including any transaction which is of the character of, or is commonly known to the trade as, an 'option', 'privilege', 'indemnity', 'bid', 'offer', 'put', 'call', 'advance guaranty', or 'decline guaranty') and transactions involving, and may designate a board of trade as a contract market in, contracts of sale (or options on such contracts) for future delivery of a group or index of securities (or any interest therein or based upon the value thereof): *Provided,* That no board of trade shall be designated as a contract market with respect to any such contracts of sale (or options on such contracts for future delivery unless the board of trade making such application demonstrates and the Commission expressly finds that the specific contract (or option on such contract) with respect to which the application has been made meets the following minimum requirements:

"(I) Settlement of or delivery on such contract (or option on such contract) shall be effected in cash or by means other than the transfer or receipt of any security, except an exempted security under section 3 of the Securities Act of 1933 or section 3(a)(12) of the Securities Exchange Act of 1934 as in effect on the date of enactment of the Futures Trading Act of 1982 (other than any municipal security, as defined in section 3(a)(29) of the Securities Exchange Act of 1934 on the date of enactment of the Futures Trading Act of 1982);

"(II) Trading in such contract (or option on such contract) shall not be readily susceptible to manipulation of the price of such contract (or option on such contract), nor to causing or being used in the manipulation of the price of any underlying security, option on such security, or option on a group or index including such securites; and

"(III) Such group or index of securities shall be predominately composed of the securities of unaffiliated issuers and shall be a widely published measure of, and shall reflect, the market for all publicly traded equity or debt securities or a substantial segment thereof, or shall be comparable to such measure.

"(iii) Upon application by a board of trade for designation as a contract market with respect to any contract of sale (or option on such contract) for future delivery involving a group or index of securities, the Commission shall provide an opportunity for public comment on whether such contract (or option on such contract) meets the minimum requirements set forth in subparagraph (ii) hereof, and shall consult with the Securities and Exchange Commission with respect to such designation. If, within fifteen days following the close of the public comment period, the Securities and Exchange Commission shall object to the designation of a board of trade as a contract market in such contract (or option on such contract) on the ground that any minimum requirement of subparagraph (ii) hereof is not met, the Commission shall afford the Securities and Exchange Commission an opportunity for an oral hearing, to be transcribed, before the Commission, and shall give appropriate weight to the views of the Securities and Exchange Commission. Such oral hearing shall be held after the public comment period, prior to Commission action upon such designation, and not less than thirty nor more than forty-five days after the close of the public comment period, unless both the Commission and the Securities and Exchange Commission otherwise agree. In the event that such an oral hearing is held and the Securities and Exchange Commission fails to withdraw its objections, and the Commission issues an order designating a board of trade as a contract market with respect to any such contract (or option on such contract), the Securities and Exchange Commission shall have the right of judicial review of such order in accordance with the standards of section 6(b) of this Act. In the event that, pursuant to section 6 of this Act, there is a hearing on the record with respect to such application for designation, the Securities and Exchange Commission shall have the right to participate in that hearing as an interested party.

"(iv) No person shall offer to enter into, enter into, or confirm the execution of any contract of sale (or option on such contract) for future delivery of any security, or interest therein or based on the value thereof, except an exempted security under section 3 of the Securities Act of 1933 or section 3(a)(12) of the Securities Exchange Act of 1934 as in effect on the date of enactment of the Futures Trading Act of 1982 (other than any municipal security as defined in section 3(a)(29) of the Securities Exchange Act of 1934 on the date of enactment of the Futures Trading Act of 1982); or except as provided in subparagraph (ii) hereof, any group or index of such securities or any interest therein or based on the value thereof.".

(c) Section 4c of the Commodity Exchange Act (7 U.S.C. 6c) is amended by adding a new subsection (f) to read as follows:

"(f) Nothing in this Act shall be deemed to govern or in any way be applicable to any transaction in an option on foreign currency traded on a national securities exchange.".

(d) Section 4m of the Commodity Exchange Act (7 U.S.C. 6m) is amended—

(1) by inserting "(1)" immediately following the section designation; and

(2) by adding a new subsection (2) to read as follows:

"(2) Nothing in this Act shall relieve any person of any obligation or duty, or affect the availability of any right or remedy available to the Securities and Exchange Commission or any private party arising under the Securities Act of 1933 or the Securities Exchange Act of 1934 governing the issuance, offer, purchase, or sale of securities of a commodity pool, or of persons engaged in transactions with respect to such securities, or reporting by a commodity pool.".

(e) Paragraph (6) of section 8a of the Commodity Exchange Act (7 U.S.C. 12a(6)) is amended—

(1) by inserting the words "registered futures association, or self-regulatory organization as defined in section 3(a)(26) of the Securities Exchange Act of 1934," before the word "notwithstanding";

(2) by striking out the word "and" before the word "consumers" and inserting in lieu thereof a comma; and

(3) by inserting the following before the semicolon: "or investors or which is necessary or appropriate to effectuate the purposes of this Act: *Provided,* That any information furnished by the Commission under this paragraph shall not be disclosed by such contract market, registered futures association, or self-regulatory organization except in any self-regulatory action or proceeding".

PERSONNEL RESTRICTIONS

SEC. 4. Section 2(a)(7) of the Commodity Exchange Act (7 U.S.C. 4a(f)) is amended—

(1) by striking out "(A)" after the paragraph designation; and

(2) by striking out subparagraph (B) in its entirety.

LEGISLATIVE FINDINGS

SEC. 5. Section 3 of the Commodity Exchange Act (7 U.S.C. 5) is amended to read as follows:

"SEC. 3. Transactions in commodities involving the sale thereof for future delivery as commonly conducted on boards of trade and known as 'futures' are affected with a national public interest; such transactions are carried on in large volume by the public generally and by persons engaged in the business of buying and selling commodities

and the products and byproducts thereof in interstate commerce; the prices involved in such transactions are generally quoted and disseminated throughout the United States and in foreign countries as a basis for determining the prices to the producer and the consumer of commodities and the products and byproducts thereof and to facilitate the movements thereof in interstate commerce; such transactions are utilized by shippers, dealers, millers, and others engaged in handling commodities and the products and byproducts thereof in interstate commerce as a means of hedging themselves against possible loss through fluctuations in price; the transactions and prices of commodities on such boards of trade are susceptible to excessive speculation and can be manipulated, controlled, cornered, or squeezed, to the detriment of the producer or the consumer and the persons handling commodities and the products and byproducts thereof in interstate commerce, rendering regulation imperative for the protection of such commerce and the national public interest therein. Furthermore, transactions which are of the character of, or are commonly known to the trade as, 'options' and which are or may be utilized by commercial and other entities for purposes of risk shifting are in interstate commerce or affect such commerce and the national economy, rendering regulation of such transactions imperative for the protection of such commerce and the national public interest.".

UNLAWFUL FUTURES TRADING, FOREIGN FUTURES

SEC. 6. Section 4 of the Commodity Exchange Act (7 U.S.C. 6) is amended—

(1) by inserting "(a)" immediately following the section designation;

(2) by striking out all those words following the word "to" the first time it occurs through and including the words "as hereinafter provided," and inserting in lieu thereof the following: "offer to enter into, to enter into, to execute, to confirm the execution of, or to conduct any office or business anywhere in the United States or its territories or possessions for the purpose of soliciting or accepting any order for, or otherwise dealing in, any transaction in, or in connection with, a contract for the purchase or sale of a commodity for future delivery (other than a contract which is made on or subject to the rules of a board of trade, exchange, or market located outside the United States, its territories or possessions) unless: (1) such transaction is conducted on or subject to the rules of a board of trade which has been designated by the Commission as a contract market for such commodity, (2) such contract is executed or consummated by or through a member of such contract market,";

(3) by striking out the word "if" the first time it occurs and inserting in lieu thereof "(3)";

(4) by striking out the word "board" after the words "*Provided*, That each" and inserting in lieu thereof the words "contract market"; and

(5) by adding a new subsection (b) to read as follows:

"(b) The Commission may adopt rules and regulations proscribing fraud and requiring minimum financial standards, the disclosure of risk, reporting, the keeping of books and records, the safeguarding of customers' funds, and registration with the Commission by any person located in the United States, its territories or possessions, who engages in the offer and sale of any contract of sale of a commodity for future delivery which is made or to be made on or subject to the rules of a board of trade, exchange, or market located outside the United States, its territories or possessions. Such rules and regulations may impose different requirements for such persons depending upon the particular foreign board of trade, exchange, or market on which such contracts are made. No rule or regulation may be adopted by the Commission under this subsection that (1) requires Commission approval of any contract, rule, regulation, or action of any foreign board of trade, exchange, or market, or clearinghouse for such board of trade, exchange, or market, or (2) governs in any way any rule or contract term or action of any foreign board of trade, exchange, or market, or its clearinghouse.".

SPECULATIVE LIMITS

SEC. 7. Section 4a of the Commodity Exchange Act (7 U.S.C. 6a) is amended—

(1) by striking our the word "order's" in subsection (2);

(2) by striking out the first semicolon in subsection (2) and inserting in lieu thereof the words "of the rule, regulation, or order";

(3) by inserting the words "rule, regulation, or" before the word "order" wherever it occurs;

(4) by striking out the words "within one hundred and eighty days after the effective date of the Commodity Futures Trading Commission Act of 1974" in subsection (3);

(5) by inserting the words ", introducing broker," after the words "futures commission merchant" and by striking out the word "as" before the words "a floor broker" in the first sentence of subsection (4); and

(6) by adding a new subsection (5) to read as follows:

"(5) Nothing in this section shall prohibit or impair the adoption by any contract market, or by any other board of trade licensed or designated by the Commission, of any bylaw, rule, regulation, or resolution fixing limits on the amount of trading which may be done or positions which may be held by any person under contracts of sale of any commodity for future delivery traded on or subject to the rules of such contract market, or under options on such contracts or commodities traded on or subject to the rules of such contract market or such board of trade: *Provided*, That if the Commission shall have fixed limits under this section for any contract or under section 4c of this Act for any commodity option, the bylaws, rules, regulations, and resolutions adopted by such contract market or such board of trade shall not be higher than the limits fixed by the Commission except with the approval of the Commission. It shall be unlawful for any person to violate any bylaw, rule, regulation, or resolution of any contract market or other board of trade licensed or designated by the Commission fixing limits on the amount of trading which may be done or positions which may be held by any person under contracts of sale of any commodity for future delivery, or under options on such contracts or commodities, if such bylaw, rule, regulation, or resolution has been approved by the Commission: *Provided*, That the provisions of section 9(c) of this Act shall not apply unless the violation was in furtherance of an attempt to manipulate, corner, or squeeze a market.".

REPEAL OF THE BAN ON OPTIONS TRADING IN AGRICULTURAL COMMODITIES

SEC. 8. Section 4c of the Commodity Exchange Act (7 U.S.C. 6c) is amended—

(1)(A) by inserting "or" at the end of clause (A) of subsection (a);

(B) by striking out clause (B) of subsection (a); and

(C) by redesignating clause (C) of subsection (a) as clause (B);

(2) in subsection (b), by striking out the following phrases: (A) "subject to the provisions of subsection (a) of this section", (B) ", but not specifically set forth in section 2(a) of this Act, prior to the enactment of the Commodity Futures Trading Commission Act of 1974,", and (C) "within one year after the effective date of the Commodity Futures Trading Commission Act of 1974 unless the Commission determines and notifies the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture that it is unable to prescribe such terms and conditions within such period of time"; and

(3) in subsection (c), by striking out "but not specifically set forth in section 2(a) of this Act prior to the enactment of the Commodity Futures Trading Commission Act of 1974,".

INTRODUCING BROKER; REGISTRATION REQUIREMENT

SEC. 9. Section 4d of the Commodity Exchange Act (7 U.S.C. 6d) is amended—

(1) by inserting the words "or introducing broker" after the words "futures commission merchant" in the introductory clause of section 4d;

(2) by inserting the words "or introducing broker" after the words "futures commission merchant" in paragraph (1); and

(3) by inserting the words "if a futures commission merchant," after the words "such person shall," in paragraph (2).

REGISTRATION PROCEDURE; TECHNICAL AMENDMENT

SEC. 10. Section 4f of the Commodity Exchange Act (7 U.S.C. 6f) is amended—

(1) by amending subsection (1)—

(A) by inserting the words ", introducing broker," after the words "futures commission merchant" the first time they occur in the first sentence;

(B) by striking out the word "as" before the words "floor broker" in the first sentence;

(C) by inserting the words "and introducing brokers" after the words "of applications of futures commission merchants" in the first sentence;

(D) by striking out the words "and of all correspondents and agents engaged in soliciting or accepting on behalf of such applicants any orders for the purchase or sale of any commodity for future delivery on or subject to the rules of any board of trade" in the first sentence;

(E) by striking out the word "its" each time it occurs in the first sentence and inserting in lieu thereof the word "the"; and

(F) by striking out the words "after notice and hearing as prescribed in this Act" in the last sentence and inserting in lieu thereof the words "pursuant to the provisions of this Act"; and

(2) by amending subsection (2) by inserting the words "or as introducing broker" after the words "futures commission merchant".

REPORTS; BOOKS AND RECORDS

SEC. 11. Section 4g of the Commodity Exchange Act (7 U.S.C. 6g) is amended—

(1) by inserting the words ", introducing broker," after the words "futures commission merchant" in subsection (1); and

(2) by inserting the words ", introducing brokers," after "Floor brokers" in subsection (3).

TECHNICAL AMENDMENTS; MISREPRESENTATION OF STATUS

SEC. 12. Section 4h of the Commodity Exchange Act (7 U.S.C. 6h) is amended—

(1) by striking out everything following the word "person" through and including "(2)";

(2) by striking out the words "futures commission merchant registered" and inserting in lieu thereof the word "registrant";

(3) by striking out the words "such registered futures commission merchant" and inserting in lieu thereof the words "any registrant"; and

(4) by adding the words "representative or" before the word "agent" the second time it occurs.

RECORDKEEPING CONFORMED TO CURRENT SYSTEM

SEC. 13. Section 4i of the Commodity Exchange Act (7 U.S.C. 6i) is amended to read as follows:

"SEC. 4i. It shall be unlawful for any person to make any contract for the purchase or sale of any commodity for future delivery on or subject to the rules of any contract market (1) if such person shall directly or indirectly make such contracts with respect to any commodity, or any future of such commodity, during any one day in an amount equal to or in excess of such amount as shall be fixed from time to time by the Commission, and (2) if such person shall directly or indirectly have or obtain a long or short position in any commodity, or any future of such commodity, equal to or in excess of such amount as shall be fixed from time to time by the Commission, unless such person files or causes to be filed with the properly designated officer of the Commission such reports regarding any transactions or positions within the provisions of clauses (1) and (2) hereof as the Commission may by rule or regulation require and unless, in accordance with rules and regulations of the Commission, such person shall keep books and records of all such transactions and positions and transactions and positions in any such commodity traded on or subject to the rules of any other board of trade, and of cash or spot transactions in, and inventories and purchase and sale commitments of, such commodity. Such books and records shall show complete details concerning all such transactions, positions, inventories, and commitments, including the names and addresses of all persons having any interest therein, and shall be open at all times to inspection by any representatives of the Commission or the United States Department of Justice. For the purposes of this section, the futures and cash or spot transactions and positions of any person shall include such transactions and positions of any persons directly or indirectly controlled by such person.".

REGISTRATION; ASSOCIATED PERSON STATUS

SEC. 14. Section 4k of the Commodity Exchange Act (7 U.S.C. 6k) is amended—

(1) by amending subsection (1) to read as follows:

"(1) It shall be unlawful for any person to be associated with a futures commission merchant or with an introducing broker as a partner, officer, employee, or agent (or any person occupying a similar status or performing similar functions), in any capacity which involves (i) the solicitation or acceptance of customers' orders (other than in a clerical capacity) or (ii) the supervision of any person or persons so engaged, unless such person is registered with the Commission under this Act as an associated person of such futures commission merchant or of such introducing broker and such registration shall not have expired, been suspended (and the period of suspension has not expired), or been revoked, and it shall be unlawful for a futures commission merchant or introducing broker to permit such a person to become or remain associated with him in any such capacity if such futures commission merchant or introducing broker knew or should have known that such person was not so registered or that such registration had expired, been suspended (and the period of suspension has not expired), or been revoked: *Provided*, That any individual who is registered as a floor broker, introducing broker, or futures commission merchant (and such registration is not suspended or revoked) need not also register under these provisions.";

(2) by redesignating subsection (2) as subsection (4);

(3) by inserting a new subsection (2) to read as follows:

"(2) It shall be unlawful for any person to be associated with any commodity pool operator as a partner, officer, employee, consultant, or agent (or any person occupying a similar status or performing similar functions), in any capacity which involves (i) the solicitation of funds, securities, or property for a participation in a commodity pool or (ii) the supervision of any person or persons so engaged, unless such person is registered with the Commission under this Act as an associated person of such commodity pool operator and such registration shall not have expired, been suspended (and the period of suspension has not expired), or been revoked, and it shall be unlawful for any commodity pool operator to permit such a person to become or remain associated with him in any such capacity if such commodity pool operator knew or should have known that such person was not so registered or that such registration had expired, been suspended (and the period of suspension has not expired), or been revoked: *Provided*, That any individual who is registered as a floor broker, introducing broker, futures commission merchant, commodity pool operator, or as an associated person of another category of registrant under this section (and such registration is not suspended or revoked) need not also register under this provision: *Provided further*, That the Commission may exempt any person or class of persons from having to register under this subsection by rule, regulation, or order.";

(4) by amending subsection (3) to read as follows:

"(3) It shall be unlawful for any person to be associated with any commodity trading advisor as a partner, officer, employee, consultant, or agent (or any person occupying a similar status or performing similar functions), in any capacity which involves (i) the solicitation of a client's or prospective client's discretionary account or (ii) the supervision of any person or persons so engaged, unless such person is registered with the Commission under this Act as an associated person of such commodity trading advisor and such registration shall not have expired, been suspended (and the period of suspension has not expired), or been revoked, and it shall be unlawful for any commodity trading advisor to permit such a person to become or remain associated with him in any such capacity if such commodity trading advisor knew or should have known that such person was not so registered or that such registration had expired, been suspended (and the period of suspension has not expired), or been revoked: *Provided*, That any individual who is registered as a floor broker, introducing broker, futures commission merchant, commodity trading advisor, or as an associated person of another category of registrant under this section (and such registration is not suspended or revoked) need not also register under this provision: *Provided further*, That the Commission may exempt any person or class of persons from having to register under this subsection by rule, regulation, or order.";

(5) by amending subsection (4) as so redesignated—

(A) by striking out the words "such" and "other" the first time they occur;

(B) by striking out the words "two years after the effective date thereof or";

(C) by striking out the words ", not less than one year from the date of issuance thereof," and everything after the word "prescribe" down to the period; and

(D) by inserting the words "as an associated person of a futures commission merchant, of an introducing broker, of a commodity pool operator, or of a commodity trading advisor" after the word "registered" the first time it occurs; and

(6) by adding a new subsection (5) to read as follows:

"(5) It shall be unlawful for any registrant to permit a person to become or remain an associated person of such registrant, if the registrant knew or should have known, of facts regarding such associated person that are set forth as statutory disqualifications in section 8a(2) of this Act unless such registrant has notified the Commission of such facts and the Commission has determined that such person should be registered or temporarily licensed.".

CONFORMING AMENDMENT

SEC. 15. Section 4n of the Commodity Exchange Act (7 U.S.C. 6n) is amended by striking out subsections (5) and (6) in their entirety.

EXTENSION OF ANTIFRAUD PROVISION

SEC. 16. Section 4o of the Commodity Exchange Act (7 U.S.C. 6o) is amended—

(1) by striking out the word "or" after the words "commodity trading advisor" each time such words occur and inserting in lieu thereof the words ", associated person of a commodity trading advisor,"; and

(2) by inserting the words ", or associated person of a commodity pool operator" after the words "commodity pool operator" each time such words occur.

EXTENSION OF AUTHORITY REGARDING PROFICIENCY EXAMINATIONS

SEC. 17. Section 4p of the Commodity Exchange Act (7 U.S.C. 6p) is amended—

(1) by striking out the words "futures commission merchants, floor brokers, and those persons associated with futures commission merchants or floor brokers" in the first sentence and inserting in lieu thereof the words "persons registered with the Commission";

(2) by striking out the words "as futures commission merchants, floor brokers, and those persons associated with futures commission merchants or floor brokers" each time they occur;

(3) by striking out the word "the" before the word "customers" and by striking out the words "of futures commission mer-

chants and floor brokers" after the word "customers"; and

(4) by inserting the words ", clients, pool participants or other members of the public with whom such individuals deal" after the word "customers".

CONTRACT MARKET RULES

SEC. 18. Section 5a of the Commodity Exchange Act (7 U.S.C. 7a) is amended—

(1) by amending paragraph (8) to read as follows:

"(8) enforce all bylaws, rules, regulations, and resolutions, made or issued by it or by the governing board thereof or any committee, which (i) have been approved by the Commission pursuant to paragraph (12) of this section, (ii) have become effective under such paragraph, or (iii) must be enforced pursuant to any Commission rule, regulation, or order; and revoke and not enforce any bylaw, rule, regulation, or resolution, made, issued, or proposed by it or by the governing board thereof or any committee, which has been disapproved by the Commission;";

(2) by amending paragraph (11)—

(A) by striking out the comma before clause (ii) and by striking out clause (ii) in its entirety and clause (iii) down to the comma;

(B) by redesignating clause (iv) as clause (ii);

(C) by striking out the word "subsection" and inserting in lieu thereof the word "paragraph"; and

(D) by striking out the words "a futures commission merchant or a floor broker" and inserting in lieu thereof the words "another member of the contract market"; and

(3) by amending paragraph (12) to read as follows:

"(12) except as otherwise provided in this paragraph, submit to the Commission for its prior approval all bylaws, rules, regulations, and resolutions ('rules') made or issued by such contract market, or by the governing board thereof or any committee thereof, which relate to terms and conditions in contracts of sale to be executed on or subject to the rules of such contract market, as such terms and conditions are defined by the Commission by rule or regulation, except those rules relating to the setting of levels of margin. Each contract market shall submit to the Commission all other rules (except those relating to the setting of levels of margin) and may put such rules into effect ten days after receipt by the Commission of such submission, unless, within the ten-day period, the contract market requests review and approval thereof by the Commission or the Commission notifies such contract market in writing of its determination to review such rules for approval. The determination to review such rules for approval shall not be delegable to any employee of the Commission. At least thirty days before approving any rules of major economic significance, as determined by the Commission, the Commission shall publish in the Federal Register a notice of such rules. The Commission shall give interested persons an opportunity to participate in the approval process through the submission of written data, views, or arguments. The determination by the Commission whether any such rules are of major economic significance shall be final and not subject to judicial review. The Commission shall approve such rules if such rules are determined by the Commission not to be in violation of this Act or the regulations of the Commission, and the Commission shall disapprove, after appropriate notice and opportunity for hearing, any such rule which the Commission determines at any time to be in violation of the provisions of this Act or the regulations of the Commission. If the Commission institutes proceedings to determine whether a rule should be disapproved pursuant to this paragraph, it shall provide the contract market with written notice of the proposed grounds for disapproval, including the specific section or sections of this Act or the Commission's regulations which would be violated. At the conclusion of such proceedings, the Commission shall approve or disapprove such rule. Any disapproval shall specify the sections of this Act or the Commission's regulations which the Commission determines such rule has violated or, if effective, would violate. If the Commission does not approve or institute disapproval proceedings with respect to any rule within one hundred-eighty days after receipt or within such longer period as the contract market may agree to, or if the Commission does not conclude a disapproval proceeding with respect to any rule within one year after receipt or within such longer period as the contract market may agree to, such rule may be put into effect by the contract market until such time as the Commission disapproves such rule in accordance with this paragraph. The Commission shall specify the terms and conditions under which a contract market may, in an emergency as defined by the Commission, put a rule into effect on a temporary basis without prior Commission approval, or without compliance with the ten-day notice requirement under this paragraph, or during any period of review by the Commission. In the event of such an emergency, as defined by the Commission, requiring immediate action, the contract market by a two-thirds vote of its governing board may immediately put such a temporary rule into effect dealing with such emergency if the contract market notifies the Commission of such action with a complete explanation of the emergency involved.".

CONTRACT MARKET DESIGNATION PROCEDURES

SEC. 19. Section 6 of the Commodity Exchange Act (7 U.S.C. 8) is amended by inserting immediately after the first sentence the following: "The Commission shall approve or deny an application for designation as a contract market within one year of the filing of the application. If the Commission notifies the board of trade that its application is materially incomplete and specifies the deficiencies in the application, the running of the one-year period shall be stayed from the time of such notification until the application is resubmitted in completed form. If the Commission denies an application, it shall specify the grounds for the denial.".

APPEALS; CONFORMING AMENDMENT

SEC. 20. Section 6(b) of the Commodity Exchange Act (7 U.S.C. 9) is amended—

(1) by striking out the words "as futures commission merchant or any person associated therewith as described in section 4k of this Act, commodity trading advisor, commodity pool operator, or as floor broker" and inserting in lieu thereof the words "with the Commission in any capacity" in the first and ninth sentences; and

(2) by inserting after the words "doing business" in the eleventh sentence the words ", or in the case of an order denying registration, the circuit in which the petitioner's principal place of business listed on petitioner's application for registration is located,".

RESTRAINING ORDERS, INJUNCTIONS, WRITS OF MANDAMUS

SEC. 21. Section 6c of the Commodity Exchange Act (7 U.S.C. 13a-1) is amended by inserting after the words "restraining order" in the first proviso the following: "(other than a restraining order which prohibits any person from destroying, altering or disposing of, or refusing to permit authorized representatives of the Commission to inspect, when and as requested, any books and records or other documents or which prohibits any person from withdrawing, transferring, removing, dissipating, or disposing of any funds, assets, or other property)".

CONFIDENTIALITY PROVISIONS; DISCLOSURE

SEC. 22. Section 8 of the Commodity Exchange Act (7 U.S.C. 12) is amended—

(1) by striking out the word *"Provided"* in subsection (a) and all that follows through the words "names of customers" and inserting in lieu thereof the following: *"Provided,* That except as otherwise specifically authorized in this Act, the Commission may not (1) disclose any records containing or based on (i) confidential information, or (ii) proprietary information that would not customarily be disclosed to the public by the persons from whom it was obtained, except that the Commission may disclose such confidential or proprietary information if disclosure is necessary to obtain public comment, or (2) publish data and information that would separately disclose the business transactions or market positions of any person and trade secrets or names of customers or data and information concerning or obtained in connection with any investigation of any person";

(2) by amending subsection (b)—

(A) by inserting the words "concerning or obtained in connection with any investigation of any person or" after the "information";

(B) by striking out the word "or" before the words "in an administrative or judicial proceedings"; and

(C) by inserting after the word "Act" the words ", in any receivership proceeding involving a receiver appointed in a judicial proceeding brought under this Act, or in any bankruptcy proceeding in which the Commission has intervened or in which the Commission has the right to appear and be heard under the Bankruptcy Code";

(3) by amending subsection (e)—

(A) by striking out the words "of the Executive Branch"; and

(B) inserting the following at the end thereof: "Upon the request of any department or agency of any State or any political subdivision thereof, acting within the scope of its jurisdiction, or any department or agency of any foreign government or any policical subdivision thereof, acting within the scope of its jurisdiction, the Commission may furnish to such department or agency any information in the possession of the Commission obtained in connection with the administration of this Act. Any information furnished to any department or agency of any State or political subdivision thereof shall not be disclosed by such department or agency except in connection with an adjudicatory action or proceeding brought under this Act or the laws of such State or political subdivision to which such State or political subdivision or any department or agency thereof is a party. The Commission shall not furnish any information to a department or agency of a foreign government or political subdivision thereof unless the Com-

mission is satisfied that the information will not be disclosed by such department or agency except in connection with an adjudicatory action or proceeding brought under the laws of such foreign government or political subdivision to which such foreign government or political subdivision or any department or agency thereof is a party.";

(4) by redesignating subsections (f) and (g) as subsections (h) and (i), respectively; and

(5) by adding new subsections (f) and (g) to read as follows:

"(f) The Commission shall provide any registration information maintained by the Commission on any registrant upon reasonable request made by any department or agency of any State or any political subdivision thereof. Whenever the Commission determines that such information may be appropriate for use by any department or agency of a State or political subdivision thereof, the Commission shall provide such information without request.

"(g) The Commission shall disclose information in its possession pursuant to a subpena or summons only if—

"(1) a copy of the subpena, or summons has been mailed to the last known home or business address of the person who submitted the information that is the subject of the subpena or summons, if the address is known to the Commission and

"(2) fourteen days have expired from the date of such mailing of the subpena or summons.".

STATUTORY DISQUALIFICATION FROM REGISTRATION; DELEGATION OF REGISTRATION FUNCTIONS

SEC. 23. Section 8a of the Commodity Exchange Act (7 U.S.C. 12a) is amended—

(1) by amending paragraph (1) to read as follows:

"(1) to register futures commission merchants, associated persons of futures commission merchants, introducing brokers, associated persons of introducing brokers, commodity trading advisors, associated persons of commodity trading advisors, commodity pool operators, associated persons of commodity pool operators, and floor brokers upon application in accordance with rules and regulations and in the form and manner to be prescribed by the Commission, which may require the applicant, and such persons associated with the applicant as the Commission may specify, to be fingerprinted and to submit, or cause to be submitted, such fingerprints to the Attorney General for identification and appropriate processing, and in connection therewith to fix and establish from time to time reasonable fees and charges for registrations and renewals thereof. Notwithstanding any other provision of this Act, the Commission may grant a temporary license to any applicant for registration with the Commission pursuant to such rules, regulations, or orders as the Commission may adopt, except that the term of any such temporary license shall not exceed six months from the date of its issuance; and";

(2) by amending paragraph (2) to read as follows:

"(2) upon notice, but without a hearing and pursuant to such rules, regulations, or orders as the Commission may adopt, to refuse to register, to register conditionally, to suspend, or to place restrictions upon the registration of, any person and with such a hearing as may be appropriate to revoke the registration of any person—

"(A) if a prior registration of such person in any capacity has been suspended (and the period of such suspension has not expired) or has been revoked;

"(B) if registration of such person in any capacity has been refused under the provisions of paragraph (3) of this section within five years preceding the filing of the application for registration or at any time thereafter;

"(C) if such person is permanently or temporarily enjoined by order, judgment, or decree of any court of competent jurisdiction (except that registration may not be revoked solely on the basis of such temporary order, judgment, or decree), including an order entered pursuant to an agreement of settlement to which the Commission or any Federal or State agency or other governmental body is a party, from (i) acting as a futures commission merchant, introducing broker, floor broker, commodity trading advisor, commodity pool operator, associated person of any registrant under this Act, securities broker, securities dealer, municipal securities broker, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company, or affiliated person or employee of any of the foregoing; or (ii) engaging in or continuing any activity involving any transaction in or advice concerning contracts of sale of a commodity for future delivery, or concerning activity subject to Commission regulation under section 4c or 19 of this Act or concerning securities;

"(D) if such person has been convicted within ten years preceding the filing of any application for registration or at any time thereafter of any felony which (i) involves any transactions or advice concerning any contract of sale of a commodity for future delivery, or any activity subject to Commission regulation under section 4c or 19 of this Act, or concerning a security; or (ii) arises out of the conduct of the business of a futures commission merchant, introducing broker, floor broker, commodity trading advisor, commodity pool operator, associated person of any registrant under this Act, securities broker, securities dealer, municipal securities broker, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company, or an affiliated person or employee of any of the foregoing; or (iii) involves embezzlement, theft, extortion, fraud, fraudulent conversion, misappropriation of funds, securities or property, forgery, counterfeiting, false pretenses, bribery, or gambling; or (iv) involves the violation of section 152, 1341, 1342, or 1343, or chapter 25, 47, 95, or 96 of title 18, United States Code;

"(E) if such person, within ten years preceding the filing of the application or at any time thereafter, has been found by any court of competent jurisdiction, by the Commission or any Federal or State agency or other governmental body, or by agreement of settlement to which the Commission or any Federal or State agency or other governmental body is a party, (i) to have violated any provision of this Act, the Securities Act of 1933, the Securities Exchange Act of 1934, the Public Utility Holding Company Act of 1935, the Trust Indenture Act of 1939, the Investment Advisers Act of 1940, the Investment Company Act of 1940, the Securities Investors Protection Act of 1970, the Foreign Corrupt Practices Act of 1977, or any similar statute of a State or foreign jurisdiction, or any rule, regulation, or order under any such statutes, or the rules of the Municipal Securities Rulemaking Board where such violation involves embezzlement, theft, extortion, fraud, fraudulent conversion, misappropriation of funds, securities or property, forgery, counterfeiting, false pretenses, bribery, or gambling; or (ii) to have willfully aided, abetted, counseled, commanded, induced, or procured such violation by any other person;

"(F) if such person is subject to an outstanding order of the Commission denying trading privileges on any contract market to such person, denying, suspending, or revoking such person's membership in any contract market or registered futures association, or barring or suspending such person from being associated with a registrant under this Act or with a member of a contract market or with a member of a registered futures association;

"(G) if, as to any of the matters set forth in subparagraphs (A) through (F) of this paragraph, such person willfully made any material false or misleading statement or omitted to state any material fact in such person's application; or

"(H) if refusal, suspension, or revocation of the registration of any principal of such person would be warranted because of a statutory disqualification listed in this paragraph: *Provided,* That for the purposes of paragraphs (2) and (3) of this section, principal shall mean, if the person is a partnership, any general partner or, if the person is a corporation, any officer, director, or beneficial owner of at least 10 per centum of the voting shares of the corporation, and any other person that the Commission by rule, regulation, or order determines has the power, directly or indirectly, through agreement or otherwise, to exercise a controlling influence over the activities of such person which are subject to regulation by the Commission:

Provided, That such person may appeal from a decision to refuse registration, condition registration, suspend, revoke, or place restrictions upon registration made pursuant to the provisions of this paragraph in the manner provided in paragraph (b) of section 6 of this Act; and";

(3) by striking out paragraph (4) and redesignating paragraph (3) as paragraph (4);

(4) by inserting a new paragraph (3) to read as follows:

"(3) to refuse to register or to register conditionally any person, if it is found, after opportunity for hearing, that—

"(A) such person has been found by the Commission or by any court of competent jurisdiction to have violated or has consented to findings of a violation of any provision of this Act, or any rule, regulation, or order thereunder (other than a violation set forth in paragraph (2) of this section), or to have willfully aided, abetted, counseled, commanded, induced, or procured the violation by any other person of any such provision;

"(B) such person has been found by any court of competent jurisdiction or by any Federal or State agency or other governmental body, or by agreement of settlement to which any Federal or State agency or other governmental body is a party, (i) to have violated any provision of the Securities Act of 1933, the Securities Exchange Act of 1934, the Public Utility Holding Company Act of 1935, the Trust Indenture Act of 1939, the Investment Advisers Act of 1940, the Investment Company Act of 1940, the Securities Investors Protection Act of 1970, the Foreign Corrupt Practices Act of 1977, or any similar statute of a State or foreign jurisdiction, or any rule, regulation, or order under any such statutes, or the rules of the Municipal Securities Rulemaking Board; or (ii) to have willfully aided, abetted, coun-

seled, commanded, induced, or procured such violation by any other person;

"(C) such person failed reasonably to supervise another person, who is subject to such person's supervision, with a view to preventing violations of this Act, or of any of the statutes set forth in subparagraph (B) of this paragraph, or of any of the rules, regulations, or orders thereunder, and the person subject to supervision committed such a violation: *Provided*, That no person shall be deemed to have failed reasonably to supervise another person within the meaning of this paragraph if (i) there have been established procedures and a system for applying such procedures which would reasonably be expected to prevent and detect, insofar as practicable, any such violation by such other person, and (ii) such person has reasonably discharged the duties and obligations incumbent upon that person, as supervisor, by reason of such procedures and system, without reasonable cause to believe that such procedures and system were not being complied with;

"(D) such person was convicted of a felony other than a felony of the type specified in paragraph (2)(D) of this section within ten years preceding the filing of the application or at any time thereafter, or was convicted of a felony, including a felony of the type specified in paragraph (2)(D) of this section, more than ten years preceding the filing of the application;

"(E) such person was convicted within ten years preceding the filing of any application for registration or at any time thereafter of any misdemeanor which (i) involves any transactions or advice concerning any contract of sale of a commodity for future delivery or any activity subject to Commission regulation under section 4c or 19 of this Act or concerning a security; or (ii) arises out of the conduct of the business of a futures commission merchant, introducing broker, floor broker, commodity trading advisor, commodity pool operator, associated person of any registrant under this Act, securities broker, securities dealer, municipal securities broker, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company, or an affiliated person or employee of any of the foregoing; or (iii) involves embezzlement, theft, extortion, fraud, fraudulent conversion, misappropriation of funds, securities or property, forgery, counterfeiting, false pretenses, bribery, or gambling; or (iv) involves the violation of section 152, 1341, 1342, or 1343 or chapter 25, 47, 95, or 96 of title 18, United States Code;

"(F) such person was debarred by any agency of the United States from contracting with the United States;

"(G) such person willfully made any material false or misleading statement or willfully omitted to state any material fact in such person's application or in any report required to be filed with the Commission by this Act or the regulations thereunder, or in any proceeding before the Commission;

"(H) such person has pleaded nolo contendere to criminal charges of felonious conduct, or has been convicted in a State court or in a foreign court of conduct which would constitute a felony under Federal law if the offense had been committed under Federal jurisdiction.

"(I) in the case of an applicant for registration in any capacity for which there are minimum financial requirements prescribed under this Act or under the rules or regulations of the Commission, such person has not established that such person meets such minimum financial requirements;

"(J) such person is subject to an outstanding order denying, suspending, or expelling such person from membership in a contract market, a registered futures association, or any other self-regulatory organization, or barring or suspending such person from being associated with any member or members of such contract market, association, or self-regulatory organization;

"(K) such person has been found by any court of competent jurisdiction or by any Federal or State agency or other governmental body, or by agreement of settlement to which any Federal or State agency or other governmental body is a party, (i) to have violated any statute or any rule, regulation, or order thereunder which involves embezzlement, theft, extortion, fraud, fraudulent conversion, misappropriation of funds, securities or property, forgery, counterfeiting, false pretenses, bribery, or gambling, or (ii) to have willfully aided, abetted, counseled, commanded, induced, or procured such violation by any other person;

"(L) such person has associated with such person any other person and knows, or in the exercise of reasonable care should know, of facts regarding such other person that are set forth as statutory disqualifications in paragraph (2) of this section unless such person has notified the Commission of such facts and the Commission has determined that such other person should be registered or temporarily licensed;

"(M) there is other good cause; or

"(N) any principal, as defined in paragraph (2) of this section, of such person has been or could be refused registration: *Provided*, That pending final determination under this paragraph, registration shall not be granted: *Provided further*, That such person may appeal from a decision to refuse registration or to condition registration made pursuant to the provisions of this paragraph in the manner provided in paragraph (b) of section 6 of this Act; and";

(5) by amending paragraph (4), as so redesignated—

(A) by striking out the word "or" before the word "revoke" the first time it occurs and inserting in lieu thereof a comma;

(B) by inserting the words ", or place restrictions upon" after the word "revoke" the first time it occurs;

(C) by striking out the words "subparagraph (2) (B) or (C)" and inserting in lieu thereof the words "paragraph (3) of this section";

(D) by inserting the words "or of any introducing broker" after the words "futures commission merchant"; and

(E) by adding the following proviso before the semicolon at the end thereof: ": *Provided*, That such person may appeal from a decision to suspend, revoke, or place restrictions upon registration made pursuant to the provisions of this paragraph in the manner provided in paragraph (b) of section 6 of this Act";

(6) by adding a new paragraph (10) to read as follows:

"(10) to authorize any person to perform any portion of the registration functions under this Act, in accordance with rules approved by the Commission, and subject to the provisions of this Act applicable to registrations granted by the Commission.".

JUDICIAL REVIEW OF COMMISSION'S ACTIONS WITH RESPECT TO MARKET EMERGENCIES

SEC. 24. Paragraph (9) of section 8a of the Commodity Exchange Act (7 U.S.C. 12a(9)) is amended to read as follows:

"(9) to direct the contract market whenever it has reason to believe that an emergency exists to take such action, including the setting of temporary emergency levels of margin, as, in the Commission's judgment, is necessary to maintain or restore orderly trading in, or liquidation of, any futures contract. The term 'emergency' as used herein shall mean, in addition to threatened or actual market manipulations and corners, any act of the United States or a foreign government affecting a commodity or any other major market disturbance which prevents the market from accurately reflecting the forces of supply and demand for such commodity. Any action taken by the Commission under this paragraph shall be subject to review only in the United States court of appeals for the circuit in which the party seeking review resides or has its principal place of business, or in the United States Court of Appeals for the District of Columbia Circuit. Such review shall be based upon an examination of all of the information before the Commission at the time the determination was made. The court reviewing the Commission's action shall not enter a stay or order of mandamus unless it has determined, after notice and hearing before a panel of the court, that the action complained of was arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law. Nothing herein shall be deemed to limit the meaning or interpretation given by a contract market to the terms 'market emergency', 'emergency', or equivalent language in its own bylaws, rules, regulations, or resolutions; and".

CERTAIN PROHIBITED TRANSACTIONS

SEC. 25. Section 9 of the Commodity Exchange Act (7 U.S.C. 13) is amended—

(1) by amending subsection (a)—

(A) by striking out the words "futures commission merchant" and inserting in lieu thereof "person registered or required to be registered under this Act";

(B) by striking out the words "by such commission merchant" and inserting in lieu thereof "by such person or any employee or agent thereof";

(C) by striking out the words "of such commission merchant"; and

(D) by inserting the words "or which otherwise was received from any customer, client, or pool participant in connection with the business of such person" after the word "contracts" the second time it occurs;

(2) by amending subsection (d)—

(A) by inserting after the words "'decline guaranty'," the following: "or any transaction for the delivery of any commodity under a standardized contract commonly known to the trade as a margin account, margin contract, leverage account, or leverage contract, or under any contract, account, arrangement, scheme, or device that the Commission determines serves the same function or functions as such a standardized contract, or is marketed or managed in substantially the same manner as such as standardized contract,"; and

(B) by inserting the following before the period at the end of the first sentence: ", nor to any transaction entered into by the trustee of a trust established by such person over which such person exercises no control if such transaction is entered into solely to hedge against adverse price changes in connection with such farming or ranching operations or is a transaction for the lease of oil or gas or other mineral rights or interests owned by such person: *Provided further*, That such prohibition against any invest-

ment transaction in an actual commodity shall not apply to a transaction in which such person buys or sells, directly or indirectly (except by means of an instrument regulated by the Commission), a United States Government security, a certificate of deposit, or similar financial instrument if no nonpublic information is used by such person in such transaction"; and

(3) by inserting after the words "decline guaranty" each time they occur in subsection (e) the following: ", or in any transaction for the delivery of any commodity under a standardized contract commonly known to the trade as a margin account, margin contract, leverage account, or leverage contract, or under any contract, account, arrangement, scheme, or device that the Commission determines serves the same function or functions as a standardized contract, or is marketed or managed in substantially the same manner as such a standardized contract".

REAUTHORIZATION; OFF-EXCHANGE JURISDICTION

SEC. 26. Section 12 of the Commodity Exchange Act (7 U.S.C. 16) is amended—

(1) by striking out "1982" and inserting in lieu thereof "1984" in subsection (d); and

(2) by adding a new subsection (e) to read as follows:

"(e) Nothing in this Act shall supersede or preempt: (1) criminal prosecution under any Federal criminal statute; (2) any Federal or State statute, including any rule or regulation thereunder, that is applicable to any transaction in or involving any commodity, product, right, service, or interest which is not conducted on or subject to the rules of a contract market or (except as otherwise specified by the Commission by rule or regulation) any board of trade, exchange, or market located outside the United States, its territories or possessions, or which is not subject to regulation by the Commission under section 4c or 19 of this Act; (3) the application of any Federal or State statute, including any rule or regulation thereunder, to any person required to be registered or designated under this Act who shall fail or refuse to obtain such registration or designation. The Commission is authorized to refer any transaction or matter subject to such other Federal or State statutes to any department or agency administering such statutes for such investigation, action, or proceedings as the department or agency shall deem appropriate.".

SECONDARY LIABILITY

SEC. 27. Section 13 of the Commodity Exchange Act (7 U.S.C. 13c) is amended—

(1) by striking out the words "in administrative proceedings under this Act" in subsection (a);

(2) by redesignating existing subsection (b) as subsection (c); and

(3) by adding a new subsection (b) to read as follows:

"(b) Any person who, directly or indirectly, controls any person who has violated any provision of this Act or any of the rules, regulations, or orders issued pursuant thereto may be held liable for such violation in any action brought by the Commission to the same extent as such controlled person if the controlling person did not act in good faith and directly or indirectly induced the act or acts constituting the violation. In proving a violation of this subsection, the Commission shall bear the burden of showing that the controlling person did not act in good faith and directly or indirectly induced the act or acts constituting the violation.".

REPARATIONS PROCEDURE

SEC. 28. Section 14 of the Commodity Exchange Act (7 U.S.C. 18) is amended—

(1) by striking out existing subsections (b), (c), and (e);

(2) by redesignating subsections (d), (f), (g), (h), and (i) as subsections (c), (d), (e), (f), and (g), respectively;

(3) by amending subsection (a)—

(A) by striking out the words "or required to be registered under section 4d, 4e, 4k, or 4m of" and inserting in lieu thereof the word "under"; and

(B) by striking out everything after the words "to the Commission" and inserting in lieu thereof the words "for an order awarding actual damages proximately caused by such violation.";

(4) by adding a new subsection (b) to read as follows:

"(b) The Commission may promulgate such rules, regulations, and orders as it deems necessary or appropriate for the efficient and expedit ous administration of this section. Notwithstanding any other provision of law, such rules, regulations, and orders may prescribe, or otherwise condition, without limitation, the form, filing, and service of pleadings or orders; the nature and scope of discovery, counterclaims, motion practice (including the grounds for dismissal of any claim or counterclaim), hearings (including the waiver thereof, which may relate to the amount in controversy), rights of appeal, if any, and all other matters governing proceedings before the Commission under this section.";

(5) by striking out "(g)" in subsection (d), as so redesignated, and inserting in lieu thereof "(e)"; and

(6) by amending subsection (f), as so redesignated, to read as follows:

"(f) Unless the party against whom a reparation order has been issued shows to the satisfaction of the Commission within fifteen days from the expiration of the period allowed for compliance with such order that either an appeal as here-in authorized has been taken or payment of the full amount of the order (or any agreed settlement thereof) has been made, such party shall be prohibited automatically from trading on all contract markets and, if the party is registered with the Commission, such registration shall be suspended automatically at the expiration of such fifteen day period until such party shows to the satisfaction of the Commission that payment of such amount with interest thereon to date of payment has been made: *Provided,* That if on appeal the appellee prevails or if the appeal is dismissed the automatic prohibition against trading and suspension of registration shall become effective at the expiration of thirty days from the date of judgment on the appeal, but if the judgment is stayed by a court of competent jurisdiction the suspension shall become effective ten days after the expiration of such stay, unless prior thereto the judgment of the court has been satisfied.".

TECHNICAL AMENDMENT

SEC. 29. Section 16 of the Commodity Exchange Act (7 U.S.C. 20) is amended by inserting the words "or market positions" after the word "transactions" in subsection (d).

SEC. 30. Section 17 of the Commodity Exchange Act (7 U.S.C. 21) is amended—

(1) by amending subsection (b)(4)(E) by inserting before the period at the end thereof the following: ", which may require the applicant to be fingerprinted and to submit, or cause to be submitted, such fingerprints to the Attorney General for identification and appropriate processing. Notwithstanding any other provision of law, such association may receive from the Attorney General all the results of such identification and processing";

(2) by amending paragraph (10) of subsection (b)—

(A) by striking out the words "a customer's" and inserting in lieu thereof "customers' ";

(B) by striking out the comma before clause (ii) and by striking out clause (ii) in its entirety and clause (iii) down to the comma;

(C) by redesignating clause (iv) as clause (ii); and

(D) by striking out the words "a futures commission merchant or a floor broker" and inserting in lieu thereof the words "another member of the association";

(3) by striking out "(k)" in subsection (h) and inserting in lieu thereof "(i)"; and

(4) by striking out the last sentence in subsection (j) and inserting in lieu thereof the following: "A registered futures association shall submit to the Commission any change in or addition to its rules and may put such rules into effect ten days after receipt by the Commission of such submission, unless, within the ten-day period, the registered futures association requests review and approval thereof by the Commission or the Commission notifies such registered futures association in writing of its determination to review such rules for approval. The Commission shall approve such rules within thirty days of their receipt if Commission approval is requested hereunder or within thirty days after the Commission determines to review for approval any other rules, unless the Commission notifies the registered futures association of its inability to complete such approval or review within such period of time. The Commission shall approve such rules if such rules are determined by the Commission to be consistent with the requirements of this section and not otherwise in violation of this Act or the regulations of the Commission and the Commission shall disapprove, after appropriate notice and opportunity for hearing, any such rule which the Commission determines at any time to be inconsistent with the requirements of this section or in violation of the provisions of the Act or the regulations of the Commission.".

TRANSACTION FEE STUDY

SEC. 31. (a) Not later than January 1, 1984, the Commodity Futures Trading Commission shall (1) conduct a study of the effect of imposing fees on the purchase and sale of futures contracts, commodity options, and leverage transactions subject to the Commodity Exchange Act to offest the cost of regulating transactions under the jurisdiction of the Commission and (2) submit to the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture a detailed report on the results of the study, including any recommendations for legislation.

(b) The study provided for in subsection (a) shall include, but not be limited to, consideration of the effect of a transaction fee on market liquidity, determination of the portions of the Commission's budget benefiting the public and market participants of the Nation's commodity markets, and consideration of the incidence of such a fee, including the impact on producers, processors, manufacturers, and other hedgers.

Mr. BAKER. Mr. President, I suggest the absence of a quorum, with the time to be charged equally to both sides.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. HELMS. Is the pending business S. 2109?

The PRESIDING OFFICER. The Senator is correct.

Mr. HELMS. I thank the Chair.

Mr. President, before us is a very significant piece of legislation, S. 2109, the Futures Trading Act of 1982, which would extend the Commodity Exchange Act for 2 years and make a number of improvements in that act. Before discussing the provisions of the legislation, however, let me emphasize my gratitude to the distinguished Senator from Indiana (Mr. LUGAR) and commend him for the remarkable skill he exhibited and the hard work he performed in bringing this piece of legislation to the Senate.

Mr. President, Senator LUGAR is chairman of the Subcommittee on Agricultural Research and General Legislation. He held 5 days of hearings during which he and his fellow members of the subcommittee collected the thoughts and suggestions of many witnesses as to the specific provisions to be incorporated in the bill. Senator LUGAR also conducted 2 days of subcommittee markup on the bill, painstakingly working through each provision and forging a consensus from the divergent opinions of the subcommittee members. In all candor, Mr. President, I think it is uncontestable that Senator LUGAR is more knowledgeable about the provisions of this bill than any other Senator, including this one. I know that we will all benefit from his remarks should questions as to specific provisions be raised by any Senator. I genuinely appreciate the leadership role Senator LUGAR has taken and I am deeply grateful for his work.

I commend Senator BOREN for his contributions to the bill. As the ranking member on the subcommittee, Senator BOREN worked diligently with Senator LUGAR to forge a piece of legislation of which our committee and the Senate can be justifiably proud. I express my gratitude to him.

I should also like to recognize the very real contributions made by this committee's ranking minority member, the able and distinguished Senator from Kentucky (Mr. HUDDLESTON). As a member of the Subcommittee on Agricultural Research and General Legislation, Senator HUDDLESTON offered his advice and counsel on the provisions contained in S. 2109 and helped in a very material way to form the structure of the bill before us here today.

I very much appreciate, as always, the contribution Senator HUDDLESTON has made at both the subcommittee and full committee levels.

And last but not least, Mr. President, I commend Senator ROTH and Senator RUDMAN for their efforts in the examination of the fraudulent operation of "off-exchange boiler rooms" and the Federal-State relationships incident to the enforcement of the Commodity Exchange Act. They were very helpful to the members of our committee during the course of the markup of the Futures Trading Act of 1982. This is clearly evidenced by the provisions suggested by these Senators which were incorporated in the pending legislation, S. 2109.

Mr. President, the Futures Trading Act of 1982 renews the funding authorization for the Commodity Exchange Act and the Commodity Futures Trading Commission for 2 years—through September 30, 1984. Prior to 1974 the act did not contain a sunset provision. That provision, however, has afforded Congress an opportunity to reexamine and evaluate the provisions of the Commodity Exchange Act and the Commission's performance in 1978 and again in 1982.

The 1982 reauthorization is particularly timely in that it affords Congress an opportunity to revisit this area in light of the dramatic changes the futures industry which have taken place since 1978. For example, 38 new futures contracts—ranging from gasoline and lumber to Treasury bills and Eurodollars—have been designated since the Commission's last reauthorization. In 1978, 53.2 million futures contracts were traded. By 1981, however, this figure had grown to 101.1 million contracts.

Similarly, the trading of futures contracts in agricultural commodities grew from 35.1 million contracts in 1978 to 54.5 million contracts in 1981. The popularity of futures contracts in financial instruments was clearly evident, as growth in the trading of these contracts outstripped all others, expanding from 1.6 million contracts in 1978 to 20.1 million contracts in 1981. The trading of futures contracts in foreign currencies was also very popular, as trading grew from 1.3 million contracts in 1978 to 5.4 million contracts in 1981.

This surge in trading has been accompanied by increased use of futures markets by financial institutions and businesses to shift price risk in a manner comparable to the more traditional use of those markets by farmers and others involved in the marketing of grain and other agricultural products. The general public has also become increasingly active in the futures markets—not only as individual customers, but also through participation in professionally managed commodity pools and accounts. Not surprisingly, there has been a corresponding increase—to nearly 52,000 individuals and firms—in the number of persons registered with the Commission, and in the average amount of customers' funds held in segregation to margin, guarantee or secure futures trades—from approximately $5 million in 1979 to approximately $8 million in 1981.

Mr. President, I am pleased that the bill includes a provision I offered as an amendment in the subcommittee to remove the complete ban on the trading of agricultural options. I see no reason to treat agricultural options differently than options on other commodities and the bill would permit that result.

S. 2109, as amended by the Committee on Agriculture, Nutrition, and Forestry, is a carefully crafted bill that will streamline the operations of the Commodity Futures Trading Commission and provide it with the tools needed to carry out its responsibility in an effective manner. The bill seeks to accommodate the divergent interests of many persons. I believe the bill is a balanced bill and I hope the Senate will approve it.

The bill makes a number of significant changes in the Commodity Exchange Act that I would like to highlight for the benefit of the Senate.

CFTC-SEC JURISDICTIONAL AGREEMENT

Several of the provisions of the Futures Trading Act of 1982 codify a jurisdictional agreement between the Commodity Futures Trading Commission and the Securities and Exchange Commission. These provisions should end the jurisdictional ambiguity between the CFTC and SEC which has hampered the development of new financial instruments. I commend Chairman Johnson of the CFTC and Chairman Shad of the SEC for their efforts in working out this accord. The Futures Trading Act of 1982 codifies the CFTC's portion of this agreement, just as that agreement was formulated by these agencies.

In broad outline, the bill leaves the CFTC with exclusive regulatory responsibility for all futures trading and for all trading in options on futures contracts. The SEC would continue to be responsible for the regulation of options based on individual stocks. In addition, the SEC will regulate all options directly on exempted securities, such as debt instruments issued or guaranteed by the U.S. Government, for example, Ginnie Mae certificates, and options on certificates of deposit. The trading of options on foreign cur-

rencies will be regulated by both agencies; the SEC will regulate these options when they are traded on a national securities exchange, the CFTC will regulate them when they are traded other than on a national securities exchange.

The bill makes explicit that the CFTC's exclusive jurisdiction over commodity pools does not abrogate the applicability of certain aspects of the Federal securities laws to securities issued by commodity pools and sold to the general public. The bill also prohibits the designation of futures contracts based on individual corporate or municipal securities, reserving for further study on the part of the CFTC and SEC the issue of the appropriate jurisdictional framework for futures contracts and options on futures contracts based on these securities.

The Futures Trading Act of 1982 also resolves differences between the CFTC and SEC with respect to stock index futures. Traditionally, the SEC has expressed concern that trading in such a futures contract could have an adverse impact upon the Nation's equity markets as well as upon the SEC's ability to insure manipulation-free securities trading. This concern is reflected in the bill in the structure for considering designation applications for stock index futures contracts. The bill preserves the CFTC's exclusive jurisdiction over the decision of whether to permit such a futures contract to be traded, but at the same time insures that any concerns expressed by the SEC will be considered carefully.

In designating futures contracts based on stock indices (or options on such contracts), the CFTC must find that each such contract (or option on such contract) meets the following criteria:

First, settlement of the contracts must be made in cash or by means other than the delivery, transfer, or receipt of a security. Exempted securities, however, may be delivered, transferred, or received in settlement of the contracts.

Second, the contracts may not be readily susceptible to price manipulation nor to causing or being used in the manipulation of the prices of the securities making up the underlying stock index.

Third, the stock index upon which the futures or option contract is based must be constructed from a broad group of securities.

These criteria are intended to provide adequate flexibility for the market to respond to the needs of participants, while assuring that only broad-based securities index futures contracts that the Commission finds are not readily susceptible to manipulation are authorized.

The bill requires that the CFTC give the public an opportunity to comment on whether a proposed stock index futures contract or option thereon meet the criteria just mentioned. The bill also requires the CFTC to consult with the SEC prior to designating the trading of such futures or options contract. If the SEC objects to the designation of a particular stock index futures or option contract on the ground that the above criteria are not satisfied, it may seek an oral hearing before the CFTC. If the CFTC designates a contract for trading over the objections of the SEC, the SEC has the right to seek judicial review of the CFTC's decision under the provisions of section 6(b) of the Commodity Exchange Act. If a hearing is held in connection with disapproval proceedings of a stock index futures or options contract application, the SEC will be permitted to participate in the hearing as an interested party.

I believe that the division of regulatory responsibility set forth in the Futures Trading Act of 1982 will benefit both the futures and securities industries, as well as the trading public. Ultimately, the forces of the marketplace will determine which new instruments will succeed in providing useful economic benefits to the financial institutions that have been both using and waiting for the development of new trading tools to limit risk and provide greater certainty in financial management.

The Committee on Agriculture, Nutrition, and Forestry endorsed the provisions of the CFTC-SEC jurisdictional agreement, and I believe that the Congress should enact the legislative proposals to carry it out in its entirety.

USER FEE STUDY—PERIOD OF REAUTHORIZATION

One of the more controversial issues with which the committee dealt during the consideration of the bill was the issue of the imposition of Federal user charges or fees on the commodities industry. The Commission currently collects fees for registrations and renewals and a docketing fee when a reparations claim is docketed. In fiscal year 1981, the Commission collected $1,002,919 from registration fees and $20,875 from reparations docketing fees. However, no transaction-based fee has been imposed to help defray the cost to the Government of the Commission's operations.

The Subcommittee on Agricultural Research and General Legislation wrestled with the issue of applying a transaction-based user charge to the futures industry during the course of 5 days of hearings and 2 days of subcommittee markup. It became apparent during these proceedings that the imposition of a user charge at this time could seriously damage the fledgling National Futures Association, the self-regulatory organization recently formed by the industry and designated by the Commission. If that occurred, it could seriously retard the growth of self-regulation in this area.

It also became apparent that the user charge proposal raised a number of questions that had not been resolved, and could not be resolved before the subcommittee and the full committee had to act. In particular the incidence of this charge and its effect on farmers, processors, and other hedgers was unclear. The constitutionality of the user fee proposal put before the committee was also unclear.

In light of these considerations, the committee decided not to impose a user charge at this time, but rather to require the Commission to conduct a study, to be completed not later than January 1, 1984, which would focus on (1) the effects of a transaction fee on market liquidity, (2) the portions of the Commission's appropriation benefiting the general public versus the market participants of the Nation's commodity markets, and (3) the incidence of such a fee, including its impact on producers, processors, manufacturers, and other hedgers.

As mentioned previously, the bill limits the reauthorization period of 2 years (to expire Sept. 30, 1984) in order to force reconsideration of the user fee issue upon completion of the Commission study. In the hearings before the Subcommittee on Agricultural Research and General Legislation, most of the witnesses who addressed the issue of the period of reauthorization recommended that the Commission be reauthorized for at least 4 years or longer. I want to make it clear that the shorter reauthorization period is not intended to reflect any dissatisfaction on the part of the committee with the performance of the Commission. While there are certainly areas where improvement can be made, the Committee believes the Commission has developed into a mature regulatory agency worthy of reauthorization.

STATE JURISDICTION, INFORMATION SHARING, AND COMMODITY FRAUD

Other major provisions in the Futures Trading Act of 1982 deal with the general topic of "commodity" fraud as that relates to the division of responsibility between the States and the Commodity Futures Trading Commission. This kind of fraud generally does not involve the traditional activities regulated by the CFTC. Rather, this fraud involves persons situated on the periphery of the Commission's regulatory jurisdiction selling off-exchange investment vehicles.

While neither the States nor other Federal agencies have ever been precluded from instituting actions against these fraudulent off-exchange operators under general State civil or criminal antifraud statutes, the committee took three major steps to deal with

this problem. The first was the adoption of a provision to declare open season on these off-exchange investment vehicles and the persons who offer and sell them by specifically authorizing all Federal, State, and local officials to prosecute these persons under any relevant law or regulation. This provision makes clear that State attorney general or securities administrators may take administrative or other legal action, under their own securities or commodities laws, against persons offering and selling these off-exchange investment vehicles and against persons engaged in activities requiring registration by the Commission who are not so registered. Activities that are subject to the comprehensive regulatory powers of the Commission, including exchange-traded futures contracts, foreign futures contracts, authorized commodity options and regulated leverage transactions will remain within the Commission's exclusive jurisdiction.

The Futures Trading Act of 1982 does not alter the Commission's exclusive jurisdiction vis-a-vis the States with respect to the regulation of persons and firms who register with and conform their activities to the requirements of the Commodity Exchange Act. The Commission's regulatory programs embody a uniform, comprehensive, nationwide scheme of regulation. The committee continues to endorse the congressional judgment that a single, uniform Federal regulatory program applicable to registrants under the Commodity Exchange Act is preferable to 50 different and arguably conflicting schemes of State regulation.

The second step taken by the committee was the insertion of a provision to grant the Commission explicit authority to share with State and foreign governments information which is now subject to confidential treatment on the part of the agency. This provision will permit the Commission to provide these governmental entities with any information in its possession, so long as the information is provided for law enforcement purposes and the Commission is satisfied that the information will be disclosed only in connection with law enforcement proceedings brought under Federal, State, or foreign law to which the information recipient is a party.

A third step in this area which was taken by the committee was that of directing that the Commission, upon reasonable request, provide any State with registration information maintained by the Commission on any registrant. The Commission shall provide this registration information to the States without request if the Commission determines that the information may be appropriate for use by the States. This provision is a variation of a provision contained in S. 2210, introduced by Senator ROTH and others.

I believe these provisions in the Futures Trading Act of 1982 will permit any State or Federal prosecutor or State securities administrator to gain access to the necessary evidence and to proceed effectively against those persons offering and selling these off-exchange investment vehicles as a means to defraud the public.

REGISTRATION PROVISIONS

The Futures Trading Act of 1982 makes extensive changes to the registration provisions in the Commodity Exchange Act. The bill contains provisions requiring the registration of sales personnel and consultants engaged in sales work who are employed by commodity trading advisers and commodity pool operators. The antifraud provisions of the act applicable to commodity pool operators and commodity trading advisors have also been extended to cover these new registrants.

The committee believes that the registration of associated persons of commodity pool operators and commodity trading advisors is necessary to insure that such persons are qualified to offer pool participations and investment advice to potential participants and clients and are also adequately supervised. This registration requirement will permit the Commission to conduct fitness checks through the FBI, SEC, and other sources to uncover past misconduct, such as criminal convictions, to proceed more effectively against individuals associated with registered entities who violate the act, and to subject these persons to reparations claims. The need to screen these categories of commodity professionals has become more evident because of a dramatic increase in the number of commodity pool operators and commodity trading advisers and a concomitant increase in the number of customers and the amount of funds under management by them. For example, the number of commodity pool operators registered with the Commission rose from 494 at the end of fiscal year 1978 to 882 at the end of fiscal year 1981, an increase of more than 75 percent. This change will make the registration program more consistent because it will require persons who essentially function in the same capacity as persons associated with futures commission merchants to register as associated persons.

The Futures Trading Act of 1982 provides for a new category of registrant, that of the introducing broker, to include persons working in the area of commodity brokerage who are not now expressly subject to regulation under the Commodity Exchange Act. The bill authorizes the Commission to develop a regulatory structure for introducing brokers modeled after that presently in effect for futures commission merchants. The antifraud provisions in the act that are applicable to futures commission merchants are also made applicable to introducing brokers.

In deciding this question, the committee made a choice between regulating these persons as associated persons of the brokerage firms with which they are affiliated or regulating them independently as introducing brokers. The committee adopted the "introducing broker" provision because a significant number of these persons are, in fact, independent business people who utilize the services of futures commission merchants for clearing and recordkeeping functions and for the safeguarding of investors' funds. In light of these facts, the committee felt it would be inappropriate to require these independent business people to become fettered to the futures commission merchants through which their trades are cleared.

The committee also took steps to provide the Commission with greater flexibility when registering persons and made an extensive enumeration of the grounds upon which a person may be disqualified from registration under the Commodity Exchange Act. Under the provisions that amend section 8a(2) of the act, the Commission will have the authority to refuse to register, to register conditionally, to suspend or to place restrictions on the registration of any person subject to the statutory disqualifications contained in the bill. The Commission could take this action after notice but without giving the affected party a hearing. The Commission could revoke a registration on the basis of a finding that the registrant is subject to a statutory disqualification, but, prior to revocation, must give the registrant an opportunity to have a hearing and must submit evidence forming a basis for the finding that the registrant is subject to a statutory disqualification.

In general, the enumerated disqualifications that can serve as a statutory bar to registration or that can result in suspension or conditional or restricted registration include first, a currently effective suspension or revocation of registration; second, a Commission refusal, after opportunity for a hearing, to register the applicant within the past 5 years; third, a temporary or permanent court injunction involving action in any capacity requiring registration under the Commodity Exchange Act or securities acts; fourth, a felony conviction within the last 10 years that involved a security or any matter subject to regulation under the Commodity Exchange Act; fifth, a finding by a court or governmental body of a violation, within the last 10 years, of the Act, Federal securities laws, or similar statutes, where the violation involved theft,

fraud, misappropriation of assets, gambling, or the willful aiding or abetting of these violations; sixth, an outstanding Commission order imposing certain sanctions, such as denial of trading privileges on any contract market; seventh, a willful material misstatement or omission in the registration application as to whether the applicant is subject to any of the foregoing statutory disqualifications; and eighth, as to the registration of a partnership or corporate entity, a finding that the partnership or corporate entity has a principal who is subject to a statutory disqualification.

Generally, these disqualifications are based upon a prior finding or order made or entered by the Commission, a court, or another governmental body. As a result, whether or not a person is subject to such a disqualification should, in most instances, be readily ascertainable by checking officially maintained Government records.

The second portion of the system of statutory disqualification added to current law by the Futures Trading Act of 1982 takes the form of an amendment to section 8a(3) of the act. Under this amendment, the Commission will be authorized to refuse to register any person or to register any person conditionally if, after opportunity for a hearing, the Commission finds, among other things, that the person: First, has been found by the Commission or a court to have violated any provision of the act or to have aided or abetted such violation; second, has been found by a court or governmental body to have violated any provision of the securities acts or related State of foreign acts or to have aided or abetted such violation; third, has failed reasonably to supervise another person under his direction with a view toward preventing violations of the act, the securities acts or related State or foreign acts; fourth, has been convicted of a felony not involving futures or securities laws within the last 10 years or of a misdemeanor within the last 10 years, involving any matter regulated under the Commodity Exchange Act or the securities acts; fifth, does not meet the minimum financial requirements established by the Commission for registration; or sixth, is subject to an outstanding order denying or suspending the person's membership in a contract market or other self-regulatory organization, expelling such person from a contract market or other self-regulatory organization, or barring such person from associating with a member of a contract market or other self-regulatory organization. These offenses, which are generally less serious or further removed from the conduct regulated under the act than the offenses specified in the amendments to 8a(2), or which require factfinding or for which it may be appropriate for the Commission to consider mitigating or extenuating circumstances or evidence of rehabilitation (such as a misdemeanor conviction), would be grounds for a finding of unfitness only after an opportunity for a hearing before the Commission.

I believe these provisions will streamline the registration process because they give the Commission greater flexibility in dealing with those factual situations in which neither a denial of registration nor full registration is appropriate. The statutory disqualification sections will put both applicants and registrants on notice as to the most significant fitness standards applicable to registration under the act. In effect, these provisions visions spell out some of the "good cause" exceptions existent in current law, under which the Commission may refuse to register an applicant or may revoke an existing registration. I am hopeful that these provisions will reduce the amount of time and resources that the Commission, as well as applicants and registrants, currently devote to preparing and litigating registration cases.

I note that the Commission has been given wide discretion in the use of the statutory disqualifications contained in the amendments to sections 8a(2) and 8a(3) of the act. In particular, the Commission has wide discretion to suspend a registrant or to place restrictions on the registrant's activity without giving the registrant a hearing in the matter. I expect that the Commission will exercise its discretion judiciously and not use its powers to suspend or restrict a registration, without a hearing, as de facto revocation of that registration. I and other members of the committee will carefully monitor the operation of these procedures.

APPROVAL OF CONTRACT MARKET RULES

The Futures Trading Act of 1982 makes several changes in the Commodity Exchange Act pertaining to Commission review of contract market rules. These changes will streamline the rule review process by limiting the kinds of rules that must be submitted for prior Commission approval and by placing a limit on the amount of time the Commission may take to consider a proposed rule before the exchange submitting the rule may put it into effect.

The committee, while reaffirming the Commission's active oversight role in the area of contract market rule review, was concerned that exchanges receive timely consideration of the rules which they are required to submit to the Commission for its approval. Therefore, the Futures Trading Act of 1982 provides that, if the Commission has not approved a proposed rule or instituted disapproval proceedings within 180 days after the rule has been submitted, the contract market may put the rule into effect. If a disapproval proceeding is not completed within 1 year after the rule is submitted to the Commission, the contract market may also put the rule into effect. Rules put into effect in this manner, however, may not be considered as having been approved by the Commission.

The committee also adopted procedures to streamline the rule review process. While all rules pertaining to contract terms and conditions will continue to be submitted to and approved by the Commission in the manner presently in effect, all other rules may be put into effect after 10 days, unless the Commissioners themselves decide that the Commission should review these rules or the exchange submitting the rules asks that they be reviewed. These changes will exclude a substantial portion of new rules from the requirement of prior Commission approval, thereby permitting earlier implementation of such rules and providing some savings of Commission resources. The exchanges will be responsible for enforcing all rules which become effective under these new procedures, as well as all rules approved by the Commission or which otherwise must be enforced by the exchanges.

While the Commission has followed the practice of informing the contract markets of the basis upon which a rule was disapproved, the Futures Trading Act of 1982 expressly includes this requirement in an amendment to section 5a(12). The bill also amends section 5a(12) to require publication in the Federal Register of a short description of proposed rules or rule changes that are of major economic significance, instead of the full text of the rules. The committee believes that this notice provision will serve the purpose of adequately informing interested persons of the contents of pending major contract market rules. Since the committee was satisfied that the current provisions of section 5a(12) pertaining to margin setting authority and temporary emergency rules are appropriate, no amendments to these provisions were made.

The committee intends that the provisions of the Futures Trading Act of 1982 applicable to contract market rules not apply to any proposed rule or change in existing rule submitted to the Commission prior to the date of enactment of this bill.

APPROVAL PROCESS FOR NEW FUTURES CONTRACTS

With respect to the issue of the approval of new futures contracts, the Futures Trading Act of 1982 provides that the Commission shall have one year in which to consider and complete its analysis of any proposed futures contract and to make a decision as to whether the contract shall be permitted to trade. This provision was put into the bill because, while consideration of these contract proposals has

been timely in the past year, there had been significant delays in the consideration of these proposals prior to that time.

The committee felt that, while the fixed 1-year period for consideration of these proposals was appropriate, a shorter time period was not desirable, in view of the fact that many of the new futures contract proposals are complex and deal with matters with which the Commission has had no prior experience. Further, while the resources available to the Commission to evaluate new contract proposals are relatively fixed over time, several contract proposals may be received by the Commission at virtually the same time or in rapid succession.

The committee added one exception to the 1-year period for consideration of these contract proposals. This provision stops the clock from running from the time the Commission notifies an exchange that its contract proposal is incomplete until the proposal is completed, returned and found to be complete.

The committee intends that the provisions in the Futures Trading Act of 1982 applicable to contract proposals will not apply to any contract proposal submitted to the Commission prior to the date of enactment of this bill.

JUDICIAL REVIEW OF THE COMMISSION'S EMERGENCY POWERS

The committee included a provision in the Futures Trading Act of 1982 that provides for limited judicial review of the exercise of the Commission's emergency powers. This provision was included because some form of judicial review appears warranted and because the exercise of these powers are not presently subject to any form of judicial review. The committee was also concerned, however, that the original intent of Congress, as expressed when the emergency powers provisions were enacted, not be frustrated by the provision providing judicial review.

The committee balanced these competing interests by providing that review of the exercise of these powers shall take place only in an appropriate U.S. court of appeals and that the court may not enter a temporary restraining order, preliminary or permanent injunction, or other stay, or order of mandamus until a hearing has been held before a panel of judges and all parties have had an opportunity to argue their positions.

In light of the committee's concern that judicial review of the exercise of these emergency powers not affect the timing and nature of their use, the committee further provided that the judicial review would be based upon the information before the Commission at the time the decision to take action was made. This information is normally set forth in the Commission's emergency order.

The bill also provides that any court-ordered temporary restraining order, preliminary or permanent injunction, or other stay or order of mandamus affecting the Commission's exercise of its emergency powers must be based on a determination that the Commission's action was arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law.

In view of the importance of this issue to the proper functioning of the futures market, the committee intends to carefully monitor this provision to insure it does not thwart the Commission's ability to act in an emergency.

SPECULATIVE TRADING AND POSITIONS LIMITS

The Futures Trading Act of 1982 also contains several provisions applicable to speculative trading and position limits.

The committee believes the Commission's authority to set speculative position and trading limits on futures contracts is important for insuring orderly trading and for preventing market excesses. To this end, the bill amends section 4a of the Commodity Exchange Act to provide express authority for the Commission to involve exchanges in this process by explicitly recognizing the exchanges' authority to set limits for futures and option contracts. The bill also provides that a violation of exchange-established speculative limits is a violation of the act, if such limits have been approved by the Commission. While exchange-established limits may not be higher than those established by the Commission, the bill permits exchanges to set limits lower than those established by the Commission. This amendment will enable the exchanges to better monitor trading and position concentrations in their markets.

The committee also decided to retain the present legislative findings expressed in section 4a concerning the burden that excess speculation places on interstate commerce. The committee believes that speculative limits, in addition to their role in preventing manipulations, corners, or squeezes, are also important regulatory tools for preventing unreasonable fluctuations or unwarranted changes in commodity prices that may arise even in the absence of manipulation.

While the committee noted the importance of encouraging all interested persons to make their views known with respect to speculative limit levels, the committee believes that the present provisions of section 4a are sufficient to achieve this outcome. The committee thus decided to retain the current provisions governing the establishment of speculative position limits; that is, in setting these limits, the Commission must provide notice and opportunity for hearing, but not a hearing on the record. Nevertheless, the committee contemplates that, before establishing speculative limits, the Commission will consider objective economic data relevant to the need for restraints on the markets. The committee expects the Commission to afford interested parties, including traders, producers, consumers, and contract markets, opportunity to address the speculative limits proposals under consideration by the Commission.

Finally, the bill amends section 4a to provide that the act's criminal penalties in section 9(c) are applicable to violations of exchange-established speculative limits only when the violations are committed in furtherance of an attempt to manipulate, corner, or squeeze a market. The committee believes that criminal penalties for violation of these limits should apply only to conduct that is intentional and that is directed at obtaining illegal gain by attempting to affect market prices.

OFFER AND SALE OF FOREIGN FUTURES CONTRACTS

The Futures Trading Act of 1982 also contains provisions regulating the offer and sale of foreign futures contracts in the United States. During recent years, futures markets have become increasingly internationalized, with growing participation by U.S. residents in foreign markets and increased participation by residents of other countries in U.S. markets. Since the Commission has adequate statutory authority to regulate foreign participants in U.S. futures markets, no changes were made in the present law respecting their activity in U.S. markets. However, for the reasons that I will outline below, the committee made certain changes to current law to reaffirm and clarify the Commission's authority over the offer and sale of foreign futures within the United States, its territories, and possessions.

Under section 2(a)(1) of the act, the Commission has exclusive jurisdiction over all agreements and transactions involving futures contracts traded or executed on any board of trade, exchange, or market, regardless of whether the board of trade, exchange, or market has been designated as a contract market under section 5 of the act. Under the exclusive jurisdiction authority in section 2(a)(1) and the general rulemaking authority in section 8a(5) of the act, the Commission has promulgated a rule prohibiting fraud in the offer and sale of foreign futures contracts within the United States. With the growth of foreign futures markets abroad and the possibility that illicit commodity instruments may be offered under the guise of legitimate foreign futures contracts, additional congressional action was deemed necessary.

In order to provide adequate protection for American residents who are solicited to trade foreign futures contracts by vendors within the United

States, the Futures Trading Act of 1982 adds a new section 4(b) to the act, reaffirming the Commission's authority to adopt rules and regulations prohibiting fraud in the offer and sale of foreign futures contracts in the United States. The new provision also provides explicit authority for the Commission to promulgate rules and regulations requiring minimum financial standards, the disclosure of risk, reporting, the keeping of books and records, the safeguarding of customer funds, and the registration of those who offer and sell foreign futures contracts from domestic locations.

Under this provision of the bill, the Commission is authorized to develop different requirements for vendors depending upon the particular board of trade or market on which the foreign futures contracts are made. However, the Commission's authority to adopt rules and regulations under this section does not include authority to approve the contracts, contract terms, rules, or actions of a foreign board of trade, market, or clearinghouse.

The Commission's authority to adopt rules and regulations under this provision is not intended to impair the contractual duties, obligations, or rights arising from the rules or practices of any foreign board of trade, market, or clearinghouse, or the principals of any such entities. In addition, the rules and regulations developed under this provision are not intended to place the solicitation or acceptance of orders in the United States for bona fide foreign futures contracts at a comparative disadvantage with similar solicitation or acceptance or orders for domestic futures contracts. Finally, the committee intends that the Commission, in developing rules or regulations under section 4(b), take into account the customs and practices of foreign boards of trade or markets and recognize that differences may exist between the practices of foreign boards of trade and their U.S. counterparts.

In addition to including a new section 4(b) that clarifies the types of rules and regulations that the Commission may promulgate with respect to the offer and sale of foreign futures contracts from domestic locations, the Futures Trading Act of 1982 also makes it clear that the Commission may permit the application of other Federal and State laws, in addition to the act, to transactions conducted on or subject to the rules of a board of trade, exchange, or market located outside the United States. The committee intends that this provision authorize the Commission to permit the application of such other Federal or State laws, as well as regulations issued under such laws, to the offer and sale in the United States of futures contracts originating on foreign boards of trade, exchanges, or markets, with particular reference to situations involving the illicit offer and sale of such contracts to U.S. residents.

SECONDARY RESPONSIBILITY

The Futures Trading Act of 1982 amends section 13 of the act in two significant ways. First of all, the bill amends the aiding and abetting provision to broaden its application to any proceeding brought under the act. I contemplate that persons who intentionally aid, abet, counsel, command, induce, or procure the commission of violations of the act or rules, regulations, or orders issued thereunder, irrespective of evil motive, or who act with reckless or careless disregard of statutory requirements, may be held responsibile for such violations in proceedings brought by the Commission.

Second, the bill adds a new subsection (b) to section 13. This provision is designed to provide greater accountability on the part of persons within an organization who control the practices that give rise to the violations of the act. Frequently, these are individuals within a company or organization who know or should have known of the particular misconduct but who seek to shield themselves from accountability. This "controlling person" provision is patterned after a similar provision in the Securities Exchange Act of 1934, but requires that the Commission bear the burden of proving wrongdoing on the part of the controlling person. Under the bill's provision, any person who directly or indirectly controls any other person who has violated the act or regulations may be held liable for that violation in any action brought by the Commission to the same extent as the controlled person, provided that the controlling person did not act in good faith and directly or indirectly induced the acts constituting the violations.

To establish liability under this provision and thus hold the controlling person liable for the misdeeds of the person controlled, the Commission must show that first, the controlled person violated the act or regulations; second, the controlling person had direct or indirect control of the person committing the violation; third, the controlling person did not discharge his responsibility in good faith; and fourth, the controlling person directly or indirectly induced the act that constitutes the violation.

REPARATIONS

The Futures Trading Act of 1982 also contains provisions to correct specific problems in the Commission's reparations program and to encourage the use of other forums by claimants seeking relief from violations of the act. These amendments will bolster the credibility of the reparations program, which has suffered due to delays in the handling of claims and the assessment of awards which are not collectible. The use of other forums will also reduce the demand for claims adjudication in the reparations programs.

During the 1978 reauthorization, the Commission sought and obtained amendments to the Act which were designed to include unregistered persons in the class of persons subject to the Commission's reparations procedures. Over the course of the past 4 years, however, the Commission has encountered several unanticipated problems stemming from the inclusion of these unregistered persons. For example, claims must now be heard by the Commission even though the Commission has had no prior knowledge of the existence of the unregistered defendant firms and individuals and has had no opportunity to regulate or monitor their business practices. Additionally, unregistered firms and individuals often file in bankruptcy, are destitute, or have disappeared by the time a claim is asserted, resulting in the assessment of reparations awards which are not collectible.

Under these circumstances, the reparations process works as a disservice to those who have already been harmed by holding out the promise of recovery which, as a practical matter, cannot be had. These types of uncollectible claims serve to delay the entire reparations process, thereby impeding the completion of cases where recovery is possible. Accordingly the bill repeals the provisions in current law which provide for reparations jurisdiction over persons not registered with the Commission. Of course, those who aid or abet the registrants' violations may be joined in the reparations proceeding.

The bill also repeals the cumbersome statutory procedural requirements applicable to reparations and gives the Commission broad discretion to fashion procedures through rulemaking to administer the reparations program in an efficient and expeditious manner. Under the bill's provisions, the Commission may adopt procedures which differ from those ordinarily applicable to agency action under the Administrative Procedure Act. These provisions, however, do not absolve the Commission from complying with the parties' due process and other rights under the U.S. Constitution.

The bill also makes other changes for purposes of encouraging prompt recoveries. For example, current law provides that a hearing is not required in reparations cases when the damages claimed do not exceed $5,000. This $5,000 limit was raised from $2,500 in 1978 to increase the number of cases that could be resolved through the submission of papers alone. In order to increase the Commission's flexibility in developing procedures for the effi-

cient disposition of claims, the bill eliminates this monetary ceiling. Thus, the Commission could decide cases on documentary evidence alone, without regard to the amount of damages claimed, or it could raise the amounts in controversy necessary before a hearing need be held.

Since the reparations program seeks to decide the entire controversy surrounding each claim, including counterclaims arising out of the same set of facts, the bill creates a sanction that would operate against a plaintiff who fails to honor a counterclaim award made in favor of a defendant. In such a case, the plaintiff would automatically be prohibited from trading in the futures market until the award is paid. This provision is designed to insure the integrity of the reparations program and the Commission's orders and to make the system more equitable for all participants.

AGRICULTURAL OPTIONS

The Futures Trading Act of 1982 contains a provision that repeals the complete ban on the trading of options on agricultural commodities and permits the Commission to approve and regulate the trading of these options under the same conditions as apply to the trading of options on other commodities. While there are no options contracts traded on U.S. commodity exchanges at the present time, the Commission is currently reviewing applications to trade options on a pilot basis on a limited number of nonagricultural commodities.

The committee believes that agricultural options could become a beneficial marketing tool for farmers and the agricultural industry. These options could provide farmers and processors with a method of price protection that differs in significant respects from methods presently available. With options, as with futures contracts, farmers can insure against the effects of unfavorable commodity price movements. With futures contracts, the farmer must give up the opportunity to benefit from favorable price movements in order to protect himself from unfavorable movements; however, futures contracts do not require the payment of a fee, identified as the option "premium."

With a "put" or sell option, a farmer may exercise the option if the market price falls below the option strike price and be assured of receiving the strike price. If the market price rises above the option strike price, however, the option contract may be abandoned and the farmer can sell his produce at the higher market price. Similarly, a processor who purchases a "call" or buy option limits his risk in case the price of his raw material rises, but may still take advantage of price declines should they occur. In this manner, the holder of an option limits his risk without forgoing his opportunity for profit. In addition, since the option purchaser's financial obligation is limited to the option purchase price or "premium," a farmer buying a "put" option would be able to identify in advance and limit his marketing costs.

Agriculture has become increasingly oriented to a world market. As a consequence, U.S. commodity prices are more responsive than ever before to global weather conditions and developments in political and monetary policy. It is thus likely that U.S commodity prices will become more volatile, because of the uncertainty stemming from these external factors. Consequently, farmers need additional marketing tools which help them to manage the risk inherent in downward price fluctuations, while leaving them free to take advantage of higher prices as they occur.

The committee believes that the trading of agricultural options should be studied further before the Commission authorizes trading in these options on the part of the public. At a minimum, trading in these options should not begin until a study of option pricing and grantor eligibility is completed, the present options pilot program has been evaluated and the Commission is confident of its ability to regulate such trading.

This does not mean, however, that the present options pilot program must be completed before it is evaluated. Indeed, after an initial evaluation of the projected options pilot program, the Commission may wish to expand the program to include options on agricultural commodities. Any such program involving agricultural options would be initiated under the statutory provisions applicable to the trading of options contracts generally.

DISCLOSURE OF INFORMATION PURSUANT TO SUBPENA OR SUMMONS

The Futures Trading Act of 1982 amends section 8 of the Commodity Trading Act to provide that the Commission shall disclose information in its possession in response to a subpena or summons served on the Commission only if a copy of the subpena has been mailed to the last known home or business address of the person who submitted the information, if the address is known to the Commission, and 14 days have elapsed since the date of such mailing. This provision is designed to provide a person who has submitted information to the Commission with notice that the information is being sought by a third person through a subpena or summons so that the submitter of the information may challenge the subpena or summons if desired. The provision, however, would not bar the Commission from resisting the subpena or summons, should it choose to do so. Further, the Commission would still be free to assert any applicable privilege when resisting all or part of any subpena or summons.

Mr. HUDDLESTON. Mr. President, I yield myself such time as may be required.

I second what the distinguished chairman of the Agriculture Committee has said about the work of Senator LUGAR of Indiana and from this side Senator BOREN of Oklahoma in developing this particular piece of legislation.

Senator BOREN, who would normally be the floor manager of the bill from this side of the aisle, although he has an intense interest in this subject, is necessarily away from the Senate because of illness in his family and will not be able to participate in this discussion.

Mr. President, S. 2109, as reported by the Committee on Agriculture, Nutrition, and Forestry, will authorize appropriations to carry out the Commodity Exchange Act for fiscal years 1983 and 1984. The bill also contains a number of amendments to the Commodity Exchange Act to improve and update the commodity futures regulatory program.

The bill is comprehensive and includes provisions recommended by the Commodity Futures Trading Commission, the futures industry, the General Accounting Office, farm organizations, securities regulators, and others. It provides, I believe, a strong framework for the continued improvement of the Federal regulatory effort.

The bill represents an effort by the Agriculture Committee to balance competing interests and maximize regulatory efficiency. I urge the Senate to support the committee in its effort and adopt the bill, as reported.

Again, I want to express my appreciation to Senator LUGAR, the chairman of the Subcommittee on Agricultural Research and General Legislation, and Senator BOREN, ranking Democrat on the subcommittee, for their dedicated work on the bill. S. 2109 is important legislation for an industry that plays a substantial role in our national economy. It was primarily through the efforts of Senator LUGAR and Senator BOREN that the comprehensive bill we are considering here today was put together.

I also wish to thank Senator HELMS for his strong leadership in the development of the bill. He has been instrumental in putting together this important legislation.

THE ROLE OF FUTURES TRADING IN THE ECONOMY

Commodity futures trading has evolved substantially, over the years, so that, today, futures contracts are being written on a diverse array of commodities and instruments vital to the national economy. These include agricultural commodities, forest products, precious metals, energy products,

foreign currencies, interest-bearing instruments, and stock composites.

Futures trading, under our system, serves the valuable function of providing an almost continuous flow of information on the prices of commodities, providing guidance for those involved in marketing and distribution.

Futures contracts also assist those who, as processors or marketers, must invest their capital in commodities and those who must take substantial positions in various financial instruments. Futures provide protection from adverse shifts in the prices of commodities or in interest rates. Hedging, in turn, permits businessmen to operate with less capital and, thus, reduce their merchandising price margins.

In recent years, our economy has experienced sharp rises and increased volatility in the prices of commodities and in interest rates, and an increased number of complex price-making forces in the market. As a result, futures contracts are playing an increasingly important role in the economy.

THE DEVELOPMENT OF THE FEDERAL REGULATORY PROGRAM

The Commodity Exchange Act was enacted, decades ago, to insure fair practices and honest dealings on the commodity exchanges and to provide a measure of control over manipulative activity and trading excesses that demoralize the futures markets and injure producers, consumers, and the exchanges themselves.

The Commodity Exchange Act was substantially revised by Congress in 1974 to provide a uniform regulatory structure for a futures industry that had begun to expand by leaps and bounds. The 1974 act also created the Commodity Futures Trading Commission as an independent agency to administer the Commodity Exchange Act and granted the Commission exclusive jurisdiction over transactions involving futures contracts and certain other commodity-related activities.

Following the 1974 amendments, the futures industry continued to grow dramatically, and the markets in financial futures opened. Also, with accelerated inflation and greater interest on the part of members of the public in protecting themselves from the ravages of inflation, there was a proliferation in commodity-related frauds. The Commodity Exchange Act was substantially amended again in 1978 to strengthen enforcement and deal with these new situations.

The 1978 legislation contained a sunset provision, authorizing appropriations only through the end of fiscal year 1982. As a result, Congress, this year, must review the progress made in the Federal regulatory program since 1978 and act to authorize appropriations for fiscal year 1983 and beyond.

Looking at the futures industry and the Commodity Futures Trading Commission today, we see a number of changes that have taken place since 1978.

More than 3 dozen new futures contracts have been authorized since the 1978 amendments became law. In 1981, the number of futures contracts traded was double the number of contracts traded in 1978.

Trading in financial futures has skyrocketed. In connection with this type of trading, last December, the Commodity Futures Trading Commission and the Securities and Exchange Commission reached an agreement on jurisdiction and regulatory responsibilities with regard to futures contracts on securities indexes, futures and option contracts on exempted securities, and options on foreign currencies.

Recently, the National Futures Association began operations. This organization will manage the industry's self-regulatory efforts and assist the Commodity Futures Trading Commission in overseeing the activities of industry professionals.

NEED FOR LEGISLATION

When the Agriculture Committee began its work on the commodity futures reauthorization, we were presented with suggestions for changes in the law from a number of sources. The Commodity Futures Trading Commission and the SEC had legislative proposals relating to their jurisdictional agreement. The Commodity Futures Trading Commission had developed a number of other proposals to make their regulatory effort more efficient and to improve prosecution of commodity-related frauds. The General Accounting Office had performed a thorough study of the operations of the Commission and developed its own recommendations for legislative changes to improve the operations of the Commission.

The futures industry, State regulators, and others had prepared proposals for legislation to address problems stemming from the rapid expansion of the industry and increased involvement by the general public in futures trading.

It was clear that, in addition to reauthorizing appropriations, other revisions of the law brought about by the evolution in futures trading and its regulation since 1978 would be needed.

Mr. President, S. 2109 responds to the changed needs of the industry and its regulators. It addresses every area of major concern brought to the attention of the Agriculture Committee.

It is a comprehensive bill that is the result of many hours of hard work sifting through a multitude of suggested changes in the law; and it represents a concerted effort to balance competing interests. For these reasons, the bill deserves the support of the Senate.

CFTC-SEC ACCORD

S. 2109 contains amendments to the Commodity Exchange Act covering the CFTC portion of the jurisdictional agreement reached by the Commodity Futures Trading Commission and the Securities and Exchange Commission. The agreement resolves jurisdictional ambiguities as to the regulatory responsibilities of the CFTC and the SEC, brought about by gaps in existing law.

The confusion over jurisdiction has become more of a problem as the demand for new contracts relating to securities and financial instruments has grown.

The agreement, as reflected in S. 2109, will eliminate jurisdictional conflict between the two agencies. It does not upset the status quo in the marketplace; and it maintains, to the extent practicable, the traditional roles of the two agencies.

The Commodity Futures Trading Commission will continue to regulate trading that serves hedging and price discovery functions, and the Securities and Exchange Commission will continue to regulate trading that has an underlying investment purpose.

ADMINISTRATIVE IMPROVEMENTS

S. 2109 makes a number of changes in the Commodity Exchange Act to improve the administration of the Federal regulatory effort.

The bill will streamline the rule review process and require the Commission to act expeditiously to approve proposed rules and contract market designations.

The bill substantially revises the process by which industry professionals are registered to do business under CFTC oversight. Generally, the bill spells out the criteria for disqualification and provides the Commission with flexibility in handling registration matters. The bill will also permit the Commission to cooperate with other entities, such as the National Futures Association, in processing applications for registration.

The bill revises the provisions of law authorizing reparations proceedings to enable the Commission to address the serious problems that have arisen with that program.

IMPROVEMENTS IN ENFORCEMENT EFFORTS

S. 2109 makes changes in the Commodity Exchange Act to broaden the scope of, and strengthen, enforcement efforts under the Act.

The bill will require contract markets to enforce rules that have been approved by the Commodity Futures Trading Commission.

It will permit the Commission to set speculative limits by rule or regulation, as well as by order, and will make it unlawful for anyone to violate the speculative limits of contract markets that the Commission has approved.

The bill will make it unlawful for any commodity pool operator or commodity trading adviser to permit a person to be associated with him if the pool operator or trading adviser knows, or should know, that the person is not registered. The bill also extends, to these associated persons, the antifraud provisions applicable to pool operators and trading advisers.

Also, it makes it unlawful for any registrant under the act to permit a person to be associated with him if the registrant knows, or should know, of facts that are grounds for statutory disqualification from registration. A registrant would be excused from this prohibition if he notifies the Commission of the fact and the Commission determines that the person should be registered anyway or temporarily licensed.

The bill extends the criminal provisions of section 9(a) of the act, which makes the conversion of margin money a felony, to all persons registered under the act. Under existing law, section 9(a) applies only to futures commission merchants.

The bill amends the act to make persons who aid or abet in the commission of violations of the act or its regulations liable in judicial proceedings under the act, as well as administrative proceedings.

The bill includes a provision to establish greater accountability on the part of persons within an organization who control practices that give rise to violations of the act. Specifically, the bill provides that any person who directly or indirectly controls another person who violates the act or its regulations can be held liable for the violation to the same extent as the controlled person if the controlling person does not act in good faith and directly or indirectly induces the violation. This provision would apply to actions brought by the Commission, and the Commission would have the burden of proof.

OPEN-SEASON PROVISIONS

In a related provision, S. 2109 includes a proposal made by the Commodity Futures Trading Commission to declare open season on off-exchange scams operating outside the act's regulatory structure. The bill will amend the act to explicitly permit the application of all Federal and State laws to any person who should register under the act but fails to do so, and to any commodity transaction that is not conducted on, or subject to, the rules of a contract market or (unless otherwise specified by the Commission) a foreign board of trade. The bill will authorize the Commission to refer such cases to Federal or State agencies for appropriate disposition. This change would not apply to dealer options or leverage transaction, which would remain under the Commission's exclusive jurisdiction.

This provision is extremely important if we are to combat boilerroom operations and other frauds effectively. Under the act as now written, State regulators have not been able to participate fully in the law enforcement process. With the amendment of the act, it would be made clear that State attorneys generals or securities administrators have the power to take administrative or other legal action, under their own laws, against the boilerroom operators.

In conjunction with this provision, the bill will explicity permit the Commission to share, with States and foreign governments, information that is now subject to confidentiality provisions in the act, so long as the information is provided for law enforcement purposes and the Commission is satisfied that the information will be disclosed only in connection with law enforcement proceedings. Also, the bill will require the Commission to furnish, to State and local governments, information on persons obtained as part of registration, if requested by the State or local government.

IMPROVEMENTS IN REGULATION

S. 2109 contains several provisions that respond to the needs of the futures industry for balanced regulation.

Among the legislative proposals submitted to Congress by the Commission was one relating to independent brokers who solicit and accept orders from the public on futures trades without handling funds, and who fulfill the trades they obtain through registered futures commission merchants. Under current law, these brokers are not required to register. However, they are listed as agents of futures commission merchants in the applictions of the commission merchants for registration, even though they are not subject to the control of the futures commission merchants but are truly independent contractors.

The Commission had proposed that all persons now considered to be agents be required to register as associated persons of commission merchants.

Many believed that, under the Commission's proposal, commission merchants would be subject to unfair liability for the actions of these independent brokers over whom they have no control.

S. 2109 resolves this issue by establishing a new category of commodity professionals, to be called introducing brokers, into which the independent brokers who are the subject of concern will fall.

Introducing brokers would be required to register and be subject to ongoing regulation, as the Commission has requested, but would be treated separately from commission merchants. They will have to stand on their own.

The bill also provides for limited judicial review of certain emergency actions taken by the Commission in response to market emergencies. This is necessary because a U.S. court of appeals has held that, under existing law, such actions are not subject to judicial review.

While the Commission, properly, has the power to respond appropriately and without unnecessary delay to market emergencies, the enormous economic effects that can result from the exercise of that power require that the Commission be subject to some review by the courts, as are most Government actions.

The bill carefully limits the scope of, and prescribes the procedures for judicial review. The end result, I believe, gives the Commission the ability to exercise its emergency powers quickly and effectively, while providing to interested parties adequate safeguards against the arbitrary or capricious exercise of that power.

USER FEES

Perhaps the most difficult issue that confronted the committee in its consideration of the bill was the user fee issue.

The Commission had proposed to amend the act to permit the implementation of a user fee system under which fees would be assessed by the Federal Government on each futures contract, exchange option, and leverage contract. There was near unanimous opposition to this proposal from the witnesses not associated with the Commission.

Strong arguments were made against the proposal. It is argued that: the Federal fees would overlap with fees to be charged by the National Futures Association to cover regulatory activities; the fees would adversely affect market liquidity and increase hedging costs to producers and users of commodities; and the fees would be unfair because regulation of the commodity markets benefits the general public, not just those who use the markets.

Because the effect of the user fee system is unknown, the committee deferred acting on the Commission proposal at this time. In light of the assertions that this proposal, if enacted, would cause serious harm to the futures industry and the overall futures regulatory effort the committee decided to obtain further information relating to the effect of transaction fees on market liquidity and market participants, and the portions of the Commission's activities that benefit the general public, before acting on the Commissions proposal. The committee gave the Commission until January 1, 1984, to develop this information.

In conjunction with the committee's decision on user fees, the committee elected to limit the reauthorization of appropriations for activities under the

Commodity Exchange Act to 2 years, through September 30, 1984. This will insure that Congress reconsiders the user fee issue expeditiously after the Commission submits its findings on that issue to us.

The committee's decision on user fees accepted neither the Commission's nor the industry's position. We developed a compromise position, and adopted it unanimously.

FOREIGN FUTURES TRADING

There has, during recent years, been an increase in trading in futures at the international level. U.S. residents trade in futures offered by foreign markets; and persons from other countries invest substantial sums in contracts offered on domestic exchanges.

Under the Commodity Exchange Act, foreign participants in domestic futures markets are regulated the same as U.S. residents.

Because the Commodity Futures Trading Commission has exclusive jurisdiction over all futures activity in this country, regardless of where the contract market is located, the Commission has issued a rule prohibiting fraud in the offer and sale of foreign futures within the United States.

Nonetheless, at the reauthorization hearings, Commission Chairman Philip Johnson testified on the need for additional legislative authority relating to foreign futures contracts. Mr. Johnson testified that, while the Commission has exclusive jurisdiction over foreign futures, the Commission believes that it should be expressly authorized in the act to develop, if needed to protect U.S. residents who are solicited to trade on foreign markets, a regulatory system for those who market foreign futures from a domestic location.

The Commission submitted proposed legislation to provide this authority, which the committee revised and included in S. 2109.

Specifically, the bill provides explicit authority for the Commission to promulgate rules and regulations requiring minimum financial standards, the disclosure of risk, reporting, the keeping of books and records, the safeguarding of customer funds, and the registration of those who offer and sell foreign contracts from domestic locations.

Under the bill, the Commission will be authorized to develop different requirements for vendors depending upon the particular board of trade or market on which the foreign futures contracts are made, in particular taking into account those foreign futures contracts that have not traditionally posed a danger to U.S. residents. The Commission's authority to adopt rules and regulations under the bill will not include authority to approve the contracts, contract terms, rules, or actions of a foreign board of trade or market.

The committee report on the bill states that the committee does not intend that the authority we will give to the Commission be used to impair contractual rights and duties arising under foreign futures contracts or to place foreign futures at a competitive disadvantage with respect to domestic futures contracts. Also, the committee report states that the committee intends for the Commission, as it develops regulations under the authority provided in the committee bill, to take into account the customs and practices of foreign markets and recognize that there can be differences between trade practices in the United States and other countries.

What the committee report indicates is that this provision of the bill is meant to provide for balanced and equitable regulations with respect to foreign futures. I expect the Commission to use commonsense and be even-handed when it moves into this area.

LEVERAGE TRANSACTIONS

Mr. President, this is the third opportunity I have had since joining this distinguished body to participate in enabling legislation for the CFTC. In each and every one of these actions by this body, the Commission has been directed—clearly and without hesitation—to move forward and expeditiously develop regulations and guidelines for the sale of leverage transactions.

I believe that the committee's intentions and directions with respect to leverage transactions under this bill are also quite clear. Yet, the CFTC's record causes me to be concerned that the clear intent of the committee on the matter of leverage transactions may again go unheeded.

I believe my colleagues will share my chagrin in noting that the Commission has simply ignored our instructions. Rather than adopting regulations, the CFTC has frozen entry into the leverage business and subsequently ignored it. The result of this inaction by the Commission has been to foster an anticompetitive situation in this segment of the commodities trading industry by conferring a monopoly upon a handful of firms in business at the time.

Mr. President, the original 1974 act creating the Commission contained clear guidance as to the need for prompt regulation of leverage transactions. The Commission's response, however, was to create an advisory committee to study the matter. Then the advisory committee recommended prompt regulations. The Commission's response, again, was to ignore the recommendation.

In the 1978 reauthorization, the Congress reminded the Commission of its direction to promptly develop regulations for leverage transactions. The conference report on the Commission's 1978 reauthorization put the direction in very clear language:

> It is the intent of the conferees that the Commission act expeditiously upon enactment of the conference substitute to regulate * * * leverage transactions. [S. Rept. No. 95-1239, p. 28]

The response of the Commission to this extraordinarily clear direction, however, was to place "temporary moratoria" on new entrants into the leverage market and on the commodities traded, and to embark upon further study.

Those "temporary moratoria," Mr. President, have remained in effect for almost 4 years. In fact, as the committee began work on this bill, the CFTC requested that we endorse and codify its "temporary moratoria" on leverage transactions.

Let me make it clear that the committee rejected that request. In effect, the CFTC asked Congress to assume full responsibility for the Commission's anticompetitive actions. I strongly supported the committee's decision to reject that request because, in my view, such moratoria are not only contrary to the previous directions of the Congress on leverage transactions, but also an example of faulty regulation.

I concur with the language in the committee's report offered by Senator BOREN that concern for Commission resources to regulate an expanded industry calls for some caution in lifting these moratoria. But, that must not be used as an excuse for not lifting these moratoria. Healthy competition between sound companies can insure as much public protection as rules governing their conduct. We want the double benefits of both rules and competition, and the sooner the better.

Therefore, the committee has urged that these CFTC moratoria on leverage transactions should be replaced as expeditiously as possible. There should be a sensible framework of regulations which makes available the opportunity to compete in the leverage business to any entrepreneur who can operate within proper regulatory guidelines and compete successfully.

I also concur with—and want to reemphasize—the committee's direction that the CFTC not misconstrue or rely upon the authority granted in section 19(d) of the act as a substitute for the regulation of leverage transactions. For the CFTC to do so would be tantamount to a ban of leverage transactions. And, on that point, the committee has made its view abundantly clear:

> The Committee intends for the Commission to regulate leverage transactions, not to ban them. [S. Rept. No. 97-384, p. 52]

I do not believe that clearer direction can be given, and I hope and expect that the Commission will finally heed this mandate.

CONCLUSION

Mr. President, the futures industry is an integral part of the Nation's economy.

S. 2109 will update the Commodity Exchange Act to give the regulators of this industry the tools they need to insure that futures markets continue to meet the needs of those served by them. It will also make the Federal regulatory program more efficient and responsive to the needs of the industry.

This is a comprehensive bill. It includes provisions recommended by the Commodity Futures Trading Commission, by the futures industry, the General Accounting Office, farm organizations, security regulators, and many others. It provides, I believe, a strong framework for the continued improvement of the Federal regulatory effort.

I yield to the distinguished Senator from Indiana.

Mr. LUGAR. Mr. President, I rise to thank the distinguished chairman of our committee (Mr. HELMS), and the distinguished ranking minority member (Mr. HUDDLESTON) for their leadership and for their thoughtful comments about the work of our subcommittee.

Mr. President, for many years our futures markets have played an important role in the economy by facilitating hedging and pricing activities. In recent years, the commodities industry has experienced phenomenal growth in both the use of existing contracts and the development of new trading instruments. Continued, healthy growth of the futures industry depends upon a high degree of public confidence, and such confidence requires efficient and effective regulation of the industry.

The reauthorization of the Commodity Futures Trading Commission provides an opportunity for Congress to review the activities of the Commission and to reexamine and refine its regulatory authority. The Subcommittee on Agricultural Research and General Legislation conducted 5 days of hearings and heard testimony from over 30 witnesses on CFTC reauthorization. The subcommittee held 2 days of markup on the bill and the full committee another day. Throughout these 3 days of markup, the committee was able to reach a consensus on the provisions of the bill which is not before the Senate.

Reasonable men and women may differ with specific provisions of S. 2109. But, taken as a whole, the committee bill offers a strong and balanced package which will foster the public confidence needed for the continuing expansion of the futures industry. We have, I believe, produced a good bill which will yield efficient regulation, protection of commercial and public participants in the markets, and continued expansion of these important markets.

The provisions of this bill have three broad purposes. First, S. 2109 streamlines and simplifies certain of the CFTC's regulatory procedures, such as those relating to registration, reparations, and rule review. These legislative changes should enhance the Commission's ability to take timely and responsive actions while protecting the rights of commodity customers and professionals.

Second, this bill and the companion amendments to the securities acts also clarify jurisdictional issues which have long clouded the relationship between the Commodity Futures Trading Commission and the Securities and Exchange Commission. By reducing jurisdictional uncertainties these amendments to the Commodity Exchange Act, in concert with the proposed amendments to the securities acts, should foster beneficial innovation, growth, and competition in financial markets.

The third general purpose of S. 2109 is to improve enforcement of the Commodity Exchange Act. This bill refines the enforcement powers of the Commission, extends the role of the States, other governmental authorities, and self-regulatory organizations in enforcing the act, and permits greater sharing of investigative information with such agencies and organizations.

For these reasons, I urge timely passage of the bill.

In closing, Mr. President, I would like to express my deep appreciation to Chairman Phillip Johnson, of the CFTC. Phil's performance as Chairman has been exemplary. His guidance and leadership have been indispensable to the committee's work.

Mr. ROTH. Mr. President, today the Senate will consider the Futures Trading Act of 1982, S. 2109. The measure is designed to reauthorize the Commodity Futures Trading Commission, the Federal agency charged with exclusive jurisdiction over the regulation of the commodity futures industry. Although I commend the Senate Agriculture Committee for its fine work on S. 2109, there remain two issues with which I am concerned: State antifraud jurisdiction over commodity investment fraud and the imposition of user or transaction fees.

In late February of this year, the Permanent Subcommittee on Investigations of the Senate Governmental Affairs Committee, which I chair, held extensive hearings on commodity investment fraud. During the hearings, which were primarily concerned with off exchange transactions, the subcommittee heard from defrauded victims, con artists, State and Federal law enforcement officials and the Chairman and Enforcement Director of the Commodity Futures Trading Commission. Evidence adduced at these hearings clearly revealed a serious commodity fraud problem in this country and suggested major problems with the Federal framework for commodity regulation. We also found that loopholes in the current Federal law, together with ineffective administrative programs, have prevented the States from taking action against commodity offenders, have deprived investors of adequate consumer remedies, and have produced an extraordinary recidivism rate among commodity schemers.

Enacting legislation in 1974 created the CFTC and vested it with exclusive jurisdiction over commodity futures. By 1978, it became apparent to Congress that the CFTC could not be held primarily responsible for policing every aspect of the commodities futures industry. Thus, in 1978, the Commodity Exchange Act was amended to allow the States to enforce the Federal law, the Commodity Exchange Act, in Federal district court, while specifically declaring that the act does not prohibit State action under general or criminal antifraud statutes.

Despite these efforts to encourage State involvement, jurisdictional questions were again raised at our February hearings when State officials expressed frustration with the current restrictions. Aside from numerous complaints regarding the complexities of Federal court and the reluctance of State legislatures to spend State funds to enforce a Federal law, the States expressed great frustration with the unnecessary delays current restrictions have caused. Under securities or commodities antifraud legislation, unlike general antifraud statutes, State officials are almost always allowed to seek administrative orders. Such orders are extremely useful in closing a fraudulent operation soon after discovery, while insuring adequate due process under the law. Court procedures, regardless of the priority given to the case, inevitably result in innumerable delays and, without such immediate administrative sanctions, often provide schemers with additional time in which to operate, and ample opportunity to transfer and secrete funds. Numerous documented instances exist for the proposition that the commodity boilerroom operator will take the money and run.

In many of these cases, had the States been allowed to intervene initially, on the basis of State securities or commodities antifraud laws, the operation could have been closed, remaining assets frozen, and numerous investors spared their misfortune. As the subcommittee investigators learned, boilerroom operations are capable of bilking investors of literally millions of dollars, sometimes in just a few months. Clearly time is of the essence.

Another complaint by State securities officials is that the application of general fraud statutes to the field of commodity futures investments is a virtually impossible task. Most general antifraud statutes do not apply to cases where a material omission is the primary basis for the fraud. Furthermore, many boilerroom operations consist of a room filled with telephones where salesmen spend their days soliciting investments from residents of other States. Thus, the victims may be in Minnesota, while the con men are in Florida. General antifraud laws are not designed to handle this problem.

Although the States may also utilize criminal fraud statutes, the burden of proof is quite difficult to meet, especially in situations where victims and perpetrators are in separate States. Furthermore, these theft-by-deception laws provide no means for recovering remaining assets with distribution to the defrauded investors.

Finally, by preventing State securities administrators from enforcing State securities and commodities laws, the effect is to shift the primary responsibility for enforcement to either the State's attorney general or to local prosecutors. Commodity fraud cases must then compete for attention in offices which for the most part, have little knowledge of the industry or its purpose.

The subcommittee staff has calculated that between 1975 and 1981 losses due to fraudulent commodity schemes amounted to at least $740 million and could easily have reached as high $1.5 billion. The accuracy of these figures was never challenged by the CFTC nor by any other law enforcement agency. If anything, the figures are probably low. Suffice it to say that American investors are losing at least $200 million a year in commodity fraud schemes.

Created to regulate and monitor the legitimate commodity industry and to protect the sophisticated investor, the Commodity Futures Trading Commission, admits that, with an annual budget of $20 million—roughly one-tenth of the estimated yearly losses—and a staff of less than 500, it does not have the ability to adequately detect and combat commodity fraud nationwide. This is especially true with regard to the boilerroom operations which migrate from one location to another. In fact, the subcommittee discovered several instances where known commodity swindlers were either registered with the CFTC under their own or an assumed name, or were in actual control of an operation while a friend, spouse, or partner registered with the CFTC.

Meanwhile, the States have evidenced a willingness and an ability to combat commodity fraud. State securities administrators, attorneys general, and Governors have told me, and many of my fellow Senators, that they want to stop commodity fraud in their States, but they are effectively precluded from acting due to current restrictions of the Commodity Exchange Act.

STATE ANTIFRAUD JURISDICTION

As a result of the subcommittee's findings, I, together with Senators RUDMAN, NUNN, and CHILES, and Senators PROXMIRE, STEVENS, and MURKOWSKI, introduced a bill which we felt would provide more adequate regulation in this crucial area. Our bill, S. 2210, was designed to allow State authorities to go after commodity fraud operators.

(By request of Mr. HUDDLESTON, the following statement was ordered to be printed in the RECORD:)

● Mr. BOREN. Mr. President, S. 2109, the Futures Trading Act of 1982, will extend the authorization for appropriations for the Commodity Futures Trading Commission for 2 years and make other needed changes in the Commodity Exchange Act.

This bill, if enacted, will improve the regulation of the Nation's commodity futures industry. I urge the Senate to adopt it.

Mr. President, I want to commend Senator LUGAR, chairman of the Subcommittee on Agricultural Research and General Legislation, for his work on this bill. Commodity futures regulation is a complex area of law that affects a vital segment of our economy; and Senator LUGAR took the lead, in committee, in developing what I believe is a balanced and responsive bill.

Also, I want to thank Senator HELMS for his leadership, as chairman of the Agriculture Committee, in the development of the bill, and Senator HUDDLESTON for his contributions in shaping this important legislation.

IMPROVED REGULATION NEEDED

In 1974, Congress established the Commodity Futures Trading Commission as an independent regulatory agency to oversee the growing commodity futures industry. Since that time, we have seen continued expansion of the futures industry and a marked evolution in the use of futures by business and finance.

Congress made major revisions to the Commodity Exchange Act in 1978 to respond to the changing needs of the Commission and the industry.

Again, this year, the Agriculture Committee was asked to consider revisions to the Commodity Exchange Act developed by the Commission. Further changes were suggested by various segments of the industry, State regulators, the General Accounting Office, and others.

The bill we are considering now is the result of months of work by the Agriculture Committee on the various proposals. This bill—the committee-reported bill—responds to the needs of the Commodity Futures Trading Commission and others with interests in the smooth functioning of the futures markets. It will, I believe, better enable the Commission to accomplish its missions and address the new challenges presented by the rapid changes in the industry. It will insure the continuation of a strong and fair regulatory program that protects the participants in, and others affected by, futures trading.

Mr. President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks, a short summary of S. 2109, as reported by the committee.

Mr. President, the futures markets are an integral part of the Nation's economy, and it is imperative that those markets continue to be free from fraud and manipulation.

The futures markets provide an efficient and cost-effective mechanism through which farmers, processors of raw material, and manufacturers can reduce the risks associated with carrying inventories and forward pricing of products, and reduce the substantial financial risks related to volatile interest rates.

In order for the futures markets to continue providing a useful service, the integrity of the system and the public's trust in that integrity must be preserved.

With the passage of this bill, we will be taking a major step toward insuring that the Commission can continue to do its job well and the markets will continue to operate smoothly.

USER FEES

One issue that the committee spent a great deal of time on is the matter of user fees. The committee considered a recommendation by the Commodity Futures Trading Commission to authorize the imposition of user fees on commodity transactions. The fees would be used to recover a major portion of the Commission's operating budget. However, the committee decided to defer the authorization of user fees and, instead, direct the Commission to study the possible effect of fees and report to Congress with its findings by January 1, 1984.

There are several significant reasons that justify this approach.

While mindful of the need to reduce the costs of the Federal Government, the committee nevertheless concluded that it did not have enough information to determine the potential effect of user fees on the futures markets.

Also, the National Futures Association, the industry-funded, self-regulatory organization, is now being organized. Government-imposed fees at this time could jeopardize the formation of the National Futures Association, which, when once operating, will relieve the Commission of a number of its regulatory burdens.

Further, the futures industry already bears a significant share of the burden of regulating the markets through fees paid to fund the self-regulatory programs carried out by the exchanges. Before imposing additional fees on the industry, we should determine what portion of the Commission's budget benefits the public and, therefore, should most appropriately be borne by the taxpayer.

The study and report by the Commission will enable Congress to make an informed judgment on whether and to what extent user fees should be imposed on the futures industry. The 2-year extension of the authorization of appropriations for the Commission, as provided in the committee-reported bill, will force reconsideration of the user fee issue upon completion of the study.

I urge the Senate to reject any amendment that would change the user fee provisions of the committee-reported bill.

FOREIGN FUTURES

Trading in futures on an international level has dramatically increased during recent years. A growing number of U.S. residents participate in foreign markets and a growing number of residents of other countries participate in U.S. markets.

Under current law, the Commission regulates foreign participants in domestic futures markets the same as U.S. residents.

Section 2(a)(1) of the Commodity Exchange Act provides the Commission with exclusive jurisdiction over all futures activity in this country, regardless of the location of the contract market. Exercising the exclusive jurisdiction conferred on it under the act, the Commission has issued a rule prohibiting fraud in the offer and sale of foreign futures contracts within the United States.

During the reauthorization hearings, the Commission requested that the express authority to adopt rules and regulations for those who market foreign futures from a domestic location be included in the committee bill. Such rules would be promulgated if they were needed to protect U.S. residents who were solicited to trade on foreign markets.

The bill reported by the committee provides explicit authority for the Commission to promulgate rules and regulations applicable to persons offering and selling foreign futures in the United States. However, the bill also specifies the kind of regulations which the Commission could issue under this provision. Under the bill, the Commission could promulgate rules and regulations proscribing fraud and requiring minimum financial standards, the disclosure of risk, reporting, the keeping of books and records, the safeguarding of customer funds, and the registration of those who offer and sell foreign futures contracts from domestic locations. The Commission will also be granted the authority to develop different requirements for different vendors depending upon the particular foreign board of trade or market on which the vendor's contracts are made or executed, taking into consideration those foreign futures contracts that have not traditionally posed a danger to U.S. residents.

The bill does not give the Commission the authority to approve the contracts, contract terms, rules, or actions of a foreign board of trade or market.

It is intended that the Commission, in developing rules and regulations under the authority provided in the bill, will take into account the customs and practices of foreign boards of trade and markets and recognize that differences may exist between the practice of foreign boards of trade and their U.S. counterparts.

In a related provision, the bill provides the Commission with the authority to issue rules permitting State regulation of persons in the United States engaging in transactions in commodities on foreign boards of trade. It is hoped that the Commission will do so only upon a determination by the Commission that first, it is unable to enforce the Federal commodities laws effectively with respect to such transactions, and second, it requires assistance from State law enforcement agencies, and third, such assistance will not impair the ability of persons in the United States to enter into transactions on international exchanges involved in providing a pricing or hedging forum for international commercial dealings.

The provisions of the bill relating to foreign futures were included precisely to provide for balanced and equitable regulations with respect to foreign futures. It is expected that the Commission will carefully move into this area.

Mr. President, this bill will improve the regulation of the Nation's commodity futures industry. I urge my colleagues to vote in favor of S. 2109, the Futures Trading Act of 1982.

SUMMARY OF S. 2109

The major provisions of the bill, as reported by the committee, would:

First. Extend the authorization for appropriations for the Commodity Futures Trading Commission through fiscal year 1984;

Second. Resolve the jurisdictional ambiguity with respect to the regulatory responsibilities of the Commodity Futures Trading Commission and the Securities and Exchange Commission;

Third. Authorize the Commodity Futures Trading Commission to regulate the offer and sale, by persons in the United States, of commodity futures contracts executed on foreign markets;

Fourth. Authorize the Commodity Futures Trading Commission and the futures exchanges, subject to Commission approval, to set speculative limits on the amount of trading which may be done or positions that may be held in options or futures contracts;

Fifth. Repeal the ban on trading in options on agricultural commodities;

Sixth. Require large traders to keep books and records and make them available for inspection regardless of Commission report-filing requirements;

Seventh. Require registration of principals, employees, and consultants of commodity pool operators and commodity trading advisors as associated persons if they are involved in solicitation of pool participations or discretionary accounts or the supervision of persons engaged in such solicitation;

Eighth. Strengthen State jurisdiction in actions against illegal enterprises and authorize the Commodity Futures Trading Commission to share information with State and foreign governments;

Ninth. Require contract markets to enforce rules and submit to the Commodity Futures Trading Commission for review proposed rules that relate to contract terms and conditions;

Tenth. Revise provisions of the Commodity Exchange Act relating to disclosure of confidential information;

Eleventh. Authorize the Commodity Futures Trading Commission to seek ex parte orders prohibiting persons from destroying records or books, refusing to permit inspection, or withdrawing or disposing of assets, and make it a felony for any person registered or required to be registered under the act, or any employee or agent thereof, to embezzle or steal customers' assets;

Twelfth. Authorize judicial review of Commission emergency actions in U.S. courts of appeal; and

Thirteenth. Provide for a user fee study and report.

Mr. LUGAR. Mr. President, I ask unanimous consent that the committee amendment be agreed to, and that the bill as amended be considered as original text for the purpose of further amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I reserve the remainder of our time.

UP AMENDMENT NO. 1377

(Purpose: To modify provisions of the Commodity Exchange Act relating to jurisdiction of the States and standardized contracts for certain commodities)

Mr. ROTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. ROTH. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Delaware (Mr. ROTH) for himself, Mr. RUDMAN, Mr. PROXMIRE, Mr. STEVENS, and Mr. MURKOWSKI proposes an unprinted amendment No. 1377.

Mr. ROTH. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 17 and 18, insert the following new section:

JURISDICTION OF THE STATES

Sec. 22. Section 6d of the Commodity Exchange Act (7 U.S.C. 13a-2) is amended by adding at the end thereof the following new paragraph:

"(8)(A) Except as provided in subparagraphs (B) and (C), nothing in this Act shall prohibit an authorized State official from instituting an action in State court or an adjudicatory administrative proceeding against any person registered under this Act (other than a floor broker) for an alleged violation of any antifraud provision of any commodities or securities statute of such State which makes it unlawful directly or indirectly—

"(i) to employ any device, scheme, or artifice to defraud any person;

"(ii) to engage in any transaction, practice, or course of business which perpetrates fraud or deceit upon any person; or

"(iii) to make or cause to be made any untrue statement of a material fact or fail to disclose a material fact in connection with any statement made or information provided to any person which, in light of the circumstances under which such statement was made or information provided, was necessary in order to make the statement not misleading.

"(B) Nothing contained in this section shall permit any State—

"(i) to impose upon any person registered under this Act, or to initiate any action or proceeding against such person for an alleged violation of, any State licensing, registration, or qualification requirements which are provided for under any State commodities or securities statute; or

"(ii) to initiate any action or proceeding against a person registered under this Act for an alleged violation of any rule, regulation, or statement of general policy issued under any State commodities or securities statute.

"(C)(i) No action or proceeding may be instituted under this section unless—

"(I) an authorized State official provides the Commission with prior written notice of the intention of the State to commence such action or proceeding and with a copy of the proposed complaint and supporting evidence;

"(II) the Commission, based on its review of such complaint and evidence, determines that the documents provided are a sufficient basis upon which to render a determination and determines that such action or proceeding would not be inconsistent with this Act or any rule, regulation, order, or policy of the Commission adopted pursuant to this Act; and

"(III) the Commission notifies such State official of its determinations in writing.

"(ii) The determinations of, and notice provided by, the Commission under clause (i) shall be made within thirty days after the date of receipt by the Commission of the documentation required under clause (i)(I) or within such other period as is agreed upon by the Commission and the authorized State official. No action or proceeding may be instituted under this section if the Commission determines, within the specified or agreed upon time period, that such action or proceeding would be inconsistent with this Act or any rule, regulation, order, or policy of the Commission adopted pursuant to this Act. If the Commission fails to make either determination and provide notice under clause (i) within such period, the State official may initiate an action or proceeding based on the proposed complaint provided to the Commission.

"(iii) In making its determinations under clause (i) (II), the Commission may assume the truth of the facts and evidence submitted in support of the allegations in the proposed complaint.

"(iv) The Commission's authority under clause (i)(II) may not be delegated to any employee of the Commission.

"(v) A determination of the Commission under clause (i)(II) shall be final and not subject to direct or collateral judicial review.

"(vi) This paragraph shall not create any right, liability, or obligation upon which an action may be brought against the Commission.".

Mr. ROTH. Mr. President, I propose this amendment on behalf of Senators RUDMAN, PROXMIRE, STEVENS, and MURKOWSKI. Our amendment would permit the States to exercise antifraud jurisdiction and only antifraud jurisdiction over commodity transactions occurring on exchange as well as off exchange. This jurisdiction would remove the shield created by exclusive Federal jurisdiction and allow the States to proceed against fraud at the local level. However, the amendment would specifically prohibit the States from devising regulations designed to usurp other regulatory powers of the CFTC. The amendment is designed to insure that the States may not interfere with the regulation of the legitimate industry while at the same time allowing for swift and effective action where fraud is found.

Thus, Senator RUDMAN, and I along with Senators PROXMIRE, STEVENS, and MURKOWSKI, today propose an amendment to S. 2109 which would permit the States to exercise antifraud jurisdiction—and only antifraud jurisdiction—over commodity transactions occurring on exchange as well as off exchange. This jurisdiction would remove the shield created by exclusive Federal jurisdiction and allow the States to proceed against fraud at the local level. However, the amendment would specifically prohibit the States from devising regulations designed to usurp other regulatory powers of the CFTC. The amendment is designed to insure that the States may not interfere with the regulation of the legitimate industry, while at the same time allowing for swift and effective action where fraud is found.

I am very pleased to be able to state that we have obtained the support of both the CFTC and State authorities on these amendments, which include a provision that requires the States to obtain CFTC approval before instituting actions under State commodities or securities antifraud statutes. The States will inform the CFTC of any actions they intend to institute against registered persons before the action is filed. The CFTC will then have 30 days to determine whether or not the proposed State action will interfere upon congressionally mandated uniform Federal regulation of commodity trading. If the Commission determines that the State action constitutes, the State will be without jurisdiction to institute the action.

The amendment is intended to provide for a comprehensive and complete attack on commodity fraud with a minimal impact on the legitimate commodity industry. We have worked closely with the CFTC, the States and the commodity industry to reach this goal. The amendment clearly indicates that States may not register persons involved in commodity trading, and that the States are prohibited from enforcing any rules or regulations which may be promulgated pursuant to their commodity antifraud statutes in an attempt to regulate the legitimate industry. Only specific antifraud provisions stipulated by our amendment can be used by the States, and CFTC review of the use will permit the States to join in the fight against commodity fraud, while retaining regulatory jurisdiction in the Federal Government. We feel that through these limitations, only the fraudulent need fear State action.

There is still another safeguard to preclude the unlikely event of a State official usurping Federal regulatory authority. Under S. 2109, the Commission is reauthorized for a period of 2 years. If during that time State officials distort their authority in an attempt to assume a regulatory role, Congress will be made aware of this assumption and the entire antifraud provision may be stricken. In view of the willingness of the States to assume this enforcement role and the already taxed resources of the CFTC, we are convinced that the States should be allowed this opportunity.

If the States desire authority over commodities futures, they surely would not risk what they have gained by opposing congressional intent in what they know is a trial period. Instead, the States would attempt to use their power to illustrate their ability to stop fraud, with a minimal effect on the legitimate commodity industry.

Mr. RUDMAN. Will the Senator from Indiana yield me 1 minute?

Mr. LUGAR. I am happy to.

Mr. RUMAN. Mr. President, I thank the Senator from North Carolina, the Senator from Indiana, and the Senator from Kentucky for working with us to reach an agreement on the amendment. As one who prior to coming here had the public charge of enforcing State fraud laws, I know how much this will be appreciated by State attorneys general and State regulators who have been concerned with the fraud that has been perpetrated on their constituents. Up to now, for reasons that we cannot blame on the CFTC, they have been unable to enforce their laws.

Mr. President, today we are addressing an important law enforcement problem facing this country. It is a problem which has received all too little attention from law enforcement agencies, the Congress, and the public. It is the problem of commodity investment fraud schemes which have plagued predominantly small investors for years, but which has gone largely unnoticed in our media.

In late February, the Permanent Subcommittee on Investigations, of which I am a member, held 3 days of hearings on the issue, during which we received testimony from a wide variety of witnesses including defrauded citizens, con artists, State and Federal law enforcement officials, and the Chairman of the Commodity Futures Trading Commission who appeared with, among others, his chief of enforcement. I found the revelations during those hearings to be shocking. The PSI staff had calculated that losses due to what are called offexchange fraud schemes amounted to at least $739 million over a 5-year period and probably as much as $1.5 billion. These figures were never challenged by the CFTC or any State authority. In fact, if anything, the witnesses appeared to believe that the numbers were low. It's fair to say that the public has been, and is presently, losing approximately $200 million a year in these fraud schemes.

What has been the response of the law enforcement community? The response has been virtually nonexistent. State and local law enforcement agencies are largely preempted by a Federal statute which has vested the CFTC with virtually exclusive jurisdiction over any instrument having to do with a commodity. This is so even though I believe, as a past New Hampshire attorney general, that State officials are particularly well suited to police fraud within their States. In fact, it is often the case that a commodity-related fraud victim's first inclination is to seek help from State officials. Unfortunately, up until now, the State official has been incapable of responding to the problem.

At the same time, we found the CFTC ill-equipped to respond to the tremendous growth of fraud within the industry. This is through no fault of the CFTC. Very simply, appropriations have not kept pace with inflation, and the tremendous growth in the industry. The CFTC's very competent staff simply cannot cope with the fraudulent elements that have invaded the legitimate industry.

In an effort to respond to the problem, Senator ROTH and I proposed legislation which would have removed the Federal preemption which prevents State officials from using their general securities and commodities antifraud statutes to respond to the obvious problem. In permitting such actions, however, we were careful to retain the centralized regulatory role solely within the jurisdiction of the CFTC. However, the fear still persisted that an "overzealous" State securities official might use the antifraud statutes to impose de facto regulation.

Chairman JOHNSON and I, the North American Association of Securities Administrators, and our respective staffs held frequent meetings to discuss possible solutions to this problem. I am extemely pleased to report that we did reach a compromise which is acceptable to us, the National Association of Securities Administrators, the CFTC, and a major element of the industry itself. The proposal would permit States to proceed against commodity fraud only when the CFTC has determined that such actions are properly prosecuted by State authorities. Essentially, the CFTC would retain veto power whenever it determined that a proposed complaint was not an appropriate State action. I believe the legislation provides the correct balance between enhanced consumer protection and centralized regulation. During these times of economic constraint and New Federalism initiatives, I believe the proposal is an example of the partnership that can be forced between State and Federal authority, and I am pleased to have had a part in this initiative.

Mr. LUGAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. Mr. President, I send to the desk a modified version of the amendment—on page 3, beyond line 24 would be deleted.

The PRESIDING OFFICER. The Senator has the right to modify his amendment.

The modified amendment is as follows:

On page 84, between lines 17 and 18, insert the following new section:

JURISDICTION OF THE STATES

SEC. 22. Section 6d of the Commodity Exchange Act (7 U.S.C 13a-2) is amended by adding at the end thereof the following new paragraph:

"(8)(A) Except as provided in subparagraphs (B) and (C), nothing in this Act shall prohibit an authorized State official from instituting an action in State court or an adjudicatory administrative proceeding against any person registered under this Act (other than a floor broker) for an alleged violation of any antifraud provision of any commodities or securities statute of such State which makes it unlawful directly or indirectly—

"(i) to employ any device, scheme, or artifice to defraud any person;

"(ii) to engage in any transaction, practice, or course of business which perpetrates fraud or deceit upon any person; or

"(iii) to make or cause to be made any untrue statement of a material fact or fail to disclose a material fact in connection with any statement made or information provided to any person which, in light of the circumstances under which such statement was made or information provided, was necessary in order to make the statement not misleading.

"(B) Nothing contained in this section shall permit any State—

"(i) to impose upon any person registered under this Act, or to initiate any action or proceeding against such person for an alleged violation of, any State licensing, registration, or qualification requirements which are provided for under any State commodities or securities statute; or

"(ii) to initiate any action or proceeding against a person registered under this Act for an alleged violation of any rule, regulation, or statement of general policy issued under any State commodities or securities statute.

"(C)(i) No action or proceeding may be instituted under this section unless—

"(I) an authorized State official provides the Commission with prior written notice of the intention of the State to commence such action or proceeding and with a copy of the proposed complaint and supporting evidence;

"(II) the Commission, based on its review of such complaint and evidence, determines that the documents provided are a sufficient basis upon which to render a determination and determines that such action or proceeding would not be inconsistent with this Act or any rule, regulation, order, or policy of the Commission adopted pursuant to this Act; and

"(III) the Commission notifies such State official of its determinations in writing.

"(ii) The determinations of, and notice provided by, the Commission under clause (i) shall be made within thirty days after the date of receipt by the Commission of the documentation required under clause (i) (I) or within such other period as is agreed upon by the Commission and the authorized State official. No action or proceeding may be instituted under this section if the Commission determines, within the specified or agreed upon time period, that such action or proceeding would be inconsistent with this Act or any rule, regulation, order, or policy of the Commission adopted pursuant to this act. If the Commission fails to make either determination and provide notice under clause (i) within such period, the State official may initiate an action or proceeding

based on the proposed complaint provided to the Commission.

"(iii) In making its determinations under clause (i) (II), the Commission may assume the truth of the facts and evidence submitted in support of the allegations in the proposed complaint.

"(iv) The Commission's authority under clause (i) (II) may not be delegated to any employee of the Commission.

"(v) A determination of the Commission under clause (i) (II) shall be final and not subject to direct or collateral judicial review.

"(vi) This paragraph shall not create any right, liability, or obligation upon which an action may be brought against the Commission.".

Mr. ROTH. Mr. President, I believe this amendment in this form has been reviewed by the managers of the bill, and it is my understanding that it is acceptable.

Mr. LUGAR. Mr. President, the Senator from Delaware is correct. The amendment has been examined by the managers of the bill.

As a matter of fact, we pay tribute to both Senator ROTH and Senator RUDMAN for extensive consultation with the Senate Agriculture Committee and the staff and Mr. Johnson of the CFTC.

It is my understanding that the amendment is also supported by the CFTC and thus passes muster on all fronts.

Our committee deliberated long in this area, but we think constructive improvement has been made, and we are prepared to accept this amendment on our side.

Mr. HUDDLESTON. Mr. President, I am prepared to accept the amendment that gives States the authority to prosecute persons registered under the Commodity Exchange Act under State commodities or securities antifraud statutes. This will, of course, duplicate the authority now held by the Commodity Futures Trading Commission to prosecute such cases.

I would like to point out, however, that the provisions of the amendment will be in addition to several other provisions already contained in S. 2109 giving States an increased role in the fight against commodity frauds.

This bill already contains an open season provision under which States will be authorized to take any appropriate action under their State laws—including the securities and commodities laws and regulations—against persons engaged in off-exchange commodity transactions and persons who should have registered with the Commodity Futures Trading Commission, but have not done so.

The bill already authorizes the Commission to share sensitive investigative information with any State for law enforcement purposes.

The bill already authorizes the Commission to provide confidential registration information to any State for law enforcement purposes.

Mr. MURKOWSKI. Mr. President, today I rise to support my distinguished colleagues, Senators ROTH and RUDMAN, for their continuing efforts to combat fraud in commodities trading and the amendment they are offering regarding State jurisdiction.

The States, which have shown considerable interest in obtaining additional jurisdiction, are currently precluded from implementing their authority under State securities and commodities statutes designed to combat commodity investment fraud. The amendment we are considering today will not allow States to establish 50 different rules, but will allow States to use their resources to assist the CFTC in the policing of both on and off-exchange fraud.

Senators ROTH and RUDMAN have clearly pointed out the necessity of this amendment, and how it will allow States to enforce common law antifraud statues that protect our constituencies from the unlawful practices of boiler room trading operations.

State securities administrators have a successful and lengthy history of enforcement. Their efforts have been responsible and have provided a strong adjunct to the Federal enforcement program at the SEC. I believe that this experience and record of success can be applied with respect to commodities fraud.

The commodities industry has experienced phenomenal growth during the last few years and with it the opportunity for fraud. Trading volume in futures contracts has nearly tripled in the last 5 years to over 100 million contracts. Nearly 50 different commodities are now involved. As a result, the CFTC now regulates 11 separate exchanges and almost 50,000 trading professionals. There are very few segments of the economy that could match that growth rate, and I am seriously concerned whether existing regulatory bodies and existing laws are capable of protecting the small and unsophisticated investor both off and on exchange.

The director of Alaska's Division of Banking and Securities has stated that

> The disreputable element in the commodities industry * * * has been the greatest economic disaster to strike Alaska since the 1964 earthquake.

The operations of these disreputable elements are not limited to Alaska alone.

Mr. President, in conclusion I would urge that S. 2109 pass with this amendment. The risks of commodity trading should not include the possibility of loss as a result of fraudulant operations.

I submit an article relating to this matter.

OUT IN THE COLD—HOW A PAIR OF ALASKANS LOST THEIR SHIRTS IN A COMMODITY SCAM

(By Daniel D. Nossiter)

Simple geography should shield the residents of Shemya Island from investment fraud. Shemya is a sullen dab of tundra and scrub in the Bering Sea at the tail of the Aleutian chain, a tiny punctuation mark fittingly situated between the Rat Islands and Siberia. The island is so far west that the international dateline zigzags to bypass the place so it can officially share the same day with the rest of the United States. Tokyo is a mere 2,000 miles away, and the Air Force base on Sheiya was once an important refueling stop on the northern route to the Orient. Now, in the era of long-range planes, the base presumably is used to spy on the Russians who, presumably, spy right back on the base.

It's possible, with difficulty, to telephone Sheiya. Frank Messer and Kenneth Iddins, who together lost $30,000 to a collection of villains touting commodity futures, report that the subpolar winter is cold and clear and bright, although and occasional 135-m.p.h. wind sometimes forces them to crawl the 300 yards from barracks to work.

What attracted Iddins, who works in its appliance shop, and Messer, who has the crucial job of looking after the power plant, are the high, hardship-post wages. Messer makes $23 an hour, Iddins, a similar amount. Iddins echoes the sentiments of many refugees from the Lower 48 when he says: "It's better than being a shoe clerk in Iowa and retiring with nothing in the bank."

The mails are a twice-weekly event on Shemya. Mail addressed to "resident" or other unknowns gets tossed in a heap for anyone, that is, everyone, with time to riffle through the pile. Late last year, the mail brought a card from Republic Advisory Corp. promising "big money fast" in futures trading.

That card and the promise somehow caught Messer's attention, a happenstance that led to the transfer of no little part of his and his friend Iddins' savings into the hands of a convicted felon who had been chased out of one boiler room operation only to open up another. Adding insult to injury. Messer and Iddins never saw a salesman face-to-face, and hence could never enjoy the pittance of satisfaction that comes with being able to describe one's woes to a human visage. Shemya's high wages are as attractive to con artists as they are to people like Messer and Iddins. Indeed, the director of Alaska's Division of Banking of Securities has stated that "the disreputable element in the commodities industry . . . has been the greatest economic disaster to strike Alaska since the 1964 earthquake."

Iddins, who has been on Shemya since 1973, was eager to make his pile and return to civilization. Hoping to speed the process, he filled out the Republic Advisory card requesting more information. Soon, he got an urgent call from the firm's San Francisco office.

Republic was a commodity trading adviser. It had been in business for all of 11 months when its come-on card arrived at Shemya. Republic had no seat on any exchange; it executed its trades through a registered broker. The firm's official principal was required to register with the Commodity Futures Trading Commission, a process that consisted of little more than filling out a form. Once that formality was accomplished, Republic—or any other firm that

cared to—could set up shop and charge fees for dispensing advice in trading commodities.

In late 1980, Republic salesmen in San Francisco and at the head office in Englewood Cliffs, N.J., were pushing heating oil contracts. "Republic Advisory Corp. has devised a strategy which—if you act now . . . can bring you quick and substantial profits. You must send our designated clearing member $10,400 . . .," cried one promotional leaflet.

Without question, the strategy brought quick and substantial profits to Republic. A whopping $4,000 went to it as a management fee. The remaining $6,400 was to go into a margin account to buy one heating oil contract, meaning that the investor was putting up about three times the margin normally required.

The Republic salesman who called Messer and Iddins said that "the big thing now is heating oil. Everyone is getting into it, and it's bound to go up to $1.40," Iddins recollects. A mite lacking in subtlety, the pitch nonetheless was effective; both Messer and Iddins fell for it. And sadly, report federal authorities, an alarming number of other innocent investors are proving easy marks for similar spiels.

Iddins sent Republic a check for $10,400 made out to Eastern Capital Corp., Republic's broker, and, subsequently, Messer sent twice that sum. The heavy-breathing promoter promised he would get them into the market at 92 cents a gallon. Meanwhile, he informed the two novice investors that Republic was switching brokerage because Eastern's service wasn't fast enough.

That is not how Eastern's president, Steven Silverman, remembers it: "We gave republic 30 days to terminate their relationship with us. They couldn't keep their records straight, their clients' positions. We assigned someone to work full-time with their back office, but it was too much of a mess. We also started hearing rumors. . . ."

For a few weeks, Messer and Iddins vainly tried to contact the Republic salesman. They finally reached him in mid-January. He was "Most ecstatic with the news that the market was now up to $1.04 a gallon," Iddins recalls. But when Messer and Iddins asked at what price they had made their purchases, he claimed that it had been so long since they had called him he couldn't remember. Call back Monday, he said, and he'd have the figures.

That was the last Messer and Iddins heard from their original Republic contact. They later managed to reach another Republic salesman, who admitted that no contracts had been purchased for either. A few weeks later, a contract was bought for Iddins for $1.04. The price promptly dropped to $1, and Iddins promptly was sold out.

For his part, Messer learned that he still had not made a trade. The second salesman said that Messer's money had been put into the wrong account. Messer called back a few days later only to learn that Republic's San Francisco phone had been disconnected. With a queasy feeling in the pits of their stomachs, Messer and Iddins phoned the head office in New Jersey to try to solve the mystery of the missing office. They were not exactly comforted by what they say they were told—that one of Republic's San Francisco employes was "a crook and a liar and Republic had closed its California office and fired all the people."

By this time, Messer had rather large second thoughts about Republic, so he fired off a letter demanding his money back. What he received in return were evasions and excuses. Fed up, he called Eastern Capital, Republic's original broker, to whom he had made out the check. Eastern Capital said sorry, they'd never heard of him or his check.

As it turns out, Eastern never saw the check because Republic never sent it. Instead, someone in Republic's New Jersey office forged a signature and used the $20,800 check to pay fees owed to the Simon Advertising agency of East Orange, N.J.

Paul Greenholtz, who runs Simon Advertising, acknowledged to a reporter that he handled Republic's promotions, but directed further inquiries to his lawyer, Stephen Dratch. Dratch claims his client hadn't the faintest idea anything was amiss until seven months later when he received an affidavit from Messer that the endorsement was forged. Dratch says the check was given to the ad agency by Thomas Pepe of Republic. (After the ad agency's bank froze its account because of the forgery, Greenholtz sued Messer, Republic and the bank in an attempt to collect the money.).

A MODEST DESCRIPTION

Republic's promotional literature refers to Pepe as a trading consultant, but that does him an injustice. According to a suit filed in U.S. District Court last summer by the CFTC, Pepe was the "undisclosed principal" in the company, whose nominal head was his wife, Maria. Some authorities familiar with his activities view him as a supremely gifted con artist. One seasoned investigator, however, is more skeptical—he says Pepe may be a pro, but that, if he were really good, he would have shut the operation after three or four months; letting it drag on for a year guaranteed he'd be caught.

In any case, Pepe is not easily discouraged. Three years ago, he was convicted of fraudulently obtaining a loan from the Small Business Administration and sentenced to three months in a half-way house and three years of probation. Last year, the CFTC obtained a permanent injunction in federal court ordering Pepe to stop defrauding investors with a crude-oil scheme. Without admitting guilt, Pepe signed a consent decree stating that he would abide by the court order. And this past summer, postal investigators raided his comfortable home in Woodcliff Lake, N.J., looking for evidence of a company he was running that purported to sell shares in a diamond fund. One investigator drily commented that "the search was more notable for the lack of any evidence" of any sort of diamond fund.

Despite repeated efforts to contact him, Pepe has refused to be interviewed. But the CFTC's complaint against him and Republic says his strategy was to sell the unwary a futures contract for an enormous "management fee" and excessive margin and then persuade the investor, who was already hooked, to change to a "managed account," in which Republic would be allowed discretion to make trades as often as it liked, at a cost of $150 per round turn trade.

That is what Republic convinced Iddins to do at the end of February. What remained of Iddins' account was placed in the hands of Raymond H. Ketcham, against whom an injunction had been issued a year earlier in connection with Pepe's crude-oil caper and who also had signed a consent order. Iddins was told that he had made more than $1,600 the first day he had switched to the discretionary account. Alas, when he received a written statement, he discovered that he had lost $356, and for which privilege he had been charged $1,350 in management fees.

Iddins gave up trying to deal with Republic and complained to the CFTC. In July, the agency had a federal judge issue another injunction against Pepe, this time for the Republic scheme. Again he signed a consent decree, and the company went into receivership. Federal authorities estimate that Republic collected some $5 million from investors like Messer and Iddins, losing about two-thirds of it in trading and making off with the rest. So far, the receiver has realized only $900, on the sale of Republic's office furniture.

The authorities say that prospects for recovery of the remaining funds are dim, and Pepe's prospects appear equally dark.

The CFTC has turned over its records on the heating-oil scheme to the U.S. Attorney's Office for New Jersey. Donald Fay, an assistant U.S. attorney in the office's frauds section, would not comment on whether criminal charges would be filed in the case.

As for the other Republic employes, one federal investigator says that many are on the phone right now, peddling some other sure-fire way to make "big money fast."

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. ROTH. I yield back the remainder of my time.

Mr. LUGAR. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1377), as modified, was agreed to.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1378

Purpose: To amend the Commodity Exchange Act to reduce fraud and improve the administration of such act, and for other purposes.

Mr. ROTH. Mr. President, I send an amendment to the desk.

THE PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Delaware (Mr. ROTH) proposes an unprinted amendment numbered 1378.

Mr. ROTH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 101, strike out lines 11 and 12, and insert in lieu thereof the following:

"(6) by adding at the end thereof the following new paragraphs:".

On page 101, line 17, strike out the two periods and the quotation marks and insert in lieu thereof "; and".

On page 101, between lines 17 and 18, insert the following:

"(11) to establish and from time to time fix the amount of reasonable fees and charges for registrations under this Act and

renewals thereof, for filing reports with the Commission, for processing reparations claims, and for other regulatory duties and services performed by the Commission in accordance with this Act or a rule, regulation, or order of the Commission.".

On page 111, beginning with line 23, strike out all down through line 15 on page 112 and insert in lieu thereof the following:

"TRANSACTION FEES

SEC. 31. (3) The Commodity Exchange Act (7 U.S.C. 1 et seq.) is amended by adding at the end thereof the following new section:

TRANSACTION FEES

"SEC. 21. (a) (1) Except as provided in subsection (b), each contract market and board of trade licensed by the commission shall remit to the Treasury of the United States, by November 1 of each year, a fee in the applicable amounts prescribed in paragraph (2) for each contract for the purchase or sale of a commodity for future delivery and for each commodity option subject to section 4c entered on or subject to the rules of the contract market or board of trade during the preceding fiscal year.

"(2) The amount of the fee required to be remitted to the Treasury pursuant to paragraph (1) is—

"(A) 12 cents for each contract or option referred to in paragraph (1) made or executed for the account or benefit of a person who is not a member of the contract market or board of trade or of a registered futures association; and

"(B) 5 cents for each contract or option referred to in paragraph (1) made or executed for the proprietary account (as defined by the Commission) of a person who is a member of the contract market or board of trade or of a registered futures association.

"(b) Each person who grants a commodity option pursuant to section 4c (d), or who is engaged in the business of offering a leverage transaction pursuant to section 19, relating to standardized contracts for certain commodities, shall remit to the Treasury of the United States, by November 1 of each year, a fee of $3 for each such option granted or leverage contract entered into by such person during the preceding fiscal year.

"(c) A person who remits a fee to the Treasury pursuant to subsection (a) or (b) shall provide written verification of the payment of such fee to the Commission.

"(d) If in any fiscal year the Commission determines that the total amount of the fees remitted to the Treasury pursuant to this section for the previous fiscal year exceeds the amount of funds appropriated to the Commission for such year, the Commission shall be rule, regulation, or order, suspend the requirement to remit fees in the current fiscal year for such period as the Commission determined fees would have otherwise been remitted in an amount equal to the amount by which the fees remitted in the previous fiscal year exceed such appropriated funds. No fees shall be required to be remitted under this section for transactions effected during the period the fees have been suspended. At the conclusion of the suspension period, the obligation to remit fees under this section shall resume.

"(e) Notwithstanding any other provision of this section, the Commission, after notice and opportunity for hearing, may by rule, regulation, or order, reduce, suspend, or waive the fees or any portion thereof required to be paid by any person under this section upon a finding that the action is necessary to prevent or correct any significant adverse effect on a market or person which would be caused by the fees or which has resulted from the imposition of the fees.".

(b) The Commodity Futures Trading Commission shall create an advisory committee pursuant to the Federal Advisory Committee Act (5 U.S.C. App. 1 et seq.) to advise the Commission regarding the fee system provided for in section 21 of the Commodity Exchange Act. The committee shall be comprised of persons materially affected by the operation of such section. The committee shall (1) advise the Commission on the effectiveness of such system, (2) consult with the Commission regarding actions under subsection (d) of such section, (3) prepare a report containing the committee's evaluation of such system and its recommendations for improving such system, and (4) perform such other duties and functions as the Commission may prescribe. The report, together with the views and recommendations of the Commission shall be submitted to the Committee on Agriculture of the House of Representatives and to the Committee on Agriculture, Nutrition, and Forestry of the Senate no later than June 30, 1985. The Committee shall cease to exist after such date.

(c) Section 26 of the Futures Trading Act of 1978 (7 U.S.C. 16a) is repealed.

(d) This section and the amendments made by this section shall apply to fiscal years beginning after the date of enactment of this Act.

Mr. ROTH. Mr. President, I offer this amendment on behalf of myself, Senator RUDMAN, who played a very key role in the development of this amendment; Mr. PROXMIRE, Mr. STEVENS, and Mr. MURKOWSKI.

This amendment deals with the concept of user fees. This topic was covered extensively in the CFTC's original proposal. Despite the Commission's support, however, the Senate Agriculture Committee chose to delay the adoption of user fees at this time.

We are proposing this amendment simply because we are unable to find any justification for the general taxpayers to continue to shoulder the cost of the special benefits conferred by the CFTC on the commodity industry. The fees which we are proposing, that is, 6 cents for members of a self-regulatory association or exchange and 12 cents for nonmembers, are insignificant when compared to other costs associated with trading in the futures market. Under this proposal, fees will be charged to commodity traders for each side of a commodity trade. The fees will go to the General Treasury to offset the funding of the CFTC. In this way, commodity traders will assume the primary responsibility for the regulation of this industry.

The concern has been raised that user fees would threaten the newly established self-regulatory agency, the National Futures Association, and should, therefore, be delayed until such time as the NFA becomes functional. In fact, the differential fee for members and nonmembers should have the opposite effect, acting as a catalyst for membership with the NFA.

Furthermore, experiences in the securities industry, which is in many ways similar to the commodities industry, indicate that transaction fees will have little, if any, negative effect upon membership in the NFA. Under current law, securities brokers and dealers must pay for the operations of the National Association of Securities Dealers (NASD), the only national securities association registered with the SEC. This fee requirement does not appear to have hampered NASD membership.

The fee that we propose is also inconsequential when compared to other fees that a trader pays in these markets. A fee of about $2 is paid to the exchange for floor execution of each trade; a commission of $50 or more is paid to the brokerage firm; and deposits made by the trader range from a few hundred dollars to several thousand dollars for each and every contract. An additional fee of a few pennies, as we propose, would hardly be noticed. As the distinguished Senator from California, Senator HAYAKAWA, has said, the fee proposed is "less than the cost of a postage stamp."

This amendment does not, as its critics contend, have a negative impact upon the agriculture industry. In fact, in addition to the support of the CFTC this amendment is supported by the American Farm Bureau Federation, the Grange, and the Cattlemens Association.

In consideration for any concerns, however, we propose to allow the Commission to create an advisery committee, if a significant adverse effect upon a market or person is shown to exist.

The amendment also includes a provision authorizing the imposition of service fees. This provision would permit the CFTC to generate funds for its operations by implementing reasonable fees and charges for the functions from which the commodity industry directly benefits: Registration, auditing, reparations, and contract approval. This provision would clarify and enhance existing authority to impose such fees and is expected to generate several million dollars in revenue to offset expenses by the agency.

I urge favorable consideration of these amendments by the Senate.

At this time, I yield to my distinguished colleague, Senator RUDMAN.

Mr. RUDMAN. I thank the Senator from Delaware.

It is my understanding that there are 20 minutes on this amendment, and we have about 18 minutes remaining. May I be yielded about 5 minutes?

Mr. ROTH. I yield.

Mr. RUDMAN. Mr. President, in the short period of time available to me to discuss the issues relating to a CFTC trading fee. I should like to discuss the objections that have been raised by the Agriculture Committee in its

report. I support the concept of user fees, particularly where the beneficiaries of an activity are an identifable group. We have that situation in the futures industry. Not only are the beneficiaries a readily identifiable group, they are also largely within the industry itself, an industry which has continued to grow and prosper despite a recession and economic stagnation. The trading fee is simply a method to assure adequate regulation of that growing industry. It is similar to the fee that the SEC has imposed for nearly 50 years. I find the suggested transaction fee very reasonable.

Instead of approving the CFTC's recommendation, the committee has recommended that the CFTC conduct another study. This is suggested even though the CFTC's 6-to-12-cent fee is the product of a study authorized by Congress in 1978. At the time, the CFTC was directed to "develop and implement" a plan of reasonable fees to cover the costs of regulation. Four years later, the CFTC has offered a reasonable plan, supported by the administration, yet the Agriculture Committee suggests that we wait 2 more years. I wonder if 6 years will improve upon a study which has already taken 4 years.

One of the specific points that the committee would like the CFTC to address in the new study would be the effects of the trading fee on market liquidity. My immediate response to the suggestion is that the best way to judge the effect on liquidity is to test the fees. Obviously, that was what the CFTC had in mind since they address the problem in their proposal. Under the CFTC proposal, the CFTC could waive or suspend the fee if any adverse effects were noticed. This provision responds to any potential liquidity problems, and the issue need not be addressed in a further study.

The Agriculture Committee also recommends that the CFTC study the effect of a 6-to-12-cent fee on farmers, processors, and other hedgers. The effect is obviously unknown, and I doubt whether any two economists would ever agree on an answer. However, the committee's position is questionable given that the National Farm Bureau, the Grange, and the National Cattlemen's Association, representing 3 million producers of farm products, are all supporting the amendment. If they do not foresee a need for further study, it certainly appears unnecessary for us to do so at this time.

The committee has also expressed a fear that the trading fee would discourage support for the industry's fledgling, self-regulatory organization, the National Futures Association. This is based upon the industry's assertion that the fee would displace funds that would otherwise go to the NFA. I doubt very much whether the small fee recommended by the CFTC would have such a drastic effect, and I certainly do not think that the trading fee obviates the need for the NFA. At the same time, I do not believe that anyone would suggest that the NFA will assume so large a role that the important functions provided by the CFTC would no longer be required. In fact, the NFA is expected to assume only registration and testing functions. No doubt, we should encourage such activities, but let us not forget that the requisite centralized regulation and enforcement will remain with the CFTC.

I do not want to take additional time. However, in closing, I do want to remind my colleagues that the amendment is strongly supported by the administration. In fact, the President intends to veto the bill unless the user fee plan is adopted. That is the understanding I have. It is also strongly endorsed by the present Chairman of the CFTC, who, as many Senators are aware, is particularly knowledgeable in this area. Finally, it is important to understand that consumers are the beneficiaries of this amendment. Consumers bear the burden of inadequate Federal regulation and enforcement, and it is the consumer we must protect today by insuring sufficient funding for the CFTC.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. LUGAR. Mr. President, I yield myself 5 minutes on this amendment. My understanding is that there is a 40-minute time limit on this amendment, 20 minutes to a side.

The PRESIDING OFFICER. The Senator is correct.

Mr. LUGAR. Mr. President, this amendment causes great difficulty to this Senator simply because we have discussed the points made by the able Senators from Delaware and New Hampshire at some length in the subcommittee hearings and in the full deliberations of the committee and the effects of a user fee are indeed unknown. The incidence of the fee is difficult to judge. Indeed, we had testimony from producers that the fee would ultimately fall upon them. We had testimony from traders that the fee could disrupt trading and make the markets less perfect in their operation.

Indeed, we have the very strong argument from the industry itself that, with the founding of the National Futures Association, self-regulation would take place at great expense to the member firms and those who are involved in making these strong exchanges work. Indeed, many millions of dollars will be devoted to this and the NFA is already underway with apparent success.

Mr. President, our dilemma, I think, comes down to this point, and I quote from a letter written to me by David Stockman, Director of the Executive Office of the President, Office of Management and Budget, on March 30, 1982. He says:

> DEAR DICK: This is to advise you of our strong concern over the failure of the Senate Subcommittee on Agricultural Research and General Legislation to include this Administration's user charge proposal for the Commodity Futures Trading Commission (CFTC) in the bill as reported out of your subcommittee.
>
> This Administration views this proposal as an essential part of its overall budget strategy. We see absolutely no justification whatsoever for the general taxpayer to shoulder the cost of the special benefits conferred upon the commodity futures market by the programs of the CFTC.

Mr. President, here is unhappily the critical paragraph.

> For the foregoing reasons, I must advise you that the Administration could not support enactment of the CFTC reauthorization bill without a user charge provision which would be effective upon enactment.
>
> Accordingly, I would urge you to reconsider the action of your Subcommittee and concur with the Administration's proposal.
>
> Sincerely,
>
> DAVID A. STOCKMAN,
> *Director.*

Mr. President, we did carefully consider that letter. I brought it immediately to the attention of the subcommittee members and the chairman and the ranking minority member of the full Agriculture Committee.

It was the feeling of the committee during the markup—and no vote has been taken on this subject, no Senator has voted in the subcommittee or in the full committee—and it was clearly the consensus of the committee and the subcommittee that the call for the user fee was not justified on the basis of the evidence that we had heard. At least that was the consensus that I gathered as we visited around the table.

Mr. President, I am convinced that, without a user fee, indeed the President will veto this legislation, and this gives great pause for each one of us who are advocates of CFTC and who believe that this particular agency has a very important role to play.

Clearly those who are most involved in the industry do not want the fee. They believe they can control their own affairs and perhaps even are willing to take their chances with regard to the veto.

Mr. President, I must say in all responsibility I take the President seriously on this question, and I am hopeful that my colleagues will vote in favor of the amendment as offered by the Senator from Delaware and the Senator from New Hampshire so that we can proceed to conference with this user fee in our particular package.

I have no idea of its fate as we meet in conference. I am concerned without at least an affirmative vote in this body it will not be a conferenceable

item, and at this very late hour reauthorization of CFTC might fail.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. HUDDLESTON. Mr. President, I yield myself such time as I may require.

Mr. President, as the distinguished Senator from Indiana has indicated, this was one of the most difficult issues that we confronted during the consideration of the pending bill. We did have strong recommendations from those representing the Commodity Futures Trading Commission and the administration that we impose user fees at this time. We likewise had strong representations and recommendations from others, principally in the commodity industries, who argued just as strongly that this was not the appropriate time. And the two speakers preceding me have outlined the general arguments used on both sides.

What the committee did, of course, was not to follow the course recommended by either side. This in itself indicates to me that we probably took the right course.

But since no one was really able to give an indication to the committee of what the impact of user fees would be on market liquidity, on the establishment of the National Futures Association that is going to exercise some of the regulatory responsibility; the committee itself decided that what the better course of action would be to assess this potential impact and then come back to give the matter thorough consideration based on that assessment.

It has been suggested that studies have already been made, and that is absolutely true.

But we are strong believers—I think the Commission itself is; I think the industry is—that self-regulation is a desirable adjunct to Federal regulatory efforts.

If we are going to have the degree of self-regulation that can be accomplished and ought to be accomplished in this particular field, which is somewhat complex, then I think we have to give the industry association the opportunity to get itself established, to establish its operating procedures, and to demonstrate what it can, in fact, do in this particular area.

We do not know, for instance, how much of the regulatory load, how much of the actual expenses of the CFTC, might be shifted to the industry's own association.

So with these things still somewhat in doubt, it appears to me that the committee did take the proper course of action by including in the bill provisions for the conduct of a study with a date certain, the date certain being January 1, 1984, for its completion. The study will develop the kind of information that is required to make an intelligent decision on this issue.

Now, something has been made of the prospects that without user fees this legislation may be vetoed. Well, I do not believe the Congress of the United States should enter into its deliberations and make decisions on policy issues more worried about a potential veto hanging like the sword of Damocles over the institution than making the right decisions on the issues.

It seems to me that our responsibility is to do what we think is correct at a given time. The legislative branch has its responsibilities, the executive branch has its responsibilities. Sometimes they come into conflict. Sometimes they have to be resolved by further action within the Senate and House.

So I do not think we should be so concerned about that particular issue. I think we ought to do today what we think is in the best interests of the people of the country and will protect the markets and provide the right kind of regulatory machinery.

It has also been suggested that the only beneficiaries of regulation by the CFTC are those who are in the markets. That is not entirely true, of course. The whole purpose of the regulation, the operation of the CFTC, is to protect the general public. The general public does have benefits accruing to it from its operations.

The Commission is to study to determine who benefits from the services of the CFTC, to what extent should they pay for the services, and to what degree is this a service to the general public, which the general taxpayers should support.

These things have not been determined. I think the course that has been selected by the committee is the proper way to go, and I would urge that we reject the imposition of user fees at this point and reject the amendment by the Senator from Delaware.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HELMS. Mr. President, the Senator from Kentucky has stated the case very well. What he has said—and I agree with him—is that this is an idea whose time has not quite come.

Mr. President, the Committee on Agriculture, Nutrition, and Forestry carefully considered a transaction or user fee proposal during the course of 5 days of hearings on the Futures Trading Act of 1982, as well as during the subcommittee and full committee markup of the bill. The proposal examined at that time is similar to the one presented here.

It became apparent during those proceedings that the imposition of a user fee at this time could seriously damage the fledgling National Futures Association, the self-regulatory organization recently formed by the commodities industry and approved by the Commodity Futures Trading Commission. The testimony of various witnesses revealed that the people who will have to pay this "user fee" may well decline to pay both a compulsory fee to support the Commission's operations and another optional fee to support the operations of the National Futures Association.

It is true that this amendment would permit NFA members to pay a lower transaction fee in some instances than that paid by NFA nonmembers. This reduced fee provision, however, is effective only for trades executed for the member's proprietary account. It is not clear how broadly or narrowly the term "proprietary account" will be defined. Thus we cannot precisely say who will benefit from the lower fee or how wide this exception will be.

The Committee on Agriculture, Nutrition, and Forestry believes that survival of the self-regulatory organization is paramount, since self-regulation is preferable to an ever-expanding bureaucracy and since the National Futures Association has the potential to save the expenditure of substantial amounts of taxpayers' money in the future.

The user fee proposal also sets a dangerous precedent for the funding of regulatory agencies. The proposal is not a fee for service provision analogous to those fee systems in effect for grain and other commodity inspection, but is simply a mechanism to pay for the Commission's operations. As long as the fee system pays for most or all of the Commission's expenses, there is no real cost contraint on the Commission's regulatory operations and little or no congressional incentive to scrutinize the Commission's regulatory activities to see if they are necessary at all, or necessary in light of their cost. Consequently, it will be easier for regulatory agencies to get Congress to fund expansive regulatory programs when such funding mechanisms have been established.

Early in the Agriculture Committee's consideration of the user fee proposal, it became apparent that the proposal raised a number of questions that had not been resolved, and which could not be resolved before we had to act. It was unclear, for example, what impact this fee would have on farmers, processors, hedgers, and consumers. Some witnesses testified that the fee costs would be passed backward to producers in the form of lower prices for their produce, or forward to consumers in the form of higher retail prices. These witnesses also stated that the fee, if implemented, would raise the costs of both processors and hedgers.

Other witnesses stated that certain commodity professionals, such as independent floor traders, would be unable to pass the fee on and would have to absorb fees amounting to thousands of dollars per year. It further appeared that those with the discretion to pass the fee on would do so.

I believe it is fair to say that agricultural producers can ill afford to bear any additional costs, given the cost-price squeeze in which they find themselves.

The constitutionality of the user fee proposal before the Committee on Agriculture, Nutrition, and Forestry was also unclear. It was particularly unclear as to whether the proposal could be accurately characterized as a "user fee," since the proposal would impose two different fee levels for essentially the same activity. Under the proposal, persons trading futures contracts for a proprietary account will pay a fee of 6 cents per side, while all others will pay 12 cents per side for the same trading activity. If all persons engage in the same trading activity, how can we justify the fact that some persons will pay twice as much for the activity as others? Presumably, a differential in the charge would be constitutionally permissible if the charge were a tax, but the proposal has been characterized as a "user fee" and not as a tax.

If the proposal is a tax or revenue-raising measure, it must originate in the House of Representatives and not in the Senate. If it is included in this bill and is thought to be a tax by the House Ways and Means Committee, the House will presumably take no action on the bill.

A further concern with this proposal is that it is structured to raise the full amount of money appropriated for the Commission's operation. The proposal makes no allowance for the fact that some portion of the Commission's activity benefits the public generally. There has been no attempt made to quantify the portion of the Commission's activity which benefits the public generally, versus the portion which benefits the market participants. Until the public benefit is quantified and this proposal is modified to take the public benefit into account, market participants will be forced to fund services which should be properly funded through general tax revenues.

I would venture to guess that most Senators would have no objection to the futures industry bearing a reasonable share of the cost of regulating the futures markets. The proposal before us, however, would, in theory, require the industry to bear the full cost of regulating these markets.

This "user fee" proposal becomes even less attractive when we consider that the futures industry already bears a significant portion of the cost of regulating the futures markets through fees paid to fund the self-regulatory programs sponsored and administered by the commodity exchanges. These payments should be taken into account in some fashion when dividing the total regulatory burden between that which should properly be borne by the futures industry and that which should properly be borne by the public.

The proponents of this amendment have argued that the commodities industry can "afford" to assume the primary responsibility for funding the Commodity Futures Trading Commission. Mr. President, I believe that is a dangerous argument. The question should be, Is the fee proposal fair? Is it equitable? If the benefit to the public stemming from commodity futures regulation is not taken into account, I do not believe the proposal can be considered fair or equitable.

In light of these considerations, the Committee on Agriculture, Nutrition, and Forestry decided not to include a user fee proposal in S. 2109, but rather to require the Commission to conduct a study, to be completed not later than January 1, 1984, which would focus on, first, the effects of a transaction fee on market liquidity, second, the portions of the Commission's appropriation benefiting the general public versus the market participants of the Nation's commodity markets, and third, the incidence of such a fee, including its impact on producers, processors, manufacturers, and other hedgers.

The committee felt that the study undertaken over this 18-month period would shed light on these questions and would permit the administration to develop a user fee proposal that would not raise the questions and concerns raised by the current proposal. In this regard, the committee specifically limited the period of reauthorization to 2 years, to expire September 30, 1984, in order to force reconsideration of the user fee issue upon completion of the Commission study.

Few in this body are more supportive of fiscal integrity and responsibility than this Senator. In view of the problems inherent in this proposal, however, I believe some additional time is needed to study and work out the problems associated with this proposal.

Some say that this bill will be vetoed unless this user fee proposal is included. The Office of Management and Budget has stated that it cannot support the bill unless this user fee proposal is included. The administration has taken no further position on the bill. If the bill goes forward without the user fee provision, I will certainly work to persuade the President to sign the bill and I am sure many of my colleagues on the committee will do likewise.

The user fee amendment should not be attached to this bill, in view of the defects in it that I have pointed out. Thus, I ask my colleagues to join with me in rejecting this amendment.

I say again, Mr. President, there are many questions raised by the amendment. For example, it is not clear how broadly or narrowly the term "proprietary account" will be defined. Thus, I do not think we can precisely say who will bear the burden of the user fee or who will pay the lower rate.

There is also a question about the precedent for funding regulatory agencies. I think the committee ought to have the opportunity to hold further hearings on this issue. I will say to my friend, the sponsor of the amendment, that I am sure the committee will hold hearings immediately after we receive the Commission's report on its study of this issue, as called for in the bill.

There is also the question of the constitutionality of the user fee proposal. I say again, it was particularly unclear, at least to this Senator, as to whether the proposal may be accurately characterized as a user fee inasmuch as the proposal imposes two different fee rates for essentially the same activity.

For these reasons, and those which I have stated earlier, and with some reluctance, Mr. President, I join my distinguished colleague from Kentucky in recommending that this amendment not be approved at this time. I ask that the committee be given an opportunity to look into the questions which are here but which have thus far remained unanswered.

While many would not argue with the concept of the amendment, I do think we would be better served if the amendment were not included.

Mr. President, I yield to the distinguished Senator from Idaho (Mr. SYMMS).

Mr. SYMMS. Mr. President, I thank the distinguished chairman of the Agriculture Committee. I would like to say that I quite agree with his statement. I also agree with the Senator from Kentucky's statement.

When my good friend from Indiana states that the President might veto this bill if this new tax is not added, that is welcome news to this Senator. In the 10 years that I have been in Congress I have watched the evolution of the Commodity Futures Trading Commission. Primarily, since the time of its inception, the Commodity Futures Trading Commission has accomplished nothing more than being an imposition on the market.

The commodity exchanges themselves, the Board of Trade, the Mercantile Exchange, the exchanges in New York are very well regulated by the market itself. It is a myth for us to believe these markets are not regulated.

The Congress in the name of the consumer, has imposed very restrictive requirements for coming up with a new contract, keeping contracts off the market, for disposing of contracts, et cetera, which is actually very detrimental to the consumer. The industry is moving in the right direction to give the public confidence in the validity, the honesty, and integrity of these markets by establishing the National Futures Association.

I believe the National Futures Association, which is now being organized, should become the main regulatory agency regulating commodity futures trading. The Commodity Futures Commission should then become a tribunal of last resort to make settlements on issues that cannot be settled by the NFA.

It would appear to me that the Committee on Agriculture was quite right in its rejection of this new tax. Let us allow the establishment of the National Futures Association to continue and examine the effectiveness of the NFA after it has been given time to work.

I might make the point that the Congress has already had substantial influence over what is happening in the futures trading industry in the United States. With the passage of the 1981 Tax Act last year, another unfortunate thing happened. The Tax Code now treats differently the taxation of futures and futures transactions than other investments in any other part of our Tax Code. We established the mark to market system. I think if anyone checks the records he will find there is more trading in the nearby months and less trading in the far-out months. As a result liquidity has declined in many of these markets, which is detrimental to the farmers, detrimental to the timber interests, detrimental to the mineral producers, and to the people who use these markets for price discovery, and who sell into these markets to guarantee stability in their own respective industries.

Individuals and industries use those futures markets for stability in their costs and profits.

Because of the fact that we have already changed tax law last summer there is more trading in the nearby months and less trading in the far-out months because there is not a bias in favor of people holding a position for a longer time, which is necessary if the producer is going to have a market where he can sell into in future months. It is very detrimental to all of the farmers, the mineral producers, the timber producers, livestock, and so forth in this country to try to impose a new tax as is being suggested. I hope my colleagues will stay with the Committee on Agriculture, because I do believe it is in the consumers' best interest to not have this new tax added at this time on the transaction of these trades. I think it would be a mistake.

The money is not necessary. Within 2 to 4 years the Commodity Futures Trading Commission may be greatly reduced by becoming a tribunal of last resort to settle disputes when the futures association's own organization may not be able to take care of a problem that might arise.

So I urge my colleagues to vote down this new tax. It is going to end up on the people who we represent. I think it would be a mistake to put it on this bill at this time.

I yield the floor.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I yield myself 2 minutes on this amendment.

Mr. President, the statements made by the distinguished chairman of the Agriculture Committee and the distinguished ranking minority member correctly summarize the deliberations we have had and the case to be made for the NFA and the self-regulatory procedure.

But I want to simply point out, as the distinguished Senator from Idaho has raised the question, that in the event the President vetoes this legislation, the entire CFTC comes into jeopardy. I take that seriously, as I think each one of us does who has worked with this Commission.

I would not accept the judgment that somehow or other consumers, producers, or those involved in the industry will be better off without the Commission. As a matter of fact, in a responsible way, we must have the work of the Commission. We have a complex industry that is growing like gangbusters and will grow strong if we have the proper governance.

The point I am making is simply, without the user fee—and the amendment offered by the distinguished Senator from Delaware does satisfy that—we face a veto and, I think, uncertainty in terms of longevity of the Commission.

I yield the floor.

Mr. PROXMIRE. Will the Senator yield me 2 minutes in favor of the bill?

Mr. LUGAR. Yes, I am happy to yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, the issue on this amendment, which I enthusiastically support, by the Senator from Delaware and the Senator from New Hampshire, the issue in this is who is going to pay? After all, the problem we have here is a huge deficit. The problem we have is excessive Federal spending. And unless we have the courage to decide that people pay for what they get, and pay as often as possible directly, we are not going to make any progress in this direction.

We have a solid precedent here in that those who use the SEC, the Securities and Exchange Commission, pay for it. The taxpayer pays little for the SEC. Almost all of the cost is paid for by the users. That is exactly what the distinguished Senators from Delaware and New Hampshire and I would do. I am a cosponsor of this amendment.

The basic fee which would be set is a reasonable charge for a strong industry which has enjoyed a high growth rate and whose clientele is largely composed of affluent and sophisticated investors. Certainly, they can afford to pay it. These investors already pay sizable commissions to their brokers for the execution of trade. An additional 6 cents—that is what this is—will not make a great difference.

With the user fee structure in place, the CFTC would become nearly self-supporting. The agency's expenses currently stand at $19.9 million and are expected to rise to $22.9 million in fiscal 1983. Revenues from user fees have been projected by the CFTC at $19.3 million, which would come close to offsetting those expenses.

The CFTC is greatly in need of additional resources. While the commodities trading industry has prospered, its regulating agency has struggled with sharply limited budgets and a diminishing capacity to effectively fulfill its functions. The commodities industry derives a direct benefit from the activities of the CFTC, which promote the industry's health by encouraging investor confidence. It is reasonable and fair to ask this thriving industry to relieve the taxpayers of the primary responsibility for the CFTC's support.

I am delighted to support the amendment.

The PRESIDING OFFICER. Who yields time?

Mr. SYMMS. Mr. President, will the Senator yield?

Mr. HUDDLESTON. I yield such time to the Senator from Idaho as he may desire.

Mr. SYMMS. Mr. President, I will be very brief. I appreciate the comments of my colleague. I would have to agree somewhat with Senator Proxmire's statement. The CFTC, whether it really has done so or not, does give the appearance to the public that there is integrity of the futures industry.

However, in examining whether the CFTC has actually presented or settled a scandal, such as the potatoe scandal that occurred several years ago, it is very interesting that has done nothing to prevent or settle these scandals.

The exchanges actually work out these problems. The CFTC has only interfered with new contracts. The CFTC has done very little to serve the public interest.

It is fine with this Senator if the public somehow thinks things are better. Sometimes in this world in which we live, particularly in politics, the truth seems to be what the perception of the truth is and people mistakenly have more confidence.

To add a new tax, which will be put into the general revenues, based on the notion that we intend to finance an agency to regulate an industry which is regulating itself is ridiculous. The true regulator is the market itself—the invisible hand—which Adam Smith wrote about in 1776 in the Wealth of Nations.

There is no place where there is more of a market than on the floor of these exchanges where every transaction has a buyer and a seller, voluntarily, on each side of the trade. These exchanges are an expression of the free market system.

I know many of my colleagues have had the opportunity to visit those exchanges. For those of you who have not, I would invite you to do so so you can see for yourselves how they operate.

I think it would be a mistake to add a new tax. This is simply a new tax which will contribute to a growing bureaucracy which we should be trying to reduce.

I yield the floor.

Mr. ROTH. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROTH. Mr. President, I yield 2 minutes to the Senator from New Hampshire.

Mr. RUDMAN. Mr. President, I just want to make two observations. First, I do not know the precise figure, but let us understand what we are talking about. These contracts—and this is a per contract tax or user fee, call it what you want—I understand range from $1,500 to $3,000. We are talking about a user fee on that transaction of 6 cents or 12 cents, depending on whether or not that particular member belongs to NFA.

The second point I wish to make is in response to the comments made by my friend from Idaho. I wish the Senator from Idaho would read the transcript of hearings before the Senate Permanent Subcommittee on Investigations, because there are people in this industry that would steal a hot stove—and they have.

We have had widows and older folks and people victimized by people in this industry. Granted, a small percentage of this industry.

Mr. SYMMS. Did the Commodity Futures Commission stop it from happening? I say to my good friend, the Senator from New Hampshire, that they have not.

Mr. RUDMAN. If the Senator will let me finish, I will answer for him.

Mr. SYMMS. They have not stopped it.

Mr. RUDMAN. Mr. President, these people were not prosecuted because the CFTC neither had the revenue, which this Congress has not appropriated, nor, in my opinion, the law to enforce against these fraudulent operators.

Earlier today, the committee accepted an amendment offered by the Senator from Delaware and the Senator from New Hampshire which gives State attorneys general the power to enforce their securities laws. And anyone who believed that an industry involving billions of dollars of on and off exchange transactions will be free from fraud and thus able to self-regulate is living in a different world.

The CFTC does not need to regulate 90 percent of these people, but the 10 percent are giving this Nation a bad time, defrauding people of hundreds of millions of dollars. And I do not think that a veto, which results in the end of the CFTC, is in the consumers interest.

There is no basis in fact, whatsoever, from any of our hearings to draw that conclusion. I think the record ought to show that before the debate concludes.

I thank the Senator from Delaware.

Mr. SYMMS. The CFTC does not concentrate its efforts on protecting the consumer from the "boiler room" operations. The CFTC devotes most of its time regulating the exchanges which are probably the most successfully self-regulated bodies in the world.

Furthermore, the revenues that would be collected from this tax would not necessarily be used to finance the CFTC. These revenues would be placed in with the general revenues and used for general purposes.

The PRESIDING OFFICER. Who yields time?

Mr. HUDDLESTON. Mr. President, just two additional points.

First of all, the Senator from New Hampshire has indicated that the proposed fee is relatively small compared to the average value of the trades made on the markets, and that therefore, the fee would be a relatively minor matter. But the fact is that it is not the size of the contract, it is the number of contracts involved, that is important.

There are about 100 million contracts traded each year and an individual trader may very well find his total fee to be quite a substantial sum of money.

The second point to be made is that he is concerned about the Commission having the resources to deal with the problem they are confronted with.

The user fee has absolutely nothing to do with that. This user fee will not go to the CFTC. It goes into the General Treasury of the United States to be apportioned out as this Congress decides. So there is absolutely no assurance or no reason to believe that the imposition of a user fee would result in a higher appropriation for the Commission for the carrying out of its responsibilities.

Mr. President, I do not see any other Members on this side of the aisle who are prepared to speak on this issue. How much time remains?

The PRESIDING OFFICER. The proponents have 11 minutes and 23 seconds. The opponents have exhausted their time.

Mr. HELMS. Mr. President, I have not worked out a head count on this measure, but I do want to say to the Senator from Delaware and the Senator from New Hampshire that if they do not prevail, I will pledge to them that the Committee on Agriculture will have immediate hearings on this question, whether it be in the lame-duck session or after the first of the year.

I would ask the Senator from Indiana if he would yield to the Senator from Kansas.

Mr. LUGAR. I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, I commend my colleagues. I happen to not agree with the Senator from Delaware on this particular question. The administration did request that we impose user fees. There were extensive hearings in the subcommittee chaired by Senator LUGAR. There was extensive consideration by every member of the Senate Agriculture Committee. In fact, I asked the question whether it was a fee or a tax. I did not have the Joint Committee on Taxation review this to see whether the Finance Committee or the Committee on Agriculture ought to have jurisdiction. Just because you call it a fee does not make it a fee. It seems to me it ought to be called a tax.

We indicated in the committee hearings that if we extend this reauthorization for just 2 years, not the 4 years the House extended it, we could allow enough time for the CFTC to come back with a study of user fees by January 1, 1984, on what would be a fair application of user fees, and for the industry to see whether the National Futures Association would be able to police itself to do some self-regulation.

It is not our reluctance to take on the futures industry. We did that last year in the Senate Finance Committee in the tax bill. We called it straddle legislation. It cost that industry about $1.7 billion over the next 5 years when it is all done. We are not opposing it for any reason except we want to find out first of all whether it will work; second, who has the appropriate jurisdiction; and third, what will the National Futures Association be able to accomplish.

I believe it has been made clear by the chairman of the committee, Senator HELMS, and others, that we will insist on the 2-year provision. It will

force us to come back and take a look at the issue.

In my view, 4 years is too long. If the bill comes back from conference with more than 2 years, the Senator from Kansas will try to defeat the conference report. If we keep it at 2 years, giving them this opportunity for study, that would be satisfactory. Otherwise, I believe we should defeat the amendment.

Mr. ROTH. Mr. President, I will be very brief. I just want to point out that the deficit of the Federal budget is with us today. If there is an equitable manner of trying to raise revenue, it is to require those who benefit to pay a user fee.

I would just like to point out that in trying to close this deficit earlier this year when we were dealing with taxes, we did not say to wait 2 years, to wait 2 years to the telephone company when we tripled the tax on them, or in other areas. The problem of the deficit is with us now.

I would point out that this proposal has the support of the administration, who said they will veto the bill if this is not included. It has the support of CFTC, the American Farm Bureau, the Grange, and the Cattlemen's Association.

Mr. President, I am ready, willing, and able to yield back the remainder of my time.

Mr. LUGAR. How much time remains, Mr. President?

The PRESIDING OFFICER. The proponents have 10 minutes and the opponents have used up their time.

Mr. PERCY. Mr. President, I have two amendments which I believe there is no opposition to which I would like to offer at this time.

Mr. LUGAR. I will ask the Senator to forebear for a moment. We are about to yield back time for a vote on this amendment.

● Mr. DOMENICI. Mr. President, today I rise in support of the user fee amendment to S. 2109, a bill to extend the Commodity Exchange Act.

This bill extends the funding authorization for the Commodity Futures Trading Commission through September 30, 1986, and updates the Commodity Exchange Act to provide those changes needed in the regulatory and enforcement authority of the Commission. It is a complex piece of legislation that is the result of many days of hearings during which the Congress heard testimony from the CFTC, Government agencies, leaders of the commodity industry, representatives of State security commissions, and members of the public at large.

With a few exceptions this bill is the product of exceptional work by the Senate Agriculture Committee. One of those exceptions is the legislation lacking user fees.

The Commodity Futures Trading Commission was established in 1974 as an independent regulatory agency to oversee the trading of commodity futures contracts. At that time the trading of futures was regulated by the Department of Agriculture's Commodity Exchange Authority. Because some nonagricultural commodity futures were traded but not being regulated, Congress recognized that some uniform regulation of all future trading would be required. Congress decided that because the role of futures contracting was expanding in the sense of both the domestic and international economy, a new independent regulatory agency was required and the CFTC was devised.

Time has shown that congressional action a correct one. Since 1974, there has been a tremendous growth in futures trading and along with that growth has come an awareness by the public and business community that shows a confidence in both the integrity of the industry and the regulatory process that guides it. During the past 5 years, trading in futures contracts rose from 37 million contracts to 100 million annually, or almost triple the size.

The term "commodity" has expanded from domestic and international agriculture products to include a variety of financial instruments, precious metals, and "natural resources" like petroleum.

Included among the topics debated during the public hearings was whether to impose user fees on the futures trading industry and what impact such fees would have on the industry's program to set up a new self-regulatory body called the National Futures Association (NFA) which was formally designated on September 22, 1981.

As I understand the situation today the cost of the CFTC is roughly about $20 million. As I understand the pending amendment it would impose a very small transaction fee on futures commodity transactions. Because of the large number of transactions, this small fee would raise almost the amount of money needed to run the CFTC.

The entire issue here is not what a user fee is. It is an issue of dollars made and lost each day in the futures markets. And for us to say that somehow a 6 cents per contract charge may hurt the market and that we should study this issue does not make sense. Recently we increased the tax on telephones by a few cents. No one demanded studies on the impact of that law. If this user fee amendment is not adopted the American taxpayer will be the loser and the big broker houses will be the winners. A study by the Small Business Committee found out that out of 1,027 traders some 80 made $100 million of a $155 million in profits over a 16-month study period.

Somehow opponents of this amendment indicate that the CFTC should be funded by the Treasury because the CFTC protects the general public. They say this as though each and every citizen uses the commodity markets. The plain fact is that only a very small proportion of our population uses the Commodity Exchanges. I do not know of many average middle class citizens in my State that use it or even understand it. Others here will argue that somehow this will impact on the farmers and ranchers of my State. I will say to those that the Commodity Exchanges have not helped the price my farmers received for their wheat this year and many of my ranchers have asked that the Commodity Exchanges no longer be allowed to offer cattle contracts.

So again I return to the question, Who will benefit if this amendment is not adopted? A very small group of commodity professionals who will continue to have their activities paid for by millions of Americans.●

Mr. DIXON. Mr. President, the Committee on Agriculture, Nutrition and Forestry of the U.S. Senate, after thoughtful and careful deliberation, unanimously agreed that user fees should not be imposed on trade conducted on a commodity market until the organization and development of the National Futures Association can be examined and assessed. The committee recognized that the National Futures Association, a statutorily sanctioned self-regulatory association approved by the Commodity Futures Trading Commission, should be given an unhindered opportunity to function as envisioned. Consequently, the committee authorized the Commodity Futures Trading Commission to study the possible effects of user fees and report its findings to Congress by January 1, 1984.

Witnesses testified before the committee that the National Futures Association will assume responsibility for futures commission merchant audits, introduction of broker oversight and ethical standards, commodity pool operator, and trading adviser oversight and ethical standards, initiating sales practice reviews, overseeing option programs of FCM's, establishing registration and fitness standards for industry professionals, customer claim procedures, and professional standards of conduct. By imposing user fees at this time, the committee concurred that successful performance of the National Futures Association would be inhibited. Industry-commissioned studies reveal that the National Futures Association, if allowed to quickly assume its responsibilities, could save the Commodity Futures Trading Commission between $9.7 and $12 million in fiscal year 1983.

The committee concurred that the National Futures Association and the goal of effective self-regulation in the

futures industry could be jeopardized if forced to compete with the Commodity Futures Trading Commission for funding.

In consideration of S. 2109, the Office of Management and Budget referred to the regulation of the futures market by the Commodity Futures Trading Commission as a subsidized Government service, and suggested that the beneficiaries of the service should be required to bear the burden of funding those subsidized services. Congress, in creating the Commodity Futures Trading Commission, did so to regulate the futures market, not provide traders with a special service because: "transactions in commodities involving the sale thereof for future delivery are affected with a national public interest."

Traders already pay fees to exchanges for the opportunity to participate in the market and to the Commodity Futures Trading Commission for registration which is directly applicable to them. Before imposing user fees, the committee suggested that it is important to determine which services performed by the Commodity Futures Trading Commission are in the public interest and appropriately supported by the taxpayers and which, if any, should be supported by market participants.

Proponents of the proposed amendment to S. 2109 state that user fees will raise additional revenues for the Commodity Futures Trading Commission by charging those who trade on commodity markets. Traders presently pay fees to both the exchanges and the Commodity Futures Trading Commission. A successful National Futures Association, free from funding competition, can result in substantial savings for the Commodity Futures Trading Commission, and provide efficient and equitable self-regulation in the futures industry. The committee decision to defer imposition of user fees at this time should be adopted.

Mr. PERCY. Mr. President, I ask unanimous consent that I be recognized for the purpose of offering two amendments following the vote.

The PRESIDING OFFICER. The Chair will announce that there is an amendment pending.

Mr. HELMS. I ask unanimous consent that the Senator from Illinois be recognized for the purpose he stated immediately after the vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

All the time has been yielded back. The question is on agreeing to the amendment of the Senator from Delaware. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Connecticut (Mr. WEICKER), is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Connecticut (Mr. DODD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Montana (Mr. MELCHER), are necessarily absent.

I also announce that the Senator from Oklahoma (Mr. BOREN), is absent because of illness in family.

I further announce that, if present and voting, the Senator from Oklahoma (Mr. BOREN) and the Senator from Montana (Mr. MELCHER), would each vote nay.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 27, nays 66, as follows:

[Roll Call Vote No. 385 Leg.]

YEAS—27

NOT VOTING—7

Bentsen	Kennedy	Weicker
Boren	Matsunaga	
Dodd	Melcher	

So Mr. ROTH's amendment (UP No. 1378) was rejected.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HUDDLESTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PERCY. Mr. President, I want to take this opportunity to commend Senator HELMS (Agriculture Committee chairman), Senator HUDDLESTON (ranking member), Senator LUGAR (subcommittee chairman), and Senator BOREN (ranking subcommittee member) for their work in drafting the Futures Trading Act of 1982.

I have examined both the committee's bill and its report (Rept. No. 97-384) and can see the large amount of work which these gentlemen and the other members of the Agriculture Committee put into this piece of legislation.

I believe it is important to press ahead with enactment of the jurisdictional agreement forged by CFTC Chairman Johnson and SEC Chairman Shad. This agreement has been carefully worked out by the respective chairmen, has the support of the Senate Banking Committee and wide support within the securities and commodities industries. I note with pleasure that this bill incorporates the CFTC portion of the agreement. I believe this jurisdictional agreement deserves the full support of this Senate.

I have also had an opportunity to review those portions of the bill and the committee report which deal with the issues of user fees and the role played by the States in commodities regulation. I must say, Mr. President, that I understand and support the Agriculture Committee's position with respect to the user fee question because I believe this position is reasonable in light of the lack of quantification of the public against private benefit flowing from the CFTC's regulatory program.

The study of the user fee issue will permit the Agriculture Committee to resolve the questions of the incidence of the fee and its effects on farmers, processors and other hedgers. In addition, the study will permit the quantification of the public against the private benefits flowing from the CFTC's regulatory efforts.

The 2-year period of reauthorization will permit the Senate to reconsider the user fee issue after these questions have been resolved and a consensus emerges as to what the Senate should do.

Consequently, I will oppose the imposition of a user fee at this time and urge my colleagues to do likewise.

The role to be played by the States in the regulation of futures trading and "off-exchange" instruments was recently examined by both the Senate Agriculture Committee and the Senate Permanent Subcommittee on Investigations, on which I serve. Both examinations dealt with the issue of off-exchange "boiler room" fraud.

After examining the legislative proposals of both the Agriculture Committee and the Permanent Subcommittee on Investigations, I have concluded that those proposed by the Agriculture Committee will take care of the off-exchange fraud problems highlighted by the permanent subcommittee in its investigation. I reached that conclusion in light of the following:

The "open season" provisions in the Agriculture Committee bill (S. 2109) are targeted to reach the off-exchange "boiler room" fraud on which the per-

manent subcommittee focused in its investigation.

The Agriculture Committee has included provisions in its bill which provide for a free flow of investigative information from the CFTC to the States and vice versa. This information will be very helpful to the States in combating this fraud.

The Agriculture Committee bill extends the reach of the Commodity Exchange Act to sales personnel and consultants who were not previously required to register with the CFTC.

The Agriculture Committee bill erects a network of statutory bars to registration to keep unfit persons out of the commodities industry.

The Agriculture Committee bill extends the criminal penalties in the Commodity Exchange Act to reach individuals not previously subject to these penalties.

Thus, it is my judgment that the open season and other provisions in the Agriculture Committee bill adequately deal with the situations highlighted by the Permanent Subcommittee on Investigations. Thus, the adoption of the Roth-Rudman amendments on State jurisdiction are not warranted.

Consequently, I will oppose the State jurisdiction amendments which will be offered and will urge my colleagues to do likewise. The current bill adequately meets these issues; further regulatory action in this area is simply not warranted.

UP AMENDMENT NO 1379

(Purpose: To modify the provisions of the bill relating to the approval or disapproval of changes in or additions to the rules of a registered futures association)

Mr. PERCY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1379.

Mr. PERCY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 111, strike out line 22 and insert in lieu thereof "or the regulations of the Commission. If the Commission does not approve or institute disapproval proceedings with respect to any rule within one hundred and eighty days after receipt or within such longer period of time as the registered futures association may agree to, or if the Commission does not conclude a disapproval proceeding with respect to any rule within one year after receipt or within such longer period as the registered futures association may agree to, such rule may be placed into effect by the registered futures association until such time as the Commission disapproves such rule in accordance with this subsection.".

Mr. PERCY. Mr. President, this amendment provides important time limitations on CFTC review of futures association rules. Under the existing provisions of S. 2109 the Commodity Exchange Act would be amended to provide authority to a registered futures association to place into effect its rules or rule changes 10 days following their receipt by the Commission, unless the association requests express CFTC approval or the CFTC determines on its own initiative to review the rule or rule change. However, S. 2109 would not put an explicit cap on the time available to the CFTC to complete its review.

In essence, under the amendment, the CFTC would have 180 days from the date of receipt of any futures association rule or rule change to finish its review of the rule and 1 year, from receipt of the rule, to initiate and complete a disapproval proceeding.

I believe this is an important and necessary amendment. In the past, contract market rules that have been submitted to the CFTC for approval have languished at the Commission for intolerable periods of time. Frequently, important self-regulatory measures have, as a result of this delay, had to be deferred or not ever been put into operation. The Commission has recognized this problem and recently has been somewhat successful in reducing the period of delay. Nevertheless, in recognition of the continuing and perhaps recurring problem in this area, the committee bill imposes time limitations on CFTC review and disapproval actions of contract market rules. Mr. President, since the National Futures Association—the industry-wide self-regulatory body that has been registered by the CFTC—is about to begin operations, restrictions are now needed on the time the CFTC may have for its approval or disapproval actions on futures association rules. The proposed amendment satisfies this need by providing time limitations on CFTC review of futures association rules, in a manner parallel to the provisions in the committee bill pertaining to contract market rules.

In all but the most unusual circumstances, CFTC review or disapproval of NFA rules should not take the full 180-day or 1-year period. In fact, the CFTC has stated that it will endeavor to expedite its consideration of NFA rules and believes that most NFA rules will be approved within at least 60 days. This expedited treatment is clearly necessary and appropriate. By encouraging expedited CFTC review and disapproval proceedings of futures association rules, the amendment would serve the overall congressional objective to insure maximum CFTC cooperation and consultation with NFA. This will enable the NFA to begin its self-regulatory mission as soon as possible.

Mr. President, this amendment is supported by the futures industry and I am not aware of any opposition to its adoption.

I urge my colleagues to support this amendment.

Mr. LUGAR. Mr. President, on behalf of the bill managers, I am happy to accept the amendment offered by the senior Senator from Illinois.

I note that the amendment is similar to a provision already in the committee bill dealing with contract market rules. I believe this provision will strengthen the National Futures Association and will help to insure its success.

I commend the senior Senator from Illinois for his interest in this very important piece of legislation.

I am prepared to accept the amendment.

Mr. HUDDLESTON. Mr. President, we accept the amendment on this side and yield back our time.

Mr. LUGAR. We yield back the remainder of our time.

The PRESIDING OFFICER. All time has been yielded back.

The question is on agreeing to the amendment.

The amendment (UP No. 1379) was agreed to.

Mr. PERCY. Mr. President, I ask unanimous consent that the name of my distinguished colleague, Senator DIXON, be added as a principal cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1380

(Purpose: To modify the provisions relating to the registration of futures associations)

Mr. PERCY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 1380.

Mr. PERCY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 101, strike out lines 13 through 17 and insert in lieu thereof the following:

"(10) to authorize any person to perform any portion of the registraiton functions under this Act, in accordance with rules, notwithstanding any other provision of law, adopted by such person and submitted to the Commission for approval pursuant to section 17(j) and subject to the provisions of

this Act applicable to registrations granted by the Commission.".

On page 110, line 20, strike out "and".

On page 111, line 22, strike out the second period and insert in lieu thereof a semicolon.

On page 111, insert between lines 22 and 23 the following paragraph:

(5) by adding at the end thereof the following new subsection:

"(o) The Commission is authorized to require any futures association registered pursuant to this section to perform any portion of the registration functions under this Act with respect to each member of the association other than a contract market and with respect to each associated person of such member, in accordance with rules, notwithstanding any other provision of law, adopted by such futures association and submitted to the Commission for approval pursuant to section 17(j) and subject to the provisions of this Act applicable to registrations granted by the Commission. In performing any Commission registration function authorized by the Commission under section 8a(10), this section or any other applicable provisions of this Act, a futures association may issue orders—

"(1) to refuse to register any person;

"(2) to register conditionally any person;

"(3) to suspend the registration of any person;

"(4) to place restrictions on the registration of any person; or

"(5) to revoke the registration of any person.

Any person against whom such an order has been issued, and against whom such order is the final decision of such futures association, may petition the Commission to review the decision. The Commission may on its own initiative or upon petition decline review, grant review and affirm, set aside, or modify such an order of the futures association, and the findings of the futures association, as to the facts, if supported by the weight of the evidence, shall be conclusive. Unless the Commission grants review, under this section, of an order concerning registration issued by a futures association, the order of the futures association shall be considered to be an order issued by the Commission. Nothing in this section shall affect the Commission's authority to review the granting of a registration application by a registered futures association that is performing any Commission registration function authorized by the Commission under section 8a(10), this section, or any other applicable provisions of this Act. In the event that a person against whom a futures association has issued a registration order under subsection (1) petitions the Commission to review that order and the Commission declines to take review, such person may file a petition for review with a United States Court of Appeals, in accordance with the requirements of section 6(b) of this Act.".

Mr. PERCY. Mr. President, I ask unanimous consent that the name of my distinguished colleague from Illinois, Senator DIXON, be added as a principal cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, the amendment I am offering seeks to facilitate the assumption of certain CFTC registration functions by the National Futures Association. I believe this amendment is in the best interest of the futures industry and the Commodity Futures Trading Commission and I urge my colleagues to support its passage.

Under existing law, the CFTC registers a wide variety of commodity professionals—futures commission merchants, floor brokers, associated persons, commodity trading advisers, and commodity pool operators. Under both S. 2109 and the House legislation, this class of registrants will be expanded to include introducing brokers, associated persons of commodity trading advisers, and associated persons of commodity pool operators. In fulfilling its statutory registration duties to insure the fitness of all commodity professionals—a function one court has called the kingpin of the act's regulatory scheme—the CFTC performs a broad range of tasks with regard to registration applications, which include screening, processing, investigating, prosecuting, and adjudicating, at both the trial and appellate level. One of the most significant aspects of S. 2109 is that the bill contemplates removing this registration burden from the Commission and, ultimately, from the taxpayers.

Mr. President, NFA is eager to begin as soon as possible to assume at least a portion of the CFTC's registration functions. According to NFA's most recent schedule, it plans to be able to begin, on or about January 15, 1983, to conduct registration proceedings for all classes of CFTC registrants. NFA's intention to assume CFTC registration duties at such an early time bodes well for a complete assumption by NFA of that function, since every registered commodity professional, except floor brokers, must be a member of NFA in order to fulfill the 1978 congressional grant of authority to the CFTC to make membership in a registered futures association compulsory.

In order to facilitate this process, the amendment would make four basic changes or additions to S. 2109. First, the amendment would clarify that the exclusive procedures governing registration proceedings conducted by a registered futures association or any other person authorized by the Commission would be set forth in rules of the registered futures association or other authorized person submitted to the Commission for its approval. This will clarify that a registration proceeding conducted by a registered futures association or any other person authorized by the CFTC, in accordance with the procedural rules submitted to the CFTC, may not be subject to legal challenge on the ground that procedures contained in the Administrative Procedure Act or any other statute or regulation were not followed.

The second aspect of the amendment expressly provides for CFTC review of final registration decisions rendered by a futures association. The amendment would also make explicit that a futures association may take the full range of registration actions available to the Commission under the act and Commission regulations. In addition, the amendment provides a standard for CFTC review of futures association registration decisions that mirrors the standard for appellate review of CFTC registration decisions under the existing scheme.

The third aspect of the amendment covers CFTC oversight of registrations granted by a futures association. This provision would make it clear that the CFTC's authority to review the granting of a registration application by a futures association is not affected in any way by the provisions of new section 17(o) of the Commodity Exchange Act.

The fourth and final aspect of the amendment would comport with basic notions of due process of law by providing any person against whom a futures association has issued a final registration decision and the Commission has declined to review the merits of such decision, to petition an appropriate U.S. court of appeals for appellate review of the decision under the procedures in section 6(b) of the act that govern appellate review of CFTC registration decisions. This aspect of the amendment will, therefore, merely make explicit in the statute that the right to judicial review from registration decisions will not be affected by authorizing a futures association to perform these functions.

Mr. President, I believe this amendment is needed in order to allow National Futures Association to begin to assume CFTC registration responsibilities as soon as possible. This amendment is strongly supported by the futures industry.

I urge my colleagues to support this amendment.

Mr. LUGAR. Mr. President, on behalf of the bill managers, I am willing to accept the amendment offered by the senior Senator from Illinois.

The contents of this amendment differ in some aspect from the proposal contained in the House bill and, consequently, this item will be one which we will deal with in conference.

I commend the Senator for his willingness to work in a spirit of compromise on a proposal on which everyone could agree. I thank the Senator for his interest in this matter.

Mr. HUDDLESTON. Mr. President, we are happy to accept the amendment on this side. I yield back my time.

Mr. LUGAR. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1380) was agreed to.

STATE REGULATION OF COMMODITY POOLS

Mr. HUDDLESTON. Mr. President, I understand that some individuals believe that the States either now have the power to qualify or substantively regulate commodity pools registered with the SEC and commodity pool operators registered with the CFTC or will get the power to qualify or substantively regulate these pools and pool operators if the jurisdictional agreement made between the CFTC and the SEC is enacted. I have examined this issue and have found nothing, either in the present Commodity Exchange Act, the bill as amended or the CFTC-SEC jurisdictional agreement which has given or would give the States the power to qualify or substantively regulate these commodity pools and commodity pool operators. I ask the distinguished chairman if this is his understanding also.

Mr. HELMS. Mr. President, the distinguished ranking minority member is absolutely correct. As the Senator will recall, this Senator offered an amendment to section 4m of the Commodity Exchange Act which provided that the provisions of this act shall preclude the qualification or substantive regulation of commodity pools under the various laws of the several States dealing with the qualification or regulation of securities or otherwise in those States.

After discussion, however, the committee decided not to adopt the amendment, since the members felt that existing law clearly preempted the States from this area of regulation. I believe the members' judgment was sound, particularly in light of the following:

In 1974, the Committee on Agriculture, Nutrition, and Forestry reported the Commodity Futures Trading Commission Act of 1974, which was subsequently enacted as Public Law 93463. That act provided that the Commodity Futures Trading Commission would have exclusive jurisdiction, vis-a-vis the States, over the matters specified in the 1974 legislation. The 1974 act also specifically repealed a provision in section 4c of the Commodity Exchange Act which provided for the application of State law to transactions in commodities. The committee and the Congress took these actions in order to avoid costly and duplicative Federal and State regulation of the same entities.

Again in 1978, the Congress expressed its intent that the CFTC retain exclusive jurisdiction over the substantive aspects of futures trading and that unnecessary and duplicative regulation of the commodities industry be avoided.

I have examined the provisions of the CFTC-SEC jurisdictional agreement and have noted that there is nothing in it which changes the congressional intent expressed in 1974 and again in 1978.

Since all commodity pools are subject to CFTC regulation, and since certain activities of commodity pools are also subject to both CFTC and Securities and Exchange Commission regulation, State regulation of the same activity is clearly duplicative and unnecessary. One uniform system of Federal regulation is clearly preferable to 50 different and potentially conflicting systems of State regulation.

ASSOCIATED PERSONS

Mr. HUDDLESTON. Mr. President, section 14(6) of the Futures Trading Act of 1982, as reported, amends section 4k of the Commodity Exchange Act to provide that it shall be unlawful for any registrant to permit a person to become or remain an associated person of the registrant if the registrant knew or should have known of facts regarding the associated person that are set forth as statutory disqualifications in section 8a(2) of the Commodity Exchange Act, as amended by this bill. The amendment makes an exception if the registrant has notified the Commission of these facts and the Commission has determined that the person should be registered or temporarily licensed.

Section 23(4) of the bill amends section 8a(3) of the Commodity Exchange Act to establish as a statutory disqualification from registration the fact that the registrant or applicant has associated with him a person whom he knows or has reason to know is subject to a statutory disqualification under section 8a(2), unless the Commission has been notified of the facts involved and has determined that the person should be registered.

It is my understanding that these provisions will impose a duty on the employer to make a reasonable background check on each employee to determine whether there are any facts which would bar the employee from being registered or temporarily licensed. I ask the distinguished chairman if this is his understanding, also.

Mr. HELMS. The distinguished ranking minority member is correct. These new provisions (sections 4k(5), 8a(2), and 8a(3)(L)) contemplate that the employer has an obligation to make a reasonable background check on the employee before the employee is first hired. It is my understanding that background checks are commonly made by firms in the securities and commodities industry today. Consequently, this amendment simply codifies that practice. The registrant will have discharged its duty under these sections if, after making a reasonable check, the registrant has learned of no facts that would disqualify the prospective employee. Of course, this section would not require registrants to check the records of every Federal and State court system and regulatory authority. It would simply require them to make the reasonable inquiry which would be made by any responsible employer.

Mr. HUDDLESTON. Mr. President, I thank the chairman for his response and I would ask a further question. As I mentioned, sections 14(6) and 23(4) of this bill, as reported, amend sections 4k and 8a(3), respectively, to permit the registrant to hire or continue the employment of an associated person if the registrant has notified the Commission of any facts forming a statutory basis for disqualifying the associated person from registration and the Commission has determined that the person should be registered or temporarily licensed.

It is my understanding that, in the event facts appearing to clearly warrant the statutory disqualification of an associated person become known, the registrant would not be in violation of the act if the registrant notified the Commission and continued to employ the associated person until such time as the Commission took affirmative action to suspend or revoke the associated person's registration or license. I ask the distinguished chairman if this is his understanding, also.

Mr. HELMS. The distinguished ranking minority member is correct. The registrant would not be in violation of the act if the registrant continues the employment of the registered or licensed associated person, so long as the Commission has not taken affirmative action to suspend or revoke the registration or license of the associated person. If, however, the Commission should take action to suspend the registration or temporary license, or should revoke it after the required hearing, there would be an immediate obligation for the registrant to terminate the employment of the associated person.

I would also say that these provisions are not intended to place a continuing duty on registrants to investigate their associated persons to determine whether the associated person has committed one of several acts which could provide the basis for a statutory disqualification. Under these sections, the only duty of the registrant, after the employee has been registered or temporarily licensed as an associated person, is to report to the CFTC any facts which otherwise come to the employer's attention which clearly provide the basis for a statutory disqualification and to terminate the employment of an associated person if the CFTC should take action to suspend or revoke the associated person's registration or temporary license.

SECTION 8a(3)(C)

Mr. HUDDLESTON. Mr. President, I understand that S. 2109 amends section 8a of the act to give the Commis-

sion authority to refuse to register persons or to register them conditionally under certain circumstances. Subsection (3)(C) authorizes the Commission to refuse to register or to register conditionally any person who fails reasonably to supervise those who are subject to that person's supervision with a view to preventing violations of the act, but provides that no violation shall occur if the person establishes and enforces reasonable supervisory procedures. I should like to engage in a colloquy with Senator HELMS regarding the intent of this provision. Is this provision intended generally to impose responsibilities on brokerage firms, commodity trading advisers and commodity pool operators in addition to those currently required by exchanges and self-regulatory organizations?

Mr. HELMS. I thank the Senator for the opportunity to comment on proposed section 8a(3)(C) of the act. This section is not intended to change significantly the practices of registrants. We understand that firms registered under the act typically have practices relating to supervision of registered employees and manuals or other guidelines establishing supervisory procedures.

This provision is intended to make clear that reasonable supervisory conduct by employees of registrants will satisfy the requirements of this subsection. I would also say that this section is not intended to mandate that a particular system of supervisory procedures be established and enforced; it does, however, require that the procedures employed be reasonable and that a reasonable effort be made to enforce them.

AIDING AND ABETTING PROVISION

Mr. HUDDLESTON. It is my understanding that section 27(1) of the bill we are considering, which amends section 13(a) of the Commodity Exchange Act, will only apply prospectively. That is, the amendment is intended to authorize aiding and abetting liability in judicial proceedings for any causes of action accruing after the date of enactment of the bill.

Mr. HELMS. The Senator's understanding is completely correct.

LEVERAGE TRANSACTIONS

Mr. HUDDLESTON. Mr. President, as the distinguished chairman of the Committee on Agriculture, Nutrition, and Forestry will recall, during the markup of S. 2109 before the committee, I offered suggested report language in the area of leverage transactions. The committee agreed to include that language in the report on S. 2109. The committee also agreed to leave the current law unchanged with respect to leverage transactions, but to make it clear to the Commission in our report that we want it to regulate leverage transactions forthwith.

I have noted that certain references in the committee's report on S. 2109 relating to leverage transactions differ from the description of those transactions in the committee's report on the 1978 CFTC reauthorization legislation.

The committee's 1978 report on the CFTC reauthorization legislation described the general leverage contract then in use as "an agreement for the purchase or sale" of a specified commodity for delivery at a later date. The 1978 report also enumerated certain other characteristics of leverage transactions.

The report to accompany S. 2109, in referring to leverage transactions, speaks of the "purchase of commodities through * * * leverage transactions."

I place no significance on the differences in wording and wish to inquire of the distinguished Chairman whether he agrees that these differences are of no significance.

Mr. HELMS. Mr. President, I appreciate the distinguished ranking minority member of the committee bringing this issue to my attention. I would say to the Senator that the fact that the committee report on S. 2109 does not include the words "or sale" when describing leverage transactions is not significant.

The Senator is correct in his description of what the Committee on Agriculture, Nutrition, and Forestry decided with regard to leverage transactions. As the Senator points out, we intended to leave the law with respect to the regulation of leverage transactions the same as it was after the 1978 reauthorization. And, in the committee report, we direct the Commission to get on with the business of regulating leverage transactions.

The committee, however, did not focus on the issue of what constitutes a leverage contract during the preparation of this legislation. Consequently, any inference that the committee views the matter differently now is not warranted.

I would also add, Mr. President, that I understand that there are administrative enforcement proceedings currently pending against two leverage transaction merchants and two court suits filed to enjoin these proceedings. The administrative proceedings involve the issue of whether certain contracts offered by the leverage transaction merchants are leverage contracts or futures contracts. I express no opinion on the issues in the administrative proceedings or court suits and do not intend that anything I have said or what the committee has done during this reauthorization have any effect on the outcome of the proceedings or suits.

Mr. HUDDLESTON. Mr. President, I thank the distinguished chairman for his remarks and for his clarification of this important point. I certainly agree that we do not intend to affect in any way the pending proceedings or court suits.

CONFIDENTIAL INFORMATION

Mr. HUDDLESTON. Mr. President, section 22(5) of S. 2109 amends section 8 of the Commodity Exchange Act to require that notice be given by any subpena served on the CFTC that requests records containing information submitted by a third party. My understanding of this new section 8(g) is that it is strictly a procedural requirement. It does not override or preempt any provision of the act relating to confidential or protected information. For example, records which are confidential under the act remain condifential regardless of how they are sought.

Mr. HELMS. The Senator is correct. New section 8(g) is strictly a procedural provision. It does not authorize or require the disclosure of any information—confidential or otherwise. In fact, it is intended to help assure that confidential information is not inadvertently released by the CFTC, by requiring notice of a subpena to the person who submitted the information to the CFTC in the first place. That person can then take whatever steps are necessary to protect his or her rights under the act.

Mr. LUGAR. Mr. President, I hope it is clear that nothing in these colloquies should be construed to run counter to the very clear intent of S. 2109, in particular sections 14(6) and 23(4) as they affect sections 4k(5) and 8a(3)(C) of the Commodity Exchange Act, as amended. The intent of S. 2109 is that employees of commodity professionals have an affirmative duty to screen and supervise their employees carefully.

The PRESIDING OFFICER. Who yields time?

UP AMENDMENT NO. 1381

(Purpose: To amend the Agricultural Act of 1970 to prohibit restrictions on the export of certain agricultural commodities)

Mr. DURENBERGER. Mr. President, I send an unprinted amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. DURENBERGER) proposes an unprinted amendment numbered 1381.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

SEC. 32. Section 812 of the Agricultural Act of 1970 (7 U.S.C. 612c-3) is amended by adding at the end thereof the following new sentence: "Notwithstanding any other provision of law, the President shall not prohibit or curtail the export of any agricultural commodity or the products thereof under

an export sales contract (1) entered into before the President announces an action that would otherwise prohibit or curtail the export of the commodity or products thereof, (2) the terms of which require delivery of the commodity or products thereof within 270 days after the date the suspension of trade is imposed, except that the President may prohibit or curtail the export of any commodity or the products thereof during a period for which the President has declared a national emergency or for which Congress has declared war.".

Cosponsors of the amendment are as follows:

Mr. Huddleston, Mr. Lugar, Mr. Dole, Mr. Cochran, Mr. Zorinsky, Mr. Melcher, Mr. Pryor, Mr. Dixon, Mr. Bentsen, Mr. Exon, Mr. Sasser, Mr. Baucus, Mr. Riegle, Mr. Ford, Mr. Johnston, Mr. Boschwitz, Mr. Jepsen, Mr. Andrews, Mr. Hatch, Mr. Nichols, Mr. Quayle, Mr. Symms, Mr. Danforth, Mr. Specter, Mr. Percy, Mrs. Kassebaum, Mr. Grassley, Mrs. Hawkins, Mr. Pressler, Mr. Abdnor, and Mr. Mattingly.

Mr. DURENBERGER. Mr. President, the amendment I have sent to the desk is designed to restore fairness for American agricultural producers, and to restore international confidence in the United States as a reliable source for foreign feed grain needs. The amendment requires the U.S. Government to honor the sanctity of all agricultural commodity export contracts except during periods a of declared national emergency or war.

The future of American agriculture lies in aggressive market development, but a strategy of market development can never succeed with the specter of the Federal Government hovering over the market every time it believes food can be used to achieve foreign policy objectives.

Mr. President, the United States has imposed at least for major grain embargoes since 1973, either for domestic political reasons or for foreign policy—national security reasons. Aside from their obvious impact in preventing new sales, the embargoes have seriously damaged U.S. agriculture.

First, when embargoes have been imposed, the Federal Government severed outstanding commercial export contracts forcing large amounts of previously sold grain and oilseeds back on the domestic and international markets. The impact of the contract severance has caused a precipitous decline in the prices farmers receive and an enormous increase in Federal outlays.

Second, the greatest cost of the embargoes, in the opinion of many observers, has been the fact that foreign buyers no longer consider the United States a reliable supplier of commodities. Only the United States has acted to sever outstanding commercial contracts. Even the U.S.S.R. has respected commercial contractual obligations. Today, many of our important foreign buyers, even our allies, are increasingly questioning whether the United States will honor its contractual commitments.

Adoption of this amendment would not only assure our trading partners that all agricultural commodity export contracts would be honored, except under the most dire circumstances; it would encourage the Soviet Union to buy its feed grain needs on a consistent basis if it wanted to guarantee the delivery of its purchases.

Mr. President, 2 years ago, on January 4, 1980, President Carter announced that he would embargo all grain sales to the Soviet Union to punish that country for its invasion of Afghanistan.

At the time President Carter made his announcement, I was traveling around the rural areas of our State. I am sure that my colleagues heard the same message I did. Almost to a person, Minnestoa farmers told me how much the grain embargo would hurt, but that they were willing to support the action because they wanted to help the country.

Their courage was overwhelming. These were the same farmers who, in the preceding year, 1979, suffered through a drought, a crippling strike at the Duluth Port, railroad failures and a truckers strike. Also 1979 was a year in which prices dropped so low that the results of a year's work lay piled on farms and elevators.

President Carter's embargo did exact its toll on Minnesota farmers. In fact, there is considerable evidence that they are still paying the price. There is no doubt that another embargo would be devastating to the agriculture community that is already devastated by low prices and soaring production costs. While the rest of the country is suffering through a recession, farmers are in a depression.

If anyone has any doubt about that, they should spend time with me in Minnesota. Time and again, I hear the same stories: interest rates have dried up the farmers' sources of borrowing; commodity prices are lower today than they were last year; foreign markets are silent; on-farm storage capacity is nonexistent; and production costs keep going up.

That should be reason enough to oppose the use of food as a weapon. But I know Minnesota farmers. They would tighten their belts another notch or two and rally to support their President and their country if asked to.

The sad truth, though, is that American farmers have already tightened their belts so much that they are choking. Another embargo may win a battle, but I am afraid we would lose the war by losing the American farmer.

Mr. President, the use of food as a weapon is bad policy. Despite America's immense market power, we simply cannot embargo the world. Competitors such as Brazil, Argentina, and the EEC have the resources to increase production and move into the markets we vacate. We must also recognize the near impossibility of monitoring the actions of those who purchase American grain and pass it through the embargoed nations.

To put it simply, we do not have an OPEC of grain and the United States cannot go it alone.

Beyond the difficulty of imposing an agricultural embargo, there is a more fundamental reason to oppose the use of food as a weapon. Food embargoes punish people, not the governments whose actions we are trying to change. The success of food embargoes depends on the ability of the people in the embargoed nations to change the attitudes and policies of their government.

Would the voice of a Russian peasant—of even a thousand or a million Russian peasants—be heard in the Kremlin? I doubt it. History has taught us that a totalitarian government will change its policies only when change is in the best interests of the government.

Mr. President, earlier this year I held hearings on the economy in Minnesota. I want to share with this Senate the testimony I received from Jerry Benz, a farmer in Martin County, Minn. Jerry said:

Our problems seem to stem from the fact we have been encouraged by past administrations and the current administration to produce more and more efficiently and rely less and less on government support. I cannot argue with that position. It can be made to work.

However, if we are to compete in the free market we have to be allowed a free market. In effect, past administrations and currently the present administration have determined they will use food as a weapon in determining policies. I cannot be expected to raise a crop and compete with world markets if this is going to be the case. If the government continues to pursue this policy we may be better off removing farm programs from the Department of Agriculture and putting them in the Defense Budget, because that is what we are doing. We are supplying weapons in much the same manner Lockheed does. They are guaranteed costs plus a percent. If the government is going to continue to pursue this policy of using food as a weapon we should have the same guarantees.

Mr. President, Jerry Benz is painting a detailed picture of the American farmer's situation: The Government tells the farmers to produce as much as possible, but then robs them of their markets.

The American farmers are saying to the Government, "Let us produce freely and let us market freely. If food is to be used as a weapon, then put the farmer in the defense budget and give him the same opportunities and benefits as any other defense contractor."

Mr. President, we know that is not the answer. The answer is simply this:

No more food embargoes. The legislation we introduce today is a step toward that answer.

This amendment has been discussed with the committee, and I understand there is no objection to the amendment.

Mr. LUGAR. We are pleased to accept this amendment.

Mr. President, I support the amendment of the Senator from Minnesota. This amendment is, in fact a hybrid of the bills which Senator DURENBERGER and I have introduced. I am pleased to join him in offering this amendment to restore some certainty and stability to the deteriorating U.S. agricultural export market.

This contract sanctity legislation would prevent any President from imposing restrictions upon the export of agricultural commodities that would interfere with existing export contracts, provided the contract agreemant was entered into prior to the time such export restrictions are imposed.

Earlier this year, I introduced S. 2357, and Senator DURENBERGER introduced S. 2410. Both bills called for enactment of some form of contract sanctity. On July 29, I chaired a hearing before the Senate Banking Committee's International Finance Subcommittee on this issue. From testimony received, I believe this amendment effectively incorporates the provisions of these two bills, and accommodates the needs of our agricultural sector as well as the needs of those concerned with the foreign policy aspects of this legislation.

Senators undoubtedly are well aware of the lasting damage to the farm economy caused by President Carter's grain embargo on the Soviet Union. Following the announcement of that embargo, the Government prohibited delivery of 18.3 million metric tons of previously contracted grain shipments to the Soviet Union. A study by Schnittker Associates estimated the cost of this action as follows:

A loss of $11.4 billion in output of goods and services.

Reduced employment equivalent to 310,000 workers.

A reduction in personal income of $3.1 billion.

Aside from the loss of the Soviet market, the lasting damage to the overall U.S. agricultural export market cannot be overemphasized. Prior to the embargo, the U.S. share of growth in the world market was 76 percent; following the embargo, that share has been only 54 percent. In 1982, farm exports are expected to decline by 4 percent, ending a 15-year growth trend.

One in three farm acres in this country grows crops for export. Without a healthy export economy, the American farm sector will continue to be in poor shape. We must pursue farm exports in a highly competitive world market, a market in which consistency and reliability are major factors in securing foreign business. Nations which import food simply cannot afford to take chances with uncertain suppliers.

We offer this amendment in order to provide the world this vital reassurance about American intentions to be a reliable agricultural supplier. The amendment provides that no restrictions shall be imposed on valid contracts for a period of 9 months following the announcement of export restrictions, except under the most extreme situations.

The amendment allows the President to impose export restrictions. It does not take away his right to declare an embargo. It simply makes clear that contracts once entered into will not be broken. This is the least assurance that we as a government can provide.

This amendment has the endorsement of virtually every major farm group, all grain exporting companies, as well as the National Governors Association. It will not add a single dollar to the Federal budget. We hope you choose to support our efforts.

Mr. HUDDLESTON. Mr. President, I am pleased to join my colleagues in sponsoring this amendment. It will help to increase agricultural exports, improve the farm economy, and restore the reputation of the United States as a reliable supplier of agricultural commodities to world markets.

The United States is the world's predominant exporter of food and food products; and our agricultural exports are of immense benefit to U.S. farmers, the economy of the United States, and the people of the world. But, in the past 9 years, inconsistencies in our export policies relating to food and food products have threatened the reputation of the United States as a reliable supplier of agricultural commodities. Our ability to compete effectively for an even larger share of the world's commodity markets has been reduced.

It is essential that Congress establish a clear policy with regard to exports of U.S. food and food products. It is important for our farmers, those who market our crops, and those at home and abroad who buy U.S. produced food and food products.

While the President has declared that farm exports would not be used as an instrument of foreign policy except in extreme situations and only as a part of a broader embargo, Congress must clarify the United States longer run agricultural export policy and eliminate the uncertainty that has arisen with respect to our commitment to deliver U.S. agricultural commodities.

This legislation would prohibit the Government of the United States from nullifying contracts providing for delivery of agricultural products to export customers within 270 days after the announcement of a trade suspension. This assurance, to buyers of U.S. agricultural commodities, that delivery will occur is needed. Only in instances where the President declares a national emergency or Congress declares a state of war could trade be abruptly suspended.

The legislation would not hamper the ability of the President to carry out American foreign policy. It would give the Secretary of Agriculture time to propose changes in domestic agricultural policies, and thereby prevent commodities from clogging market pipelines and depressing farm prices.

At this time, there is a suspension in trade affecting contracts for delivery of nonagricultural commodities. But our recent experience with embargoes of agricultural commodities has demonstrated their relative ineffectiveness as a foreign policy instrument. Enactment of this legislation would be consistent with both our foreign policy and a sound agricultural trade policy.

This legislation is needed to reestablish the position of the United States as a reliable supplier of agricultural products. Our national reputation as a reliable supplier should not be questioned. I would note that it appears that the Soviet Union will take less than 14 million metric tons of grain during the current marketing year—some 9 million tons less than we have offered during this sixth year of the U.S.-U.S.S.R. grain agreement. Similiarly, the Japanese in 1974, following the Nixon embargo began to look to other countries for an increased percentage of their agricultural imports. We should act to discourage our foreign customers from considering other services.

Mr. President, this legislation will go a long way to reestablish our reputation as a reliable supplier of agricultural commodities in world markets. I ask my colleagues to join in cosponsoring this measure and in seeking its passage.

Mr. COCHRAN. Mr. President, will the Senator yield?

Mr. DURENBERGER. I yield.

Mr. COCHRAN. Mr. President, I am pleased to join in cosponsoring this amendment to assure our foreign customers that the United States is a reliable supplier.

Several embargoes during the last decade have raised questions in the minds of our foreign customers about whether or not the United States will deliver when contracts have been agreed upon.

This has encouraged them to seek alternative sources of supply. The most dramatic example was the rapid increase in the production of soybeans in Brazil following the 1973 embargo.

Today Brazil is a major competitor or ours in the world soybean market.

When Congress rewrote the farm bill last year we addressed this problem by putting a substantial financial penalty on the Government if agricultural products are singled out for export suspension.

This provision has helped to assure our farmers that if an embargo or suspension is imposed that their interest will be addressed. However, in my opinion, it has not helped the confidence of our foreign customers. They still question whether or not we will deliver on sales contracts executed.

Mr. Presdient, I believe this amendment will show our resolve to meet our obligations short of the President declaring a state of national emergency or Congress declaring war.

This is a positive step in the right direction. We must seek every opportunity to reduce the large stocks of agricultural products and I can think of no better way to do that than to expand our exports.

For every $1 billion in agricultural exports about 26,000 jobs are created in this country. We cannot afford to sit idly by with agricultural prices at rock bottom and unemployment high. Every effort must be made to return health to our economy and there is no better place to start than agriculture.

After all, the agricultural economy is the Nation's largest employer. When it is in financial trouble the Nation is in financial trouble.

I urge my colleagues to join me in support of this amendmnent as a start toward regaining the confidence we once enjoyed in the world market and returning economic strength to our farm sector.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the Senator from Georgia (Mr. MATTINGLY) be added as a cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the record be left open so other Senators may be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I yield to the Senator from North Carolina.

CONTRACT SANCTITY MEANS INCREASED U.S. AGRICULTURAL EXPORTS

Mr. HELMS. Mr. President, the amendment by Senator DURENBURGER represents good business practice. I support this amendment because I know how seriously the farm export sector has suffered as a result of past embargoes and threats of embargoes. Farm prices in this country continue to be affected by global good weather, increased foreign competition and subsidization, past restrictions on trade and depressed demand.

The intent of this amendment is to regain the image of a reliable supplier of agricultural commodities in foreign markets for the United States, but in a manner that does not impinge upon the President's authority to conduct foreign policy. The President would be able to cut across contracts in the event of a national emergency or a declaration of war by Congress.

Mr. President, I know of no other issue of more importance to the U.S. farm community than unfettered access to foreign markets. Countless number of American farmers have told me time and time again that they are in favor of reduced governmental influence and supports for agriculture. Most farmers recognize now that we are in the situation that prevailed during the late 1950's and through most of the 1960's when farmers were guided by price support levels versus market prices. The wheat and corn reserves have taken on a new role of exerting downward pressure on prices. Unprecedented levels of funds of the Commodity Credit Corporation are tied up in commodity support programs with the likelihood that the Federal Government will ultimately end up owning enormous amounts of U.S. grain.

The vast majority of farmers have told me that, since they wish to produce for the marketplace versus governmental support levels, their access to foreign markets must be unencumbered. In other words, Mr. President, if U.S. farmers are not permitted access to foreign markets, then they must look to the U.S. Government to absorb the surplus that would otherwise enter foreign market channels.

The oversupply situation in agricultural commodities has caused the United States to revert to such acreage reduction measures as paid diversions for wheat, feedgrains, cotton, and rice. However, our trading partners such as Canada, Australia, and Argentina have continued to expand their acreage for wheat and feedgrains. These same nations have signed long-term agreements for grain sales with the Soviet Union and other agricultural importing nations since the Carter embargo of 1980.

Adding insult to injury, the European Economic Community and others continue to subsidize their agricultural surpluses on the foreign market to the detriment of the United States and other free-market trading nations.

I congratulate my colleagues for their efforts to renew the reliable supplier image for the United States. Our farmers must be permitted to export unless the foreign policy interests of the United States would become jeopardized. Otherwise, our Nation faces the reality of increased governmental interference in the market or substantial retrenchment of our efficient agricultural plant.

Mr. DIXON. Mr. President, I rise to cosponsor this effort which I enthusiastically support.

Mr. President, American Presidents, both Democratic and Republican, have imposed three embargoes of agricultural commodities in recent years. That is far too many and demonstrates the need for a change in the law to prevent excessive use of embargoes of agricultural commodities in the future.

Agriculture is our largest exporter; agricultural exports constitute about 20 percent of all U.S. exports—over $40 billion in 1982. But agricultural exports are not only important to the American economy, exports are also vital to the health and financial well-being of the American farmer. Approximately one-third of all U.S. farm production is devoted to exports, making it clear that the loss of export markets would have devastating results.

I was pleased, last year, to offer legislation, along with my senior colleague from Illinois, Senator PERCY, designed to insure that American agriculture would no longer be singled out in the future to bear a disproportionate share of the burden made necessary by difficult foreign policy decisions. My amendment would have prohibited restrictions on the export of agricultural products to any country for foreign policy reasons, unless the embargo was in conjunction with an across-the-board ban on all trade with a country, or unless Congress adopted a joint resolution approving the restrictions.

That amendment was adopted by the Senate by a vote of 66 to 20. Unfortunately, it did not survive the House-Senate conference on the Export Administration Act amendments. I continue to believe that this change is necessary, however. I continue to believe Congress must act to change the law to insure that embargoes are only used when absolutely necessary.

I am pleased to be a cosponsor of this amendment designed to help achieve that goal. This amendment prohibits the imposition of any restrictions on the export of agricultural commodities which interfere with valid contracts entered into before the imposition of export controls, if the agricultural commodities are delivered within 270 days from the time controls are imposed.

I think this is a badly needed change. I think we must do all we can to insure that this specter of embargo is lifted from the farm community. Farm income is at depression levels; agricultural commodity prices are depressed. And part of the reason is the lack of certainty that an agricultural

embargo will not be imposed in the near future.

I hope today's action will be the beginning of a comprehensive reexamination of our trade policy. We need to insure that the future will be different than the past—that excessive use of agricultural embargoes will cease. We also need to insure that embargoes of other commodities are well thought out, necessary, and workable, before they are imposed. All too often, trade policy results in damaging American manufacturers—American businesses, including agriculture and suppliers of agricultural products—while not working effectively against the country at which they are aimed. We damage our relations with our own allies, and create an image of unreliability as a supplier in world markets. The result is that, increasingly, the United States is the supplier of last resort. We only get business that no one else can handle.

It should be remembered, however, that most of what we produce is not unique. American wheat can be, and was, replaced in part by Argentine wheat when we last embargoed the Soviets. Caterpillar tractors can be, and are being, replaced by Japanese tractors, when we refused to permit the sale. World markets are increasingly competitive; we ignore that fact at our own peril.

We need exports, a larger volume of exports, to help restore our economy to health. Every $1 billion in exports means 30,000 jobs, jobs that we cannot afford to lose because of the lack of a well-coordinated, well-thought-out trade policy.

American agriculture has been the victim of poor trade policy in the past. Today is the beginning of the process that will insure that needed changes are made. I believe agriculture can and will point the way toward needed reform across the spectrum of trade policy.

Mr. DURENBERGER. Mr. President, I move passage of the amendment.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. DURENBERGER. Mr. President, I yield back my time.

Mr. LUGAR. Mr. President, I yield back the remainder of my time.

Mr. HUDDLESTON. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Minnesota.

The amendment (UP No. 1381) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HUDDLESTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1382

(Purpose: To make certain minor amendments to the Futures Trading Act of 1982)

Mr. LUGAR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Indiana (Mr. LUGAR) for himself, Mr. HELMS, and Mr. HUDDLESTON proposes an unprinted amendment numbered 1382.

Mr. LUGAR. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 80, line 19, immediately after the word "margin", insert the following: "and except those that the Commission may specify by regulation".

On page 88, line 5, strike the quotation marks and the second period.

On page 88, between lines 5 and 6, insert the following: "This subsection shall not apply to Congressional subpenas or Congressional requests for information."

On page 112, after line 16, insert the following new section:

"EFFECTIVE DATE

"SEC. 32. This Act shall be effective upon the date of enactment of this Act, except that sections 9, 14, and 28 of this Act shall be effective 120 days after the date of enactment of this Act, or such earlier date as the Commodity Futures Trading Commission shall prescribe by regulation."

Mr. LUGAR. Mr. President, this amendment makes three amendments to the Futures Trading Act of 1982 to take care of problems which were discovered after the bill was reported by the committee.

The first amendment would give the Commission authority to exempt categories of exchange rules from the requirement that all such rules be submitted to the Commission for its review. Under this amendment, the Commission could exempt exchanges from submitting minor operating or other kinds of rules to the Commission. For example, some exchanges have rules establishing employee dress codes and employee commendation procedures. As S. 2109 is presently drafted, these rules would have to be submitted to the Commission for its review. If this amendment is adopted, however, the Commission could issue regulations which would exempt the dress code, employee commendation and other similar rules from having to be submitted to the Commission.

The second amendment provides that the new procedures covering the Commission's response to subpenas and summonses shall not apply to congressional subpenas or requests for information. Under the bill, the Commission could not disclose information in its possession pursuant to a subpena or summons until it has mailed a copy of the subpena or summons to the last known address of the person who submitted the information and 14 days had expired from the date of the mailing. The exception provided in the amendment is necessary because Congress often needs to obtain information from the Commission on relatively short notice and could be inhibited from doing so if this exception is not made.

The third amendment delays the effective date of the reparations provision and certain of the registration provisions in S. 2109 for a maximum of 120 days after enactment. The amendment would also give the Commission discretion to make any or all of these provisions effective at some point within the 120-day period, should it choose to do so.

The new registration provisions would require that certain unregistered persons presently employed in the commodities industry register with the Commission. These provisions would also make it unlawful to employ any of these persons in their present positions if they are not registered with the Commission.

The Commission will not be able to register these persons until regulations are issued and registration procedures are developed. The 120-day delay period will permit these persons to continue to work in their present jobs while going through the registration process, without causing their employers to violate the act.

The Futures Trading Act of 1982 will also repeal a number of the statutory procedural provisions applicable to the Commission's reparations program and will give the Commission the authority to establish new streamlined reparations procedures through regulations. This amendment gives the Commission the time needed to prepare, publish, and put into place the regulations spelling out the new reparations procedures prior to the repeal of the existing statutory procedures.

If this amendment is not adopted, the existing reparations provisions will be deleted before the new provisions are in place and all pending reparations cases may be stalled until the new procedures are formally adopted. It is also unclear whether any new reparations cases could be filed until such time as the new procedures are formally adopted.

As I mentioned previously, these amendments take care of problems which were discovered after the bill was reported by the committee. The Commission favors the adoption of these amendments. I do not believe there is any opposition to them.

Mr. President, I yield to the distinguished chairman of our committee.

Mr. HELMS. Mr. President, are there further amendments?

May I ask if the technical amendments have been adopted as yet?

The PRESIDING OFFICER. If Senators will yield back their time.

Mr. LUGAR. Mr. President, we yield back our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Indiana.

The amendment (UP No. 1382) was agreed to.

Mr. HELMS. Mr. President, will the Chair bear with us?

Mr. LUGAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum called rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1383

(Purpose: To add a provision to the bill requiring the conduct of a study on insider trading in the commodity futures markets)

Mr. HUDDLESTON. Mr. President, on behalf of the distinguished Senator from Montana (Mr. MELCHER), who necessarily had to be absent at this particular time, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kentucky (Mr. HUDDLESTON) for Mr. MELCHER proposes an unprinted amendment No. 1383.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

"INSIDER TRADING STUDY

"SEC. 32. (a) The Commodity Futures Trading Commission shall conduct a study to determine (1) the extent of insider trading of futures contracts on contract markets subject to regulation under the Commodity Exchange Act and (2) whether such trading is, or can be (in reasonably anticipated circumstances), connected with—

(A) excessive speculation or manipulation or improper control of the futures markets, or

(B) improper activities with respect to the establishment of cash prices for the commodities involved.

The Commission shall complete the study and report its findings to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate within 6 months after the date of enactment of this Act.

"(b) As used in subsection (a) of this section, the term 'insider trading' means trading by an individual who has access to material information, not generally available to the public, about present or anticipated cash or futures trading activity or positions (to which the individual is not a party) in any commodity, in cases in which such trading activity or positions are in amounts at or above reporting levels fixed by the Commodity Futures Trading Commission under section 4i of the Commodity Exchange Act.".

Mr. HUDDLESTON. Mr. President, this amendment just calls for a study of inside traders in the market. It has been cleared on both sides of the aisle.

I yield back the remainder of my time and ask for its passage.

Mr. HELMS. Mr. President, I yield back the remainder of our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kentucky.

The amendment (UP No. 1383) was agreed to.

Mr. HUDDLESTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I support the enactment of both H.R. 6156 and S. 2109 and agree completely with the remarks of the distinguished ranking minority member of the Committee on Agriculture, Nutrition, and Forestry.

It is my understanding that under existing law, as interpreted by the Seventh Circuit Court of Appeals in Chicago Board of Trade against SEC., options on commodities that may also be securities are subject to the exclusive regulatory jurisdiction of the CFTC and are currently prohibited under the Commodity Exchange Act. It is the ultimate purpose of the CFTC-SEC jurisdictional accord, as reflected in H.R. 6156 and S. 2109, to authorize the SEC to regulate trading in options on Government issued debt securities, even if those securities fall within the definition of "commodity" under the Commodity Exchange Act. Since S. 2109 would amend the Commodity Exchange Act, while H.R 6156 amends the Federal securities laws, enactment of S. 2109 is essential in overturning the seventh circuit's decision and authorizing the SEC to regulate these options. Therefore, I anticipate that all parties affected will support enactment of both H.R. 6156 and S. 2109 to accomplish the purpose of the CFTC-SEC accord.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. HELMS. Mr President, I ask unanimous consent that we proceed to the consideration of Calendar Order No. 873, H.R. 5447, the companion House bill.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 5447) to extend the Commodity Exchange Act, and for other purposes.

There being no objection, the Senate proceeded to the consideration of the bill.

Mr. HELMS. Mr. President, I move to strike all after the enacting clause of H.R. 5447 and to substitute in lieu thereof the text of S. 2109, as amended by the Senate.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from North Carolina.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 5447), as amended, was passed, as follows:

Resolved, That the bill from the House of Representatives (H.R. 5447) entitled "An Act to extend the Commodity Exchange Act, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Futures Trading Act of 1982".

DEFINITIONS

SEC. 2. Section 2(a) of the Commodity Exchange Act (7 U.S.C. 2, 4) is amended—

(1) by redesignating subsection (a)(1) as subsection (a)(1)(A);

(2) by inserting immediately after the sentence defining the term "futures commission merchant" in subsection (a)(1)(A), as so redesignated, a new sentence to read as follows: "The term 'introducing broker' shall mean any person, except an individual who elects to be and is registered as an associated person of a futures commission merchant, engaged in soliciting or in accepting orders for the purchase or sale of any commodity for future delivery on or subject to the rules of any contract market who does not accept any money, securities, or property (or extend credit in lieu thereof) to margin, guarantee, or secure any trades or contracts that result or may result therefrom."; and

(3) by amending the definition of the term "commodity trading advisor" in subsection (a)(1)(A), as so redesignated, to read as follows: "The term 'commodity trading advisor' shall mean any person who, for compensation or profit, engages in the business of advising others, either directly or through publications, writings, or electronic media, as to the value of or the advisability of trading in any contract for future delivery of a commodity made or to be made on or subject to the rules of any contract market, any commodity option authorized under section 4c, or any leverage transaction authorized under section 19 of this Act, or who, for compensation or profit, and as part of a regular business, issues or promulgates analyses or reports concerning any of the foregoing; but such term does not include (i) any bank or trust company, (ii) any news reporter, news columnist, or news editor of the print or electronic media, or any lawyer, accountant, or teacher, (iii) any floor broker or futures commission merchant, (iv) the pub-

lisher or producer of any print or electronic data of general and regular dissemination, including its employees, (v) the fiduciary of any defined benefit plan which is subject to the provisions of the Employee Retirement Income Security Act of 1974, (vi) any contract market, and (vii) such other persons not within the intent of this definition as the Commission may specify by rule, regulation, or order: Provided, That the furnishing of such services by the foregoing persons is solely incidental to the conduct of their business or profession: Provided further, That the Commission, by rule or regulation, may include within this definition, any person advising as to the value of commodities or issuing reports or analyses concerning commodities, if the Commission determines that such rule or regulation will effectuate the purposes of this provision.".

JURISDICTIONAL ACCORD WITH THE SECURITIES AND EXCHANGE COMMISSION

SEC. 3. (a) Section 2(a)(1)(A) of the Commodity Exchange Act (7 U.S.C. 2, 4), as redesignated by section 2 of this Act, is amended by inserting in the third sentence the words ", except to the extent otherwise provided in subparagraph (B) of this paragraph," after the words "exclusive jurisdiction".

(b) Section 2(a)(1) of the Commodity Exchange Act (7 U.S.C. 2, 4) is amended by adding a new subparagraph (B) to read as follows:

"(B) Notwithstanding any other provision of law—

"(i) This Act shall not apply to and the Commission shall have no jurisdiction to designate a board of trade as a contract market for any transaction whereby any party to such transaction acquires any put, call, or other option on one or more securities (as defined in section 2(1) of the Securities Act of 1933 or section 3(a)(10) of the Securities Exchange Act of 1934 on the date of enactment of the Futures Trading Act of 1982), including any group or index of such securities, or any interest therein or based on the value thereof.

"(ii) This Act shall apply to and the Commission shall have exclusive jurisdiction with respect to accounts, agreements (including any transaction which is of the character of, or is commonly known to the trade as, an 'option', 'privilege', 'indemnity', 'bid', 'offer', 'put', 'call', 'advance guaranty', or 'decline guaranty') and transactions involving, and may designate a board of trade as a contract market in, contracts of sale (or options on such contracts) for future delivery of a group or index of securities (or any interest therein or based upon the value thereof): Provided, That no board of trade shall be designated as a contract market with respect to any such contracts of sale (or options on such contracts) for future delivery unless the board of trade making such application demonstrates and the Commission expressly finds that the specific contract (or option on such contract) with respect to which the application has been made meets the following minimum requirements:

"(I) Settlement of or delivery on such contract (or option on such contract) shall be effected in cash or by means other than the transfer or receipt of any security, except an exempted security under section 3 of the Securities Act of 1933 or section 3(a)(12) of the Securities Exchange Act of 1934 as in effect on the date of enactment of the Futures Trading Act of 1982 (other than any municipal security, as defined in section 3(a)(29) of the Securities Exchange Act of 1934 on the date of enactment of the Futures Trading Act of 1982);

"(II) Trading in such contract (or option on such contract) shall not be readily susceptible to manipulation of the price of such contract (or option on such contract), nor to causing or being used in the manipulation of the price of any underlying security, option on such security, or option on a group or index including such securities; and

"(III) Such group or index of securities shall be predominately composed of the securities of unaffiliated issuers and shall be a widely published measure of, and shall reflect, the market for all publicly traded equity or debt securities or a substantial segment thereof, or shall be comparable to such measure.

"(iii) Upon application by a board of trade for designation as a contract market with respect to any contract of sale (or option on such contract) for future delivery involving a group or index of securities, the Commission shall provide an opportunity for public comment on whether such contract (or option on such contract) meets the minimum requirements set forth in subparagraph (ii) hereof, and shall consult with the Securities and Exchange Commission with respect to such designation. If, within fifteen days following the close of the public comment period, the Securities and Exchange Commission shall object to the designation of a board of trade as a contract market in such contract (or option on such contract) on the ground that any minimum requirement of subparagraph (ii) hereof is not met, the Commission shall afford the Securities and Exchange Commission an opportunity for an oral hearing, to be transcribed, before the Commission, and shall give appropriate weight to the views of the Securities and Exchange Commission. Such oral hearing shall be held after the public comment period, prior to Commission action upon such designation, and not less than thirty nor more than forty-five days after the close of the public comment period, unless both the Commission and the Securities and Exchange Commission otherwise agree. In the event that such an oral hearing is held and the Securities and Exchange Commission fails to withdraw its objections, and the Commission issues an order designating a board of trade as a contract market with respect to any such contract (or option on such contract), the Securities and Exchange Commission shall have the right of judicial review of such order in accordance with the standards of section 6(b) of this Act. In the event that, pursuant to section 6 of this Act, there is a hearing on the record with respect to such application for designation, the Securities and Exchange Commission shall have the right to participate in that hearing as an interested party.

"(iv) No person shall offer to enter into, enter into, or confirm the execution of any contract of sale (or option on such contract) for future delivery of any security, or interest therein or based on the value thereof, except an exempted security under section 3 of the Securities Act of 1933 or section 3(a)(12) of the Securities Exchange Act of 1934 as in effect on the date of enactment of the Futures Trading Act of 1982 (other than any municipal security as defined in section 3(a)(29) of the Securities Exchange Act of 1934 on the date of enactment of the Futures Trading Act of 1982); or except as provided in subparagraph (ii) hereof, any group or index of such securities or any interest therein or based on the value thereof.".

(c) Section 4c of the Commodity Exchange Act (7 U.S.C. 6c) is amended by adding a new subsection (f) to read as follows:

"(f) Nothing in this Act shall be deemed to govern or in any way be applicable to any transaction in an option on foreign currency traded on a national securities exchange.".

(d) Section 4m of the Commodity Exchange Act (7 U.S.C. 6m) is amended—

(1) by inserting "(1)" immediately following the section designation; and

(2) by adding a new subsection (2) to read as follows:

"(2) Nothing in this Act shall relieve any person of any obligation or duty, or affect the availability of any right or remedy available to the Securities and Exchange Commission or any private party arising under the Securities Act of 1933 or the Securities Exchange Act of 1934 governing the issuance, offer, purchase, or sale of securities of a commodity pool, or of persons engaged in transactions with respect to such securities, or reporting by a commodity pool.".

(e) Paragraph (6) of section 8a of the Commodity Exchange Act (7 U.S.C. 12a(6)) is amended—

(1) by inserting the words "registered futures association, or self-regulatory organization as defined in section 3(a)(26) of the Securities Exchange Act of 1934," before the word "notwithstanding";

(2) by striking out the word "and" before the word "consumers" and inserting in lieu thereof a comma; and

(3) by inserting the following before the semicolon: "or investors or which is necessary or appropriate to effectuate the purposes of this Act: Provided, That any information furnished by the Commission under this paragraph shall not be disclosed by such contract market, registered futures association, or self-regulatory organization except in any self-regulatory action or proceeding".

PERSONNEL RESTRICTIONS

SEC. 4. Section 2(a)(7) of the Commodity Exchange Act (7 U.S.C. 4a(f)) is amended—

(1) by striking out "(A)" after the paragraph designation; and

(2) by striking out subparagraph (B) in its entirety.

LEGISLATIVE FINDINGS

SEC. 5. Section 3 of the Commodity Exchange Act (7 U.S.C. 5) is amended to read as follows:

"SEC. 3. Transactions in commodities involving the sale thereof for future delivery as commonly conducted on boards of trade and known as 'futures' are affected with a national public interest; such transactions are carried on in large volume by the public generally and by persons engaged in the business of buying and selling commodities and the products and byproducts thereof in interstate commerce; the prices involved in such transactions are generally quoted and disseminated throughout the United States and in foreign countries as a basis for determining the prices to the producer and the consumer of commodities and the products and byproducts thereof and to facilitate the movements thereof in interstate commerce; such transactions are utilized by shippers, dealers, millers, and others engaged in handling commodities and the products and byproducts thereof in interstate commerce as a means of hedging themselves against possible loss through fluctuations in price; the transactions and prices of commodities on such boards of trade are susceptible to excessive speculation and can be manipulated, controlled, cornered, or squeezed, to the det-

riment of the producer or the consumer and the persons handling commodities and the products and byproducts thereof in interstate commerce, rendering regulation imperative for the protection of such commerce and the national public interest therein. Furthermore, transactions which are of the character of, or are commonly known to the trade as, 'options' and which are or may be utilized by commercial and other entities for purposes of risk shifting are in interstate commerce or affect such commerce and the national economy, rendering regulation of such transactions imperative for the protection of such commerce and the national public interest.".

UNLAWFUL FUTURES TRADING, FOREIGN FUTURES

SEC. 6. Section 4 of the Commodity Exchange Act (7 U.S.C. 6) is amended—

(1) by inserting "(a)" immediately following the section designation;

(2) by striking out all those words following the word "to" the first time it occurs through and including the words "as hereinafter provided," and inserting in lieu thereof the following: "offer to enter into, to enter into, to execute, to confirm the execution of, or to conduct any office or business anywhere in the United States or its territories or possessions for the purpose of soliciting or accepting any order for, or otherwise dealing in, any transaction in, or in connection with, a contract for the purchase or sale of a commodity for future delivery (other than a contract which is made on or subject to the rules of a board of trade, exchange, or market located outside the United States, its territories or possessions) unless: (1) such transaction is conducted on or subject to the rules of a board of trade which has been designated by the Commission as a contract market for such commodity, (2) such contract is executed or consummated by or through a member of such contract market,";

(3) by striking out the word "if" the first time it occurs and inserting in lieu thereof "(3)";

(4) by striking out the word "board" after the words "Provided, That each" and inserting in lieu thereof the words "contract market"; and

(5) by adding a new subsection (b) to read as follows:

"(b) The Commission may adopt rules and regulations proscribing fraud and requiring minimum financial standards, the disclosure of risk, reporting, the keeping of books and records, the safeguarding of customers' funds, and registration with the Commission by any person located in the United States, its territories or possessions, who engages in the offer and sale of any contract of sale of a commodity for future delivery which is made or to be made on or subject to the rules of a board of trade, exchange, or market located outside the United States, its territories or possessions. Such rules and regulations may impose different requirements for such persons depending upon the particular foreign board of trade, exchange, or market on which such contracts are made. No rule or regulation may be adopted by the Commission under this subsection that (1) requires Commission approval of any contract, rule, regulation, or action of any foreign board of trade, exchange, or market, or clearinghouse for such board of trade, exchange, or market, or (2) governs in any way any rule or contract term or action of any foreign board of trade, exchange, or market, or its clearinghouse.".

SPECULATIVE LIMITS

SEC. 7. Section 4a of the Commodity Exchange Act (7 U.S.C. 6a) is amended—

(1) by striking out the word "order's" in subsection (2);

(2) by striking out the first semicolon in subsection (2) and inserting in lieu thereof the words "of the rule, regulation, or order";

(3) by inserting the words "rule, regulation, or" before the word "order" wherever it occurs;

(4) by striking out the words "within one hundred and eighty days after the effective date of the Commodity Futures Trading Commission Act of 1974" in subsection (3);

(5) by inserting the words ", introducing broker," after the words "futures commission merchant" and by striking out the word "as" before the words "a floor broker" in the first sentence of subsection (4); and

(6) by adding a new subsection (5) to read as follows:

"(5) Nothing in this section shall prohibit or impair the adoption by any contract market, or by any other board of trade licensed or designated by the Commission, of any bylaw, rule, regulation, or resolution fixing limits on the amount of trading which may be done or positions which may be held by any person under contracts of sale of any commodity for future delivery traded on or subject to the rules of such contract market, or under options on such contracts or commodities traded on or subject to the rules of such contract market or such board of trade: Provided, That if the Commission shall have fixed limits under this section for any contract or under section 4c of this Act for any commodity option, the bylaws, rules, regulations, and resolutions adopted by such contract market or such board of trade shall not be higher than the limits fixed by the Commission except with the approval of the Commission. It shall be unlawful for any person to violate any bylaw, rule, regulation, or resolution of any contract market or other board of trade licensed or designated by the Commission fixing limits on the amount of trading which may be done or positions which may be held by any person under contracts of sale of any commodity for future delivery, or under options on such contracts or commodities, if such bylaw, rule, regulation, or resolution has been approved by the Commission: Provided, That the provisions of section 9(c) of this Act shall not apply unless the violation was in furtherance of an attempt to manipulate, corner, or squeeze a market.".

REPEAL OF THE BAN ON OPTIONS TRADING IN AGRICULTURAL COMMODITIES

SEC. 8. Section 4c of the Commodity Exchange Act (7 U.S.C. 6c) is amended—

(1)(A) by inserting "or" at the end of clause (A) of subsection (a);

(B) by striking out clause (B) of subsection (a); and

(C) by redesignating clause (C) of subsection (a) as clause (B);

(2) in subsection (b), by striking out the following phrases: (A) "subject to the provisions of subsection (a) of this section", (B) ", but not specifically set forth in section 2(a) of this Act, prior to the enactment of the Commodity Futures Trading Commission Act of 1974,", and (C) "within one year after the effective date of the Commodity Futures Trading Commission Act of 1974 unless the Commission determines and notifies the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture that it is unable to prescribe such terms and conditions within such period of time"; and

(3) in subsection (c), by striking out "but not specifically set forth in section 2(a) of this Act prior to the enactment of the Commodity Futures Trading Commission Act of 1974,".

INTRODUCING BROKER; REGISTRATION REQUIREMENT

SEC. 9. Section 4d of the Commodity Exchange Act (7 U.S.C. 6d) is amended—

(1) by inserting the words "or introducing broker" after the words "futures commission merchant" in the introductory clause of section 4d;

(2) by inserting the words "or introducing broker" after the words "futures commission merchant" in paragraph (1); and

(3) by inserting the words "if a futures commission merchant," after the words "such person shall," in paragraph (2).

REGISTRATION PROCEDURE; TECHNICAL AMENDMENT

SEC. 10. Section 4f of the Commodity Exchange Act (7 U.S.C. 6f) is amended—

(1) by amending subsection (1)—

(A) by inserting the words ", introducing broker," after the words "futures commission merchant" the first time they occur in the first sentence;

(B) by striking out the word "as" before the words "floor broker" in the first sentence;

(C) by inserting the words "and introducing brokers" after the words "of applications of futures commission merchants" in the first sentence;

(D) by striking out the words "and of all correspondents and agents engaged in soliciting or accepting on behalf of such applicants any orders for the purchase or sale of any commodity for future delivery on or subject to the rules of any board of trade" in the first sentence;

(E) by striking out the word "its" each time it occurs in the first sentence and inserting in lieu thereof the word "the"; and

(F) by striking out the words "after notice and hearing as prescribed in this Act" in the last sentence and inserting in lieu thereof the words "pursuant to the provisions of this Act"; and

(2) by amending subsection (2) by inserting the words "or as introducing broker" after the words "futures commission merchant".

REPORTS; BOOKS AND RECORDS

SEC. 11. Section 4g of the Commodity Exchange Act (7 U.S.C. 6g) is amended—

(1) by inserting the words ", introducing broker," after the words "futures commission merchant" in subsection (1); and

(2) by inserting the words ", introducing brokers," after "Floor brokers" in subsection (3).

TECHNICAL AMENDMENTS; MISREPRESENTATION OF STATUS

SEC. 12. Section 4h of the Commodity Exchange Act (7 U.S.C. 6h) is amended—

(1) by striking out everything following the word "person" through and including "(2)";

(2) by striking out the words "futures commission merchant registered" and inserting in lieu thereof the word "registrant";

(3) by striking out the words "such registered futures commission merchant" and inserting in lieu thereof the words "any registrant"; and

(4) by adding the words "representative or" before the word "agent" the second time it occurs.

RECORDKEEPING CONFORMED TO CURRENT SYSTEM

SEC. 13. Section 4i of the Commodity Exchange Act (7 U.S.C. 6i) is amended to read as follows:

"SEC. 4i. It shall be unlawful for any person to make any contract for the purchase or sale of any commodity for future delivery on or subject to the rules of any contract market (1) if such person shall directly or indirectly make such contracts with respect to any commodity, or any future of such commodity, during any one day in an amount equal to or in excess of such amount as shall be fixed from time to time by the Commission, and (2) if such person shall directly or indirectly have or obtain a long or short position in any commodity, or any future of such commodity, equal to or in excess of such amount as shall be fixed from time to time by the Commission, unless such person files or causes to be filed with the properly designated officer of the Commission such reports regarding any transactions or positions within the provisions of clauses (1) and (2) hereof as the Commission may by rule or regulation require and unless, in accordance with rules and regulations of the Commission, such person shall keep books and records of all such transactions and positions and transactions and positions in any such commodity traded on or subject to the rules of any other board of trade, and of cash or spot transactions in, and inventories and purchase and sale commitments of, such commodity. Such books and records shall show complete details concerning all such transactions, positions, inventories, and commitments, including the names and addresses of all persons having any interest therein, and shall be open at all times to inspection by any representative of the Commission or the United States Department of Justice. For the purposes of this section, the futures and cash or spot transactions and positions of any person shall include such transactions and positions of any persons directly or indirectly controlled by such person.".

REGISTRATION; ASSOCIATED PERSON STATUS

SEC. 14. Section 4k of the Commodity Exchange Act (7 U.S.C. 6k) is amended—

(1) by amending subsection (1) to read as follows:

"(1) It shall be unlawful for any person to be associated with a futures commission merchant or with an introducing broker as a partner, officer, employee, or agent (or any person occupying a similar status or performing similar functions), in any capacity which involves (i) the solicitation or acceptance of customers' orders (other than in a clerical capacity) or (ii) the supervision of any person or persons so engaged, unless such person is registered with the Commission under this Act as an associated person of such futures commission merchant or of such introducing broker and such registration shall not have expired, been suspended (and the period of suspension has not expired), or been revoked, and it shall be unlawful for a futures commission merchant or introducing broker to permit such a person to become or remain associated with him in any such capacity if such futures commission merchant or introducing broker knew or should have known that such person was not so registered or that such registration had expired, been suspended (and the period of suspension has not expired), or been revoked: Provided, That any individual who is registered as a floor broker, introducing broker, or futures commission merchant (and such registration is not suspended or revoked) need not also register under these provisions.";

(2) by redesignating subsection (2) as subsection (4);

(3) by inserting a new subsection (2) to read as follows:

"(2) It shall be unlawful for any person to be associated with any commodity pool operator as a partner, officer, employee, consultant, or agent (or any person occupying a similar status or performing similar functions), in any capacity which involves (i) the solicitation of funds, securities, or property for a participation in a commodity pool or (ii) the supervision of any person or persons so engaged, unless such person is registered with the Commission under this Act as an associated person of such commodity pool operator and such registration shall not have expired, been suspended (and the period of suspension has not expired), or been revoked, and it shall be unlawful for any commodity pool operator to permit such a person to become or remain associated with him in any such capacity if such commodity pool operator knew or should have known that such person was not so registered or that such registration had expired, been suspended (and the period of suspension has not expired), or been revoked: Provided, That any individual who is registered as a floor broker, introducing broker, futures commission merchant, commodity pool operator, or as an associated person of another category of registrant under this section (and such registration is not suspended or revoked) need not also register under this provision: Provided further, That the Commission may exempt any person or class of persons from having to register under this subsection by rule, regulation, or order.";

(4) by amending subsection (3) to read as follows:

"(3) It shall be unlawful for any person to be associated with any commodity trading advisor as a partner, officer, employee, consultant, or agent (or any person occupying a similar status or performing similar functions), in any capacity which involves (i) the solicitation of a client's or prospective client's discretionary account or (ii) the supervision of any person or persons so engaged, unless such person is registered with the Commission under this Act as an associated person of such commodity trading advisor and such registration shall not have expired, been suspended (and the period of suspension has not expired), or been revoked, and it shall be unlawful for any commodity trading advisor to permit such a person to become or remain associated with him in any such capacity if such commodity trading advisor knew or should have known that such person was not so registered or that such registration had expired, been suspended (and the period of suspension has not expired), or been revoked: Provided, That any individual who is registered as a floor broker, introducing broker, futures commission merchant, commodity trading advisor, or as an associated person of another category of registrant under this section (and such registration is not suspended or revoked) need not also register under this provision: Provided further, That the Commission may exempt any person or class of persons from having to register under this subsection by rule, regulation, or order.";

(5) by amending subsection (4) as so redesignated—

(A) by striking out the words "such" and "other" the first time they occur;

(B) by striking out the words "two years after the effective date thereof or";

(C) by striking out the words ", not less than one year from the date of issuance thereof," and everything after the word "prescribe" down to the period; and

(D) by inserting the words "as an associated person of a futures commission merchant, of an introducing broker, of a commodity pool operator, or of a commodity trading advisor" after the word "registered" the first time it occurs; and

(6) by adding a new subsection (5) to read as follows:

"(5) It shall be unlawful for any registrant to permit a person to become or remain an associated person of such registrant, if the registrant knew or should have known, of facts regarding such associated person that are set forth as statutory disqualifications in section 8a(2) of this Act unless such registrant has notified the Commission of such facts and the Commission has determined that such person should be registered or temporarily licensed.".

CONFORMING AMENDMENT

SEC. 15. Section 4n of the Commodity Exchange Act (7 U.S.C. 6n) is amended by striking out subsections (5) and (6) in their entirety.

EXTENSION OF ANTIFRAUD PROVISION

SEC. 16. Section 4o of the Commodity Exchange Act (7 U.S.C. 6o) is amended—

(1) by striking out the word "or" after the words "commodity trading advisor" each time such words occur and inserting in lieu thereof the words ", associated person of a commodity trading advisor,"; and

(2) by inserting the words ", or associated person of a commodity pool operator" after the words "commodity pool operator" each time such words occur.

EXTENSION OF AUTHORITY REGARDING PROFICIENCY EXAMINATIONS

SEC. 17. Section 4p of the Commodity Exchange Act (7 U.S.C. 6p) is amended—

(1) by striking out the words "futures commission merchants, floor brokers, and those persons associated with futures commission merchants or floor brokers" in the first sentence and inserting in lieu thereof the words "persons registered with the Commission";

(2) by striking out the words "as futures commission merchants, floor brokers, and those persons associated with futures commission merchants or floor brokers" each time they occur;

(3) by striking out the word "the" before the word "customers" and by striking out the words "of futures commission merchants and floor brokers" after the word "customers"; and

(4) by inserting the words ", clients, pool participants or other members of the public with whom such individuals deal" after the word "customers".

CONTRACT MARKET RULES

SEC. 18. Section 5a of the Commodity Exchange Act (7 U.S.C. 7a) is amended—

(1) by amending paragraph (8) to read as follows:

"(8) enforce all bylaws, rules, regulations, and resolutions, made or issued by it or by the governing board thereof or any committee, which (i) have been approved by the Commission pursuant to paragraph (12) of this section, (ii) have become effective under such paragraph, or (iii) must be enforced pursuant to any Commission rule, regulation, or order; and revoke and not enforce any bylaw, rule, regulation, or resolution, made, issued, or proposed by it or by the governing board thereof or any committee,

which has been disapproved by the Commission;";

(2) by amending paragraph (11)—

(A) by striking out the comma before clause (ii) and by striking out clause (ii) in its entirety and clause (iii) down to the comma;

(B) by redesignating clause (iv) as clause (ii);

(C) by striking out the word "subsection" and inserting in lieu thereof the word "paragraph"; and

(D) by striking out the words "a futures commission merchant or a floor broker" and inserting in lieu thereof the words "another member of the contract market"; and

(3) by amending paragraph (12) to read as follows:

"(12) except as otherwise provided in this paragraph, submit to the Commission for its prior approval all bylaws, rules, regulations, and resolutions ('rules') made or issued by such contract market, or by the governing board thereof or any committee thereof, which relate to terms and conditions in contracts of sale to be executed on or subject to the rules of such contract market, as such terms and conditions are defined by the Commission by rule or regulation, except those rules relating to the setting of levels of margin. Each contract market shall submit to the Commission all other rules (except those relating to the setting of levels of margin and except those that the Commission may specify by regulation) and may put such rules into effect ten days after receipt by the Commission of such submission, unless, within the ten-day period, the contract market requests review and approval thereof by the Commission or the Commission notifies such contract market in writing of its determination to review such rules for approval. The determination to review such rules for approval shall not be delegable to any employee of the Commission. At least thirty days before approving any rules of major economic significance, as determined by the Commission, the Commission shall publish in the Federal Register a notice of such rules. The Commission shall give interested persons an opportunity to participate in the approval process through the submission of written data, views, or arguments. The determination by the Commission whether any such rules are of major economic significance shall be final and not subject to judicial review. The Commission shall approve such rules if such rules are determined by the Commission not to be in violation of this Act or the regulations of the Commission, and the Commission shall disapprove, after appropriate notice and opportunity for hearing, any such rule which the Commission determines at any time to be in violation of the provisions of this Act or the regulations of the Commission. If the Commission institutes proceedings to determine whether a rule should be disapproved pursuant to this paragraph, it shall provide the contract market with written notice of the proposed grounds for disapproval, including the specific section or sections of this Act or the Commission's regulations which would be violated. At the conclusion of such proceedings, the Commission shall approve or disapprove such rule. Any disapproval shall specify the sections of this Act or the Commission's regulations which the Commission determines such rule has violated or, if effective, would violate. If the Commission does not approve or institute disapproval proceedings with respect to any rule within one hundred-eighty days after receipt or within such longer period as the contract market may agree to, or if the Commission does not conclude a disapproval proceeding with respect to any rule within one year after receipt or within such longer period as the contract market may agree to, such rule may be put into effect by the contract market until such time as the Commission disapproves such rule in accordance with this paragraph. The Commission shall specify the terms and conditions under which a contract market may, in an emergency as defined by the Commission, put a rule into effect on a temporary basis without prior Commission approval, or without compliance with the ten-day notice requirement under this paragraph, or during any period of review by the Commission. In the event of such an emergency, as defined by the Commission, requiring immediate action, the contract market by a two-thirds vote of its governing board may immediately put such a temporary rule into effect dealing with such emergency if the contract market notifies the Commission of such action with a complete explanation of the emergency involved.".

CONTRACT MARKET DESIGNATION PROCEDURES

SEC. 19. Section 6 of the Commodity Exchange Act (7 U.S.C. 8) is amended by inserting immediately after the first sentence the following: "The Commission shall approve or deny an application for designation as a contract market within one year of the filing of the application. If the Commission notifies the board of trade that its application is materially incomplete and specifies the deficiencies in the application, the running of the one-year period shall be stayed from the time of such notification until the application is resubmitted in completed form. If the Commission denies an application, it shall specify the grounds for the denial.".

APPEALS; CONFORMING AMENDMENT

SEC. 20. Section 6(b) of the Commodity Exchange Act (7 U.S.C. 9) is amended—

(1) by striking out the words "as futures commission merchant or any person associated therewith as described in section 4k of this Act, commodity trading advisor, commodity pool operator, or as floor broker" and inserting in lieu thereof the words "with the Commission in any capacity" in the first and ninth sentences; and

(2) by inserting after the words "doing business" in the eleventh sentence the words ", or in the case of an order denying registration, the circuit in which the petitioner's principal place of business listed on petitioner's application for registration is located,".

RESTRAINING ORDERS, INJUNCTIONS, WRITS OF MANDAMUS

SEC. 21. Section 6c of the Commodity Exchange Act (7 U.S.C. 13a-1) is amended by inserting after the words "restraining order" in the first proviso the following: "(other than a restraining order which prohibits any person from destroying, altering or disposing of, or refusing to permit authorized representatives of the Commission to inspect, when and as requested, any books and records or other documents or which prohibits any person from withdrawing, transferring, removing, dissipating, or disposing of any funds, assets, or other property)".

JURISDICTION OF THE STATES

SEC. 22. Section 6d of the Commodity Exchange Act (7 U.S.C. 13a-2) is amended by adding at the end thereof the following new paragraph:

"(8)(A) Except as provided in subparagraphs (B) and (C), nothing in this Act shall prohibit an authorized State official from instituting an action in State court or an adjudicatory administrative proceeding against any person registered under this Act (other than a floor broker) for an alleged violation of any antifraud provision of any commodities or securities statute of such State which makes it unlawful directly or indirectly—

"(i) to employ any device, scheme, or artifice to defraud any person;

"(ii) to engage in any transaction, practice, or course of business which perpetrates fraud or deceit upon any person; or

"(iii) to make or cause to be made any untrue statement of a material fact or fail to disclose a material fact in connection with any statement made or information provided to any person which, in light of the circumstances under which such statement was made or information provided, was necessary in order to make the statement not misleading.

"(B) Nothing contained in this section shall permit any State—

"(i) to impose upon any person registered under this Act, or to initiate any action or proceeding against such person for an alleged violation of, any State licensing, registration, or qualification requirements which are provided for under any State commodities or securities statute; or

"(ii) to initiate any action or proceeding against a person registered under this Act for an alleged violation of any rule, regulation, or statement of general policy issued under any State commodities or securities statute.

"(C)(i) No action or proceeding may be instituted under this section unless—

"(I) an authorized State official provides the Commission with prior written notice of the intention of the State to commence such action or proceeding and with a copy of the proposed complaint and supporting evidence;

"(II) the Commission, based on its review of such complaint and evidence, determines that the documents provided are a sufficient basis upon which to render a determination and determines that such action or proceeding would not be inconsistent with this Act or any rule, regulation, order, or policy of the Commission adopted pursuant to this Act; and

"(III) the Commission notifies such State official of its determinations in writing.

"(ii) The determinations of, and notice provided by, the Commission under clause (i) shall be made within thirty days after the date of receipt by the Commission of the documentation required under clause (i)(I) or within such other period as is agreed upon by the Commission and the authorized State official. No action or proceeding may be instituted under this section if the Commission determines, within the specified or agreed upon time period, that such action or proceeding would be inconsistent with this Act or any rule, regulation, order, or policy of the Commission adopted pursuant to this Act. If the Commission fails to make either determination and provide notice under clause (i) within such period, the State official may initiate an action or proceeding based on the proposed complaint provided to the Commission.

"(iii) In making its determinations under clause (i)(II), the Commission may assume the truth of the facts and evidence submitted in support of the allegations in the proposed complaint.

"(iv) The Commission's authority under clause (i)(II) may not be delegated to any employee of the Commission.

"(v) A determination of the Commission under clause (i)(II) shall be final and not subject to direct or collateral judicial review.

"(vi) This paragraph shall not create any right, liability, or obligation upon which an action may be brought against the Commission.".

CONFIDENTIALITY PROVISIONS; DISCLOSURE

SEC. 22. Section 8 of the Commodity Exchange Act (7 U.S.C. 12) is amended—

(1) by striking out the word "Provided" in subsection (a) and all that follows through the words "names of customers" and inserting in lieu thereof the following: "Provided, That except as otherwise specifically authorized in this Act, the Commission may not (1) disclose any records containing or based on (i) confidential information, or (ii) proprietary information that would not customarily be disclosed to the public by the persons from whom it was obtained, except that the Commission may disclose such confidential or proprietary information if disclosure is necessary to obtain public comment, or (2) publish data and information that would separately disclose the business transactions or market positions of any person and trade secrets or names of customers or data and information concerning or obtained in connection with any investigation of any person";

(2) by amending subsection (b)—

(A) by inserting the words "concerning or obtained in connection with any investigation of any person or" after the word "information";

(B) by striking out the word "or" before the words "in an administrative or judicial proceeding"; and

(C) by inserting after the word "Act" the words ", in any receivership proceeding involving a receiver appointed in a judicial proceeding brought under this Act, or in any bankruptcy proceeding in which the Commission has intervened or in which the Commission has the right to appear and be heard under the Bankruptcy Code";

(3) by amending subsection (e)—

(A) by striking out the words "of the Executive Branch"; and

(B) by inserting the following at the end thereof: "Upon the request of any department or agency of any State or any political subdivision thereof, acting within the scope of its jurisdiction, or any department or agency of any foreign government or any political subdivision thereof, acting within the scope of its jurisdiction, the Commission may furnish to such department or agency any information in the possession of the Commission obtained in connection with the administration of this Act. Any information furnished to any department or agency of any State or political subdivision thereof shall not be disclosed by such department or agency except in connection with an adjudicatory action or proceeding brought under this Act or the laws of such State or political subdivision to which such State or political subdivision or any department or agency thereof is a party. The Commission shall not furnish any information to a department or agency of a foreign government or political subdivision thereof unless the Commission is satisfied that the information will not be disclosed by such department or agency except in connection with an adjudicatory action or proceeding brought under the laws of such foreign government or political subdivision to which such foreign government or political subdivision or any department or agency thereof is a party.";

(4) by redesignating subsections (f) and (g) as subsections (h) and (i), respectively; and

(5) by adding new subsections (f) and (g) to read as follows:

"(f) The Commission shall provide any registration information maintained by the Commission on any registrant upon reasonable request made by any department or agency of any State or any political subdivision thereof. Whenever the Commission determines that such information may be appropriate for use by any department or agency of a State or political subdivision thereof, the Commission shall provide such information without request.

"(g) The Commission shall disclose information in its possession pursuant to a subpena or summons only if—

"(1) a copy of the subpena, or summons has been mailed to the last known home or business address of the person who submitted the information that is the subject of the subpena or summons, if the address is known to the Commission, and

"(2) fourteen days have expired from the date of such mailing of the subpena or summons.

This subsection shall not apply to congressional subpenas or congressional requests for information.".

STATUTORY DISQUALIFICATION FROM REGISTRATION; DELEGATION OF REGISTRATION FUNCTIONS

SEC. 23. Section 8a of the Commodity Exchange Act (7 U.S.C. 12a) is amended—

(1) by amending paragraph (1) to read as follows:

"(1) to register futures commission merchants, associated persons of futures commission merchants, introducing brokers, associated persons of introducing brokers, commodity trading advisors, associated persons of commodity trading advisors, commodity pool operators, associated persons of commodity pool operators, and floor brokers upon application in accordance with rules and regulations and in the form and manner to be prescribed by the Commission, which may require the applicant, and such persons associated with the applicant as the Commission may specify, to be fingerprinted and to submit, or cause to be submitted, such fingerprints to the Attorney General for identification and appropriate processing, and in connection therewith to fix and establish from time to time reasonable fees and charges for registrations and renewals thereof. Notwithstanding any other provision of this Act, the Commission may grant a temporary license to any applicant for registration with the Commission pursuant to such rules, regulations, or orders as the Commission may adopt, except that the term of any such temporary license shall not exceed six months from the date of its issuance; and";

(2) by amending paragraph (2) to read as follows:

"(2) upon notice, but without a hearing and pursuant to such rules, regulations, or orders as the Commission may adopt, to refuse to register, to register conditionally, to suspend, or to place restrictions upon the registration of, any person and with such a hearing as may be appropriate to revoke the registration of any person—

"(A) if a prior registration of such person in any capacity has been suspended (and the period of such suspension has not expired) or has been revoked;

"(B) if registration of such person in any capacity has been refused under the provisions of paragraph (3) of this section within five years preceding the filing of the application for registration or at any time thereafter;

"(C) if such person is permanently or temporarily enjoined by order, judgment, or decree of any court of competent jurisdiction (except that registration may not be revoked solely on the basis of such temporary order, judgment, or decree), including an order entered pursuant to an agreement of settlement to which the Commission or any Federal or State agency or other governmental body is a party, from (i) acting as a futures commission merchant, introducing broker, floor broker, commodity trading advisor, commodity pool operator, associated person of any registrant under this Act, securities broker, securities dealer, municipal securities broker, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company, or affiliated person or employee of any of the foregoing; or (ii) engaging in or continuing any activity involving any transaction in or advice concerning contracts of sale of a commodity for future delivery, or concerning activity subject to Commission regulation under section 4c or 19 of this Act or concerning securities;

"(D) if such person has been convicted within ten years preceding the filing of any application for registration or at any time thereafter of any felony which (i) involves any transactions or advice concerning any contract of sale of a commodity for future delivery, or any activity subject to Commission regulation under section 4c or 19 of this Act, or concerning a security; or (ii) arises out of the conduct of the business of a futures commission merchant, introducing broker, floor broker, commodity trading advisor, commodity pool operator, associated person of any registrant under this Act, securities broker, securities dealer, municipal securities broker, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company, or an affiliated person or employee of any of the foregoing; or (iii) involves embezzlement, theft, extortion, fraud, fraudulent conversion, misappropriation of funds, securities or property, forgery, counterfeiting, false pretenses, bribery, or gambling; or (iv) involves the violation of section 152, 1341, 1342, or 1343, or chapter 25, 47, 95, or 96 of title 18, United States Code;

"(E) if such person, within ten years preceding the filing of the application or at any time thereafter, has been found by any court of competent jurisdiction, by the Commission or any Federal or State agency or other governmental body, or by agreement of settlement to which the Commission or any Federal or State agency or other governmental body is a party, (i) to have violated any provision of this Act, the Securities Act of 1933, the Securities Exchange Act of 1934, the Public Utility Holding Company Act of 1935, the Trust Indenture Act of 1939, the Investment Advisers Act of 1940, the Investment Company Act of 1940, the Securities Investors Protection Act of 1970, the Foreign Corrupt Practices Act of 1977, or any similar statute of a State or foreign jurisdiction, or any rule, regulation, or order under any such statutes, or the rules of the Municipal Securities Rulemaking Board where such violation involves embezzlement, theft, extortion, fraud, fraudulent conversion, misappropriation of funds, securities or property, forgery, counterfeiting, false pretenses,

bribery, or gambling; or (ii) to have willfully aided, abetted, counseled, commanded, induced, or procured such violation by any other person;

"(F) if such person is subject to an outstanding order of the Commission denying trading privileges on any contract market to such person, denying, suspending, or revoking such person's membership in any contract market or registered futures association, or barring or suspending such person from being associated with a registrant under this Act or with a member of a contract market or with a member of a registered futures association;

"(G) if, as to any of the matters set forth in subparagraphs (A) through (F) of this paragraph, such person willfully made any material false or misleading statement or omitted to state any material fact in such person's application; or

"(H) if refusal, suspension, or revocation of the registration of any principal of such person would be warranted because of a statutory disqualification listed in this paragraph: Provided, That for the purposes of paragraphs (2) and (3) of this section, 'principal' shall mean, if the person is a partnership, any general partner or, if the person is a corporation, any officer, director, or beneficial owner of at least 10 per centum of the voting shares of the corporation, and any other person that the Commission by rule, regulation, or order determines has the power, directly or indirectly, through agreement or otherwise, to exercise a controlling influence over the activities of such person which are subject to regulation by the Commission:

Provided, That such person may appeal from a decision to refuse registration, condition registration, suspend, revoke, or place restrictions upon registration made pursuant to the provisions of this paragraph in the manner provided in paragraph (b) of section 6 of this Act; and";

(3) by striking out paragraph (4) and redesignating paragraph (3) as paragraph (4);

(4) by inserting a new paragraph (3) to read as follows:

"(3) to refuse to register or to register conditionally any person, if it is found, after opportunity for hearing, that—

"(A) such person has been found by the Commission or by any court of competent jurisdiction to have violated or has consented to findings of a violation of any provision of this Act, or any rule, regulation, or order thereunder (other than a violation set forth in paragraph (2) of this section), or to have willfully aided, abetted, counseled, commanded, induced, or procured the violation by any other person of any such provision;

"(B) such person has been found by any court of competent jurisdiction or by any Federal or State agency or other governmental body, or by agreement of settlement to which any Federal or State agency or other governmental body is a party, (i) to have violated any provision of the Securities Act of 1933, the Securities Exchange Act of 1934, the Public Utility Holding Company Act of 1935, the Trust Indenture Act of 1939, the Investment Advisers Act of 1940, the Investment Company Act of 1940, the Securities Investors Protection Act of 1970, the Foreign Corrupt Practices Act of 1977, or any similar statute of a State or foreign jurisdiction, or any rule, regulation, or order under any such statutes, or the rules of the Municipal Securities Rulemaking Board; or (ii) to have willfully aided, abetted, counseled, commanded, induced, or procured such violation by any other person;

"(C) such person failed reasonably to supervise another person, who is subject to such person's supervision, with a view to preventing violations of this Act, or of any of the statutes set forth in subparagraph (B) of this paragraph, or of any of the rules, regulations, or orders thereunder, and the person subject to supervision committed such a violation: Provided, That no person shall be deemed to have failed reasonably to supervise another person within the meaning of this paragraph if (i) there have been established procedures and a system for applying such procedures which would reasonably be expected to prevent and detect, insofar as practicable, any such violation by such other person, and (ii) such person has reasonably discharged the duties and obligations incumbent upon that person, as supervisor, by reason of such procedures and system, without reasonable cause to believe that such procedures and system were not being complied with;

"(D) such person was convicted of a felony other than a felony of the type specified in paragraph (2)(D) of this section within ten years preceding the filing of the application or at any time thereafter, or was convicted of a felony, including a felony of the type specified in paragraph (2)(D) of this section, more than ten years preceding the filing of the application;

"(E) such person was convicted within ten years preceding the filing of any application for registration or at any time thereafter of any misdemeanor which (i) involves any transactions or advice concerning any contract of sale of a commodity for future delivery or any activity subject to Commission regulation under section 4c or 19 of this Act or concerning a security; or (ii) arises out of the conduct of the business of a futures commission merchant, introducing broker, floor broker, commodity trading advisor, commodity pool operator, associated person of any registrant under this Act, securities broker, securities dealer, municipal securities broker, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company, or an affiliated person or employee of any of the foregoing; or (iii) involves embezzlement, theft, extortion, fraud, fraudulent conversion, misappropriation of funds, securities or property, forgery, counterfeiting, false pretenses, bribery, or gambling; or (iv) involves the violation of section 152, 1341, 1342, or 1343 or chapter 25, 47, 95, or 96 of title 18, United States Code;

"(F) such person was debarred by any agency of the United States from contracting with the United States;

"(G) such person willfully made any material false or misleading statement or willfully omitted to state any material fact in such person's application or in any report required to be filed with the Commission by this Act or the regulations thereunder, or in any proceeding before the Commission;

"(H) such person has pleaded nolo contendere to criminal charges of felonious conduct, or has been convicted in a State court or in a foreign court of conduct which would constitute a felony under Federal law if the offense had been committed under Federal jurisdiction;

"(I) in the case of an applicant for registration in any capacity for which there are minimum financial requirements prescribed under this Act or under the rules or regulations of the Commission, such person has not established that such person meets such minimum financial requirements;

"(J) such person is subject to an outstanding order denying, suspending, or expelling such person from membership in a contract market, a registered futures association, or any other self-regulatory organization, or barring or suspending such person from being associated with any member or members of such contract market, association, or self-regulatory organization;

"(K) such person has been found by any court of competent jurisdiction or by any Federal or State agency or other governmental body, or by agreement of settlement to which any Federal or State agency or other governmental body is a party, (i) to have violated any statute or any rule, regulation, or order thereunder which involves embezzlement, theft, extortion, fraud, fraudulent conversion, misappropriation of funds, securities or property, forgery, counterfeiting, false pretenses, bribery, or gambling, or (ii) to have willfully aided, abetted, counseled, commanded, induced, or procured such violation by any other person;

"(L) such person has associated with such person any other person and knows, or in the exercise of reasonable care should know, of facts regarding such other person that are set forth as statutory disqualifications in paragraph (2) of this section unless such person has notified the Commission of such facts and the Commission has determined that such other person should be registered or temporarily licensed;

"(M) there is other good cause; or

"(N) any principal, as defined in paragraph (2) of this section, of such person has been or could be refused registration: Provided, That pending final determination under this paragraph, registration shall not be granted: Provided further, That such person may appeal from a decision to refuse registration or to condition registration made pursuant to the provisions of this paragraph in the manner provided in paragraph (b) of section 6 of this Act; and";

(5) by amending paragraph (4), as so redesignated—

(A) by striking out the word "or" before the word "revoke" the first time it occurs and inserting in lieu thereof a comma;

(B) by inserting the words ", or place restrictions upon" after the word "revoke" the first time it occurs;

(C) by striking out the words "subparagraph (2) (B) or (C)" and inserting in lieu thereof the words "paragraph (3) of this section";

(D) by inserting the words "or of any introducing broker" after the words "futures commission merchant"; and

(E) by adding the following proviso before the semicolon at the end thereof: ": Provided, That such person may appeal from a decision to suspend, revoke, or place restrictions upon registration made pursuant to the provisions of this paragraph in the manner provided in paragraph (b) of section 6 of this Act"; and

(6) by adding a new paragraph (10) to read as follows:

"(10) to authorize any person to perform any portion of the registration functions under this Act, in accordance with rules, notwithstanding any other provision of law, adopted by such person and submitted to the Commission for approval pursuant to section 17(j) and subject to the provisions of this Act applicable to registrations granted by the Commission.".

JUDICIAL REVIEW OF COMMISSION'S ACTIONS WITH RESPECT TO MARKET EMERGENCIES

SEC. 24. Paragraph (9) of section 8a of the Commodity Exchange Act (7 U.S.C. 12a(9)) is amended to read as follows:

"(9) to direct the contract market whenever it has reason to believe that an emergency exists to take such action, including the setting of temporary emergency levels of margin, as, in the Commission's judgment, is necessary to maintain or restore orderly trading in, or liquidation of, any futures contract. The term 'emergency' as used herein shall mean, in addition to threatened or actual market manipulations and corners, any act of the United States or a foreign government affecting a commodity or any other major market disturbance which prevents the market from accurately reflecting the forces of supply and demand for such commodity. Any action taken by the Commission under this paragraph shall be subject to review only in the United States court of appeals for the circuit in which the party seeking review resides or has its principal place of business, or in the United States Court of Appeals for the District of Columbia Circuit. Such review shall be based upon an examination of all of the information before the Commission at the time the determination was made. The court reviewing the Commission's action shall not enter a stay or order of mandamus unless it has determined, after notice and hearing before a panel of the court, that the action complained of was arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law. Nothing herein shall be deemed to limit the meaning or interpretation given by a contract market to the terms 'market emergency', 'emergency', or equivalent language in its own bylaws, rules, regulations, or resolutions; and".

CERTAIN PROHIBITED TRANSACTIONS

SEC. 25. Section 9 of the Commodity Exchange Act (7 U.S.C. 13) is amended—

(1) by amending subsection (a)—

(A) by striking out the words "futures commission merchant" and inserting in lieu thereof "person registered or required to be registered under this Act";

(B) by striking out the words "by such commission merchant" and inserting in lieu thereof "by such person or any employee or agent thereof";

(C) by striking out the words "of such commission merchant"; and

(D) by inserting the words "or which otherwise was received from any customer, client, or pool participant in connection with the business of such person" after the word "contracts" the second time it occurs;

(2) by amending subsection (d)—

(A) by inserting after the words "'decline guaranty'," the following: "or any transaction for the delivery of any commodity under a standardized contract commonly known to the trade as a margin account, margin contract, leverage account, or leverage contract, or under any contract, account, arrangement, scheme, or device that the Commission determines serves the same function or functions as such a standardized contract, or is marketed or managed in substantially the same manner as such a standardized contract,"; and

(B) by inserting the following before the period at the end of the first sentence: ", nor to any transaction entered into by the trustee of a trust established by such person over which such person exercises no control if such transaction is entered into solely to hedge against adverse price changes in connection with such farming or ranching operations or is a transaction for the lease of oil or gas or other mineral rights or interests owned by such person: Provided further, That such prohibition against any investment transaction in an actual commodity shall not apply to a transaction in which such person buys or sells, directly or indirectly (except by means of an instrument regulated by the Commission), a United States Government security, a certificate of deposit, or similar financial instrument if no nonpublic information is used by such person in such transaction"; and

(3) by inserting after the words "'decline guaranty'" each time they occur in subsection (e) the following: ", or in any transaction for the delivery of any commodity under a standardized contract commonly known to the trade as a margin account, margin contract, leverage account, or leverage contract, or under any contract, account, arrangement, scheme, or device that the Commission determines serves the same function or functions as such a standardized contract, or is marketed or managed in substantially the same manner as such a standardized contract".

REAUTHORIZATION; OFF-EXCHANGE JURISDICTION

SEC. 26. Section 12 of the Commodity Exchange Act (7 U.S.C. 16) is amended—

(1) by striking out "1982" and inserting in lieu thereof "1984" in subsection (d); and

(2) by adding a new subsection (e) to read as follows:

"(e) Nothing in this Act shall supersede or preempt: (1) criminal prosecution under any Federal criminal statute; (2) any Federal or State statute, including any rule or regulation thereunder, that is applicable to any transaction in or involving any commodity, product, right, service, or interest which is not conducted on or subject to the rules of a contract market or (except as otherwise specified by the Commission by rule or regulation) any board of trade, exchange, or market located outside the United States, its territories or possessions, or which is not subject to regulation by the Commission under section 4c or 19 of this Act; (3) the application of any Federal or State statute, including any rule or regulation thereunder, to any person required to be registered or designated under this Act who shall fail or refuse to obtain such registration or designation. The Commission is authorized to refer any transaction or matter subject to such other Federal or State statutes to any department or agency administering such statutes for such investigation, action, or proceedings as the department or agency shall deem appropriate.".

SECONDARY LIABILITY

SEC. 27. Section 13 of the Commodity Exchange Act (7 U.S.C. 13c) is amended—

(1) by striking out the words "in administrative proceedings under this Act" in subsection (a);

(2) by redesignating existing subsection (b) as subsection (c); and

(3) by adding a new subsection (b) to read as follows:

"(b) Any person who, directly or indirectly, controls any person who has violated any provision of this Act or any of the rules, regulations, or orders issued pursuant thereto may be held liable for such violation in any action brought by the Commission to the same extent as such controlled person if the controlling person did not act in good faith and directly or indirectly induced the act or acts constituting the violation. In proving a violation of this subsection, the Commission shall bear the burden of showing that the controlling person did not act in good faith and directly or indirectly induced the act or acts constituting the violation.".

REPARATIONS PROCEDURE

SEC. 28. Section 14 of the Commodity Exchange Act (7 U.S.C. 18) is amended—

(1) by striking out existing subsections (b), (c), and (e);

(2) by redesignating subsections (d), (f), (g), (h), and (i) as subsections (c), (d), (e), (f), and (g), respectively;

(3) by amending subsection (a)—

(A) by striking out the words "or required to be registered under section 4d, 4e, 4k, or 4m of" and inserting in lieu thereof the word "under"; and

(B) by striking out everything after the words "to the Commission" and inserting in lieu thereof the words "for an order awarding actual damages proximately caused by such violation.";

(4) by adding a new subsection (b) to read as follows:

"(b) The Commission may promulgate such rules, regulations, and orders as it deems necessary or appropriate for the efficient and expeditious administration of this section. Notwithstanding any other provision of law, such rules, regulations, and orders may prescribe, or otherwise condition, without limitation, the form, filing, and service of pleadings or orders; the nature and scope of discovery, counterclaims, motion practice (including the grounds for dismissal of any claim or counterclaim), hearings (including the waiver thereof, which may relate to the amount in controversy), rights of appeal, if any, and all other matters governing proceedings before the Commission under this section.";

(5) by striking out "(g)" in subsection (d), as so redesignated, and inserting in lieu thereof "(e)"; and

(6) by amending subsection (f), as so redesignated, to read as follows:

"(f) Unless the party against whom a reparation order has been issued shows to the satisfaction of the Commission within fifteen days from the expiration of the period allowed for compliance with such order that either an appeal as herein authorized has been taken or payment of the full amount of the order (or any agreed settlement thereof) has been made, such party shall be prohibited automatically from trading on all contract markets and, if the party is registered with the Commission, such registration shall be suspended automatically at the expiration of such fifteen day period until such party shows to the satisfaction of the Commission that payment of such amount with interest thereon to date of payment has been made: Provided, That if on appeal the appellee prevails or if the appeal is dismissed the automatic prohibition against trading and suspension of registration shall become effective at the expiration of thirty days from the date of judgment on the appeal, but if the judgment is stayed by a court of competent jurisdiction the suspension shall become effective ten days after the expiration of such stay, unless prior thereto the judgment of the court has been satisfied.".

TECHNICAL AMENDMENT

SEC. 29. Section 16 of the Commodity Exchange Act (7 U.S.C. 20) is amended by inserting the words "or market positions" after the word "transactions" in subsection (d).

REGISTERED FUTURES ASSOCIATIONS; FINGERPRINTING MEMBERS

SEC. 30. Section 17 of the Commodity Exchange Act (7 U.S.C. 21) is amended—

(1) by amending subsection (b)(4)(E) by inserting before the period at the end thereof the following: ", which may require the applicant to be fingerprinted and to submit, or cause to be submitted, such fingerprints to the Attorney General for identification and appropriate processing. Notwithstanding any other provision of law, such association may receive from the Attorney General all the results of such identification and processing";

(2) by amending paragraph (10) of subsection (b)—

(A) by striking out the words "a customer's" and inserting in lieu thereof "customers' ";

(B) by striking out the comma before clause (ii) and by striking out clause (ii) in its entirety and clause (iii) down to the comma;

(C) by redesignating clause (iv) as clause (ii); and

(D) by striking out the words "a futures commission merchant or a floor broker" and inserting in lieu thereof the words "another member of the association";

(3) by striking out "(k)" in subsection (h) and inserting in lieu thereof "(i)";

(4) by striking out the last sentence in subsection (j) and inserting in lieu thereof the following: "A registered futures association shall submit to the Commission any change in or addition to its rules and may put such rules into effect ten days after receipt by the Commission of such submission, unless, within the ten-day period, the registered futures association requests review and approval thereof by the Commission or the Commission notifies such registered futures association in writing of its determination to review such rules for approval. The Commission shall approve such rules within thirty days of their receipt if Commission approval is requested hereunder or within thirty days after the Commission determines to review for approval any other rules, unless the Commission notifies the registered futures association of its inability to complete such approval or review within such period of time. The Commission shall approve such rules if such rules are determined by the Commission to be consistent with the requirements of this section and not otherwise in violation of this Act or the regulations of the Commission and the Commission shall disapprove, after appropriate notice and opportunity for hearing, any such rule which the Commission determines at any time to be inconsistent with the requirements of this section or in violation of the provisions of the Act or the regulations of the Commission. If the Commission does not approve or institute disapproval proceedings with respect to any rule within one hundred and eighty days after receipt or within such longer period of time as the registered futures association may agree to, or if the Commission does not conclude a disapproval proceeding with respect to any rule within one year after receipt or within such longer period as the registered futures association may agree to, such rule may be placed into effect by the registered futures association until such time as the Commission disapproves such rule in accordance with this subsection.";

(5) by adding at the end thereof the following new subsection:

"(o) The Commission is authorized to require any futures association registered pursuant to this section to perform any portion of the registration functions under this Act with respect to each member of the association other than a contract market and with respect to each associated person of such member, in accordance with rules, notwithstanding any other provision of law, adopted by such futures association and submitted to the Commission for approval pursuant to section 17(j) and subject to the provisions of this Act applicable to registrations granted by the Commission. In performing any Commission registration function authorized by the Commission under section 8a(10), this section or any other applicable provisions of this Act, a futures association may issue orders—

"(1) to refuse to register any person;

"(2) to register conditionally any person;

"(3) to suspend the registration of any person;

"(4) to place restrictions on the registration of any person; or

"(5) to revoke the registration of any person.

Any person against whom such an order has been issued, and against whom such order is the final decision of such futures association, may petition the Commission to review the decision. The Commission may on its own initiative or upon petition decline review, grant review and affirm, set aside, or modify such an order of the futures association, and the findings of the futures association, as to the facts, if supported by the weight of the evidence, shall be conclusive. Unless the Commission grants review, under this section, of an order concerning registration issued by a futures association, the order of the futures association shall be considered to be an order issued by the Commission. Nothing in this section shall affect the Commission's authority to review the granting of a registration application by a registered futures association that is performing any Commission registration function authorized by the Commission under section 8a(10), this section, or any other applicable provisions of this Act. In the event that a person against whom a futures association has issued a registration order under subsection (1) petitions the Commission to review that order and the Commission declines to take review, such person may file a petition for review with a United States Court of Appeals, in accordance with the requirements of section 6(b) of this Act.".

TRANSACTION FEE STUDY

SEC. 31. (a) Not later than January 1, 1984, the Commodity Futures Trading Commission shall (1) conduct a study of the effect of imposing fees on the purchase and sale of futures contracts, commodity options, and leverage transactions subject to the Commodity Exchange Act to offset the cost of regulating transactions under the jurisdiction of the Commission and (2) submit to the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture a detailed report on the results of the study, including any recommendations for legislation.

(b) The study provided for in subsection (a) shall include, but not be limited to, consideration of the effect of a transaction fee on market liquidity, determination of the portions of the Commission's budget benefiting the public and market participants of the Nation's commodity markets, and consideration of the incidence of such a fee, including the impact on producers, processors, manufacturers, and other hedgers.

AGRICULTURAL EXPORTS

SEC. 32. Section 812 of the Agricultural Act of 1970 (7 U.S.C. 612c-3) is amended by adding at the end thereof the following new sentence: "Notwithstanding any other provision of law, the President shall not prohibit or curtail the export of any agricultural commodity or the products thereof under an export sales contract (1) entered into before the President announces an action that would otherwise prohibit or curtail the export of the commodity or products thereof, (2) the terms of which require delivery of the commodity or products thereof within 270 days after the date the suspension of trade is imposed, except that the President may prohibit or curtail the export of any commodity or the products thereof during a period for which the President has declared a national emergency or for which Congress has declared war.".

INSIDER TRADING STUDY

SEC. 33. (a) The Commodity Futures Trading Commission shall conduct a study to determine (1) the extent of insider trading of futures contracts on contract markets subject to regulation under the Commodity Exchange Act and (2) whether such trading is, or can be (in reasonably anticipated circumstances), connected with—

(A) excessive speculation or manipulation or improper control of the futures markets, or

(B) improper activities with respect to the establishment of cash prices for the commodities involved.

The Commission shall complete the study and report its findings to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate within six months after the date of enactment of this Act.

"(b) As used in subsection (a) of this section, the term 'insider trading' means trading by an individual who has access to material information, not generally available to the public, about present or anticipated cash or futures trading activity or positions (to which the individual is not a party) in any commodity, in cases in which such trading activity or positions are in amounts at or above reporting levels fixed by the Commodity Futures Trading Commission under section 4i of the Commodity Exchange Act.".

EFFECTIVE DATE

SEC. 34. This Act shall be effective upon the date of enactment of this Act, except that sections 9, 14, and 28 of this Act shall be effective one hundred and twenty days after the date of enactment of this Act, or such earlier date as the Commodity Futures Trading Commission shall prescribe by regulation.

Mr. HELMS. Mr. President, I ask unanimous consent that S. 2109 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LUGAR. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. I thank the Chair.

CLARIFICATION OF JURISDICTION OF THE SECURITIES AND EXCHANGE COMMISSION

The PRESIDING OFFICER. Under the previous order the Senate will proceed to the consideration of H.R. 6156 which the clerk will state by title.

The legislative clerk read as follows:

A bill (H.R. 6156) to clarify the jurisdiction of the Securities and Exchange Commission and the definition of security, and for other purposes.

The Senate proceeded to consider the bill, which was considered to have been read a second time.

Mr. D'AMATO. Mr. President, H.R. 6156 is an important but noncontroversial bill amending the Federal securities laws to reconcile ambiguities in those statutes. The existence of these issues has led to unproductive disputes concerning the division of authority between the Securities and Exchange Commission and the Commodity Futures Trading Commission over certain new financial products, and the roles of securities exchanges and futures exchanges. H.R. 6156 is substantially similar to S. 2260, a bill approved without objection by the Banking Committee earlier this year.

The bill would make it clear that the SEC's plenary authority over options trading on national securities exchanges extends to options on securities, securities groups and indices, certificates of deposit, and foreign currency.

I would emphasize to my colleagues that these changes are urgently needed. In recent years, both the Nation's securities exchanges and the boards of trade have developed a variety of new trading instruments to respond to a growing need among businesses and investors to minimize or avoid financial and interest rate risks. But because of the ambiguities in the securities and commodities laws, confusion over which agency has authority over each product has led to undue delays in their approval for trading and, in some instances, to litigation about the regulatory jurisdiction over such products, rather than analysis of the merits of the products.

In fact, once court recently reached a decision regarding the scope of the SEC's jurisdiction which radically departs from widely held interpretations of the SEC's authority. This confusion and uncertainty must be remedied by swift congressional action, and this bill would do so.

Since its creation in 1934, the SEC has had plenary regulatory authority over trading in securities. The definitions of the term, "security," found in the various securities laws were intentionally made broad and flexible in order that they would cover evolving financial instruments not in existence at the time the laws were passed. Thus, although the word "option" is not explicitly included in the definition of "security," a call option on a security is a "right to purchase" a security and both put and call options on securities are considered instruments commonly known as securities. Accordingly, the SEC has properly exercised jurisdiction since 1973 over exchange trading in options on securities.

For most of its history, the SEC's authority to regulate options on securities was unchallenged. However, developments in recent years have given rise to jurisdictional uncertainty and controversy. Congress in 1974 enacted amendments to the Commodity Exchange Act which created the Commodity Futures Trading Commission (CFTC), expanded the definition of "commodity" in that act and vested the CFTC with exclusive jurisdiction over accounts, agreements and transactions involving contracts of sale of a commodity for future delivery. During the past decade, commodity boards of trade—which had formerly traded only contracts of sale for future delivery of agricultural commodities and metals—have begun to trade futures contracts on various financial instruments, including GNMA securities, certain Treasury securities, and certain stock indices.

The grant in 1974 of exclusive jurisdiction of the CFTC with respect to transactions involving futures contracts, in conjunction with the failure of the definitional sections of the securities laws expressly to include put-and-call options on exempted securities such as GNMA's and Treasury securities, led to confusion and litigation. In particular, one court recently concluded that exchange-traded put and call options on GNMA securities were not themselves securities and were subject to the exclusive jurisdiction of the CFTC. *Board of Trade of the City of Chicago* v. *SEC*, 677 F. 2d 1137 (7th Cir. 1982). That decision has created uncertainty as to the extent and nature of the SEC's authority to regulate trading in securities options and, without modification, would lead to continuing controversy. The bill before the Senate would clarify that the SEC has plenary authority to regulate trading in securities options and would overturn the seventh circuit's recent decision.

Realizing that the longstanding jurisdictional controversy was not in the public interest, the SEC and the CFTC reached an agreement as to the appropriate scope of their respective jurisdictions, and submitted proposed legislation to codify that agreement. The two agencies recognized the SEC as properly being the sole Federal regulator of options on securities, certificates of deposit, groups or indices of securities, and, when traded on a national securities exchange, options on foreign currencies. This regulatory authority of the SEC over these options is confirmed by H.R. 6156.

The pending CFTC authorization bill, S. 2109, contains that part of the jurisdictional accord which would confirm that the CFTC is to have jurisdiction to regulate futures contracts on exempted securities (other than municipal securities) and on broad-based securities indices, as well as options on any such futures contracts. The CFTC will also have jurisdiction to regulate the trading of options on foreign currencies in the commodities markets.

H.R. 6156 would amend the securities laws in the following ways. First, the bill would clarify the SEC's authority over options by amending the definition of the term "security" in the Securities Act and the Securities Exchange Act. As amended, the definition of "security" would expressly include any put or call option on any security, certificate of deposit, or group or index of securities, as well as options relating to foreign currency entered into on a national securities exchange.

Second, H.R. 6156 would amend section 9 of the Securities Exchange Act to make it clear that the SEC has plenary authority to regulate the trading of such options, notwithstanding any other provision of law. This means that the SEC's authority to regulate such options would not be diminished or affected in any way by the provisions of the Commodity Exchange Act or any other law. This amendment would not give the SEC any jurisdiction to regulate options on futures, the regulation of which would be vested with the CFTC.

These amendments would therefore confirm that the SEC—and not the CFTC—has jurisdiction to regulate the trading of options on securities, certificates of deposit, and groups or indexes of securities. The phrase "notwithstanding any other provision of law" is added to section 9 of the Securities Exchange Act of 1934 to confirm the SEC's exclusive jurisdiction over these instruments. Under the Commodity Exchange Act, the CFTC—and not the SEC—has jurisdiction to regulate futures contracts and options on futures contracts. None of these instruments wold be regulated by both the SEC and the CFTC. Such dual regulation is undesirable because it could subject exchanges, brokers and investors to the potentially conflicting demands of different regulatory schemes. Jurisdiction over options on foreign currencies would be divided depending on the market in which such options are traded—the SEC would regulate options on foreign currencies traded on a national securities exchange, and the CFTC would regulate options on foreign currency traded in the commodities markets.

It has been called to my attention that, by including "option" within the definition of "security" in certain securities laws, an inference might be drawn that banks could not deal in such options. I would therefore like to clarify that this change is not intended to affect a bank's activities under the Glass-Steagall Act and that, if a bank is permitted to purchase and sell the underlying security—such as a U.S. Government security—then it would also be permitted to purchase and sell options on such securities.

The bill contains related amendments to the Investment Company Act, the Investment Advisers Act, and the Securities Investor Protection Act.

Finally, the House bill contains a provision designed to prevent the application of antigambling laws to options and other securities authorized to trade on registered securities exchanges. This provision is intended to remove an unintended obstacle to the trading of new securities products which the SEC may authorize following enactment of the clarifying jurisdictional amendments. It would insure that stock index options, which are settled in cash, would not be invalidated under State gaming and bucketshop laws. In so doing, the provision would equalize the application of these State laws to commodity and security products. Stock index futures, which will be regulated by the CFTC, are already exempt from State gaming and bucketshop laws pursuant to the CFTC's grant of exclusive jurisdiction under the Commodity Exchange Act.

By preempting certain types of States laws, this provision would also remove the basis for Federal causes of action which are premised on the applicability of such State laws. However, the provision does not interfere with State blue sky or antifraud authority. In short, this provision will assure that new products developed under the jurisdictional amendments contained in my amendment will in fact be traded, as contemplated in the jurisdictional accord.

The bill's purpose is to resolve jurisdictional questions involving the SEC and the CFTC. The language of the bill indicates that certificates of deposit are to be treated as securities for purposes of the Investment Company Act and the Investment Advisers Act, regardless of their status under other securities laws. The purpose of this is to leave the prevailing judicial and administrative interpretations intact, and thus to leave the status of certificates of deposit under the Investment Company Act and the Investment Advisers Act unchanged.

In treating CD's in this manner, the Banking Committee did not intend to decide, for all purposes, whether certificates of deposit should be treated the same as securities generally under the Investment Company Act and the Investment Advisers Act.

Mr. President, the allocation of responsibilities between the SEC and the CFTC necessarily involves certain compromises on both sides. Each agency acting alone might have drawn the lines somewhat differently, but their uncoordinated approaches in past years produced uncertainty and unnecessary delay. The jurisdictional accord between the agencies represents a large step in rationalizing the regulatory structure and minimizing the delay in introducing new financial products. SEC Chairman John Shad, CFTC Chairman Johnson, and the respective Commissions should be congratulated for their accomplishment in reaching the agreement.

Mr. President, I strongly urge enactment of H.R. 6156.

I certainly would like to commend Senator GARN, Senator HUDDLESTON, and Senator LUGAR for working untiringly, unceasingly to bring about a badly needed accord that I think brings the kind of protection that the people of America are entitled to in the marketplaces of the securities industry and new products being created.

Mr. SARBANES addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, I am pleased to join my colleague in supporting H.R. 6156, a bill to clarify the jurisdiction of the Securities and Exchange Commission (SEC) and the definition of a security. Similar legislation was considered by the Securities Subcommittee of the Senate Banking Committee as S. 2260, the Securities-Commodities Accord Amendments of 1982, and enjoys the bipartisan support of the entire Senate Banking Committee.

H.R. 6156 contains needed amendments to Federal securities laws which will help clarify the respective regulatory jurisdictions of the CFTC and the SEC over the developing markets in futures and options on financial instruments. This legislation provides in general that the SEC will regulate options on all securities and certificates of deposit, as well as options on all groups or indexes of securities or certificates of deposit for purposes of Federal securities laws. H.R. 6156 also effects a limited preemption of State laws to equalize the regulatory structure applicable to options and futures settled in cash.

This legislation is particularly timely in light of the recent decision in *Board of Trade of the City of Chicago* v. *Securities and Exchange Commission and Chicago Board Options Exchange, Inc.*, No. 81-1660 (7th Cir. 1982). In this case the Court held in a 2-to-1 decision that options on GNMA securities are not securities and that, therefore, the SEC lacks authority to approve a proposal by a national securities exchange to trade such instruments. The Court also held that GNMA options are subject to the exclusive jurisdiction of the CFTC and that, subject to the conditions of the commodity options ban, trading in such instruments is unlawful. In the absence of this legislation, that decision, if left undisturbed, could be read to jeopardize SEC authority over trading within its regulatory domain. This legislation avoids that result and clarifies the authority of both regulatory agencies.

H.R. 6156 represents an accommodation that both the SEC and the CFTC believe is in the public interest, and members of the Senate Banking Committee share that view. I am pleased that these two independent regulatory agencies have been able to successfully resolve the ambiguities in the current law governing their jurisdictions.

I also hope that the discussions that produced this jurisdictional resolution have laid the groundwork for further consultation and coordination between the SEC and CFTC with respect to other matters of concern.

I am pleased to join with my colleague in support of this legislation.

● Mr. GARN. Mr. President, I urge the enactment of H.R. 6156. This bill would amend the securities laws to confirm the jurisdiction of the Securities and Exchange Commission to authorize and regulate the trading, on securities exchanges, of options on various financial instruments. With its enactment, the SEC will have the clear authority to authorize trading in options on various financial instruments which have thus far been held up.

Enactment of this bill will end a lengthy, often unproductive dispute over the proper regulatory structure with respect to options on exempt securities such as GNMA and U.S. Treasury securities. This ongoing dispute and related controversies over trading of certain futures contracts and options on futures have stalled the ability of both securities exchanges and commodity boards of trade to introduce new instruments which have the potential to improve the ability of businessmen and individual investors to cope with the risks of interest rate fluctuations and other financial risks.

The bill makes the changes in the securities laws recommended by the SEC and the Commodity Futures Trading Commission in their joint proposal of February 2, 1982. That agreement has set the stage for needed cooperation between the two agencies in acting in the public interest, and they are to be commended for putting aside the longstanding controversies which adversely affected the development of

new products by the two industries which they regulate. With the enactment of H.R. 6156, competing products traded on securities exchanges and boards of trade will compete, and the marketplace, rather than the regulators, should have the final say in deciding which products are most attractive to investors.●

Mr. HUDDLESTON. I am pleased to join my colleagues in supporting H.R. 6156. It is one part of the legislation necessary to implement the CFTC-SEC jurisdictional accord. The securities portion is contained in H.R. 6156, while the commodities portion is in S. 2109. The accord is intended to specify clear jurisdictional boundaries for the CFTC and the SEC. The accord was necessitated in part by the seventh circuit decision in the Chicago Board of Trade against SEC which held that options on commodities including Government-issued debt instruments were subject to both the CFTC's exclusive jurisdiction and the commodity options ban under the Commodity Exchange Act. The court also held that the SEC did not have authority to regulate these options under the Federal securities laws.

Under the seventh circuit's decision, therefore, options on Government-issued debt securities that are also commodities, like GNMA's, Treasury bills, and Treasury bonds, cannot now be publicly traded. Since the seventh circuit decision rests on independent holdings under the Commodity Exchange Act and the Federal securities laws, I believe that it is generally agreed that both H.R. 6156 and S. 2109 must be enacted to remove any legal barriers that exist which prohibit the legal trading of those options.

I hope that the members of the Committee on Banking, Housing, and Urban Affairs will work with the members of the Committee on Agriculture, Nutrition, and Forestry to insure that S. 2109 is enacted.

Mr. D'AMATO. Mr. President, I yield back my time.

Mr. SARBANES. I yield back my time.

Mr. COHEN. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. COHEN. I request the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time having been yielded back, the question is on the third reading of the bill.

The bill was ordered to be read a third time and was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass? The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. BRADY) and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Connecticut (Mr. DODD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Montana (Mr. MELCHER), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

I also announce that the Senator from Oklahoma (Mr. BOREN) is absent because of illness in the family.

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 91, nays 0, as follows:

[Rollcall Vote No. 386 Leg.]

YEAS—91

So the bill (H.R. 6156) was passed.

SENATOR MATTINGLY RECEIVES GOLDEN GAVEL AWARD

Mr. BAKER. Mr. President, I observe that it is now 4:33 in the afternoon. According to calculations given to me by the Journal Clerk, that means 3 minutes ago, the distinguished occupant of the Chair (Mr. MATTINGLY) completed 100 hours of presiding over the Senate. For those not familiar with the situation, that means that, in due course, he will be lavishly praised and given an award called the Golden Gavel.

What that also means is that he has sort of turned into a second parliamentarian.

I am grateful he has given that service, as I know all my colleagues in the Senate are.

Mr. HEINZ. Mr. President, I join in commending the majority leader on his recognition of the Chair and his distinguished service in wielding, if not a golden gavel, a very eloquent ivory implement. I know the Chair is not supposed to make comments on his own, but I compliment him anyway.

The PRESIDING OFFICER. The Chair expresses his appreciation.

EXPORT TRADING COMPANIES ACT—CONFERENCE REPORT

Mr. HEINZ. Mr. President, I submit a report of the committee of conference on S. 734 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 734) to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. BAKER. Mr. President, I ask unanimous consent that on this conference report, there be a time limitation of 15 minutes to be equally divided and the control of the time to be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, this is a conference report on the Export Trading Companies Act, which is no stranger to the Senate. It has twice passed the Senate without a dissenting vote, in this Congress and the last. It has been the subject, over in the House, of hearings in three different committees.

The House version passed the House without opposition. It was originally strongly supported by President Carter in his administration. It is now strongly supported by the Reagan administration. Indeed, President Reagan mentioned it at the outset in his news conference on Tuesday of this week.

Mr. President, I view this bill not just as an export trading company bill, but a bill that will allow businesses,

many of them small, many of them medium sized, to join together and compete internationally as trading companies the way the Germans and the Japanese have done so successfully.

I view this as a jobs bill, Mr. President. Indeed, various people have studied this bill. Chase Econometrics has estimated, for example, that this bill will create somewhere between 340,000 and 640,000 jobs over the next 3 to 4 years. Administration studies have made similar estimates. That, Mr. President, is a jobs bill.

These jobs are particularly important to our economy. They are in an important sector, the export sector, which includes virtually everything we make in this country, from food and fiber, our great agricultural potential, to manufactures of every conceivable kind. Increasingly, as our economy matures, the real potential for growth and job creation is going to be more and more in international trade. Just recently, we were advised that of the jobs created in this country over the last 10 years, fully one-third of all the new jobs have been created through exports.

I observe further, Mr. President, that enactment of this bill today is particularly timely in view of August's record $7 billion trade deficit. If we continue to run at that rate for a 12-month period, that will result in an $84 billion trade deficit. That is clearly something that this country cannot afford.

Mr. President, I would be remiss if I did not thank a number of people who have worked very, very diligently on this bill and on the conference report. First, I am deeply grateful to the chairman of the Committee on Banking, Housing, and Urban Affairs (Mr. GARN) for the total cooperation he has given in this matter. He has, as chairman of our committee, scheduled the necessary hearings and markups expeditiously. He has been immensely supportive of the legislation, of which he, himself, is an original cosponsor.

I thank Senator RIEGLE, the ranking minority member on the committee who has, at every turn, supported the legislation fully, has worked to make it better, has offered prefecting amendments. This bill could not have been as good a bill as it is today without his determined help.

I am especially grateful to Senator THURMOND, who has been extremely helpful in understanding the nature of this bill. He has done a superb job in counseling us in our deliberations with the Judiciary Committee on the House side.

Mr. President, there are many others I could and should thank on this. Senator BRADLEY has made an important contribution. As much as anyone else, Senator STEVENSON, who was one of the prime movers of this bill in the last Congress, deserves our thanks and congratulations. I would be remiss in those particular instances if I did not point them out. Of course, without the help of all the members of the committee, we would not have this excellent bill before us today.

Mr. GARN. Will the Senator yield?

Mr. HEINZ. I am happy to yield.

Mr. GARN. The distinguished Senator from Pennsylvania is overgenerous. I appreciate the lavish praise, but I think the record should be set straight that I had very little to do with this bill except stay in the background. Senator HEINZ has totally taken this over from the beginning, last year and this year. He deserves 99 percent of the credit for this bill, about to become law within a few days if it survives the House.

Again, I appreciate his praise, but it is vastly overstated in view of the time and effort that he, himself, has put in through his service as chairman of the International Finance Subcommittee of the Banking Committee.

Mr. HEINZ. Mr. President, I thank the distinguished Senator from Utah. I reserve the remainder of my time.

Mr. RIEGLE. Mr. President, I thank the Senator from Pennsylvania for his kind comments and most gracious words. I commend him for his exceptional leadership on this effort and for his success in bringing it to a conclusion today.

The adoption of the Export Trading Company Act marks the happy conclusion of more than 3 years of congressional consideration of legislation to encourage the formation and operation of export trading companies. The first bill on the subject was introduced in August 1979 by the former Senator from Illinois, Adlai Stevenson, who chaired the International Finance Subcommittee at the time.

The legislation has enjoyed wide bipartisan support in the Senate from its introduction. The distinguished current chairman of the International Finance Subcommittee, the senior Senator from Pennsylvania, Mr. HEINZ, was an early and avid supporter of this legislation, and it has been carried to consummation in this Congress under his leadership.

I, too, was an early cosponsor of this legislation in both the 96th and 97th Congresses, and am delighted to support adoption of the conference report. I believe the Export Trading Company Act can significantly expand U.S. exports and, thereby, U.S. jobs. Banks will have an opportunity to invest in export trading companies through bank holding companies. Antitrust concerns can be clarified for all exporters under procedures established in the act. The Commerce Department and the Export-Import Bank are directed to give particular attention to the promotion of exports through U.S. export trading companies.

Mr. President, this legislation has been carefully considered. There have been dozens of days of hearings over the past 3 years on this bill or earlier versions of it. The legislation has passed the Senate twice by unanimous rollcall votes. The conference report is the product of arduous negotiations involving several committees in the House and the Senate. The legislation is supported by the present administration, as it was by President Carter and his administration.

I urge adoption of the conference report. Our growing trade deficit leaves no room for further delay in providing U.S. producers with new opportunities to expand exports.

Mr. PROXMIRE. Mr. President, I support this conference report.

The legislation before us would authorize the establishment of export trading companies by bank holding companies and provide for antitrust clearance for such trading companies and exporters under the jurisdiction of the Justice Department's Antitrust Division and the Commerce Department.

Similar legislation has passed the Senate twice before. I voted in favor of the Senate-passed bills with substantial reservation. When those bills went to the House, the House Banking and Judiciary Committees did an outstanding job of refining the Senate bill. My hat goes off to Chairman ST GERMAIN and Chairman RODINO.

This legislation will place administrative responsiblity for the banking sections where it belongs: in the Federal Reserve. No antitrust clearance will be given without the concurrence of the Justice Department.

I believe we have achieved a balance in this bill between the need to provide legislation to encourage exports and the need to provide strong provisions to prevent unsafe unsound banking practices or violations of our antitrust laws.

We all hope very much that this legislation will increase our exports, particularly among small- and medium-sized businesses.

Mr. President, the International Finance Subcommittee of the Banking Committee has worked long and hard on this legislation. The legislation could not have been accomplished without the hard work of Senator HEINZ and his willingness to compromise.

I commend this legislation to my colleagues.

Mr. RIEGLE. Mr. President, I yield back the remainder of the time on this side of the aisle.

Mr. HEINZ. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Pennsylvania has 2 minutes, 45 seconds.

Mr. HEINZ. Mr. President, I want to make one last comment. We are nearing passage on this major jobs bill. When it passes the Senate, it will go to the House. The House, at this moment, is still engaged in their debate on the so-called balanced budget constitutional amendment. At the conclusion of that debate, there will then be an opportunity for the House to take up this bill and pass it.

Over in the House, too, this has been a very bipartisan bill. It has been championed by Representative ST GERMAIN, chairman of the House Committee on Banking; it has been championed by DON BONKER, of Washington, chairman of the House export task force.

It has been acted on favorably by the House Foreign Affairs Committee, where Chairman ZABLOCKI has lent his total support to this bill. The chairman of the House Judiciary Committee, Congressman RODINO, has been incredibly helpful in facilitating passage.

I not only hope that the House passes this bill tonight, but I urge all Members in the House who have supported this bill to do everything in their power, including Speaker O'NEILL, who I know strongly favors this bill, to facilitate its passage. We have waited nearly 4 years to get this bill through the legislative process. It was President Carter's highest international trade priority, but it did not make it. I hope it makes it this time. The Senate has done its duty once again. I commend all my colleagues.

Also, as I mentioned, the Senator from New Jersey (Mr. BRADLEY) has been very supportive of this legislation from the time he arrived in the Senate.

I hope the the House is as supportive there as we are on this side.

Mr. President, I see no Senator requesting time. I yield back the remainder of my time.

The PRESIDING OFFICER. Do both sides yield back their time?

Mr. RIEGLE. All time has been yielded back.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. RIEGLE. I move to reconsider the vote by which the conference report was agreed to.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMENDATION OF SENATOR MATTINGLY

Mr. NUNN. Mr. President, I want to commend the junior Senator from Georgia, who is in the chair, for his extraordinary service to the Senate. I think he is well deserving of the award and all the accolades that were stated by the majority leader a few minutes ago. I would like to identify myself with the majority leader's remarks.

Also, I might say that it is comforting to know that anytime I need to converse with the junior Senator from Georgia, I can always find him in the chair. It is a very convenient arrangement.

However, I do, in all sincerity, congratulate him for his extrordinary service to the Senate.

The PRESIDING OFFICER. The Chair thanks the senior Senator from Georgia.

VIRGIN ISLANDS SOURCE INCOME AND DISABILITY PROPOSAL—H.R. 7093

Mr. BAKER. Mr. President, if I could have the attention of the distinguished chairman of the Finance Committee, the distinguished ranking minority member and the Senator from Maine, I wonder if the Senator from Kansas would be prepared at this time to establish the status of H.R. 7093, the Virgin Islands source income and disability proposal.

I yield to the Senator, Mr. President.

Mr. DOLE. Mr. President, I ask unanimous consent that we might move to the consideration of H.R. 7093.

Mr. LONG. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. DOLE and Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I wonder if the Senator from Louisiana will withhold so the Senator from Maine might have a brief discussion on that.

Mr. LONG. Mr. President, I am more than willing to withhold my objection with the understanding the Chair will recognize me so that I might object after this subject is discussed.

Mr. DOLE. Mr. President, let me just say one thing. There is a section of this bill that is controversial. Part of it is not.

H.R. 7093 would reduce to 10 percent the 30-percent withholding tax withheld at source by U.S. Virgin Islands payers of certain Virgin Islands source passive investment income when the recipient is a U.S. individual or corporation.

The bill would allow the Virgin Islands government to further reduce the 10-percent rate at its discretion.

It is not that particular provision that is in controversy. The provision that is in some—I do not say controversy, but there is some question about it—the provision relates to the social security disability insurance; and I yield to the distinguished Senator from Maine so that he may address the question of the Senator from Louisiana.

Mr. COHEN. Mr. President, I thank the Senator from Kansas for this opportunity to discuss an amendment that was offered by Senator LEVIN and me and others. In fact, it is an amendment that was cosponsored by Senators DOLE, ARMSTRONG, HEINZ, RIEGLE, DURENBERGER, METZENBAUM, BIDEN, BOREN, BURDICK, CANNON, CHAFEE, COCHRAN, CRANSTON, DIXON, LEAHY, PELL, SASSER, STAFFORD, QUAYLE, and DODD.

The purpose of our proposal is to provide immediate relief to the thousands of disabled individuals whose benefits are being erroneousy terminated and subsequently restored after a lengthy appeals process has run its course. Our legislation also would slow down the rate of reviews so that these disability investigations may proceed at a more measured pace.

In response to a congressional mandate, the Social Security Administration has been reviewing the eligibility of hundreds of thousands of individuals with nonpermanent disabilities. In my judgment, Congress was correct in mandating periodic reviews to identify those individuals who have recovered sufficiently to be able to resume working. The implementation of this law, however, has created chaos and inflicted pain that Congress neither envisioned nor desired when it enacted what was intended to be a sound management tool. And we in Congress share a large measure of responsibility for failing to establish specific guidelines for selecting the cases and conducting the investigations.

On May 25, Senator LEVIN and I held a hearing in our Oversight of Government Management Subcommittee to investigate numerous reports from all over the country that truly disabled people were having their benefits terminated. What we found was most disturbing. Benefits were being discontinued in more than 40 percent of the cases reviewed—far above the 20-percent rate originally predicted by the General Accounting Office. Yet, more than two-thirds of the claimants who appealed were eventually reinstated to the program after a hearing before an administrative law judge. The tragedy is that in waiting for rein-

statement these severely disabled persons and their families must go without benefits for many months—or even a year—due to the tremendous backlog of cases.

Witnesses at our hearing recounted case after case in which truly disabled individuals lost their benefits and suffered financial hardship and emotional trauma because of an unjust system. Our hearing revealed a disturbing pattern of misinformation, conflicting standards, incomplete medical examinations, inadequately documented reviews, bureaucratic indifference, erroneous decisions, financial and emotional hardships, and an overburdened system.

Rectifying such fundamental deficiencies will require comprehensive legislation, and I applaud Senator DOLE for his willingness to thoroughly review the disability program. It will, however, take time for Congress to effect the needed changes in the disability review process. In the interim, it is essential that we act to provide immediate relief to the disabled individuals whose benefits are being terminated and then reinstated, and to slow down the reviews so that they may proceed more rationally.

Our legislation has two parts: First, it would direct the Secretary of Health and Human Services to determine on a State-By-State basis the appropriate volume of reviews. Second, it would continue disability payments until the administrative law judge stage of the appeals process. Both steps could be easily and quickly implemented.

Slowing down the number of cases reviewed would help both claimants and the State agencies which conduct the investigations. Currently, case files are literally overflowing out of boxes, and unreasonable burdens have been placed on many State agencies, particularly in those States where personnel freezes have prevented the hiring of needed staff. By directing the Secretary to proceed with the reviews at a pace which recognizes the necessity for careful evaluations and a more even workload, our legislation would improve the quality of the decisions and lessen the huge backlog of cases. S. 2942 provides the Secretary with the flexibility that he needs to make adjustments in the States workload after consulting with the State administrators.

In addition, by continuing benefits pending appeal, this legislation would eliminate the needless financial burden now imposed on disabled people who are mistakenly removed from the program, despite being unable to resume work. Currently, claimants who are successful in appealing their termination decisions receive back benefits, but only after months of disruption and delay. Our proposal would prevent the interruption of benefits which these individuals eventually would receive anyway.

To control the cost of this proposal and to discourage frivolous appeals, S. 2942 would require individuals whose terminations are upheld by an administrative law judge to repay the benefits paid pending appeal. Unless it would cause hardship or create an inequity to do so.

Again, I emphasize that fundamental reforms in the SSA review procedures are absolutely essential. Indeed, Senator LEVIN and I, along with several other Senators, have proposed comprehensive legislation to make the system more equitable and efficient. Congress would, however, be remiss in waiting for comprehensive legislation to solve these urgent problems. While we should continue to seek long-term reforms, including a medical improvement standard, we should act immediately to provide protection for the disabled Americans who are the victims of a faulty and unfair system.

Surely when we are dealing with the most disabled workers in our society, we should enact every safeguard to insure that the Government does not add another burden to the ones they already must bear.

I would like to thank Senator DOLE for working with us in fashioning a solution to this problem, and I commend Senator LEVIN for his distinguished leadership and hard work on this issue.

Mr. President, the reason why this issue has come to the Senate is that we have a serious situation in the whole area of reviewing our social security disability payments.

Congress, in the past, has mandated—and I see the Senator from Louisiana, who really is one of those who was in the forefront of causing this review, this mandated review, of social security disability payments, which I think he correctly perceived at that time had gotten out of hand.

As a result of that congressional mandate, this administration has gone forward with a great deal of enthusiasm to carry out that congressional mandate and, I submit, long before they were adequately prepared to carry it out. As the result of this review which has been mandated by Congress, we have seen evidence of thousands of cases being reviewed in a very cursory manner, with very little notice being given to the social security disability recipients—a notice which says, "Your case is coming up for review."

We have truth in lending, we have truth in labeling, but we do not have any truth, apparently, in notifying people who are our most seriously disabled people in this country that their cases are not only coming up for review but also that the Social Security Administration is not going to take into account any past medical evidence, and that they would have the burden of bringing their doctor foward with new evidence to support their claims of disability.

Suddenly, they are examined by a strange doctor for 10 to 15 minutes, and it is run through a computer—no face-to-face interviews, no personal contact. It is all done by way of administrative fiat, and suddenly they are cut off the disability rolls.

The cases are appealed, and better than 60 percent of all cases that have been terminated under this review process have been reversed on appeal. That appeal takes 9 months, a year, sometimes 15 months. So you have people who are severely disabled, who go without those benefits, not as a welfare grant but something they paid for when they were working. They go without those benefits for up to a year, and almost two-thirds have them reinstated.

We found a situation where there was, No. 1, insufficient notice to the recipient, the beneficiary, of what was going to take place. No. 2, there is no personal, no human, contact with the agency whatsoever.

No. 3, the agency has done something which is inconsistent with the rule of law, in my judgment. The Agency has excluded the consideration of pain as a disabling factor, even when it is supported by sound medical evidence.

No. 4, as the Senator from Louisiana correctly notes in his dissenting views, we saw the use of a different standard by the agencies, as opposed to the administrative law judges. The agencies were using one standard and the administrative law judges were using another.

As I said earlier, we have seen a 15- to 20-minute medical examination and a 60-percent reversal record.

I take this opportunity to quote from the dissenting views of the distinguished Senator from Louisiana. I thank the Senator for his generosity in providing them to me.

I note the statement on page 7 of those views:

> The high reversal rates at the hearings level have been a matter of concern to the Congress for a number of years. On its face, a system in which most appealed cases are reversed is a system in trouble. Simply as a workload matter, such a situation leads to an unduly large number of appeals. The committee proposal to pay benefits during appeal will aggravate this problem. Moreover, a high reversal rate tends to cast doubt on the validity of the entire decisonmaking process and to invite efforts to game the system.

It seems to me that that is correct in the first instance. We have a system in serious trouble because of it being understaffed. They do not have adequate staff in many States. We have people who are not properly trained in some instances. We have no face-to-face

contact to eliminate the most egregious cases we heard about in our committee. We have the elimination of pain as a consideration of a disabling factor, and we have a different standard.

We have thousands of people who are really disabled and being denied their benefits when they should not be denied.

I support what the Senator from Louisiana has done in the past and agree that we have too many people on the rolls. GAO said 20 percent should be taken off. We found that the system is taking 40 percent off, only to have two-thirds reversed.

It seems to me that we are creating unnecessarily a great deal of pain and suffering for people who are truly in need of these payments because of their disabilities.

It was with this notion in mind that Senator LEVIN and I held our hearings in the Government Oversight Committee and then presented the matter to the Finance Committee, to see if we could find some way of providing temporary relief.

What we propose are two things: Aside from any kind of comprehensive revision of the present review process, what we proposed was, No. 1, to slow down the review of these cases, to allow the Administrator, on a State-by-State basis, to decide where he could justifiably slow down the review process so that there would not be the kind of errors which are taking place.

Second, we proposed that we continue the disability payment through the appeals process to the administrative law judges. This, as I understand it, is the biggest point of contention of the Senator from Louisiana. I have read his views, and I understand the basis for them.

What we have found, for example, is that a fundamental error is being made at the lower level. Whether it is because the administration is making one policy and the administrative law judges are following another, I do not know. That is the basic problem. We should have one standard, one rule of law, but we have two, and maybe we have three or four.

The problem is that the administrative law judges are applying the rule of law as interpreted by our courts, as they interpret our laws, and the administration is following a different policy.

What we have, I think, is a situation where our most disabled citizens find themselves victims of confusing, conflicting, chaotic laws, in the administration of our laws.

What we propose to do is to continue the payment through the appeals process, so that the two-thirds of the people who are being unjustifiably denied now will not be denied in that appeals process.

I would go further. I would eliminate the reconsideration process, because that is simply a rubberstamp of the lower administrative decision. Eighty-five percent of the cases are affirmed.

I would mandate a face-to-face interview and then to directly to the administrative law judge, eliminating reconsideration of the initial decision.

The Senator from Louisiana makes a valid point: We do not want to encourage people to file frivolous appeals claims. By the same token if people have paid into a social security disability fund through their wages and then you find they are being terminated and two-thirds are being reinstated on appeal, it seems to me that the equities clearly come down on the side of those who are being erroneously terminated.

Mr. President, it was with that notion in mind that I had requested Senator DOLE to consider the amendment Senator LEVIN and I had offered.

I point out that there are those who would go much further at this stage. Senator METZENBAUM, Senator HEINZ, Senator RIEGEL, and others would like to go to a comprehensive review right now, and I have not supported that because I think we need time to fully debate the issue. We should debate on an extensive basis in the committees—the Committee on Finance and the Committee on Government Oversight—and on the floor a more comprehensive approach as to how we are going to terminate people on disability payments.

People are commiting suicide because of the termination of disability payments. There are people like Mr. Gage. I will not take the Senate's time to go through the whole sorry history of someone who had been a diabetic from age 12; partially blind, with tunnel vision; could not walk without assistance; and yet had benefits terminated, went into the hospital, had a heart attack, and died. Nine months later, the agency said they made a mistake. They went back and notified the widow: "By the way, your husband is dead. We terminated his benefits. We made a mistake. We sorry."

We have had people who have been in iron lungs having their benefits terminated. I had a man in Maine in a body cast and his benefits were terminated.

So we have a situation where the review process is out of control, and what this measure is designed to do is to put a sense of equity back into the system, recognizing it is a short-term solution until such time as this Congress has an opportunity to take a comprehensive approach.

Having said that, I point out as a result of the hearings that we have had, as a result of the kind of meetings that the Secretary of HHS has had with Members of the Senate, they have taken steps to correct some of the more egregious deficienices in the current review process.

I commend the administration for that. But the most egregious effort and deficiency is we are still terminating people who now have to go through the appellate process that takes 9 months to a year to 15 months, only to have that reinstated. That is a fundamental inequity that should not be tolerated for any length of time.

So what we hope to do is to have a consideration of this measure on a temporary stopgap basis until such time as this Congress can review whether or not its congressional mandate is being carried out in a manner which it intended.

I do not beleive that to be the case right now. I think that congressional intent is not being carried out but rather that there is severe pain and suffering being inflicted upon citizens who should not tolerate it.

(Mrs. HAWKINS assumed the chair.)

So, Madam President, that is the basis for the amendment that was included and cosponsored by the distinguished chairman of the Finance Committee and so many other Members of this Senate, and I hope that the Senator from Louisiana will take that into account in choosing whether or not to exercise his right to object.

Mr. LONG. Madam President, when this debate opened a different Presiding Officer was in the chair, and it was agreed that I would withhold my objection and that the Chair would recognize me to object after we had had a colloquy on this subject.

Let me explain some of the background of this matter. It was many years ago, about 1956, when some of the people associated with the labor movement came to the Senator from Louisiana and urged this Senator to lead the charge to have disability covered under social security.

At that time the Senator from Louisiana told these gentlemen that while I would enjoy undertaking that responsibility and would be proud to do so, we would have a better chance of prevailing upon the Senate to accept such a proposal if we could persuade the former chairman of the Finance Committee, Walter George, who at that time was chairman of the Foreign Relations Committee, to be the principal sponsor of the amendment. Senator George was persuaded to do that and we prevailed in the Senate.

I do not believe we would have prevailed if Senator George, with the enormous prestige he had at that time as a former chairman of the Finance Committee and as the chairman of the Foreign Relations Committee, had not been willing to lead the charge for us, because his eloquence, prestige, and stature made a great difference.

Madam President, we prevailed in this Senate by a very close vote. With the change of a single vote, we would not have prevailed.

At that time the overwhelming majority of Democrats voted for the position I was advocating, and most of those on the other side of the aisle voted against it.

I was proud of having been a part of that matter in the beginning. Madam President, the Senator from Louisiana, who controls the floor at this moment, had he not been interested in seeing the program enacted even more than he was interestred in having credit for doing something as a Senator, could very well have been known as the father of this disability program. For the good of the country and in order that the program could become law, the Senator from Louisiana yielded the opportunity to the Senator from Georgia, Mr. Walter George, to be the sponsor of the amendment and the person responsible for this program being in effect.

But if this Senator had not voted for it, in fact if any one of us who had voted for that amendment had not voted for it, it would not have become the law at that time. It might never have become the law, for all we know.

The thing we were cautioned about in the hearings on the proposal, and the grave alarm that was expressed throughout the country then, and it proved to be well taken, was that if we enacted a disability program as a matter of right under social security, we were going to have enormous numbers of people claiming that they were totally disabled when they are not really disabled—though they may have a handicap, perhaps a severe handicap, they are not totally and permanently disabled.

Madam President, I have with me the speech that Walter George made at that time, a very eloquent speech, may I say, the closing speech on that subject in the Chamber, and he explained that this amendment was drawn in such a fashion that there would be a very close limitation on the number of people who would be drawing these benefits, that this new program was only for people who were very severely disabled and unable to engage in any substantial gainful activity.

The Senator spelled out in his speech the limitations on eligibility and the costs that we could expect from such a proposal.

Madam President, that is what I voted for. that is what I supported. That is what I sponsored. And that is what the Senate voted for.

Now we did that in good faith and when Walter George stood here telling the people of this Nation what we expected of this program, he was sincere just as I am sure every Senator who voted for this program was.

What is the No. 1 fault of the program today? It is not the horror stories people are talking about of someone being rejected from the rolls. No; from any fair and impartial point of view, the No. 1 thing that is wrong is that the public is paying for three and a half times as many beneficiaries under this program as it was expecting to be paying for.

Madam President, you can go all over the country and find horror stories the other way around, about people who are not disabled at all who are on those rolls.

Just let me give you one example. I know this from a person who was a former alcoholic and who told me about it. I am informed that under the rules right now, people who were alcoholics and who had been put on the rolls as being disabled, and I am not challenging that, even after they had reformed and joined Alcoholics Anonymous and were no longer alcoholics and were available to the work force, they just remained on the rolls and they continue to remain on the rolls.

Madam President, I have been told by many housewives of their trying to hire domestic help and having person after person come to apply and tell them: "We are available to work providing you can pay us on a cash basis with no records kept, because we are on the disability rolls as being totally and permanently disabled." To look at these people you would not have the impression they had any problem at all.

The point is that as of right now the taxpayers are paying $16 billion a year for a program which should be costing them about $5 billion a year. I do not know of any Federal activity where a program is exceeding what is should be costing by a greater degree than this one right here.

The Department is trying to do something about that.

(Mr. SPECTER assumed the chair.)

Mr. SYMMS. Mr. President, will the distinguished gentleman from Louisiana yield at that point?

Mr. LONG. I yield.

Mr. SYMMS. Did I understand the Senator to say that the program is costing three times as much as it is supposed to?

Mr. LONG. Three and a half times what it ought to be costing.

Mr. SYMMS. Three and a half times. I thank the Senator for bringing that point to this body.

Mr. LONG. I am saying this because if you take the number of people actually on the rolls in 1980, it is about three and a half times the number of people that were originally estimated to be on the rolls in 1980. Similarly, the cost of the program as a percent of taxable payroll is about three and a half times the percent of payroll originally estimated for this purpose.

Mr. President, we in the Committee of Finance as a matter of responsibility brought to the Senate and the Senate passed and the House concurred in a measure in 1980 calling upon the Department to review these cases and to remove from the rolls those who did not belong on the rolls, and the Department is trying to do that.

The Department has responded to the 1980 congressional mandate. The problem now is not that the examiners are putting too many people on the rolls, because examiners have been directed to review and to tighten up on the determinations, and they are trying to do what Congress mandated. But all one had to do is to appeal from the decision of the examiner, when the examiner says that this person should not be on the rolls, and about two times out of three the administrative law judge will restore the person to the rolls.

The Department has made a study of this matter to see how accurate the determinations have been, and their estimate is that in about 97 percent of the cases the examiner was right.

Mr. COHEN. Mr. President, if the Senator will yield, the Department is being overruled in two-thirds of the cases.

Mr. LONG. Exactly, overruled by its own administrative law judges, who used different standards than the examiners used.

But the Department has made a study of this matter, and in its review of the decisions made by the examiners, the Department found that the decisions of the examiners were correct 97 percent of the time, using the Department's eligibility standards—even though they have been reversed about two-thirds of the time by the administrative law judges.

So the evidence tends to reveal at least in view of the Department, and I am inclined to believe this is substantially correct, that the error is not as much on the part of the examiners as it is on the administrative law judges in putting these people back on the rolls, people who do not belong there.

These administrative law judges can contend that in some instances they are following the decisions of Federal courts, and I would assume that to be the case.

But when those judges have overruled the Department's decision in many cases, Mr. President, they have been in error, too, and that ought to be corrected.

In the judgment of this Senator, the answer is not to pass laws that are going to put more people on the rolls, and not to pass laws to stop the review we required in 1980, and not to pass laws to continue on the rolls people who have been found to be ineligible.

Mr. COHEN. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. COHEN. The Senator raises an issue of who has made the more accurate assessment of the disability. Was the Senator aware, for example, that under the administration's policy there is no personal contact whatsover with the recipient or the beneficiary at the administrative level? They never see the people, they never talk to them. It is done by a computer.

They select a name out of it, they look at the records which includes a recommendation of one doctor who may have seen this person for 10 or 15 minutes, who puts it in the file, and that is it, and they say "disability terminated."

The only time that person out there has any human contact with the system is at the administrative law judge level. Let me just read what our committee received in testimony from what the New England director of the Association of ALJS said about that:

With regard to the speed in which such review of termination cases are performed, we have found in a vast majority of the cases that there has been poor development of the medical record at the state agency level. In all fairness to the state agencies, we believe that such poor development is due in large part to an extremely large state agency workload, under-staffing of the state agencies, and arbitrary time constraints imposed on the state agencies for processing cases. . . . The Administrative Law Judges often feel that the hearing level has become the "dumping ground" for the hurried state agency process.

If you look to where the error is being made, it seems to me that you'll find it at the agency level. If you want to do business and treat people solely in this country by computer, then you turn to the administration's process, just terminate them based upon what the computer says. But if you really want to deal fairly with people who are disabled, you ought to have some personal contact.

Mr. LONG. Mr. President, let me make my point. There are three and a half times as many people on these rolls as we thought ought to be on the rolls. I voted for the program and helped to enact it into law. We have three and a half times as many people as we told the taxpayers we were going to pay benefits to.

Mr. COHEN. GAO says 20 percent.

Mr. LONG. I do not care what GAO says about present law. I am talking about the program we originally inacted. I was here and voted on it. I know what we voted on, and I recall the legislative record as if it were yesterday.

Mr. President, we have 3½ times as many people on the rolls as we told the Senate were going to be on the rolls when we offered the original disability amendment in 1956.

Regardless of what percentage you want to say are ineligible we can all agree that there are many people on these rolls that do not meet the definition of disability in the law and who are costing the taxpayers a great deal of money.

So far as I am concerned, Mr. President, I expect that we will vote on this matter in the session that is to occur after the elections. The Senate can do whatever it wants to do about the matter. I do not think the bill ought to be passed, but I do think, Mr. President, it serves a purpose to consider it at that time rather than at this time because, assuming the bill passes, I personally think the President should veto it. The administration has said they do not support the measure. In my judgment, it is going to cost the taxpayers at least $1 billion a year if we pass this bill. The committee report does not state that it is going to cost that much, but it certainly is going to cost a lot of money.

In any event, this is something we can vote on and settle in the lame-duck session. I hope the President will veto it if it does come to his desk, and in the event he vetoes it at that point, he can be under less politicial pressure in making his decision. He will be able to look at what is best for the country, not on the basis of whether or not he would be regarded as being brutal, but on the basis of doing his duty.

Mr. BAKER. Mr. President, I have no desire to bring this to an end, but we have a lot of work to do, and I wonder if the Senators will acknowledge that the Senator from Louisiana has already indicated he wishes to be recognized for the purpose of making an objection to proceeding to the item? There is going to be a lot of time to debate this later.

Mr. LONG. Mr. President, I ask unanimous consent that a statement of my views appear in the RECORD.

There being no objection, the materials was ordered to be printed in the RECORD, as follows:

ADDITIONAL VIEWS OF SENATOR LONG ON H.R. 7093

The social security disability program was enacted in 1956. At the time it was passed, Congress believed it was adopting a narrowly drawn program which would serve only the most severely disabled. The actuaries projected that its cost would be modest and that it could be financed over its entire future history by a tax rate of less than one-half of one percent. Over the years, these early cost estimates have proven much too low. The number of people drawing benefits has grown far beyond anything that was anticipated in 1956. The long-range cost of the program is now projected to be some three and one-half times as great as was expected in 1956. By 1980, it was clear to Congress that this was a program out of control.

In 1980, the Congress enacted legislation designed to bring the social security disability insurance program back under control. A major element of the 1980 amendments was a requirement that the Administration begin a thoroughgoing periodic review of the eligibility of all beneficiaries. This review has been undertaken and, as was anticipated, a large portion of the cases reviewed have been found to be ineligible. Yet the Finance Committee in this bill recommends the extraordinary procedure of continuing to pay benefits to individuals who have been found to be ineligible for those benefits until they have exhausted a lengthy administrative appeals process.

I believe that continuing benefits is a fundamentally incorrect approach to this situation. The individuals being terminated from the disability rolls are people who have been found not to meet the requirements for eligibility. The present review process was mandated because of deep Congressional concern that the cost of the disability program had grown out of control. Lax administration was a major reason for the uncontrolled growth of the program. Because of this lax administration, many people were put on the benefit rolls who did not meet the stringent requirements that Congress established for this program.

The social security disability program from its very inception was intended as insurance against the virtually total loss of earnings ability arising from severe disabilities. Time and again Congress has reaffirmed the intent to limit benefits under this program only to those people who cannot work. Unfortunately, the program has not always been administered in a way which carries out this mandate. As a result, individuals have been put on the benefit rolls even though their disabilities are not so severe that they are no longer capable of substantial work activity. Some of these individuals are in fact handicapped, but they are not so disabled as to meet the standards of the social security disability program.

The Committee proposal will result in significant expenditures of social security trust fund monies. These expenditures will go to pay benefits primarily to people who do not qualify for those benefits. While the legislation provides for recovering those incorrect payments at a later date, most of those payments will not in fact be recovered. The Administration believes that they will be able to get back about half of the incorrect payments, and that may be a highly optimistic estimate. The payment of benefits during appeal will tend to aggravate the existing serious problems which exist within the social security appeals system. Moreover, there is a danger that this legislation will be viewed as undermining the mandate of the 1980 Amendments for vigorous administration to assure that benefits are paid only to eligible individuals.

THE NATURE OF THE SOCIAL SECURITY DISABILITY PROGRAM

When the social security disability program was enacted in 1956, it was intended to be a program for those individuals who are so disabled that they cannot engage in any kind of substantial work activity. There are many people who suffer handicapping ailments, and these individuals are deserving of great sympathy. However, the social security disability program was not intended as a pension to be paid to anyone with a handicap. If the social security trust funds are to be used to pay benefits to all those who have suffered a medical condition which restricts their earnings capacity, the Congress will need to enact very substantial increases in the social security tax rate to fund the program.

This is not to say that Congress should not address the problems of handicapped individuals. A great deal can be done through a variety of programs to assist these individ-

uals to regain the ability to work and to encourage the expansion of employment opportunties. Consideration needs to be given to improving those programs and to strengthening the incentives in the tax laws for hiring the handicapped. But the social security disability insurance program is based on a different premise and addresses a different population. The social security program is insurance against that catastrophic situation in which a worker becomes so disabled that he has totally lost the ability to support himself.

The limited intent of Congress with respect to this program can be seen by looking back at its legislative history. In 1957, when the program was newly enacted, the actuaries projected that, its costs would represent less than one-half percent of taxable payroll. By 1980, that cost was projected at 1.5 percent of payroll—more than 3½ times as much.

Despite the intent of Congress that this should be a program narrowly limited to people who have totally lost the ability to earn a living, there has been a continual tendency to put on the rolls individuals who are less severely disabled. In part this may arise from a misunderstanding of the purposes of the program. In part it may arise from the unwillingness to expend the funds necessary to administer the program tightly.

The Congress has reaffirmed its original intent to restrict this program to the most severely disabled individuals when it has reviewed the program. In 1967, for example, it appeared that courts were applying a rule which would give benefits to any individual with a disability sufficiently severe to keep him from doing his usual work or any other work available in his locality.

The Congress felt this was a far broader definition of disability than was appropriate for the social security disability insurance program. To reemphasize the original intent, Congress amended the law to make it clear that an individual "shall be determined to be under a disability only if his physical or mental impairment or impairments are of such severity that he is not only unable to do his previous work but cannot, considering his age, education, and work experience, engage in any other kind of substantial gainful work which exists in the national economy, regardless of whether such work exists in the immediate area in which he lives, or whether a specific job vacancy exists for him, or whether he would be hired if he applied for work" (sec. 223(d) of the Social Security Act).

Despite the clear Congressional intent that the social security disability insurance program be limited to the most severely disabled, the program continued to experience growth beyond anything that could be explained by changes in the legislation or demographic trends. The annual costs of the program increased from a little more than $250 million in 1958 to over a billion dollars in 1962, to more than $3 billion by 1970, more than $10 billion by 1976 and more than $18 billion in 1982.

According to an analysis done in 1978 by former Chief Actuary Robert Myers, the incidence of persons receiving disability benefits increased from 4.5 per one thousand insured workers in 1968 to 6.0 per one thousand in 1972, and to 6.9 per one thousand in 1975—in effect a 50 percent increase over a seven-year period in the rate at which workers were coming onto the disability rolls. There is no evidence to indicate that this increase was in any way based on real increased incidence of disabling conditions among the population at large.

A June, 1977 study by the actuaries of the Social Security Administration cited a variety of factors as responsible for the growth in the benefit rolls. Possible explanations included the increased attractiveness of benefits under a system in which benefit levels had been substantially increased, changing attitudes on the part of individuals with impairments, and increased emphasis on vocational factors resulting in more allowances on appeal. The actuaries also cited the results of trying to hold down administrative costs during a period of increased caseloads and the tendency in such circumstances to give claimants the benefit of the doubt. This problem was described by the actuaries as follows:

"All of this put tremendous pressure on the disability adjudicators to move claims quickly. As a result the administration reduced their review procedures to a small sample, limited the continuing disability investigations on cases which were judged less likely to be terminated, and adopted certain expedients in the development and documentation in the claims process. Although all of these moves may have been necessary in order to avoid an unduly large backlog of disability claims, it is our opinion that they had an unfortunate effect on the cost of the program.

"By claiming that it is difficult to maintain a proper balance between sympathy for the claimant and respect for the trust funds, we do not mean that disability adjudicators consciously circumvent the law in order to benefit an unfortunate claimant. What is meant is that in a public program designed specifically to help the people, such as Social Security, whose operations are an open concern to millions of individuals, and where any one decision has an insignificant effect on the overall cost of the program, there is a natural tendency to find in favor of the claimant in close decisions. This tendency is likely to result in a small amount of growth in disability incidence rates each year, such as that experienced under the DI program prior to 1970, but it can become highly significant during long periods of difficult national economic conditions." (SSA Actuarial Study No. 74, January 1977, p. 8.)

COMPARISON OF CONTINUING DISABILITY INVESTIGATIONS (CDI'S) PROCESSED TO TOTAL DISABLED-WORKER BENEFICIARIES OVER THE YEARS

Fiscal year	CDI's processed (DI and concurrent cases only)	DI-worker beneficiaries (in millions)	Number of CDI's per 1,000 DI-worker beneficiaries
1970	[1] 167,000	1.493	111.8
1973	[1] 142,000	2.017	70.4

THE 1980 AMENDMENTS

In view of the enormous growth in disability insurance program costs and caseloads, the Congress enacted legislation in 1980 designed to bring the program back under control. The 1980 legislation established limitations on benefit amounts designed to deal with the problem of a program in which benefit levels were unreasonably high in relation to earnings levels. Congress was, however, also concerned with the evidence of loose administration, and mandated several changes designed specifically to tighten up the disability determination process. In order to assure that improper awards to new claimants were avoided, Congress required the Social Security Administration to reinstate its former practice of reviewing most State agency allowances before payments are started. To deal with the problem of improper allowances on appeal, the 1980 Amendments required the Secretary to begin reviewing cases which are allowed in the appeals process. Under this provision, the Social Security Appeals Council is required to reexamine a significant sample of cases decided by administrative law judges and to reverse those cases which have been improperly decided.

The 1980 legislation also required that the Administration report the progress in implementing this review program and provide an analysis of the reasons why administrative law judges so frequently overturn initial agency decisions.

Finally, Congress in the 1980 law specifically required that all disability beneficiaries be reexamined on a periodic basis. This requirement was designed to assure that those who were not eligible for benefits would not continue on the rolls indefinitely once they began receiving benefits. In general, the Administration was required to review each claimant's eligibility at least once every three years; a less frequent review is permitted in cases which are determined to be permanent.

INDIVIDUALS BEING TERMINATED ARE INELIGIBLE

The Congress required a periodic review in the 1980 amendments because of indications that many ineligible people were in fact receiving benefits. The rapid growth of the disability caseloads over the preceding 10 years was one indiction of this. The substantially reduced level of administrative review during that same period also led to concern that ineligible persons were receiving benefits. Subsequent to the enactment of the 1980 amendments, these concerns were verified in studies conducted both by the Social Security Administration and the General Accounting Office. In March 1981, the GAO issued a report entitled "More Diligent Follow-up Needed to Weed Out Ineligible Social Security Administration Disability Beneficiaries." Based on the evidence then available, this report concluded that "there could be about 584,000 persons on the DI rolls who may not meet the program's eligibility criteria." The annual benefit drain for cash benefits alone (not including medicare) was estimated to be as high as $2 billion. On the basis of its findings, the GAO report recommended that the Department give high priority to implementing a more vigorous continuing disability review program.

On the basis of the legislative mandate in the 1980 amendments and the findings of its own internal studies and those of GAO, the Social Security Administration did undertake a vigorous program of reviewing the eligibility of disabled beneficiaries. During the first eight months of fiscal year 1982, a total of 267,000 reviews were completed. Forty-seven percent of these cases (121,000) were found to be ineligible. Although this is a very high rate of ineligibility, it is consistent with the evidence found in earlier studies. In conducting these reviews, the Administration has utilized techniques designed to target the first reviews on those parts of the caseload where ineligibility was more likely to be found. During the Finance Committee consideration of this bill, an Administration spokesman stated that the overall ineligibility rate is expected to be about 25 percent by the time the process is fully implemented.

While these continuing disability reviews are conducted by State agencies, the Social Security Administration monitors the accuracy of their decisions by conducting a sample reexamination of State agency findings. For the period from October 1981 through March 1982 (the latest available findings) these quality control samples show a 97.5 percent net accuracy rating. In other words, after reexamination of all of the sampled cases (including obtaining additional evidence where this seemed appropriate), the Social Security Administration would have disagreed with the finding of the State agency in only two and one-half percent of the cases. This means that by the standards of disability which are applied by the agency, nearly all the cases being terminated are in fact ineligible for benefits.

CONTINUING DISABILITY INVESTIGATION (CDI) CONTINUANCES AND CESSATIONS BY STATE AGENCIES, DI AND SSI COMBINED, FISCAL YEARS 1977–82 [1]

Fiscal year	Total number of CDI reviews	Continuances	Cessations	Continuance rate (in percent)	Cessation rate (in percent)
1977	150,305	92,529	57,776	62	38
1978	118,819	64,097	54,722	54	46
1979	134,462	72,353	62,109	54	46
1980	129,084	69,505	59,579	54	46
1981	208,934	110,134	98,800	53	47
Oct. 1, 1981 to May 28, 1982	266,725	145,321	121,404	54	47

[1] Reflect continuance and cessation rates only at the State agency level—not at the district office or at the hearing or appeal levels of adjudication. These figures differ from the previous table in that they exclude CDI's where no new medical determination of disability by the State agency was required. Other factors have affected the individual's entitlement, such as his return to work.

PROBLEMS IN THE APPEALS PROCESS

If an individual's benefits are terminated because he is found no longer to be disabled, he is entitled to seek a further review of the issue. The first review takes place as a matter of reconsideration by a different decision maker in the State agency. Most reconsideration decisions uphold the initial finding of ineligibility. The claimant then is entitled to ask for a hearing before an administrative law judge. At the present time, the administrative law judges are reversing a very high proportion of cases appealed to them. During the first quarter of 1982, 65 percent of terminations which were appealed to administrative law judges were being restored to benefit status. While this is a very high reversal rate, it is not strikingly different from the administrative law judge reversal rate in prior years, nor from the administrative law judge reversal rate of initial claims.

The high reversal rates at the hearings level have been a matter of concern to the Congress for a number of years. On its face, a system in which most appealed cases are reversed is a system in trouble. Simply as a workload matter, such a situation leads to an unduly large number of appeals. The committee proposal to pay benefits during appeal will aggravate this problem. Moreover, a high reversal rate tends to cast doubt on the validity of the entire decision-making process and to invite efforts to game the system.

The 1980 amendments included a requirement that the Social Security Administration conduct a study of the factors involved in the large numbers of ALJ reversals. This study found that markedly different eligibility standards were being applied in the appeals process from the standards used by the agency. In a sample of administrative law judge decisions, the Social Security Office of Assessment using agency standards would have allowed 13 percent of the sample—while the administrative law judges had allowed 64 percent of the sample. This study indicates that a very significant part of the administrative law judge pattern of high reversals occurs because the appeals process simply does not follow the same eligibility standards as the agency.

There will always be some reversals which can be attributed to differences of judgment in close cases, evidence obtainable only through personal appearance, and changes in condition between initial decision and hearing. But reversals for these reasons represent only a small part of the caseload. Most reversals are due to the application of easier eligibility standards.

TABLE 1. PERCENT DISTRIBUTION OF SAMPLE CASE ALLOWANCES AND DENIALS, BY DECISIONMAKER AND BASIS FOR DECISION [1]

[In percent]

	Original A.L.J. decision	Appeals Council decision	Office of Assessment decision using DDS standards
ALLOWANCES			
Medical alone	18	15	6
Medical vocational inability to egage in SGA:			
Directed by medical-vocational rule	14	11	5
Specific reasons:			
RFC less than sedentary	18	9	0
Pain combined with significant impairment(s)	5	3	0
Mental disorders combined with significant physical impairment(s)	5	4	(2)
Other medical/vocational	5	6	2
Total	64	48	13
DENIALS			
Impairment not severe	11	16	39
Impairment does not prohibit past work	9	13	28
Directed by medical-vocational rule	13	19	13
Impairment does not prohibit other work	1	2	4
Other	2	3	3
Total	36	52	87

[1] Percentages shown are for the combined total of DI and SSI claims. Although there are some differences between the allowance/denial rates for DI claims and SSI claims (e.g., the Appeals Council would have allowed about 49 percent of DI claims and 45 percent of SSI claims), these differences do not appear to be significant and do not affect the findings of the review.
[2] About 0.4 percent.

Note.—Detail may not add to totals due to rounding.
Source: SSA January 1982 Study.

There can be no justification for continuing a system in which different standards of eligibility are applied at the appeals level than are applied at the initial determination level. Such a situation invites universal appeals, denies those who do not appeal of a fair opportunity to receive benefits, and creates a revolving door situation in which one part of the agency puts an individual on the rolls after another part of the same agency has taken him off the rolls. It is the responsibility of the administering agency, in this case the Social Security Administration, to develop the procedures and guidelines which will carry out the requirements of a law. Policy decisions should be made by the agency and should be carried out by all parts of the agency including those charged with conducting hearings. It is not the function of an administrative law judge to make agency policy. It is his function to assure claimants that the agency policy is being carried out in their case. This responsibility of the administrative law judge was described in a 1977 study of the Social Security appeals process by the Center for Administrative Justice. The final report of that study describes the proper roll of the administrative law judge as follows:

"The protection of ALJ decisional independence in the APA is significant. Once appointed the ALJ's position is permanent; he may be removed only "for cause" after formal adjudicatory hearing. Moreover, the ALJ's compensation is determined by the Civil Service Commission, not by his agency. Cases must be assigned in rotation, the ALJ may not be assigned tasks inconsistent with his duties as an ALJ and, with respect to the *facts* at issue in a particular case, the ALJ may not be approached by anyone, including the employing agency, save on the record. Moreover, the ALJ may not be made subject to the supervision or control of any person who has investigative or prosecuting functions for the agency.

"On the other hand, certain aspects of the ALJ's activities are clearly subject to agency control. ALJ's are not "policy" independent. They represent an extension of "the agency" and the agency may control their exercise of discretion by regulation, guidelines, instructions, opinions and the like in order to attempt to produce decisions as similar as possible to those "the agency" would have made. There is no prohibition even on consultation with agency employees on questions of law or policy in a particular case." (Source: "Final Report: Study of the Social Security Administration Hearing System." Center for Administrative Justice, October 1977, p. 244-5.)

It appears that the Social Security Administration in the past has not carried out its responsibility to assure that administrative law judges do in fact implement agency policy as to how and under what standards the question of disability is to be determined.

This situation should be greatly improved in the near future. The Social Security Administration has undertaken to publish in Social Security Rulings (which are binding on administrative law judges) a much more detailed explanation of the criteria to be applied in determining whether or not an individual is eligible for disability benefits. The greater part of these rulings will have been published by the end of October of this year and this project is expected to be essentially completed with the publication of the January, 1983 Social Security Rulings. The Administration is to be commended for undertaking to correct this problem and should continue to monitor the situation and to publish further guidelines as necessary.

To assure that the administrative law judges are in fact carrying out the agency policy as published in these rulings, the Social Security Appeals Council has the ongoing responsibility of reviewing cases allowed by administrative law judges. This responsibility was reaffirmed in the 1980 legislation and the Administration should give a high priority to implementing that responsibility. If the agency succeeds in conforming the policy applied in the appeals process to the authoritative agency policy standards, the rate of reversals on review should fall dramatically. This in itself should tend to reduce the appeals workload to more manageable levels, since claimants will no longer be encouraged to appeal in all cases (as they are by the present system). Once these changes are fully implemented, it can be expected that reversals at the hearing level will tend to occur only where there is in fact a failure to apply the agency standards at the initial and reconsideration levels, or where the claimant's condition has in fact worsened since the initial agency determination.

INITIAL PROBLEMS ARE BEING CORRECTED

The present Administration is to be commended for moving rapidly and effectively to implement the review requirements mandated by the Congress. It is unfortunately inevitable that there will be some difficulties encountered in undertaking any major new initiative. In the case of the disability review process, this situation was aggravated by the very large number of cases involved (267,000 during the first eight months of fiscal 1982) and by the complications of operating under contractual arrangements with a network of State agencies.

Sadly, there were some cases of improper terminations and even some cases of terminations involving individuals with such severe disabilities as to leave no room for doubt. It is remarkable that such situations were rare and that the Administration has been able to maintain a 97.5 percent accuracy rate. Still, every effort should be made to avoid burdening those individuals who are without any question eligible, and the Administration has in fact been sensitive to this need.

Since the implementation of this program, the Administration has made numerous changes in its procedures directed specifically at assuring that truly eligible individuals are continued in benefit status and, insofar as appropriate, are spared the burden of unnecessary reviews.

A letter to the Committee on Finance from the Commissioner of Social Security outlines the following twelve different steps the agency has taken to improve its procedures in ways which help assure a high degree of accuracy:

(Excerpt from September 16, 1982 letter from Commissioner of Social Security)

1. In March, SSA initiated a policy of determining that, in general, a person's disability ceases as of the time the beneficiary is notified of the cessation. This change reduces situations where the beneficiary is faced with the need to pay back past benefits because of a retroactive determination.

2. Since May, SSA has mandated that States review all medical evidence available for the past year—a directive which ensures that every State is looking at every piece of evidence that might be pertinent to a case.

3. SSA has underway, in two States, a study to test the value of obtaining more than one special mental status examination in cases where evidence from the beneficiary's treating source is incomplete or inadequate. This is intended to determine whether a person's mental condition can drastically change from one day to another. One criticism of SSA's practice of getting only one mental status examination is that it gives a misleading "snapshot" of a person.

4. Since March, SSA has required State agencies to furnish detailed explanations of their decisions in all cases in which a person's disability has ceased

5. To insure quality in CDI cases, SSA conducts a quality review of a sample of cases before benefits are stopped. In June 1982, SSA doubled the number of quality reviews of termination cases. The quality has been holding very high at 97.5 percent. In addition, to demonstrate the importance of quality in the CDI process, SSA established an interim accuracy goal for the State agencies without waiting for publication of regulations.

6. SSA has consistently monitored State agency resources and workloads closely and adjusts the flow of cases to the individual States to avoid backlogs when problems have arisen in their acquiring adequate resources. The selective moratoriums on new CDI cases that SSA has implemented for August and September (and even earlier in some States) has been easing problems in specific States that have had unusually large backlogs.

7. Starting in October, SSA will use a new procedure for beginning a CDI review: each beneficiary will have a face-to-face interview with an interviewer in the local Social Security office. The interviewer will explain how the review works and what the beneficiary's rights are, obtain information about the

beneficiary's medical care and treatment and current condition, and—in some cases—conclude the review process where it is clearly warranted based on the beneficiary's current medical condition.

This will correct the single most glaring anomaly in the CDI process. Recipients whose cases are selected for review under the 1980 Congressional mandate rarely, if ever, come face-to-face with a decisionmaker until and unless the case is pursued to the third level of review and appeal—a process which may drag on as much as 6 months to a year after benefits have been stopped. This one flaw in the program is perhaps more to blame than any other factor for the seemingly senseless "horror stories" we have all seen from time to time of people being dropped from the rolls despite glaringly obvious disabilities.

8. To improve the quality of determinations in difficult cases where it is necessary to determine a person's capacity to do work-related activities despite a severe impairment, SSA is requiring that the determinations as to remaining capacity be more detailed and explicit so that the basis for the final decision is clear.

9. SSA has taken many actions to improve the quality of consultative examinations purchased by the Government in cases where medical evidence from a person's physician is unavailable or incomplete.

10. SSA has been very sensitive to the need for special handling of cases involving psychiatric impairments. SSA has met with mental health groups to obtain their recommendations for improvements and is re-evaluating all guidelines for evaluation of mental impairments. SSA has also encouraged the States to increase the number of psychiatrists on their staffs in order to enhance their ability to review cases involving mental impairments. Secretary Schweiker has asked the American Psychiatric Association for assistance in recruiting psychiatrists for the States.

11. SSA has added more than 140 Administrative Law Judges to what is already perhaps the largest single adjudicative system in the world, bringing their total number to more than 800 and providing them with significantly more support staff to help reduce the backlog of cases that has been a chronic problem in past years.

12. Based on our findings in the first year of the CDI program, SSA has broadened the definition of the permanently disabled who need not be subject to the every-three-year CDI process mandated under the law. As a result, SSA expects to exempt an additional 165,000 beneficiaries from the CDI process during the next fiscal year—which will mean reducing the total from about 800,000 to about 640,000, a major reduction in workloads for the State agencies.

Included in these measures is an important change under which a personal interview is conducted by a Social Security Administration employee before a case is even sent to a State agency for review. This personal interview assures that claimants will be acquainted with the implications of the process and will have the opportunity to present their views and to make available any relevant evidence. Moreover, the face-to-face interview creates a situation in which obviously inappropriate reviews can be detected at the very beginning of the process. In such situations, the case is not even sent to the State agency but is referred back to the Social Security central office with a recommendation that further review be discontinued.

These actions should reduce to an absolute minimum the incidence of improper terminations. Together with the administrative steps being taken to improve the appeals process, these changes eliminate any possible basis for continuing benefit payments beyond the point of the initial State agency determination.

FINANCE COMMITTEE APPROACH INADVISABLE

The Committee has recommended an approach which would continue benefits during the appeals process. This approach has nothing to recommend it. If the bulk of initial decisions denying benefits were incorrect, the proper approach would be to change the initial decision process rather than to pay benefits to those who happen to appeal that initial decision. In fact, however, the evidence available to the Committee does not indicate that the bulk of initial decisions are wrong. Rather, it indicates that over 97 percent of the decisions are correct. Consequently, the Committee bill will result in spending social security trust fund money primarily to pay improper benefits. Some of this money will be subsequently recovered; most of it will not. Except in those cases where the individual's benefit is continued on appeal (and this will frequently be an improper continuation) the amendment does nothing but postpone the day of reckoning. Moreover, it will leave the terminated beneficiary with the burden of a substantial overpayment at that point.

The implications of the Committee amendment may be even more than the short-term improper expenditure of many millions of dollars in social security trust funds. The history of the social security disability program seems to show a fair degree of volatility in the application of adjudicative standards. The Congress has faced a continuing need to reemphasize its original intent that the definition of disability be applied strictly and narrowly. In the 1980 Amendments Congress spoke forcefully and, thus far, effectively to this issue. There is a distinct danger that these amendments would be viewed by all adjudicators as a reversal of this Congressional intent. This bill could be seen as a Congressional judgment that most, or a substantial proportion, of the agency's terminations are incorrect. If this occurs, it could cause the State agencies to allow more claims.

In addition, the Committee provision is bound to have substantial impact on the appeals process, probably in ways which will undermine the attempts of the Administration to bring the appellate process back into line with the agency policy. Simply on a workload basis, the decision to pay benefits through the hearing level will stimulate additional appeals from individuals with little expectation of ultimately winning reinstatement. In addition, the hearings officers like the State agencies may read into this legislation a subtle message that Congress is reversing its earlier concern over the integrity of the benefit rolls.

Mr. BAKER. Mr. President, let me yield to the Senator from Maine and then to the Senator from Louisiana.

Mr. COHEN. Mr. President, I ask unanimous consent that the findings of the Subcommittee on Governmental Affairs be printed in the RECORD.

There being no objection, the findings were ordered to be printed in the RECORD, as follows:

VIII. FINDINGS

The Subcommittee's principal finding is that many severely disabled persons are being erroneously terminated from the disability insurance program, only to wait without benefits through a lengthy appeals process after which 67 percent are eventually reinstated in the program.

If present trends continue, by the end of 1983, more than 200,000 people will have had their benefits discontinued only to have them reinstated many months later after a hearing before an Administrative Law Judge. In the meantime, they will suffer both financial hardship and emotional trauma. Already some disabled people have committed suicide and others have lost their homes after losing their benefits.

The Subcommittee finds that this needless and unjustifiable result is attributable to several factors—some of which are long-standing problems and others which were created by the way the current reviews were being conducted. The Subcommittee found the following:

(1) Many states have been ill-prepared to handle the flood of CDI cases because of insufficient staff to process the reviews. States received less than a month's notice that thousands of CDI cases would be forwarded to their offices. State hiring freezes have prevented some states from hiring needed additional staff. The tremendous increase in reviews has created a severe strain on state agencies' ability to quickly and thoroughly review cases.

(2) The Social Security Administration does not fully inform disability recipients when notifying them that their cases are under review. The letter sent by the SSA does not stress the gravity of the review but merely says that the agency is checking to determine whether the claimant "continues to meet the eligibility requirements."

Insufficient time is allowed for the recipient to fully respond to the state disability determination.

(3) The initial decision entitling the claimant to benefits is not presumed to be valid. Beneficiaries are having to prove all over again that they are disabled. This burden of proof is not, however, explained to beneficiaries and their doctors, who understandably believe that they have to show only a lack of medical improvement. Inadequate notice to beneficiaries hinders the development of a full and complete medical record. Beneficiaries are not notified that their existing medical history on file with the Social Security Administration is not considered in the decision.

(4) State agencies are poorly developing the medical evidence essential to the disability determination. In reviewing claimants' files, states are disregarding an medical evidence that is more than two or three months old, thus providing a very distorted and incomplete picture of the claimant's condition. Because the SSA does not require a showing of medical improvement before benefits are terminated, many severely disabled people have been dropped from the program, although their medical conditions have actually deteriorated or remain unchanged.

(5) The SSA is placing an undue reliance on consultative examinations in the review process. The high rate of consultative examinations is attributable to the rush to issue decisions based only on new medical evidence and to the practice of soliciting information from treating physicians in a

format which is not useful to the disability determination.

(6) Different, and in some cases, conflicting standards are used for disability determinations, depending on whether the decision is being made by a state claims examiner or an ALJ. The POMS which govern state agency decisions and are issued without public review and comment do not accurately reflect the intent of the federal regulations, and account in part for the differences in allowance rates at the state and ALJ levels.

(7) The appeals process is clogged and lengthy. On average, a claimant has to wait from nine months to a year to obtain a hearing before an ALJ. There is no face-to-face contact between a decision maker and the claimant prior to the ALJ hearing, so that state decisions are based solely on a review of the claimant's file.

The combined effect of these and other factors is that this process is not a "review" of disability at all, but rather a re-determination of disability based on inconsistent and more strict criteria, without notice to beneficiaries or their treating physicians of the ture nature of the CDI process.

Mr. THURMOND. Mr. President, I rise in support of H.R. 7093 to continue paying social security disability benefits through the appeals process.

The distinguished Senator from Maine, Mr. COHEN, and I have both introduced legislation directed at this problem of premature termination of disability payments. Severe hardships have been inflicted unnecessarily on hundreds of disabled individuals and their families whose social security disability payments have been suddenly terminated upon review of their case files. While approximately two-thirds of those terminated are eventually reinstated when they appeal the unfavorable decisions, the appeals process can take months and many families may be financially devastated before the unfavorable decisions can be overturned.

Mr. President, this legislation is designed to prevent further, unnecessary hardships to social security disability recipients whose cases are reviewed. It would give the benefit of the doubt to the disabled recipient by continuing these payments until an administrative law judge hears the appeal and rules against the appellant. This authority to pay benefits pending appeal would expire in June 1983. It is, therefore, simply a temporary measure which will grant relief to disabled individuals and their families while Congress undertakes a more comprehensive review of the social security system.

Mr. President, I believe this is a fair, compassionate measure of minimal cost, and I hope the Senate will adopt it.

Mr. BAKER, I yield to the Senator from Louisiana for the purpose of making an objection.

Mr. LONG. I object.

The PRESIDING OFFICER (Mr. SPECTER). Objection is heard.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I might advise the Senate, while waiting for the minority leader to come to the floor, that the vote on the continuing resolution conference report is going on now in the House of Representatives, which is a good hour or hour and a half earlier than they thought at a prior time. They still have items in disagreement to deal with, so I have no way of judging when the report itself will get here. But it looks like we are going to be able to turn to that measure substantially ahead of the time I had predicted earlier. I felt we would not receive it before 10 o'clock. I would not be surprised to see us get it about 7 o'clock. I am sure that is good news for all Members.

Mr. President, before going to——

Mr. METZENBAUM. Mr. President, will the Senator from Kansas yield for a question? I am not clear what the Department's position is. Senator LONG objected to calling up the bill, was that it?

Mr. BAKER. Yes, Mr. President, that is true.

Mr. METZENBAUM. He objected to the measure with respect to disability so it is not before the Senate.

Mr. BAKER. That is correct.

Mr. President, I thought I was prepared to go forward with a unanimous-consent request on the defense procurement conference report, but I am not. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEFENSE PRODUCTION ACT EXTENSION

Mr. BAKER. Mr. President, I am prepared to ask the Senate to turn to the consideration of the Defense Production Act, S. 2375. Before I do so, I would like to propound a unanimous-consent request as to that item. I will state it now, Mr. President, for the consideration of the minority leader and all Senators.

Mr. President, I ask unanimous consent that the Senate now turn to the consideration of the Defense Production Act, S. 2375. I ask unanimous consent that there be 20 minutes equally divided on the bill. I ask unanimous consent that there be 30 minutes equally divided on a McClure-Warner substitute amendment to the Schmitt change amendment, on which there will be a limitation of 10 minutes equally divided, on the termination date of the bill.

I ask unanimous consent that there be 15 minutes, equally divided, on a Warner amendment to title III, which will be offered and withdrawn, and 10 minutes, equally divided, on a Schmitt amendment, which has been cleared.

Further, I ask unanimous consent that, on the Schmitt White House Conference on Productivity amendment, there be 10 minutes, equally divided.

Mr. President, I ask unanimous consent that, on the Humphrey amendment on stockpile study, there be 10 minutes, equally divided.

I ask unanimous consent, Mr. President, that any second-degree amendment be limited to one-half the time for the first-degree amendment and must be germane to the first-degree amendment.

Further, I ask unanimous consent that these amendments as identified be the only amendments in order and that the agreement be in the usual form.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object.

Mr. BAKER. Mr. President, I add to the request that the time for debate on the bill be under the control of the distinguished Senator from New Mexico (Mr. SCHMITT) and the distinguished Senator from Illinois (Mr. DIXON), and that the time on the amendments be in the usual form as to control of time.

Mr. LONG. Mr. President, reserving the right to object. Could I ask what the nature of the Schmitt change amendment is?

Mr. SCHMITT. That is a date change.

Mr. ROBERT C. BYRD. Mr. President, there is no objection on this side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank all Senators.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 2375) to extend by 5 years the expiration date of the Defense Production Act of 1950.

The Senate proceeded to consider the bill which had been reported from the Committee on Banking, Housing, and Urban Affairs with an amendment to strike out all after the enacting clause, and insert the following:

TITLE I—EXTENSION OF DEFENSE PRODUCTION ACT OF 1950

SEC. 101. The first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1983".

TITLE II—COST ACCOUNTING STANDARDS

SHORT TITLE; TABLE OF CONTENTS

SEC. 201. This title may be cited as the "Defense Production Act Amendments of 1982".

TABLE OF CONTENTS

Sec. 201. Short title; table of contents.
Sec. 202. Findings and purpose.
Sec. 203. Transfer of Cost Accounting Standards Board functions.

FINDINGS AND PURPOSE

SEC. 202. (a) The Congress hereby finds that—

(1) the Cost Accounting Standards Board has fulfilled its mandate to establish cost accounting standards for defense contractors;

(2) there are continuing functions required to be performed in maintaining the standards, including the amendment or modification of standards, granting of waivers for individual contracts, and establishing exemptions; and

(3) it is necessary to transfer the authority to exercise these functions and the authority to maintain, interpret, and administer these standards.

(b) Therefore, it is the purpose of this title to transfer the authorities and functions of the Cost Accounting Standards Board which are necessary to maintain, interpret, and administer the standards to the Director of the Office of Management and Budget.

TRANSFER OF COST ACCOUNTING STANDARDS BOARD FUNCTIONS

SEC. 203. Section 719 of the Defense Production Act of 1950 (50 U.S.C. App. 2168) is amended to read as follows:

"COST ACCOUNTING STANDARDS

"SEC. 719. (a) Cost accounting standards shall be used by all relevant Federal agencies and by defense contractors and their subcontractors in estimating, accumulating, and reporting costs in connection with the pricing, administration, and settlement of all negotiated prime contract and first-tier subcontract national defense contracts with the United States in excess of $500,000, other than contracts or subcontracts where the award is based on (1) established catalog or market prices of commercial products, (2) prices set by law or regulation, or (3) adequate price competition.

"(b) All standards, rules, and regulations issued by the Cost Accounting Standards Board, and in effect on the day prior to the effective date of the Defense Production Act Amendments of 1982, shall remain in effect and be subject to the provisions of this section. These standards, rules, and regulations shall have the force and effect of duly promulgated regulations.

"(c) All exemptions, waivers, and other actions by the Cost Accounting Standards Board in connection with any function transferred by this section, and in effect at the time of the transfer, shall remain in effect to the same extent as if such transfer had not occurred, until amended or rescinded by the Director of the Office of Management and Budget.

"(d) The Director of the Office of Management and Budget (hereinafter referred to as the 'Director') shall have the authority to take such action as the Director determines necessary to ensure—

"(1) that the standards, rules, regulations, and interpretations issued by the Cost Accounting Standards Board are consistent with sound accounting principles and provide for accurate, fair, and equitable cost determinations; and

"(2) that such standards, rules, regulations, and interpretations conform to procurement policies, regulations, procedures, or forms promulgated pursuant to the Office of Federal Procurement Policy Act and other Government procurement authorities. In performing such function, the Director is authorized to amend or rescind the standards, rules, regulations, or interpretations issued by the Cost Accounting Standards Board.

"(e)(1) Prior to the amendment or rescission of any standard, rule, or regulation under this section, the Director shall publish in the Federal Register notice of the action proposed to be taken, together with a report concerning such proposal. All parties affected thereby shall be afforded a period of not less than ninety days after such publication in which to submit their views and comments with respect to the proposed action.

"(2) The Director shall give full consideration to the views and comments submitted before making any final amendment or rescission. A final amendment or rescission may not become effective prior to the expiration of ninety days after final publication in the Federal Register.

"(f) The publication required by subsection (e)(1) shall contain, with respect to the proposal—

"(1) a full description of such proposal;

"(2) a summary of the reasons for such proposal; and

"(3) an assessment of the probable costs of implementation relative to the probable benefits of such proposal, including an analysis of—

"(A) the effects of such proposal on inflation;

"(B) the advantages and improvements in the pricing, administration, and settlement of contracts which will result from such proposal; and

"(C) the effect of such proposal on contract prices.

"(g) The Director is authorized to exempt from the requirements of this section such classes or categories of defense contractors or subcontractors under contracts negotiated in connection with national defense procurements as the Director determines, on the basis of the size of the contracts involved, nature of the contractor's business, or otherwise, are appropriate, consistent with the purposes sought to be achieved by this section.

"(h) The Director is authorized to waive the requirements of this section.

"(i) For the purpose of determining whether a defense contractor or subcontractor has complied with duly promulgated cost accounting standards and has followed consistently his disclosed cost accounting practices, any authorized representative of the head of the agency concerned or of the Comptroller General of the United States shall have the right to examine and make copies of any documents, papers, or records of such contractor or subcontractor relating to compliance with such cost accounting standards and principles.

"(j) With respect to any function that may be transferred by this section and exercised after the effective date of this section, reference in any other Federal law or regulation to the Cost Accounting Standards Board shall be deemed to mean the Director.

"(k) The assets, liabilities, contracts, property, and records of the Cost Accounting Standards Board are hereby transferred to the Director.

"(l) The standards, rules, and regulations made effective under this section shall be incorporated into a single, Government-wide procurement regulation not later than September 30, 1984. When such regulation becomes effective, the provisions of this section shall terminate.".

Amend the title so as to read: "A bill to extend the Defense Production Act of 1950, and to amend section 719 of such Act to transfer the authorities and functions of the Cost Accounting Standards Board.".

Mr. SCHMITT. Mr. President, S. 2375, a bill to extend the expiring provisions of the Defense Production Act for 1 year until September 30, 1983, is a vitally needed piece of legislation, as the authorities expired last night at midnight. Soon I will offer an amendment that would change the date to 9 months for reasons to be explained later.

This act contains authorities providing the President with powers necessary to mobilize the economy in wartime, and in times of peace, to prioritize and expedite the performance of defense contracts.

Title II of S. 2375 contains provisions which transfer the authorities of the now defunct Cost Accounting Standards Board to the Director of the Office of Management and Budget. This transfer is needed to permit necessary updating, modification, and simplification of the cost accounting standards. The administration supports this provision of the bill, which was unanimously agreed to by the Banking Committee.

The extension of this Act is vital to avoid confusion, delay and possible additional expense in the performance of government contracts. I urge the adoption of this legislation.

Mr. President, I yield to my distinguished colleagues from Illinois for any opening remarks that he may wish to make.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, the Defense Production Act of 1950 expired last night. Immediate extension of the defense preparedness authority under the act is essential to our national security. The Defense Production Act includes authority for the President to expedite performance on certain defense contracts and provides for the maintenance of our Nation's defense industrial base in a high state of readiness.

Mr. President, I am aware that there are a number of proposals in both the House and Senate for major changes in the Defense Production Act and in the manner in which we address the need for strengthening our industrial base. I regret that it is not possible at this very late date in the session to address all these issues on their merits. The bill before the Senate, S. 2375, will be amended to provide a 9-month extension of the Defense Production Act. The act will then expire on June 30, 1983, unless further extended. Thus, the new Congress will have the Defense Production Act on its agenda for early action, and I hope that the

need to strengthen the defense industrial base will receive early and thorough attention in the Banking Committee.

I wish to thank the Senator from New Mexico (Mr. SCHMITT) for his work on this important measure. We have had very good cooperation between our two sides on this matter.

Mr. President, further information on the bill is contained in Senate Report No. 97-412. The report has been available since May, and the only changes in the bill as reported will be the amendments we are about to consider.

UP AMENDMENT NO. 1384

(Purpose: To provide for a White House Conference on Productivity)

Mr. SCHMITT. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. SCHMITT) proposes an unprinted amendment numbered 1384.

Mr. SCHMITT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following:

TITLE III—WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SHORT TITLE

SEC. 301. This title may be cited as the "White House Conference on Productivity Act".

FINDINGS

SEC. 302. The Congress finds that—

(1) the United States traditional annual productivity improvement rate of approximately 3 per centum has fallen drastically in recent years to a negative one-half of 1 per centum;

(2) If our traditional productivity improvement rate had been maintained, the average household would have received nearly $5,500 in additional real income each year;

(3) the decline in productivity has inflated the cost of goods and services produced in the United States relative to the goods and services of nations with higher productivity rates;

(4) improved productivity will enhance our international competitiveness, which will expand foreign market opportunities and jobs;

(5) productivity improvement can be restored in the United States through the application of policies and management techniques which have brought substantial productivity gains on a broad scale in other countries and in some businesses within the United States;

(6) When adequate protections are provided, productivity improvement techniques can bring great benefits to labor as well as management; and

(7) the United States must act immediately to reverse our productivity decline and to restore our annual productivity improvement.

DEFINITIONS

SEC. 303. For purposes of this title—

(1) the term "conference" means the White House Conference on Productivity;

(2) the term "Director" means a Director of the White House Conference on Productivity who should be appointed by the Secretary of Commerce and who shall be paid at the rate of basic pay provided for level V of the Executive Schedule pursuant to section 5316 of title 5, United States Code;

(3) the term "productivity" means output per paid employee hour of all employees in the private sector; and

(4) the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

ESTABLISHMENT AND DUTIES OF THE WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SEC. 304. (a) The President shall conduct a White House Conference on Productivity (hereinafter referred to as the "conference") not later than one year after the date of enactment of this title in order to develop recommendations to stimulate the Nation's productivity improvement rate.

(b) For the purpose of ascertaining facts and developing recommendations concerning the improvement of productivity, the conference shall bring together individuals who are experts in the field of productivity, employees, and representatives of business, associations, labor organizations, academic institutions, and Federal, State, and local government.

(c) The Conference shall consider the following policy options with regard to their role in improving national productivity:

(1) reorganization of the Federal Government so that it can best promote productivity improvement in the private and public sectors;

(2) bringing to the attention of American businesses, labor organizations, and Government officials the benefits which result from implementing productivity improvement techniques;

(3) improving the general training and skill level of American labor;

(4) redirecting Government efforts to inform American businesses of foreign technological developments;

(5) encouraging Government agencies to share with industry new discoveries and processes that improve productivity;

(6) establishing annual Presidential awards of recognition for those businesses and industries which accomplish outstanding improvement in productivity and establishing similar awards at the State and district levels;

(7) revising the tax laws to encourage companies to take actions to improve productivity;

(8) reviewing the effect of the antitrust laws on efforts to improve productivity;

(9) reviewing the patent laws to determine if changes are needed to encourage more productive use of American patents;

(10) improving the accuracy and reliability of data gathered by the Bureau of the Census and other Government statistical collection centers which measure American productivity; and

(11) revising Federal civil service laws to improve the productivity of Government workers and encouraging similar action at State and local levels.

REPORT OF THE CONFERENCE

SEC. 305. A final report of the Conference on Productivity shall be submitted to the President not later than one hundred and twenty days following the date on which the Conference is called and the findings and recommendations included therein shall be immediately made available to the public. The President shall, within one hundred and twenty days after submission of such final report, transmit to the Congress his recommendations for the administrative action and legislation necessary to implement recommendations contained in such report with which he concurs.

ADMINISTRATION

SEC. 306. (a) In administering this title, the Director shall—

(1) request the cooperation and assistance of the Office of Management and Budget and the Departments of Labor and the Treasury and such other Federal departments and agencies as may be appropriate in carrying out the provisions of this title;

(2) render all reasonable assistance, including financial assistance to groups and organizations which are conducting district, State, or regional productivity conferences in preparation for the Conference;

(3) prepare and make available background materials for the use of delegates to the Conference which are deemed necessary, and prepare and distribute any report of the Conference as may be necessary and appropriate;

(4) engage such additional personnel as may be necessary to carry out the provisions of this title without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates; and

(5) enter into contracts only to such extent and in such amounts as are provided in appropriation Acts, with organizations with particular expertise in productivity to conduct preparatory and followup work for the Conference.

(b) Personnel engaged under subsection (a)(4) shall be compensated at a rate not to exceed the rate equal to the maximum rate for GS-15 of the General Schedule under section 5332 of title 5, United States Code.

Mr. SCHMITT. Mr. President, this amendment would provide for the President to convene a White House Conference on Productivity.

The White House Conference on Productivity envisioned by this amendment would provide a national forum for addressing our Nation's concern over declining productivity. Such a conference, preceded by State and regional meetings among business, labor, academia, government, consumers and the general public, would provide an opportunity to focus attention on some of the elements that may help to improve productivity growth, including new approaches to labor-management relations, alternatives to current methods for financial analysis of proposed capital investments, robotics, capital formation, and regulatory policy.

This conference could focus national attention on the individual benefits that accrue from productivity improvements. It could study the methods and policies that have been suc-

cessfully used in other countries to promote rapid productivity growth.

This White House Conference would be an important contribution to improving our Nation's economic performance, first as a statement by the Chief Executive in the priority he places on improved productivity, and, second as a forum for developing innovative solutions to restore productivity growth to its previous levels.

U.S. productivity, or output per hour of all persons, grew fairly steadily at an average rate of 2.4 percent per year between 1948 and 1977. Since 1977 it has gone through a series of quarterly increases and decreases. Overall, however, productivity growth has virtually stalled.

Productivity is a measure used to judge the efficiency of production processes. It is not production itself, but the rate of production—output—per unit of input. Our level or productivity, or rate of output per unit of input, influences the level of our standard of living and our balance of trade. If wages and salaries rise, without compensatory productivity gains, they translate merely into inflated prices.

UNDERLYING CAUSES OF PRODUCTIVITY STAGNATION

Since World War II, productivity has tended to decline for one or two quarters during the mature part of the expansion phase of a business cycle—as less efficient workers and equipment are brought on. However, the 8 quarterly productivity declines which occurred during the 16-quarter expansion period of cycle VI—between the fourth quarter of 1976 and the fourth quarter of 1979—depart strongly from the norm.

A number of economists have attempted to identify factors contributing to the general productivity slowdown. They ascribe varying degrees of importance to a variety of factors. A general listing of these factors includes the following:

First, increases in the price of energy since the OPEC oil embargo of 1973 have caused a shift away from energy as a production input and away from goods produced with or using large amounts of energy, toward goods using or produced with lesser amounts of energy. Low energy using industries tend to have lower rates of productivity growth.

Second, relative increases in the basic price of capital over labor have made businessmen favor increases in the work force over productivity increasing capital stock in certain instances.

Third, increases in the cost to finance the purchase of productivity increasing capital equipment—due to historically high interest rates over the past several years—have discouraged employer investment.

Fourth, changes in the age-sex composition of the work force over the past decade have resulted in increasing proportions of relatively inexperienced—and thus, the argument goes, less productive—women and young workers from the baby boom generation.

Fifth, a proliferation of Government regulations throughout the 1970's, especially in areas of consumer product safety protection, pollution control, and occupational safety and health protection, have resulted in the diversion of capital investment into equipment which does not necessarily increase output.

PROFILE OF QUARTERLY PRODUCTIVITY MOVEMENTS SINCE 1974

Mr. President, I have had prepared a table that traces 8 years of productivity growth in the nonfarm business sector, which accounts for about 74 percent of the economy in terms of worker hours paid for. Changes in the behavior of quarterly fluctuations over the course of the business cycle are evident in the table. Note how productivity declined sharply during the first quarter of a recession (74/1, 80/2, and 81/4), and increased sharply during the first quarter of a recovery (75/2 and 80/3).

Our longer-term productivity stagnation is not directly related to the mechanism causing quarterly fluctuations in productivity. Rather, it results from long-term causes such as those outlined later in the paper. It is evidenced in the table below by the fact that only once in the past 4 years has the level of productivity in the United States achieved its third quarter of 1977 peak level—see productivity index number in column 3. This happened in the second quarter of 1981.

The index number assigns the value of 100 to the level of productivity for 1977, the base year. Accordingly, any productivity-level index number issued for a given quarter, for example, 1981 IV equals 98.2, reflects the extent to which productivity has grown—or in this case declined—since the base year. Said another way, the index number reflects the level of productivity at a given point in time relative to the level of productivity in 1977.

Mr. President, I ask unanimous consent that a table showing the quarterly productive movements be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

RECENT QUARTERLY PRODUCTIVITY CHANGES, NONFARM BUSINESS SECTOR

Phase of business cycle	Year and quarter	Productivity index (1977 = 100)	Annual rates, seasonally adjusted [1]		
			Quarterly gain	Quarterly loss	Phase average
Cycle VI:					
Recession	74/1	93.8		−4.4	
Do.	74/2	93.0		−3.1	
Do.	74/3	92.4		−2.9	
Do.	74/4	92.3		−.3	
Do.	75/1	92.4	0.3		−2.1
Recovery	75/2	94.7	10.6		
Do.	75/3	96.2	6.6		
Do.	75/4	95.8		−1.9	
Do.	76/1	97.1	5.8		5.1
Expansion	76/2	98.0	3.5		
Do.	76/3	98.2	.8		
Do.	76/4	97.9		−1.0	
Do.	77/1	99.3	5.7		
Do.	77/2	97.9	2.4		
Do.	77/3	100.6	2.9		
Do.	77/4	100.4		−.7	
Do.	78/1	100.4	.1		
Do.	78/2	100.8	1.6		
Do.	78/3	100.6		−.6	
Do.	78/4	100.8	.6		
Do.	79/1	100.3		−1.8	
Do.	79/2	99.4		−3.5	
Do.	79/3	98.9		−2.2	
Do.	79/4	98.8		−.2	
Do.	80/1	98.7		−.4	.4
Cycle VII:					
Recession	80/2	97.6		−4.6	
Do.	80/3	98.4	3.4		−.7
Recovery	80/4	99.2	3.1		
Do.	81/1	100.4	5.0		4.0
Expansion	81/2	100.0		−1.3	
Do.	81/3	100.0	.3		−.8
Cycle VIII:					
Recession	81/4	99.1		−3.5	
Do.	82/1	99.2	.6		
Do.	82/2	99.3	.5		

[1] Quarterly gains or losses were calculated from actual statistical ratios rather than from index numbers here reported. Therefore, dividing each gain or loss by 4 only approximates the distance between the corresponding and previous index numbers.

A LOOK TO THE FUTURE

Mr. SCHMITT. As the country moves through the recession of 1981-82, some new forces are at work—including an apparent trend toward a slight reduction of some energy prices—which may act to reduce the prices of capital and/or energy relative to labor. Some of these forces are embodied in the Economic Recovery Tax Act of 1981, including the following:

First, provisions for accelerated depreciation allowances and reduced corporate tax rates are designed to increase cash flow which could, in turn, be used to finance capital purchases.

Second, provisions for tax credits are aimed at boosting research and development of new technology which may improve energy efficiency and/or productivity, eventually.

Third, tax incentives for individual retirement accounts are intended to increase the pool of funds from which banks can make loans, including loans to certain businesses to purchase capital equipment.

On the other hand, a tight Federal monetary policy and resulting high interest rates may importantly dampen the rate of capital investment and thus strongly influence the rate of productivity growth in the next expansion phase.

If interest rates remain high—at least in the double-digit range—as a

result of efforts of the Federal Reserve Board to constrict the money supply to stem inflation, capital investment will most likely continue to stagnate. Furthermore, the projected large Federal deficit is expected to put additional strains on the money supply, restricting the funds available for lending to corporations and individuals, and keeping the costs of borrowing high.

Based on the current situation, Data Resources Inc., Wharton, and Chapse Econometric models in early 1982 forecast productivity growth rates for 1983—during an expected "recovery" stage—ranging from 1.25 to 2.25 percent. Both rates would be lower than the 2.5-percent average productivity growth rate over the recovery stage of cycle VII (1980–81). It is obvious that neither productivity growth rate is anywhere near the productivity growth rates during the recovery periods of the 1950's, 1960's, or 1970's.

The White House conference on Productivity envisioned by this amendment will allow us to examine the sources of our national productivity decline and to consider some of the proposals to solve these problems that have surfaced in recent years. I am optimistic that we, as a nation are capable of a renewed burst of economic growth that will improve our standard of living and restore our competitive position in world markets. This conference, I believe, will be a step in that direction.

Mr. President, I ask unanimous consent that the Senator from Delaware (Mr. ROTH) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. Mr. President, I wish to offer my strong support for this amendment to the Defense Procurement Act (S. 2375) which would institute a White House Conference on International Competition and Productivity. Earlier this year, I introduced an identical measure, Senate Joint Resolution 159, calling for such a conference; and since that time, the bill has attracted 41 cosponsors. I was therefore delighted when Senator SCHMITT, as a member of the committee with responsibility for S. 2375, was willing to offer this measure as an amendment.

America today is in the midst of a productivity crisis. We have seen our productivity growth rates decline with the passage of time and have witnessed a loss of markets and sales opportunities throughout the world to countries whose efficiency surpasses ours. Loss of markets means loss of jobs and a declining standard of living for all Americans.

Productivity declines affect each and every one of us. The Department of Commerce and the American Productivity Center estimate that if we had maintained our earlier growth rates, the average American household would have $5,500 more in real income this year.

Moreover, as our productivity growth rates have declined our share of world markets has followed suit. While our share of the world market for manufactured goods was nearly 20 percent in 1960, we were supplying less than 13 percent of that market by 1980. Much of this market share has been seized by more productive firms in Japan and the newly industrializing countries around the rim of Asia.

As members of a global system U.S. producers must compete with foreign producers everywhere; and as unit costs of production overseas decline relative to U.S. costs, foreign goods become cheaper and we lose markets and job opportunities.

These competitive problems affect our Nation's basic industries. U.S. producers of carbon steel, for example, unable to keep pace with productivity improvements in Japan, have seen that country gobble up an increasing share of the U.S. market. Even my own State of Delaware has suffered from international pressure. Delaware's Chrysler and General Motors auto and truck producers have watched Japanese auto manufacturers walk away with as much as 30 percent of the U.S. market in a given month.

This experience is being repeated throughout our economy, in consumer electronics, motorcycles, machine tools, apparel, and a host of other products.

We must turn this situation around and regain our international competitiveness. We must develop a strategy for economic growth that will boost the standard of living for all Americans and increase job stability for U.S. workers. And I am convinced that, over the long term, the solution to our domestic and international dilemma lies in greatly improved productivity. To sell abroad and compete at home, we must become more productive.

Productivity improvements, however, will require some basic changes in our thinking. We must give up our crisis mentality approach to issues and begin to emphasize long-term stability.

Business, government, and labor all have a stake in improving our productivity performance and in developing long-term guidelines that will enable us to become more efficient. These groups, working together, can contribute to a cooperative strategy for growth.

As a key step in this cooperative process, the President should convene a White House Conference on International Competition and Productivity. Such a conference—preceded by statewide and regional meetings among business, labor, academia, government at all levels and consumers—would provide a forum for airing views on such diverse topics as robotics, government organization, quality of worklife, capital formation, regulatory policy, export prospects and technology sharing.

This conference could focus national attention on the individual benefits that accrue from productivity improvements. It could study the measures and policies that have been successful in other countries to learn how we might become more efficient. And it could study educational systems around the world to learn how students are taught to become formidable competitors in the world marketplace.

What I envision is a grassroots campaign to spread the word on the value of productivity improvements to each and every American citizen. I do not envision a one-shot deal—just another Federal conference where ideas and recommendations are thrashed out, only to be filed and forgotten due to lack of interest or followup action.

Rather, this White House conference would be an important contribution to our Nation's economic recovery—first as a statement by the Chief Executive on the priority he places on improved productivity, and, second, as a forum for developing innovative solutions to get our productivity back on track.

The United States can again be the world's productivity leader, but to do so requires the cooperation and active participation of every American. A White House Conference on International Competition and Productivity could get that ball rolling.

Mr. DIXON. Mr. President, I ask unanimous consent that I be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Mr. President, I am a cosponsor of the resolution calling for a White House Conference on Productivity and I ask unanimous consent to be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Mr. President, the importance of bringing together the best minds in the country to consider ways to boost industrial productivity is crystal clear. I only regret that the administration has not seen fit to address this urgent national problem.

Mr. SCHMITT. Mr. President, I yield back the remainder of my time.

Mr. DIXON. Mr. President, I yield back the remainder of my time.

Mr. SCHMITT. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment.

The amendment (UP No. 1384) was agreed to.

Mr. SCHMITT. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1385

(Purpose: To establish a Commission on Strategic and Critical Materials Stock Piling Needs)

Mr. HUMPHREY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from New Hampshire (Mr. HUMPHREY), for himself, Mr. SCHMITT, and Mr. CANNON, proposes an unprinted amendment numbered 1385.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new title:

TITLE IV—COMMISSION ON STRATEGIC AND CRITICAL MATERIALS STOCK PILING NEEDS

Sec. 401. This title may be cited as the "Strategic and Critical Materials Stock Piling Study Act of 1982".

Sec. 402. The Congress hereby finds that—

(1) the availability of adequate supplies of strategic and critical industrial materials continues to be essential for national security, economic well being, and industrial production;

(2) research, development, and technological innovation are important factors which contribute to and affect the availability and use of such materials;

(3) there is concern that the Federal Government may not fully possess, or is not adequately exercising, the authority and responsibility for establishing critical policies on such materials and for coordinating and implementing those policies; and

(4) the importance of strategic and critical industrial materials to many national policies requires review of the organizational means for the coordination of policies on strategic and critical materials within the Federal Government.

Sec. 403. (a) There is established a commission to be known as the Commission on Strategic and Critical Materials Stock Piling Needs (hereafter referred to in this title as the "Commission") to study the management, needs, and operations of current national strategic stockpiles.

(b) The Commission shall be composed of five members who shall be appointed by the President from among persons who, as a result of training, experience, and achievement, are exceptionally qualified to carry out the duties and functions of the Commission. In selecting persons for appointment to the Commission, the President shall give particular consideration to persons whose training, experience, and achievement is in fields relating to materials policy, defense policy, or materials science and engineering. The members of the Commission shall serve at the pleasure of the President. The President shall appoint the members of the Commission within 60 days after the date of enactment of this Act.

(c) The President shall designate one of the members of the Commission to serve as Chairman.

Sec. 304. (a) Within six months after the date of appointment of the members of the Commission, the Commission shall transmit to the President and to interested Committees of the Congress a report on the findings, conclusions, and recommendations of the Commission on the needs, management, and operations of the National Defense Stockpile and the system of stockpiling strategic and critical materials. The report shall include—

(1) recommendations for improvement of the current system of management of strategic and critical materials programs and stockpiles of strategic and critical materials and for development policies relating to strategic and critical materials, including recommendations on the advisability of centralizing such management, development, and implementation in one new agency and on the structure and control of such agency;

(2) recommendations regarding the funding and funding structure needed to implement a sound strategic and critical materials program and policy;

(3) recommendations for a coherent national policy on strategic and critical materials consistent with other Federal Government policies and recommendations on the actions necessary to implement such a policy;

(4) a discussion of the actions necessary to develop coordinated Federal Government policies, programs, and research and development activities on materials, including strategic and critical materials;

(5) a review and evaluation of the various programs and activities of the Federal Government carried out in accordance with the policy and directions set forth in the National Materials and Minerals Policy, Research and Development Act of 1980 (94 Stat. 2305; 30 U.S.C. 1601 et seq.), and a determination of the extent to which such programs and activities are contributing to the achievement of such policy and directions;

(6) recommendations of policies designed to improve conditions affecting the minerals and materials needs and resources of the United States and to meet the social, economic, and national security goals of the United States; and

(7) a description of domestic and foreign trends in the availability of strategic and critical materials and the quality of the available materials, the implications of such trends for the economies of the United States and the world and for national security, and the probable effects of such trends on domestic industries.

Sec. 406 (a) The Commission shall adopt such rules and regulations as may be necessary to establish its procedures and to govern the manner of its operations and its organization.

(b) Three members of the Commission shall constitute a quorum.

(c) Any vacancy in the Commission shall not affect its powers, but shall be filled in the manner in which the original appointment was made.

(d) Each member of the Commission who is from private life, while serving on the business of the Commission away from such member's home or regular place of business, shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons intermittently employed in the Government service.

(e)(1) The Commission or any member authorized by the Commission may, for the purpose of carrying out this section, hold such hearings and sit and act at such times and places, take such testimony, have such printing and binding done, enter into such contracts and other arrangements (with or without consideration or bond, to such extent or in such amounts as are provided in appropriation Acts, and without regard to section 3709 of the Revised Statutes (41 U.S.C. 5)), make such expenditures, and take such other actions as the Commission or such member may consider advisable. Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission or before such member.

(2) The Commission is authorized to secure directly from any officer, department, agency, establishment, or instrumentality of the Government such information, suggestions, estimates, and statistics as the Commission may require to carry out this title. Each such officer, Department, agency, establishment, or instrumentality is authorized and directed to furnish, to the extent permitted by law, such information, suggestions, estimates, and statistics directly to the Commission, upon request made by the Chairman.

(3) Upon request of the Commission, the head of any Federal agency is authorized to make any of the facilities and services of such agency available to the Commission or to detail any of the personnel of such agency to the Commission, on a reimbursable basis, to assist the Commission in carrying out its duties under this section, unless the head of such agency determines that urgent overriding reasons will not permit the agency to make such facilities, services or personnel available to the Commission and so notifies the Chairman in writing.

(4) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(5) No officer or agency of the United States shall require the Commission to submit any report, recommendation, or other matter to any such officer or agency for approval, comment, or review before submitting such report, recommendation, or other matter to the Congress or to the President.

Mr. HUMPHREY. Mr. President, essentially, this amendment establishes a Presidential Commission of 6 months' duration to conduct a comprehensive study of the way in which the national defense strategic stockpile is being managed. There has been a great deal of controversy associated with the stockpile over the years. Many valid charges have been made that it was mismanaged and used for economic and political purposes in absolute violation of the canons by which the stockpile was supposed to be managed.

I would prefer that we were taking direct action today to remedy some of these faults, and I intend to pursue that avenue.

I want to add my support to Senator SCHMITT and Senator CANNON, cosponsors of this amendment, an amendment mandating a study in 6 months certainly being a positive step forward.

Mr. President, the National Defense Stockpile and Strategic and Critical Materials Stock Piling Revision Act of 1979 have long been personal concerns of mine. My Preparedness Subcommittee of the Senate Armed Services Committee has held hearings on the stockpile condition, the management problem, the inadequate funding, and the political and economic misuse of the stockpile and its transaction Fund. I have personally introduced legislation to solve some of these problems and I am pursuing studies along with the GAO and other agencies to gather data to support further corrective legislation.

I feel strongly about the requirement and purpose of the stockpile. The purpose of the national defense stockpile is to promote national security by providing a ready and adequate supply of raw materials for use during a national emergency. The operation of the stockpile was intended to be free from political or economic considerations. The language and intent of the Strategic and Critical Materials Stock Piling Act is clear when it states, "The purpose of the stockpile is to serve the interest of national defense only and is not to be used for economic or budgetary purposes." Still, attempts are made almost daily to use the stockpile to bolster a small subsection of our economy. The integrity and purpose of the stockpile is more critical than these attempts to misuse the stockpile and its moneys. This is not a new matter with me, as the record will show, I have risen many times on this floor to speak against bills attempting to direct or restrict funds for special interest. My dear colleague letters have gone to both Senate and House Members requesting support to delete restrictions which have been introduced to the Stock Piling Act and transaction fund.

As long as management of the stockpile is fragmented, the funding is held hostage to the budget process, and the transaction fund is viewed as fair game for special purposes, the material requirements will not be met. Given the existing shortages of materials to meet stated requirements, immediate action is required. Although in the past 4 months the stockpile with all its problems have gotten increased visibility, legislative solutions have not been enacted.

By calling for a stockpile study to examine ways to consolidate management actions, to eliminate budget and political misuses, to find funding alternatives, and to make the transaction fund a pure rotating account, I hope we are moving a step closer to corrective actions. I would rather be speaking today on direct legislation. But, if this short study is only an interim measure meant to consolidate Senate and House efforts and can be viewed as progress, I add my support.

I will continue to push for enactment of S. 2906, my bill to remove the stockpile transaction fund, once and for all, from the budget process and to establish the fund as a pure revolving account.

Mr. SCHMITT. Mr. President, I want to express my strong support for this amendment, Senator HUMPHREY's leadership on critical materials issues has helped to focus this body's attention and the attention of the Armed Services Committee on a very serious problem.

The amendment will assist us in arriving at some answer to our materials problem by creating a Presidential Study Commission to examine the entire scope of our policies or lack thereof, as is too often the case, and to make recommendations to the President and the Congress for action.

The history of the stockpile is not an impressive one. We are far below our national goals and in the event of a national emergency would be hardpressed to provide materials for both defense and critical civilian purposes that our country would need.

I am pleased that the Senator from New Hampshire has joined myself and others in the sponsorship of legislation to be introduced in the near future to establish a Strategic Stockpile Commission.

The Senator's hearings on this legislation established a forceful record on the need for the rationalization of the stockpile management and he is to be commended for his diligence on this issue.

● Mr. CANNON. Mr. President, I am pleased to join with the Senator from New Hampshire (Mr. HUMPHREY) and the Senator from New Mexico (Mr. SCHMITT) in offering an amendment to S. 2375, which would establish a Presidential commission to pull together this country's inconsistent and recently counterproductive strategic and critical materials stockpile policies.

I have introduced legislation to establish a permanent White House Council to direct our national materials policies and had hoped to offer that proposal as an amendment to S. 2375. However, I do not want the strong opposition from the administration to jeopardize the extension of the Defense Production Act and have deferred my proposal.

The amendment I am offering with the Senator from New Hampshire and the Senator from New Mexico will establish a Commission on Strategic and Critical Materials Stockpiling Needs to do a 6-month study of the management, needs, and operations of current national strategic stockpiles.

The recommendations of this Commission, which will go directly to the President and the Congress, will hopefully provide this country with a comprehensive blueprint for a national agenda of action to end our dangerous overreliance on imported strategic and critical materials.

This Commission will be directed to consider in its report the following important matters:

First, recommendations for improvement of the current system of management of strategic and critical materials programs and stockpiles of strategic and critical materials and for development and implementation of research and development policies relating to strategic and critical materials, including recommendations on the advisability of centralizing such management, development, and implementation in one new agency and on the structure and control of such agency;

Second, recommendations regarding the funding and funding structure needed to implement a sound strategic and critical materials program and policy;

Third, recommendations for a coherent national policy on strategic and critical materials consistent with other Federal Government policies and recommendations on the actions necessary to implement such a policy;

Fourth, a discussion of the actions necessary to develop coordinated Federal Government policies, programs, and research and development activities on materials, including strategic and critical materials;

Fifth, a review and evaluation of the various programs and activities of the Federal Government carried out in accordance with the policy and directions set forth in the National Materials and Minerals Policy, Research and Development Act of 1980 (94 Stat. 2305; 30 U.S.C. 1601 et seq.), and a determination of the extent to which such programs and activities are contributing to the achievement of such policy and directions;

Sixth, recommendations of policies designed to improve conditions affecting the minerals and materials needs and resources of the United States and to meet the social, economic, and national security goals of the United States; and

Seventh, a description of domestic and foreign trends in the availability of strategic and critical materials and the quality of the available materials, the implications of such trends for the economies of the United States and the world and for national security, and the probable effects of such trends on domestic industries.

I want to congratulate my colleague from New Hampshire (Mr. HUMPHREY) and my colleague from New Mexico (Mr. SCHMITT) for their efforts to help develop a more constructive stockpile policy. This Study Commission can make an important contribution to that end and I am pleased to join with them in asking for the Senate's support of this amendment.●

Mr. DIXON. Mr. President, I yield back the remainder of my time.

Mr. HUMPHREY. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment.

The amendment (UP No. 1385) was agreed to.

Mr. SCHMITT. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 3620

(Purpose: To provide a funding mechanism for purchase commitments to promote domestic production of strategic minerals, metals, and materials)

Mr. WARNER. Mr. President, I send back to the desk amendment No. 3620 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Virginia (Mr. WARNER), for himself, Mr. MCCLURE, Mr. MELCHER, Mr. DANFORTH, and Mr. JACKSON, proposes amendment numbered 3620.

Mr. WARNER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, add the following new section:

SEC. 301. (a) Section 303 of the Defense Production Act of 1950 (50 U.S.C. App. 2093) is amended as follows:

(1) Amend subsection 303(a) up to the first proviso to read as follows:

"(a) When it will promote improved defense preparedness, the President may promote expanded domestic production capacity and supply by making contracts (1) for purchases of or commitments to purchase metals, minerals, and other materials, for Government use or resale; and (2) for the encouragement, development and mining of critical and strategic minerals, metals and materials. No such contracts may be made in an amount greater than $500 million unless the Committees on Armed Services of the Senate and the House of Representatives have been notified in writing of such contract and 30 days of continuous session of Congress have expired following the date on which such notice was transmitted to such committees and neither House of Congress has adopted, within such 30-day period, a resolution disapproving such contract. For purposes of this section, the continuity of a session of Congress is broken by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than 3 days to a date certain are excluded in the computation of such 30-day period.".

(2) Add at the end of the section the following new subsections:

"(h) Any contract under this section shall provide that the President has the right to refuse delivery of the item involved and to pay an amount equal to the amount by which the price for the item, specified in the contract, exceeds the market price at the time of delivery for such items as determined by the President. Additionally, any contract under this section shall provide that the President has the right to purchase the contractor's interest in the contract and all of the assets of the project for the contractor's total capital and uncapitalized investment minus depreciation.

"(i) When any contract entered into pursuant to this section imposes contingent liability upon the United States, such liability shall be considered for the purposes of sections 3679 and 3732 of the Revised Statutes, as amended, as an obligation only to the extent of the lesser of (1) the contractor's (estimated for the date of delivery) total capital and uncapitalized investment minus depreciation; or (2) the difference between the contract price for the item and the President's estimate of the market price at delivery. Such obligations established in accordance with this subsection do not have to be amended due to changes in the estimates upon which the original obligation was determined. The President shall submit a report to the Congress not less often than once each year setting forth the gross amount of each such transaction entered into by an agency of the United States Government under this authority and the basis for determining the obligation hereunder.

"(j) Funds for contracts made under this section may be made available from—

"(A) appropriations originally available for the performance of the contract concerned;

"(B) appropriations currently available for procurement of the type of item concerned, and not otherwise obligated; or

"(C) funds subsequently appropriated for those payments. If part or all required funds are not available to enter into or when payment is due under a contract made in accordance with this section, any department, agency, official or corporation of the Government created or utilized under subsection 2094(a) is authorized, subject to the approval of the President, to borrow from the Treasury of the United States, such sums of money as may be necessary to carry out its functions under this section: *Provided, however,* That the amount borrowed under the provisions of this section by all such borrowers shall not exceed an aggregate of $50,000,000 in any one fiscal year: *Provided further,* That all loans from the Treasury shall be repaid within 24 months unless the President makes a finding that such loans are essential to the national security and extends the period for repayment.".

(b) Section 304 of the Defense Production Act of 1950 (50 U.S.C. App. 2094) is amended as follows:

(1) Subsection (b) is amended to read as follows:

"(b) In considering proposals for financial assistance pursuant to sections 2091, 2092, and 2093, the President shall make every effort to minimize the Federal financial commitment and the financial risk to the Federal Government.".

(2) Subsection (c) is amended to read as follows:

"(c) The President shall submit a report not later than January 31 of each year to Congress concerning the operation of sections 2091, 2092, and 2093 (including the reporting requirement of subsection 2093(i) during the preceding fiscal year.".

Mr. WARNER. Mr. President I rise on behalf of Senators MCCLURE, JACKSON, MELCHER, DANFORTH, and myself to introduce an amendment to S. 2375, a bill to extend the Defense Production Act, which reinstates the Treasury borrowing authority which for over 20 years, 1950–74, acted as a reserve against liabilities assumed under purchase commitments, loans and loan guarantees issued under the act. The reinstated borrowing authority would be at a much reduced level from the pre-1974 authority, $50 million versus $2.1 billion, and could only be used for purchase commitments to promote domestic production of strategic and critical minerals, metals, and materials. No loans or loan guarantees would be authorized. All amounts borrowed must be repaid by the procuring agency within 24 months. Any additional funds used in connection with the procurement would be subject to advance appropriations under the Defense Production Act or under such acts as may authorize procurement of the defense items in which the purchased minerals, metals, or materials will be utilized.

The amendment is a modest, but important step forward in this country's efforts to reduce its reliance on unstable foreign sources of strategic and critical minerals, metals, and materials.

Reinstatement of a borrowing authority reserve is an appropriate funding mechanism for purchase commitments to promote domestic production since such commitments will be contingent in nature, that is, no funds will be expended unless the world market price for the item is reduced below the price established in contract, and therefore the amount of payments to be made, which may be zero, cannot be known in advance.

Purchase commitments will assure the United States of a secure source of supply of the needed material, protect domestic producers from predatory pricing by foreign cartels, reduce stockpile requirements, increase U.S. employment and tax revenue, and improve U.S. balance of payments.

The Senate has an opportunity, by this very simple amendment to the Defense Production Act of 1950, to strike a blow against continued reliance on unstable foreign sources of strategic and critical materials.

The amendment would reinstate a provision, removed from the DPA in 1974, which provides the Department of Defense with a funding mechanism for purchase agreements with producers of strategic materials in the United States.

The amendment modifies the pre-1974 provision in a way that should remove any objection to its reenactment.

Prior to 1974, DPA contracts were funded through the use of Treasury borrowing authority. This method of

funding, which had been effectively used for over 20 years, was instrumental in starting or expanding U.S. production of cobalt, copper, nickel, lead, zinc, and titanium.

Because most DPA contracts are contingent in nature, that is, no purchases are made by the Government unless the price of the material falls below the price necessary to sustain U.S. production, borrowing authority, which acts as a reserve against contingent liabilities, is the most sensible funding mechanism, since it recognizes that actual outlays under the contracts will be substantially less than the face amount of the contracts. During the Korean war period, for example, over $9 billion in contracts were entered into, with the borrowing authority reserve ultimately tapped for less than $900 million.

In 1974, the Congress repealed the borrowing authority reserve due to the fact that funds from the sales of the commodities that had been purchased were not being used to repay the borrowing. The result of the repeal is that no DPA contracts for domestically produced materials have been entered into since 1974. Without a borrowing authority reserve, advance appropriations have to be made in the total face amount of the contracts, which produces an apparent budgetary impact that is totally unrealistic.

The amendment that is being offered would again establish a borrowing authority reserve for DPA contracts. An added feature is that borrowings would have to be repaid within 24 months. The amendment would provide that repayments would be made from the agency for which the minerals were purchased for which would be generally out of the DOD budget.

One might argue why reinstate the DPA borrowing authority.

Purchase commitments under the DPA are a well-recognized means of developing domestic capacity in the production of strategic minerals, metals, and materials. However, the commitments are contingent in nature. They are triggered only in the event that foreign producers drop their price below the price necessary to sustain U.S. production.

The alternative to borrowing authority is to appropriate the maximum potential liability of the contract prior to its execution. This produces a budgetary impact which is totally unrealistic and is the principal reason why no purchase commitments have been entered into since the borrowing authority was deleted in 1974.

Borrowing authority acts as a reserve against the contingent liabilities under the contracts, and spreads the budgetary impact, if any, over the entire term of the contracts, which may be 8 to 10 years.

Borrowing authority was repealed by the Congress in 1974 because the borrowing agencies were not repaying the loans from the Treasury. This amendment would require that the borrowing authority be repaid within 24 months after the borrowing occurs. This, plus the reporting requirements of the amendment and the clearance of larger contracts by the Congress, will give the Congress the ability to maintain close control over this very important program.

Some critics of the DPA program, and more importantly title III of the act, would argue that DPA purchase commitments are subsidies to domestic producers.

I would argue that they are not. The DPA purchase commitments are nothing more than procurement contracts for a given commodity at a negotiated price. This kind of contract is common in commercial and government procurement.

The fact that the negotiated price may sometimes be more than the so-called market price does not mean that the producer is being subsidized, it merely means that the purchaser desires to assure itself of a stable source of supply and is willing to take the risk that at some point the price it is paying may be higher than market.

In the case of many strategic and critical materials, the price differential—to the extent it exist at all—reflects not only the fact that foreign production is subsidized but also that a secure source of a critical material is more valuable than an insecure source.

The National Commission on Materials Policy in a report transmitted to Congress in June 1973 said:

> . . . In the interest of national security it is unwise to become dependent upon specific strategic commodities for which the United States lacks a resource base and which are obtained mainly from a small number of countries which may choose to restrict or cut-off the flow of supply. . . . The interest of national security will be served by maintaining access to a reasonable number of diverse suppliers for as many materials as possible.

However America currently is more than 50 percent dependent on foreign sources for 23 of 40 critical materials essential to the U.S. economy and national security procurement and protection.

America must maximize the development of its minerals and materials as quickly as possible to protect itself during times of emergency.

During the Korean war title III was instrumental in expanding our minerals and materials industry. It increased U.S. aluminium capacity by 113,000 tons, which resulted in doubling of production; in increasing copper mine capacity by one-quarter or 300,000 tons, in initiating nickel mining in the United States; in creating the domestic titanium industry; in quadrupling U.S. tungsten mining; in expanding the world columbian and tantalum mining and processing industries; and in expanding supplies of many other strategic and critical minerals just during the Korean war.

Title III of the DP Act must be once again activated so that it may serve the purpose for which it was enacted—to revitalize America's mineral industry for national security needs.

I believe that my amendment which modestly funds title III for purposes of entering into purchase agreements, accomplishes this purpose.

Mr. President, I yield to the distinguished Senator from Idaho.

Mr. McCLURE. Mr. President, I rise in support of the amendment. It has been well documented in congressional hearings as well as public and private studies that we are highly and dangerously dependent on unstable foreign sources for many of the materials that are vital to our national security. Perhaps the best example is the situation we face with cobalt, a metal used in jet engines, engine mounts, armor-piercing shells, tool steels, and other important defense and industrial applications.

The defense stockpile of cobalt is currently 40 million pounds short of its goal of 85 million. We presently import 95 percent of our supply, 76 percent of which comes from two African countries, Zaire and Zambia. Internal instability and the possibility of military conflict with their neighbors make these two countries a highly insecure source of cobalt for the United States.

Recently rehabilitated mines in Idaho and Missouri and a potential new mine in California could produce from 8 ot 10 million pounds of cobalt per year by 1986. This would meet approximately 60 percent of total domestic demand and 100 percent of superalloy demand.

The problem faced by these mines is the threat of predatory pricing that effectively prevents their beginning operation.

Zaire and Zambia presently produce over 60 percent of the world's supply of cobalt. Since cobalt is a byproduct of their copper mines, there is little relationship between their price for cobalt and the cost of operation. In addition, loans provided by the international development banks, Eximbank, and the U.S. Overseas Private Investment Corporation, have subsidized the capital costs of the African mines so that pricing competition with potential U.S. mines is not based on free market considerations.

The risk of predatory pricing by an OPEC-type cobalt cartel can be eliminated by purchase commitments between the Government and domestic mines. DPA contracts were used extensively during the Korean war to develop or expand U.S. mining capacity in

copper, iron ore, lead, zinc, manganese, nickel, magnesium, titanium, and cobalt. The Government was able to generate secure domestic sources in these minerals at a cost of less than one-tenth of the face amount of the contracts.

The Senate now has an opportunity, by an amendment to the Defense Production Act, to strike a blow against continued reliance on unstable foreign sources of strategic and critical materials.

Prior to 1974, DPA contracts were funded through use of Treasury borrowing authority. Because DPA purchase commitments are contingent in nature—that is, no purchases are made by the Government unless the price of the material falls below the price necessary to sustain U.S. production—borrowing authority, which acts as a reserve against contingent liabilities, is a more sensible funding mechanism than direct appropriations, since actual outlays under DPA contracts are substantially less than the face amount of the contracts.

The amendment that is being offered would again establish a borrowing authority reserve for DPA contracts, but at a much reduced level—only $50 million compared to the $2.1 billion that existed prior to 1974.

By using this very modest authority the U.S. Government can take a major step forward in reducing its reliance on foreign sources of strategic and critical materials, reduce stockpile goals, protect U.S. industry from OPEC-type cartel activities, provide employment in the depressed U.S. mining industry, and improve the U.S. balance of payments.

For these reasons, I urge support of this very important amendment.

Mr. SCHMITT. Mr. President, the Senator from Virginia, the Senator from Idaho, and others in this body are well aware by now that I am extremely supportive of attempts to develop mechanisms for cobalt and other minerals for which there are geologically accessible resources in this country to be produced by this country in order to reduce our dependence on foreign imports and on stockpile supplies.

I have been informed by the Office of Management and Budget that the administration will soon propose a viable funding mechanism for title 3 of the Defense Production Act.

It would appear, therefore, that the objectives of the amendment would be achieved through the normal appropriations process, provided we all can work together to insure that the administration does what they say they are going to do.

Since the administration opposes this amendment, Mr. President, and, actually more importantly, it is my understanding, my very clear understanding, that unanimous consent for consideration of S. 2375 in the House, which is required for passage today, will be impossible if this amendment is adopted, and with the assurances that we have from the administration and in the interest of expediting passage of this legislation—which, it has been noted, expired at 12 o'clock last night—I hope the Senator from Virginia will withdraw the amendment with the kind of assurances that we have had.

Mr. WARNER. Mr. President, I respect the representation of my distinguished colleague from New Mexico. As I stated, the purpose of this amendment is as a mechanism for improving the administration of the title III program. I understand there have been developments within the administration recently that bear on this issue. In fact, within the hour, I have been handed the following letter addressed to me from David A. Stockman, Director of the Office of Management and Budget. I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE
OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., October 1, 1982.

Hon. JOHN W. WARNER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WARNER: This is to relate to you the Administration position on the Defense Production Act and use of Title III authorities. As we stated in a letter to the Congress on August 16, 1982, we supported a full Five-year extension of the existing authorities (the Bethune Admendment). Since there is now no prospect for a full five year extension, we should press for a simple extension of the current Act for a shorter period of time.

We further support a viable funding mechanism for the Title III programs and plan to seek a fiscal year 1983 appropriations rider permitting use of Title III authority for purchase agreements, but no loan guarantees or price supports, up to a level of $50 million. With this approach appropriations for the contract authority would be included within the Defense total for the year the contract is issued. We do not see a need for any Treasury or FFB financing of contract authority. While the Department of Defense will have full discretion on the selection of specific projects, the budget level for use of Title III authorities will be reviewed during the budget process. If you need any further information, please let me know.

Sincerely,

DAVID A. STOCKMAN,
Director.

Mr. WARNER. In substance, it indicates that the Office of Management and Budget is prepared to begin work now to support a viable funding mechanism for title III programs.

The letter indicates that administration will pursue funding of title III of the DPA for fiscal year 1983 in the amount of $50 million for purchase guarantees. This offer is exactly what my amendment calls for except that my amendment would allow for funding of title III in subsequent years.

With that in mind, Mr. President, I call upon my distinguished colleague from Idaho and ask if he concurs in the desire to pull this down and let such an important piece of legislation as the simple extension of the DPA go forward at this time. Also, I advise our colleagues that it is our intent to try to raise this subject again, hopefully during this Congress.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. WARNER. I yield to the Senator from Idaho.

Mr. McCLURE. Mr. President, I concur in the remarks of the distinguished Senator from Virginia. I extend a very sincere and heartfelt thanks for all the assistance he has given in trying to bring to the attention of our Nation the vulnerability we visit on our Nation by the importation of these critical materials. I do concur in the remarks the Senator has made.

Mr. WARNER. Mr. President, at this time, I yield such time as he may require to the distinguished Senator from Washington.

The PRESIDING OFFICER. The time of the Senator from Virginia has expired.

Mr. WARNER. Mr. President, will the distinguished Senator from New Mexico yield a few minutes of his time.

Mr. SCHMITT. I shall be happy to if the Senator from Illinois does not.

Mr. DIXON. Mr. President, I am delighted to yield such time as he may desire to the Senator from Washington.

Mr. WARNER. Mr. President, if I may summarize to the Senator from Washington, we have now brought the Warner, McClure, Jackson amendment up and explained the purpose of it. The Senator from Idaho has joined me and in discussing the merits of the amendment after receiving an offer from the administration to fund title III of the DPA in the amount of $50 million on the DOD fiscal year 1983 authorization bill we have decided to withdraw our amendment.

Mr. SCHMITT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SCHMITT. There is time on the bill that is available to yield, is there not?

The PRESIDING OFFICER. There is time on the bill and on the amendment; 15 minutes on the amendment equally divided, controlled by the mover of the amendment and the manager of the bill.

Mr. SCHMITT. I yield the time that is available to the opposition to the Senator from Washington.

Mr. JACKSON. Mr. President, I support the Warner amendment, which

they are going to pull down, I guess, to reinstate borrowing authority under the Defense Production Act (DPA) to fund purchase commitments with domestic producers of strategic minerals, metals, and materials.

There are three points I want to make in connection with this amendment.

There has been ample testimony over the years that we are walking down a very dangerous road in continuing to rely on unstable foreign sources for the critical materials we need to assure our national security. We need to reduce our dependence on these foreign sources of supply where we can. This amendment is a step in the right direction because it encourages domestic production of these strategic and critical materials.

This amendment provides for an economical way to meet our need for these materials. For example, a recently completed study by the Federal Emergency Management Agency concludes that, as an alternative to stockpiling foreign produced colbalt, the development of domestic sources of cobalt is a more cost-effective course of action.

Finally, this amendment is a modest and sound proposal. We are not dealing with an untested program. The Defense Production Act has been around for over 30 years. All this amendment would do is reinstate a funding mechanism that supported DPA purchase commitments over the years and helped to start or expand our production of titanium, lead, zinc, maganese, nickel, and magnesium.

Mr. President, I urge the adoption of this amendment.

Mr. SCHMITT. Mr. President, I yield to the Senator from Virginia the rest of the time in opposition.

Mr. WARNER. Mr. President, I say to the distinguished proponents of this amendment that we shall not give up. The administration has indicated to the Senator from Virginia its intention to find $50 million within the 1983 budget to apply to the basic purposes of this amendment as soon as it is possible with the accommodation of the appropriation cycle.

I withdraw the amendment at this time and in doing so express appreciation to a number of staff people who have done a great deal of work on this amendment: Mr. Sindelar, Counsel of the Energy and Mineral Resources Subcommittee of the Senate Energy and Natural Resources Committee, Mrs. Magill of my staff, and Miss Wise of the staff of the distinguished Senator from Idaho.

The amendment (No. 3620) was withdrawn.

UP AMENDMENT NO. 1386

(Purpose: To extend the Act for 9 months)

Mr. SCHMITT. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. SCHMITT) proposes an amendment numbered 1386.

On page 2, line 8, strike out "September 30, 1983" and insert in lieu thereof "June 30, 1983".

Mr. SCHMITT. Mr. President, this amendment merely changes the termination date from 1 year from last night to 9 months; that is, to June 30, 1983. It is my own preference, Mr. President, that this legislation be extended for 5 years in order to provide some certainty to the activities that come underneath the Defense Production Act so that we can carry on the discussions such as that involving title III and discussions involving the stockpile commission and others without worrying about reauthorization.

These discussions will continue, nonetheless, and, maybe more importantly, we have an objection, on the House side again, to the extension of this duration as well as some objections on this side.

In the interest of avoiding the expiration of this important legislation, I am introducing this amendment and urge that it be accepted.

The PRESIDING OFFICER. Who yields time?

Mr. SCHMITT. Mr. President, does anyone care to make any remarks on the termination date?

Mr. DIXON. No; Mr. President, other than to say that we support that date.

Mr. SCHMITT. Mr. President, I know the Senator from Idaho has something.

Mr. WARNER. Mr. President, I rise to protect the Senator from Idaho. It is my understanding that he is about to send to the desk an amendment in the second degree.

Mr. SCHMITT. I think the Senator from Idaho is ready to offer his amendment. Therefore, I yield back the time available on this side on the amendment that I have sent to the desk.

Mr. DIXON. I yield back such time as we may have over here, Mr. President.

UP AMENDMENT NO. 1387

Mr. McCLURE. Mr. President, I send an amendment to the desk on behalf of myself and the Senator from Virginia (Mr. WARNER) and the Senator from Washington (Mr. JACKSON) as a substitute for the pending amendment.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for himself, Mr. WARNER, and Mr. JACKSON, proposes an unprinted amendment numbered 1387 to unprinted amendment numbered 1386.

In lieu of the language proposed to be inserted insert the following: "December 31, 1982."

Mr. McCLURE. Mr. President, a parliamentary inquiry: How much time is allotted on this substitute amendment?

It is my understanding that it is 30 minutes equally divided. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. McCLURE. Mr. President, I yield myself such time as I may consume.

I thank the Senator from New Mexico for agreeing with us on the procedure to be used to get to the agreement on what the time extension would be. I share with the Senator from New Mexico the determination that we should enter into a realistic assessment of our stockpile goals and a realistic way of going about financing them. The only difference we have is in regard to the time for the extension of the authority of the act. The Senator from New Mexico would limit that time to 9 months. Senator JACKSON, Senator WARNER, and I have proposed that that be limited to 90 days.

The reason we have done that, Mr. President, is to maintain the leverage and the momentum with respect to the funding, which I think is absolutely essential to get something done. We are on the verge of finally doing something constructive and relieving this country of its dependence on unstable foreign sources.

It has been studied and restudied for years, as the Senator from Washington indicated. It is time for us to make a decision. I recognize that we cannot make that decision today. Senator WARNER, Senator JACKSON, and I offered the other amendment with respect to funding in good faith. We have been persuaded, however, that it simply could not be resolved today, but we are determined that it be resolved in this session of the Congress. We hope, therefore that the people who are managing this bill would see fit to agree with us that the 90-day period gives us a better guarantee of the ability to resolve that in this session of the Congress than it would be if we extend the time period into the next Congress.

Mr. JACKSON. Will the Senator yield?

Mr. McCLURE. I yield 2 minutes to the Senator from Washington.

Mr. JACKSON. Mr. President, I hope that the 90-day extension will be accepted as a suitable compromise. As my colleague from Idaho has pointed out, this issue has been studied and restudied by virtually every committee of the Congress. If we put this matter off now, for even 9 months, I think we are courting disaster. Some of these countries on which we are so dangerously dependent for our strategic min-

erals may not even be around next year. And, we will be holding more hearings and conducting more studies. I think the 90-day extension is the kind of comprise we need to get this program going without further delay.

I thank the Senator from Idaho.

The PRESIDING OFFICER. Who yields time?

Mr. SCHMITT. Mr. President, I yield myself such time as I require.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. SCHMITT. Mr. President, our duty is not so much a disagreement on the urgency of action relative to our strategic minerals stockpile. I think just about everyone who has been involved in this issue, and many who have not, have made in clear that they are terribly concerned about the strategic vulnerability that the Nation faces relative to imports of strategic minerals from unstable sources. Our problem is one of pure practical procedure. We have been trying for many days, many weeks in fact, to negotiate an extension of this act with our colleagues on the House side as well as in this body. It is, frankly, not possible to get this bill through the House tonight if we do not have a 9-month extension. I am sorry to say that it has come down to that kind of delicate balance, but as I am sure many Senators realize, when you get into these negotiations a variety of interests come down saying it is 9 months, it is not a year; it is not 90 days, it is 9 months.

We are assured by a number of sources involved in this issue on the House side that if this amendment is passed and we indeed send a termination date of 90 days, there will be an objection to the consideration of the Senate bill 2375 and we will not have an extension of the Defense Production Act. If we do not have an extension of this act, there are many known, and probably even more unknown, consequences of unknown costs but significant costs, as I am assured by the administration, as the administration loses its authority to determine priority of contractor work relative to defense projects. So I would urge my colleagues to either withdraw this amendment or urge other colleagues to support the committee in opposition to it.

Mr. WARNER and Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Parliamentary inquiry, Mr. President. How much time do I have remaining?

The PRESIDING OFFICER. Twelve minutes and seven seconds.

Mr. McCLURE. Mr. President, I yield to the Senator from Virginia 4 minutes.

Mr. WARNER. Mr. President, the distinguished Senator from New Mexico has been most cooperative in this matter, and he has correctly stated that this has gotten down to one of those loggerhead battles between the House of Representatives and the Senate. I have here a letter that has just been handed me, from WILLIAM M. BRODHEAD, a Member of Congress, which I have not had an opportunity to share as yet with my distinguished colleague, which indicates the following: "Dear Mr. Warner. I support your effort to extend the Defense Production Act for 90 days so that Congress can return to consider your amendment." When he states my amendment, it is the one that the distinguished Senator from Idaho and the distinguished Senator from Washington submitted and just brought down. "Therefore, I will object"—and I repeat—"I will object to any extension which exceeds 90 days."

Mr. President, as I understand the procedural situation of the House, if there is a single objection this cannot become enacted by the Congress, and therefore I strongly urge my colleague from New Mexico that he heed the advice of the distinguished Senator from Washington who has worked in this area for many, many years, far more than I have, and indeed my distinguished colleague from Idaho. It is our considered judgment that the amendment that we are sponsoring and have brought down should be considered in this session of Congress. The only way that can be done is if we extend this act no longer than 90 days. Furthermore, the only way the House can accept this act is for the Senate to vote no longer than a 90-day extension.

Mr. President, I yield the floor.

Mr. SCHMITT addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. I am familiar with the warning in the letter just quoted by the Senator from Virginia. I have equally as strong personal communications from Members of the other body that are formally involved in this activity from both sides of the aisle that say exactly the opposite; that is, if it is not 9 months, we will have an objection.

So I think we are in a position now of taking the representation of the leadership on the House side, on both sides of the aisle, that tell me that it must be 9 months, sent it over there and they are going to have to work it out for themselves. We can only hope that they are able to persuade their colleagues to extend the act, accept the Senate bill, so that we can proceed then on this side to deal with these matters in a timeframe that makes it possible to deal with them.

The Senators certainly have my assurance as a member of the Banking Committee and one who is principally responsible for Defense Production Act issues to proceed quickly, if possible, in the lameduck session, if not certainly early next year, to move forward on the issues that they have raised as well as many others. I know we have had the assurances of the Senator from New Hampshire (Mr. HUMPHREY), and the Armed Services Committee on which the distinguished Senator from Virginia also sits, that they will move forward with their responsibilities.

I see no way to resolve this except to pass the bill with the best date and that is 9 months.

Mr. WARNER. Mr. President, if the Senator will yield, I appreciate the sentiments that the Senator will help support Senators JACKSON, McCLURE, and WARNER in their efforts to bring before the committee the full measure and import of the amendment discussed today. We brought down the amendment to accommodate the distinguished Senator from New Mexico, who really believes that that amendment might jeopardize passage in the conference. However, in view of the difference we have now, let us give it a try. Let us send it over tonight—they are in session until 9 o'clock—with the 90-day stipulation and see what happens.

Mr. SCHMITT. I wish I could accommodate the distinguished Senator, but again I have to go on the representations I have made as the majority manager of this bill, representations that reflect the attitude of the managers on the other side. I think we stand a better chance of not having to hang around here by going with 9 months. As much as I am reluctant to disagree with my distinguished colleague, I am going to have to ask that the Senate not approve this substitute and go with the committee's position, which is 9 months.

Mr. McCLURE. Mr. President, this is one of those instances in which we are perhaps having difficulty reading what will happen in the other body.

I suspect that the leadership on the other side has said 9 months is necessary because they cannot get the 5-year extension. We are accommodating that in our amendment as well as in the 9-month extension. We are accommodating the major reason they had that problem.

I repeat what I said earlier: If you want to get it done in this session of Congress, you had better pass the 90-day extension; you had better not give 9 months. If we extend this 9 months and have to get into next year and start all over again, I guarantee that we will not make progress. We should set ourselves a deadline of this kind so that we do not have to start all over again in the next Congress.

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. McCLURE. I yield.

Mr. JACKSON. Mr. President, I hope my good friend from New Mexico will see fit to go along on the 90 days and send it to the House and see what they will do. If they will not buy it, then we can exercise the other option. I have great respect for his views and his concerns, and I hope he will give it that try so that we can expedite action on this legislation and see what the House will do finally.

Mr. McCLURE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. DIXON. I yield back the remainder of my time.

Mr. SCHMITT. Mr. President, I respect the opinion of the Senator from Washington very much. I wish I could yield to him on this matter. Unfortunately, I have to go with the judgment that we developed after days of negotiation and ask that the Senate not agree to this substitute amendment.

Mr. McCLURE. Mr. President, it has been suggested to me that perhaps this could be resolved on a voice vote. I would be willing to ask to vitiate the order for the yeas and nays.

Mr. SCHMITT. Mr. President, I suggest that we have a rollcall vote on this issue.

The PRESIDING OFFICER. Objection is heard.

Mr. McCLURE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

The question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Vermont (Mr. STAFFORD), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Michigan (Mr. LEVIN), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Montana (Mr. MELCHER), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I also announce that the Senator from Oklahoma (Mr. BOREN) is absent because of illness in the family.

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER) and the Senator from Michigan (Mr. RIEGLE) would each vote "yea."

The PRESIDING OFFICER (Mr. ABDNOR). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 49, nays 37, as follows:

[Rollcall Vote No. 387 Leg.]

YEAS—49

Andrews	Exon	Mitchell
Baucus	Ford	Murkowski
Bradley	Glenn	Nunn
Bumpers	Grassley	Pell
Burdick	Hart	Pryor
Byrd, Harry F., Jr.	Hatfield	Quayle
	Hawkins	Randolph
Byrd, Robert C.	Heflin	Sasser
Cannon	Helms	Simpson
Chafee	Huddleston	Specter
Cohen	Inouye	Stennis
Cranston	Jackson	Symms
Danforth	Laxalt	Thurmond
Denton	Leahy	Wallop
Dole	Long	Warner
Eagleton	Lugar	Zorinsky
East	McClure	

NAYS—37

Abdnor	Gorton	Packwood
Armstrong	Hatch	Percy
Baker	Hayakawa	Pressler
Biden	Heinz	Proxmire
Boschwitz	Humphrey	Roth
Brady	Jepsen	Rudman
Chiles	Kassebaum	Sarbanes
Cochran	Kasten	Schmitt
D'Amato	Mathias	Stevens
Dixon	Mattingly	Tower
Domenici	Metzenbaum	Tsongas
Garn	Moynihan	
Goldwater	Nickles	

NOT VOTING—14

Bentsen	Hollings	Melcher
Boren	Johnston	Riegle
DeConcini	Kennedy	Stafford
Dodd	Levin	Weicker
Durenberger	Matsunaga	

So Mr. McCLURE's amendment (UP No. 1387) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SCHMITT. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

The question recurs on the first degree amendment, UP No. 1386.

The amendment (UP No. 1386), as amended, was agreed to.

Mr. SCHMITT. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. Senators will return to their seats and refrain from conversation.

Mr. SCHMITT. Mr. President, parliamentary inquiry, what is the pending business before the Senate?

The PRESIDING OFFICER. The first degree amendment, as amended, has just been agreed to, with one amendment remaining to be offered by the Senator from New Mexico.

Mr. SCHMITT. Mr. President, I believe that all amendments have been disposed of.

A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SCHMITT. The amendment, the Schmitt amendment, to which the McClure amendment was a substitute, has that been agreed to?

The PRESIDING OFFICER. That has been agreed to.

Mr. SCHMITT. I believe there are no further amendments.

The PRESIDING OFFICER. If there are no further amendments, the question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. SCHMITT. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SCHMITT. Mr. President, once again may we have order?

The PRESIDING OFFICER. Senators will please refrain from conversing and will please return to their seats so we can hear.

If there are no further amendments, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and to be read a third time. The bill was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

The bill (S. 2375) was passed as follows:

S. 2375

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—EXTENSION OF DEFENSE PRODUCTION ACT OF 1950

SEC. 101. The first sentency of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof December 31, 1982.

TITLE II—COST ACCOUNTING STANDARDS

SHORT TITLE; TABLE OF CONTENTS

SEC. 201. This title may be cited as the "Defense Production Act Amendments of 1982".

TABLE OF CONTENTS

Sec. 201. Short title; table of contents.
Sec. 202. Findings and purpose.
Sec. 203. Transfer of Cost Accounting Standards Board functions.

FINDINGS AND PURPOSE

SEC. 201. (a) The Congress hereby finds that—

(1) the Cost Accounting Standards Board has fulfilled its mandate to establish cost accounting standards for defense contractors;

(2) there are continuing functions required to be performed in maintaining the standards, including the amendment or

modification of standards, granting of waivers for individual contracts, and establishing exemptions; and

(3) it is necessary to transfer the authority to exercise these functions and the authority to maintain, interpret, and administer these standards.

(b) Therefore, it is the purpose of this title to transfer the authorities and functions of the Cost Accounting Standards Board which are necessary to maintain, interpret, and administer the standards to the Director of the Office of Management and Budget.

TRANSFER OF COST ACCOUNTING STANDARDS BOARD FUNCTIONS

SEC. 203. Section 719 of the Defense Production Act of 1950 (50 U.S.C. App. 2168) is amended to read as follows:

"COST ACCOUNTING STANDARDS

"SEC. 719. (a) Cost accounting standards shall be used by all relevant Federal agencies and by defense contractors and their subcontractors in estimating, accumulating, and reporting costs in connection with the pricing, administration, and settlement of all negotiated prime contract and first-tier subcontract national defense contracts with the United States in excess of $500,000, other than contracts or subcontracts where the award is based on (1) established catalog or market prices of commercial products, (2) prices set by law or regulation, or (3) adequate price competition.

"(b) All standards, rules, and regulations issued by the Cost Accounting Standards Board, and in effect on the day prior to the effective date of the Defense Production Act Amendments of 1982, shall remain in effect and be subject to the provisions of this section. These standards, rules and regulations shall have the force and effect of duly promulgated regulations.

"(c) All exemptions, waivers, and other actions by the Cost Accounting Standards Board in connection with any function transferred by this section, and in effect at the time of the transfer, shall remain in effect to the same extent as if such transfer had not occurred, until amended or rescinded by the Director of the Office of Management and Budget.

"(d) The Director of the Office of Management and Budget (hereinafter referred to as the 'Director') shall have the authority to take such action as the Director determines necessary to ensure—

"(1) that the standards, rules, regulations, and interpretations issued by the Cost Accounting Standards Board are consistent with sound accounting principles and provide for accurate, fair, and equitable cost determinations; and

"(2) that such standards, rules, regulations, and interpretations conform to procurement policies, regulations, procedures, or forms promulgated pursuant to the Office of Federal Procurement Policy Act and other Government procurement authorities. In performing such function, the Director is authorized to amend or rescind the standards, rules, regulations, or interpretations issued by the Cost Accounting Standards Board.

"(e)(1) Prior to the amendment or rescission of any standard, rule, or regulation under this section, the Director shall publish in the Federal Register notice of the action proposed to be taken, together with a report concerning such proposal. All parties affected thereby shall be afforded a period of not less than ninety days such publication in which to submit their views and comments with respect to the proposed action.

"(2) The Director shall give full consideration to the views and comments submitted before making any final amendment or rescission. A final amendment or rescission may not become effective prior to the expiration of ninety days after final publication in the Federal Register.

"(f) The publication required by subsection (e)(1) shall contain, with respect to the proposal—

"(1) a full description of such proposal;

"(2) a summary of the reasons for such proposal; and

"(3) an assessment of the probable costs of implementation relative to the probable benefits of such proposal, including an analysis of—

"(A) the effects of such proposal on inflation;

"(B) the advantages and improvements in the pricing, administration, and settlement of contracts which will result from such proposal; and

"(C) the effect of such proposal on contracts prices.

"(g) The Director is authorized to exempt from the requirements of this section such classes or categories of defense contractors or subcontractors under contracts negotiated in connection with national defense procurements as the Director determines, on the basis of the size of the contracts involved, nature of the contractor's business, or otherwise, are appropriate, consistent with the purposes sought to be achieved by this section.

"(h) The Director is authorized to waive the requirements of this section.

"(i) For the purpose of determining whether a defense contractor or subcontractor has complied with duly promulgated cost accounting standards and has followed consistently his disclosed cost accounting practices, any authorized representative of the head of the agency concerned or of the Comptroller General of the United States shall have the right to examine and make copies of any documents, papers, or records of such contractor or subcontractor relating to compliance with such cost accounting standards and principles.

"(j) With respect to any function that may be transferred by this section and exercised after the effective date of this section, reference in any other Federal law or regulation to the Cost Accounting Standards Board shall be deemed to mean the Director.

"(k) The assets, liabilities, contracts, property, and records of the Cost Accounting Standards Board are hereby transferred to the Director.

"(l) The standards, rules, and regulations made effective under this section shall be incorporated into a single, Government-wide procurement regulation not later than September 30, 1984. When such regulation becomes effective, the provisions of this section shall terminate.".

TITLE III—WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SHORT TITLE

SEC. 301. This title may be cited as the "White House Conference on Productivity Act".

FINDINGS

SEC. 302. The Congress finds that—

(1) the United States traditional annual productivity improvement rate of approximately 3 per centum has fallen drastically in recent years to a negative one-half of 1 per centum;

(2) if our traditional productivity improvment rate has been maintained, the average household would have received nearly $5,500 in additional real income each year;

(3) the decline in productivity has inflated the cost of goods and services produced in the United States relative to the goods and services of nations with higher productivity rates;

(4) improved productivity will enhance our international competitiveness, which will expand foreign market opportunities and jobs;

(5) productivity improvement can be restored in the United States through the application of policies and management techniques which have brought substantial productivity gains on a broad scale in other countries and in some businesses within the United States;

(6) when adequate protections are provided, productivity improvement techniques can bring great benefits to labor as well as management; and

(7) the United States must act immediately to reverse our productivity decline and to restore our annual productivity improvement.

DEFINITIONS

SEC. 303. For purposes of this title—

(1) the term "conference" means the White House Conference on Productivity;

(2) the term "Director" means a Director of the White House Conference on Productivity who shall be appointed by the Secretary of Commerce and who shall be paid at the rate of basic pay provided for level V of the Executive Schedule pursuant to section 5316 of title 5, United States Code.

(3) the term "productivity" means output per paid employee hour of all employees in the private sector; and

(4) the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

ESTABLISHMENT AND DUTIES OF THE WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SEC. 304. (a) The President shall conduct a White House Conference on Productivity (hereinafter referred to as the "Conference") not later than one year after the date of enactment of this title in order to develop recommendations to stimulate the Nation's productivity improvement rate.

(b) For the purpose of ascertaining facts and developing recommendations concerning the improvement of productivity, the Conference shall bring together individuals who are experts in the field of productivity, employees, and representatives of business, associations, labor organizations, academic institutions, and Federal, State, and local government.

(c) The Conference shall consider the following policy options with regard to their role in improving national productivity:

(1) reorganization of the Federal Government so that it can best promote productivity improvement in the private and public sectors;

(2) bringing to the attention of American businesses, labor organizations, and Government officials the benefits which result from implementing productivity improvement techniques;

(3) improving the general training and skill level of American labor;

(4) redirecting Government efforts to inform American businesses of foreign technological developments;

(5) encouraging Government agencies to share with industry new discoveries and processes that improve productivity;

(6) establishing annual Presidential awards of recognition for those businesses and industries which accomplish outstanding improvement in productivity and establishing similar awards at the State and district levels;

(7) revising the tax laws to encourage companies to take actions to improve productivity;

(8) reviewing the effect of the antitrust laws on efforts to improve productivity;

(9) reviewing the patent laws to determine if changes are needed to encourage more productive use of American patents;

(10) improving the accuracy and reliability of data gathered by the Bureau of the Census and other Government statistical collection centers which measure American productivity; and

(11) revising Federal civil service laws to improve the productivity of Government workers and encouraging similar action at State and local levels.

REPORT OF THE CONFERENCE

SEC. 305. A final report of the Conference on Productivity shall be submitted to the President not later than one hundred and twenty days following the date on which the Conference is called and the findings and recommendations included therein shall be immediately made available to the public. The President shall, within one hundred and twenty days after submission of such final report, transmit to the Congress his recommendations for the administrations contained in such report with which he concurs.

ADMINISTRATION

SEC. 306. (a) In administering this title, the Director shall—

(1) request the cooperation and assistance of the Office of Management and Budget and the departments of Labor and the Treasury and such other Federal departments and agencies as may be appropriate in carrying out the provisions of this title;

(2) render all reasonable assistance, including financial assistance to groups and organizations which are conducting district, State, or regional productivity conferences in preparation for the Conference;

(3) prepare and make available background materials for the use of delegates to the Conference which are deemed necessary, and prepare and distribute any report of the Conference as may be necessary and appropriate;

(4) engage such additional personnel as may be necessary to carry out the provisions of this title without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates; and

(5) enter into contracts only to such extent and in such amounts as are provided in appropriation Acts, with organizations with particular expertise in productivity to conduct preparatory and followup work for the Conference.

(b) Personnel engaged under subsection (a)(4) shall be compensated at a rate not to exceed the rate equal to the maximum rate for GS-15 of the General Schedule under section 5332 of title 5, United States Code.

TITLE IV—COMMISSION ON STRATEGIC AND CRITICAL MATERIALS

STOCK PILING NEEDS

SEC. 401. This title may be cited as the "Strategic and Critical Materials Stock Piling Study Act of 1982".

SEC. 402. The Congress hereby finds that—

(1) the availability of adequate supplies of strategic and critical industrial materials continues to be essential for national security, economic well being, and industrial production;

(2) research, development, and technological innovation are important factors which contribute to and affect the availability and use of such materials;

(3) there is concern that the Federal Government may not fully possess, or is not adequately exercising, the authority and responsibility for establishing critical policies on such materials and for coordinating and implementing those policies; and

(4) the importance of strategic and critical industrial materials to many national policies requires review of the organizational means for the coordination of policies on strategic and critical materials within the Federal Government.

SEC. 403. (a) There is established a commission to be known as the Commission on Strategic and Critical Materials Stock Piling Needs (hereafter referred to in this title as the "Commission") to study the management, needs, and operations of current national strategic stockpiles.

(b) The Commission shall be composed of five members who shall be appointed by the President from among persons who, as a result of training, experience, and achievement, are exceptionally qualified to carry out the duties and functions of the Commission. In selecting persons for appointment to the Commission, the President shall give particular consideration to persons whose training, experience, and achievement is in fields relating to materials policy, defense policy, or materials science and engineering. The members of the Commission shall serve at the pleasure of the President. The President shall appoint the members of the Commission within 60 days after the date of enactment of this Act.

(c) The President shall designate one of the members of the Commission to serve as Chairman.

SEC. 404. (2) Within six months after the date of appointment of the members of the Commission, the Commission shall transmit to the President and to interested Committees of the Congress a report on the findings, conclusions, and recommendations of the Commission on the needs, management, and operations of the National Defense Stockpile and the system of stockpiling strategic and critical materials. The report shall include—

(1) recommendations for improvement of the current system of management of strategic and critical materials programs and stockpiles of strategic and critical materials and for development and implementation of research and development policies relating to strategic and critical materials, including recommendations on the advisability of centralizing such management, development, and implementation in one new agency and on the structure and control of such agency.

(2) recommendations regarding the funding and funding structure needed to implement a sound strategic and critical materials program and policy;

(3) recommendations for a coherent national policy on strategic and critical materials consistent with other Federal Government policies and recommendations on the actions necessary to implement such a policy;

(4) a discussion of the actions necessary to develop coordinated Federal Government policies, programs, and research and development activities on materials, including strategic and critical materials;

(5) a review and evaluation of the various programs and activities of the Federal Government carried out in accordance with the policy and directions set forth in the National Materials and Minerals Policy, Research and Development Act of 1980 (94 Stat. 2305; 30 U.S.C. 1601 et seq.), and a determination of the extent to which such programs and activities are contributing to the achievement of such policy and directions;

(6) recommendations of policies designed to improve conditions affecting the minerals and materials needs and resources of the United States and to meet the social, economic, and national security goals of the United States; and

(7) a description of domestic and foreign trends in the availability of strategic and critical materials and the quality of the available materials, the implications of such trends for the economies of the United States and the world and for national security, and the probable effects of such trends on domestic industries.

SEC. 405 (a) The Commission shall adopt such rules and regulations as may be necessary to establish its procedures and to govern the manner of its operations and its organization.

(b) Three members of the Commission shall constitute a quorum.

(c) Any vacancy in the Commission shall not affect its powers, but shall be filled in the manner in which the oiriginal appointment was made.

(d) Each member of the Commission who is from private life, while serving on the business of the Commission away from such member's home or regular place of business, shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons intermittently employed in the Government service.

(e)(1) The Commission or any member authorized by the Commission may, for the purpose of carrying out this section, hold such hearings and sit and act at such times and places, take such testimony, have such printing and binding done, enter into such contracts and other arrangements (with or without consideration or bond, to such extent or in such amounts as are provided in appropriation Acts, and without regard to section 3709 of the Revised Statutes (41 U.S.C. 5)), make such expenditures, and take such other actions as the Commission or such member may consider advisable. Any member of the Commission may administer oaths or affirmations to witnesses appearling before the Commission or before such member.

(2) The Commission is authorized to secure directly from any officer, department, agency, establishment, or instrumentality of the Government such information, suggestions, estimates, and statistics as the Commission may require to carry out this title. Each such officer, department, agency, establishment, or instrumentality is authorized and directed to furnish, to the extent permitted by law, such information, suggestions, estimates, and statistics directly to the Commission, upon request made by the Chairman.

(3) Upon request of the Commission, the head of any Federal agency is authorized to make any of the facilities and services of such agency available to the Commission or to detail any of the personnel of such

agency to the Commission, on a reimbursable basis, to assist the Commission in carrying out its duties under this section, unless the head of such agency determines that urgent overriding reasons will not permit the agency to make such facilities, services or personnel available to the Commission and so notifies the Chairman in writing.

(4) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(5) No officer or agency of the United States shall require the Commission to submit any report, recommendation, or other matter to any such officer or agency for approval, comment, or review before submitting such report, recommendation, or other matter to the Congress or to the President.

The title was amended so as to read: "A bill to extend the Defense Production Act of 1950, and to amend section 719 of such act to transfer the authorities and functions of the Cost Accounting Standards Board.".

Mr. SCHMITT. Mr. President, I cannot hear the business of the Senate. I wonder if we can have order?

The PRESIDING OFFICER. Senators conversing will all please go to the cloakroms so that we can hear.

NATIONAL PEACE DAY

Mr. DENTON. Mr. President, on Wednesday, this body passed by unanimous consent Senator BUMPERS second degree amendment to provide for the proclamation of "National Peace Day," which was appended to a first degree amendment offered by Senator MOYNIHAN and relating to a means test with respect to medicare.

Senator BUMPERS characterized his amendment as innocuous as apple pie and motherhood. In my view, his amendment is entirely unsatisfactory and his characterization is inaccurate. The amendment is not innocent but will give aid and comfort to the enemies of this country.

Mr. President, I placed in the RECORD of Wednesday's proceedings literature issued by Peace Links, which calls itself an organizing effort aimed at stimulating interest in national security issues among traditional women's organizations.

The literature of this organization abounds with leaflets and flyers calling for a "Peace Day Festival" on October 10, 1982. Calls to the office of Peace Links by members of my staff have established that it is a self-identified antinuclear group and that the so-called peace theme is ancillary to its true mission.

Mr. President, calls to the office of Senator BUMPERS by members of my staff before the introduction of his amendment calling upon the President to designate October 10 as "National Peace Day" established that the resolution came about at the suggestion of Peace Links which, of course, is headed by Mrs. Betty Bumpers. I do not criticize the sincerity and well meaning of Senator and Mrs. BUMPERS, or any Senator who supported Senator BUMPERS' amendment, even those who might have known of what it consisted. But I am compelled to offer the facts about Peace Links and its affiliations, as well as to express my own opinions about the efficacy of the Bumpers' amendment, which was passed without propriety and without information to the Members of this Chamber as to the issue being voted upon.

Before doing so, Mr. President, let me assure this body and all those who aspire for peace that I too aspire for peace. And it is in the interest of peace that I am now speaking.

It is not accidental that Peace Links had already been calling for and organizing public demonstrations on October 10 to promote the nuclear freeze movement and, at least implicitly, to condemn American foreign policy. I have absolutely no disagreement with the right of our citizens to demonstrate, but I see no reason for the Congress and the President to appear to endorse demonstrations organized in part by groups that are openly critical of, even hostile to, the principles and policies of our country.

The organization, Peace Links, advocates grassroots action to convince women that war is unhealthy and bad for their children, apparently assuming that people do not already realize that. For example, one brochure urges women to "organize within your civic groups, senior citizens, professional and social organizations, garden clubs, PTA's, churches and synagogues to talk about nuclear issues and anxieties, and invite public policymakers to participate in your forums." Another brochure urges women to "have a peace party and invite your friends over to talk about current issues and what can be done."

I will talk about some of those parties later, Mr. President.

Peace Links is guided—and this is the key, I say to Senators—Peace Links is guided by a 14-organization advisory board. Four organizations on the Peace Links advisory board are either Soviet controlled or openly sympathetic with and advocates for, Communist foreign policy objectives. These are the Women Strike for Peace, an affiliate of the Soviet-contolled Women's International Democratic Federation which is based in East Germany; the Women's International League for Peace and Freedom; the radical United States Student Association.

Mr. JEPSEN. Mr. President, may we have order?

Mr. EXON. Mr. President, we cannot hear the Senator.

The PRESIDING OFFICER. The Senators are absolutely correct. The Senate will be in order and we will not continue until the talking is stopped. The Senator has a right to be heard and the Senators have a right to hear him.

The Senator from Alabama.

Mr. DENTON. Mr. President, I thank the Senator from Nebraska and the Chair.

Mr. President, Peace Links is guided by a 14-organization advisory board. Four organizations on the Peace Links advisory board are either Soviet controlled or openly sympathetic with, an advocates for, Communist foreign policy objectives. These are the Women Strike for Peace, an affiliate of the Soviet-contolled Women's International Democratic Federation which is based in East Germany; the Women's International League for Peace and Freedom; the radical United States Student Association; and the Committee for National Security, which was established by the radical, left-oriented Institute for Policy Studies.

One danger in this resolution proposed by Peace Links is that it undermines our position in the disarmament negotiations. It seems a paradox that this resolution is carried on a bill which is vital to the continued operation of our Government. Moreover, it requires the President to turn out our Government workers to rally against his own policies and our own national interests.

Mr. President, we in the Congress and among the American people must understand that the peace we all seek is not easily obtained nor easily preserved. It certainly will not be obtained and preserved by the means advocated by those who have organized the demonstrations scheduled for October 10 and by those who instigated the amendment in question.

I understand the appeal that the nuclear freeze and disarmament have to the people of this country and others. They must understand and face the fact that the measures they advocate will not achieve their goal.

I am reminded of a similar time in history in 1939. After Hitler went into Czechoslovakia, Churchill wanted to do one thing which might have prevented World War II; Chamberlain wanted to do another. Appeasement was the mood of the day. Apathy was the underlying attitude for tactics chosen to deal with Hitler's aggression, and what could have been stopped was not stopped peacefully but might have been had we listened to the words of Churchill. And these words can be applied today in more than strategic terms, but I ask the body to listen to the words of Churchill on that occasion. He said:

Each man hopes that if he feeds the crocodile enough the crocodile will eat him last, and all of them hope that the storm will pass before their turn comes to be devoured. But I fear greatly the storm will not pass. It

will spread ever more widely. It will roar ever more wildly. It will spread to the north, it will spread to the south.

He was correct. And at that time in our history when we went into World War I and World War II it found us at two of the most disarmed points in our history which did not help the chances for peace but hurt them.

I say again that the appeal that the nuclear freeze and disarmament have to the people of this country and others is evident. But they must understand and face the fact that it is not the road to peace. We cannot achieve peace and preserve our liberties by rendering ourselves helpless in the hope that our adversaries will then leave us alone and allow us to live under a system of democratic government and individual liberties whose very existence is anathema to them and, indeed, constitutes a direct and serious threat to their ability to remain in power by suppressing their own people and those who have fallen under their domination.

Disarmament is not a new idea and not an un-American idea. It has been a central preoccupation of this country from its beginning. The search for truly mutual and verifiable nuclear disarmament has been a vital part of our foreign policy since the atomic bomb came upon the scene. From the Baruch plan to START, the United States has consistently and regularly taken the lead in the initiative for arms control negotiations and in proposals to actually and really reduce the number of nuclear weapons, their size and destructiveness, their delivery systems, and the threat that they will be used. But it takes two to negotiate, and the Soviet Union has consistently and regularly refused to reduce its own capability while insisting that we diminish ours, and insisting along many lines very persuasive to the gullible.

Ambassador Edward Rowney, our chief negotiator at the START talks in Geneva, faces great difficulties in those negotiations. The Soviet representatives can assume that the nuclear freeze movement in this country demonstrates that he and the President do not have the support of the people of this country. Actions taken by the Congress are particularly conducive to the same effect. These things diminish the willingness or the need for the Soviets to truly negotiate and to compromise.

Mr. President, I guarantee that, if we allow the resolution to stand and if the Congress and the President appear to endorse the activities already scheduled for October 10, the Soviet policymakers will derive comfort and aid from the lack of support for American foreign policy apparent in the Congress. These Soviet policymakers will smile even as they continue to upgrade and expand their strategic nuclear arsenal and dilly-dally at the important negotiations underway both in Geneva and in Vienna.

Mr. President, it is my hope that the House will take appropriate action to remove the language of the Bumpers amendment from the conference report tonight.

I will withhold further comment until the conference report reaches this Chamber. I have objected to all unanimous-consent time agreements. I intend to be on the floor to oppose all such agreements.

I thank the Chair.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, I will be happy to defer to the Senator from Arkansas if it is on the same matter.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, I think I was recognized but I will be glad to yield to my colleague from Arkansas, Senator BUMPERS, and then I would hope to have two or three moments.

Mr. BUMPERS. Mr. President, first I want to read the resolution that the Senate adopted, and I hope the Senate will pay close attention.

SEC. . The Senate finds that:

a. Wars are raging in several parts of the world inflicting incalculable loss of human lives and property, with unbearable human suffering and grief; and

b. The presence of huge nuclear arsenals in the world present an ever present threat to the survival of mankind; and

c. Though war in a very troubled and divisive world is an ever present possibility and threat, the United States has been at peace since the end of the Vietnam conflict; and

d. The benefits of peace and the value of life should be ever present in the thoughts of all people; and

e. A day should be set aside for the American people to reflect on the values of peace and the horrors of war; and

f. The President should proclaim a day of peace and call on the people of the country to commemorate it with such ceremonies and activities as are appropriate and in keeping with an expression of gratitude for living in a great, free Nation at peace.

The resolution calls on the President to simply call on the people of the country, State and local government agencies, interest groups and organizations, all the people of the United States, to observe that day by engaging in appropriate activities and programs showing their commitment to peace.

When a resolution like that becomes subversive, you can kiss everything that has made this country what it is goodby.

That resolution was cosponsored by 36 of the 38 Senators I asked to cosponsor it.

I said to them and I say to you, that there is a war raging in Ireland. We have just finished the Falkland war in which a thousand fine young men lost their lives. There is war all over Central America, especially in El Salvador. Over 250,000 people have been killed in the Iraq-Iran war. And the Middle East? There is no need to elaborate on it. How pitiful, how terrible, how bloody, how unspeakable the horror has been.

And the word "peace"—is it not interesting, is it not an interesting thing, the connotation that the Senator from Alabama puts on the word "peace."

Most of us in this body tell our constituents, I believe honestly, that we cherish all the teachings of the Messenger of Peace. We have now in Lebanon a peacekeeping force. And on Christmas we sent out all the Christmas cards saying, "Peace on Earth, good will toward men."

Yet the Senator from Alabama seems to find the word peace subversive.

We live on the very brink of extinction and I do not know of a thoughtful person anywhere in the world who doubts that for an instant.

We hope each day that somehow or other the giant nuclear powers, the Soviet Union and the United States will find some way to back away from the brink.

But completely aside from the nuclear war issue, why is peace not something to be cherished?

Many of us served in World War II. The Senator from Arizona (Mr. GOLDWATER), who sits in front of me at this moment, served and served well. He is a conservative and nobody is for a stronger defense than he is. But I promise you he also cherished peace because he is a father.

The teachers across the country tell me that the art work of children is more of mushroom clouds than any other single piece of art.

What are we doing to our children? What is their art work a manifestation of?

Peace Links, which the Senator from Alabama talks about, was not founded in the Kremlin dining room—it was founded in my kitchen. And by a group of mothers and housewives who were and are increasingly concerned about whether their children are going to survive or not.

Many people in this body may not know it but one of the reasons 96 percent of the children in this country right now are immunized against all preventable childhood diseases is because of Betty Bumpers. When she went to Jimmy Carter with her program to immunize the children of this country, because she had already done it in Arkansas, he accepted it immediately and the result was a very successful program that resulted in the virtual elimination of childhood diseases. We have had about 25 cases of measles this year as compared to

about 25,000 the year Betty started the program.

But she had been talking to some women in the neighborhood, and other women she knew about this issue, and she said, "Why should we go to all the trouble to protect the health of our children if we are going to incinerate them?" So, Peace Links was born. And I cannot conceive of a more noble cause. A group of women who want to send a message across the country, to raise the awareness level of what we face, not for unilateral disarmament, not for a weakening of our peace effort. Simply to raise the awareness level among mothers, because by their very nurturing instincts, they have a keener appreciation of the threat to their children, and are more protective of them. We as fathers in this body are protective, too, but we know there is one thing we cannot protect our children against and that is the nuclear holocaust.

My wife—and I do not say this to be magnanimous—has raised three fine children. Because of my public service, she has had to do most of the rearing. She is first and foremost a mother. But she has also been a devoted wife. Her concern here is nothing more or less than her children and her yet unborn grandchildren and yours, and yes, even the children of the Senator from Alabama.

So for the Senator from Alabama to come to this Chamber and say what he has just said, and to insert into the RECORD an article which impugns the integrity of some of the finest people in this country—George Ball, Averell Harriman, Dr. Theodore Hesburgh, William J. Fulbright, and many more—to suggest that all those people who belong to any organization which favors a nuclear freeze are somehow being manipulated by the KGB, is an affront to some of the greatest people in this Nation.

This body's sorriest hour was in the early 1950's when there was a Senator from Wisconsin named Joe McCarthy who had most of the Senators in this body jumping under their desks in adject terror and fear for their political futures.

Well, I want to serve notice not just on the Senator from Alabama but anybody else, that here is one Senator, and I can only speak for one, who is not going to be intimidated. I will use the last ounce of my strength to make sure that this Nation never goes through a similar period again.

But I want the Senator from Alabama to take comfort in one thing. I will fight to the death for his freedom of expression and his freedom of thought, for his right to say most anything he wants to say. But I also want to assure him that I will be here every time an effort is made to impugn, the patriotism of people who simply disagree with him.

It is an especial affront to my wife, but it is also an affront to the wives of Governors, of the Senators in this body, the wives of the Members of the House who have been so helpful to Betty, all across the country, meeting hopefully as a grassroots organization, just one of literally hundreds of organizations across the country who are increasingly concerned about this issue.

But neither Betty Bumpers nor peace links is the issue. The real issue is the attack that the Senator makes on our value system. Mr. President, that is what our quarrel with the Soviet Union is really about. It is our value system; it is not economic. It is not just political; it is our values. And the Senator erodes our value system with the kind of attack he has leveled here tonight on the patriotism of literally millions of people.

There were 202 Members in the House who voted for the freeze; only 204 voted against it. The article which the Senator placed in the RECORD yesterday suggested that, somehow or other, they, too, are being manipulated. Perhaps we should include the people of Wisconsin, 76 percent of whom voted for the freeze.

There are about 30 Senators on the Hatfield-Kennedy freeze resolution, including me, and they must be included.

Mr. President, I will continue to be for a strong defense. One of the reasons I am for a strong defense is because there is always a bully around who will try to silence his adversaries. I cherish our freedoms, and I shall always be for a strong defense to make sure that we continue to enjoy them and that my children continue to enjoy them.

But I shall continue at the same time to fight for peace. I am going to continue adhering to the teachings of the Messenger of Peace, and I am going to continue to send out Christmas cards that say, "Peace on Earth, Good Will Toward Men." And I shall continue to resist the efforts of any Senator, as I would any Nation, who tries to silence dissent in this body or in this country.

Mr. President, I yield the floor.

Mr. PRYOR. Mr. President.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, does the Senator from Kansas have a statement?

Mr. DOLE. It is not on the same subject. I would like to make a unanimous-consent agreement on an amendment that has been cleared. I do not want to interrupt debate on this subject.

Mr. PRYOR. Mr. President, if I may, I wish to rise for just a few moments to comment on the statements made by our colleague, the distinguished Senator from Alabama (Mr. DENTON). Unfortunately, I did not have the opportunity to hear all of those remarks, because when the Senator took the floor, I immediately ran over here as fast as I could.

Just a few feet from where we sit this evening, a little over 40 years ago, Franklin Roosevelt stood and said, "The only thing we have to fear is fear itself." Somehow, those words are echoing tonight, I think, in the Senate Chamber, because for one reason or another we have started preaching fear once again. We have started preaching that if someone attempts to stand in disagreement or advocate an unpopular opinion, we have started saying that maybe he is Communist-inspired or maybe the Soviets are behind his stand.

Let me make one or two points. First, I would like to say a word about Betty Bumpers. I think without any question whatsoever, Betty Bumpers, the wife of the senior Senator from the State of Arkansas, the former first lady of our State, had more impact on those causes that were noble and good, and I might say holy, in our State and our country than almost any lady who has ever graced that particular position. In no way, Mr. President, would any citizen of our State—whether in agreement or disagreement with Mrs. Bumpers or with Senator BUMPERS during his very distinguished career in public service and her very devoted career to giving herself to the people she loved so well—not one citizen of the State of Arkansas, I daresay, would ever entertain any idea whatsoever that Mrs. Bumpers was tied into or supported by or closely allied with or even remotely associated with any organization that had in mind the overthrowing of the Government of the United States. For us to indicate on the floor of the Senate and in the CONGRESSIONAL RECORD that this October 10 demonstration might be an attempt to advocate anything but the best interests of this country, Mr. President, is absurd. I think it is clear that this movement is an attempt to let out the deep frustrations that we find across America, frustrations that are growing day by day.

Frankly, it is no wonder that those frustrations are growing, because some 13,342 days ago, we exploded the first nuclear bomb at Hiroshima, then Nagasaki. Since that day, we have produced at least one nuclear warhead each day—the Soviets and the Americans. We have enough nuclear weaponry today to add up to 40 tons of TNT for every inhabitant of this globe.

We have in our own State, Mr. President, 17 Titan II missiles as has the Senator from Kansas and the Senator from Arizona—53 in all. Each of those Titan II missiles carries a warhead that is 750 times more destructive

than those bombs we dropped over 13,000 days ago in Hiroshima and Nagasaki. Mr. President, it is no secret that there is frustration over this super abundance of destructive power. We look at the Defense Department and the Department of Energy budgets. We see, from 1980 to 1987, an increase in nuclear weapons production of 231 percent. What are we going to do with all these weapons? What are we going to do with these warheads? How many times can we blow this world up, and how many times do the people of our country have to come forward and say, We want it to stop, we want there to be sanity?

How do we respond in Congress? How do we respond in Washington? We respond by appropriating more money each year for the Army and Navy and Marine bands than we spend to negotiate and talk about peace.

That is how we respond. That is why there is frustration, Mr. President, that is why there is such an organizations Peace Links. I would like to encourage my colleagues, rather than discourage them, to join in this overall effort—not just the resolution offered by Senator BUMPERS—because I think it is reflective of what the country is feeling. In addition to that, I would like to invite our colleagues to actually associate themselves with that October 10 Peace Day, where the people in our country can join together to express our concern about the nuclear insanity which exists in this Nation at this time.

Mr. President, I would like to say finally that we are talking about messages that we sent out. We are talking about signals. I think the worst signal of all that we could send out today is that we are fearful of dissent or that we are fearful of the people who want to express themselves in an orderly and pecaceful way. With that, Mr. President, I yield to the Senator from Oregon.

Mr. HATFIELD. Mr. President, I very reluctantly rise at this moment, because I know this is a very difficult issue to raise in these closing hours of the Senate and maintain a calm and cool approach to this, because it does strike at the very emotions of all of us. Let me say to the Senator from Alabama, as one who has spoken at a meeting sponsored by this organization and at the invitation of Mrs. Betty Bumpers, I have had the opportunity to know these people directly because I saw who was there, I was able to visit with these people.

I can say to you that these are good Americans. I cannot vouch for every individual. I did not know every individual. I cannot vouch for every organization. But let me say, Mr. President, I can remember very clearly back to the 1940's, when any conservative political organization was being criticized, or most of them, because they saw a Facistic hand manipulating them—Gerald L. K. Smith for one. So anyone who allied himself with a conservative movement or political cause was falsely accused, his reputation smeared, because it might coincide with some position that Gerald L. K. Smith held and some of the other American Facists.

It is just as wrong to consider that there is somehow a monolithic structure that stands here that is for peace, working for peace, that somehow this group may have manipulation or be manipulated by the Soviet Union or sympathize with the Soviet cause.

Let me say that I stand here proud as a cooriginator of the Kennedy-Hatfield nuclear freeze resolution. If you want to list credentials, I will be very happy to list credentials that might give me my badge of patriotism, my badge of Americanism. A lot of people talk about the Communist threat. I happened to have been in a situation, like a few others who have risked their lives, fighting on the battlefield against communism in the China civil war, in my case, back in 1945. I know what communism is. I am no less concerned about the Communist threat than anyone else on this floor, but by the same token, that does not mean I have to adopt either their tactics or their methods or that I have to somehow put myself in such a position that there cannot be reconciliation under any circumstances.

Mr. President, one of the strengths of this Nation is the pluralism within our society, pluralism in our religious society, in our political society, in our economic society. Let us not attempt to demand such conformity to prove a certain patriotic dogma or a certain Americanism that has to be subscribed to by crossing every "t" and dotting every "i."

Let us not do that. We see this happening on all sides of us today.

I happen to be an Evangelical Christian, and yet I cannot say that I can subscribe to everything that comes under the guise of a so-called conservative religious rite. I happen to be orthodox in my theology, conservative in my theology, fundamental in my theology, but that does not mean that there is not a pluralism within the conservative Christian theology. Of course not. I still believe that Madalyn Murray O'Hair has every constitutional right that Billy Graham has under our Constitution, and may it never not be so. That does not mean that I have to subscribe to everything that Madalyn Murray O'Hair believes in.

By the same token, I think we have to recognize that there is this pluralism. We have to protect the right to dissent. I believe deeply that when we raise this kind of an issue at this time on the floor, it does a disservice not only to the cause of pluralism, but I think it does a disservice to the institution of the Senate to make this kind of attack.

I want it to be clearly understood that it is not a partisan one because I stand in defense of a Betty Bumpers as much as I would stand in defense of JEREMIAH DENTON to say as he pleases and to think as he pleases and to not restrict it to any dogma or to any point of view. It must be real, it must be upheld for every point of view.

I am very sorry the Senator from Alabama saw fit to attack Mrs. Bumpers in this way and the cause that she represents. I am proud to stand shoulder to shoulder with her on that, and I hope the Senator will convey my view to her.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I am sorry to interrupt, but we have to get on with the business at hand, I have a unanimous-consent request that is ready, I believe, and has been cleared on both sides.

I would like to yield to the Senator from Kansas so he can put the request, or would the Senator prefer for me to do it?

Mr. EXON. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The majority leader has not made a request.

Mr. EXON. Reserving the right to object——

Mr BAKER. Mr. President, I will yield to the Senator from Nebraska if he wishes me to.

Mr. EXON. Point of order then.

Do I understand the debate is going to cease on the matter that we have been discussing?

Mr. BAKER. Mr. President, no, no, no. I have no desire to stop any Senator. All I am doing is asking if Senators will permit me to get a unanimous-consent request. If the Senator will forebear to do that, I will quietly yield the floor and let Members continue as they may wish.

Mr. EXON. I thank the Chair and I thank the majority leader.

The PRESIDING OFFICER. The majority leader.

UNANIMOUS-CONSENT AGREEMENT—H.R. 5407

Mr. BAKER. Now, Mr. President, I ask unanimous consent that when the Senate turns to the consideration of H.R. 5407, the tax bill reported by the Committee on Finance, that there be a 10-minute time limitation on that bill to be equally divided; that only three amendments be in order: A Symms amendment dealing with the Highway Trust Fund, a Dole amendment dealing with Alaska Natives, and a Bradley amendment dealing with the Virgin Islands, and that the time limitation be in the aggregate and overall, and the time to be equally divided and controlled in the usual form.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Reserving the right to object, and I do not intend to object, Mr. Leader, is it not the Senator's intent that all amendments shall be germane?

Mr. BAKER. Mr. President, yes, I will add that to the request. They were described in the request but, yes, I will include in the request that the amendments must be germane, no second-degree amendments will be in order unless they are germane to the first-degree amendment, and the time limitation is 10 minutes equally divided, and that is an aggregate total time limitation and not divided among the several amendments.

Mr. METZENBAUM. I thank the Senator.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, one more thing; that the committee amendment would be in order which was reported.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Is the request granted?

The PRESIDING OFFICER. The Chair hears none, and it is so ordered.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I will take only a few minutes of the Senate's time, but I feel compelled to rise, ironically enough, to defend Betty Bumpers and peace, two defenses I never thought any person in this Chamber on either side of the aisle would ever have to make. It is not ironic, however, that we hear both in the same term, however, because so much of Mrs. Bumpers' work has been synonymous with the idea of peace.

I rise to defend her in the same way and to echo the words so eloquently put by her husband, my distinguished colleague and friend from Arkansas. In listening to this debate I find hidden among those subversives who are connected with Betty Bumpers, according to some of the material put into our CONGRESSIONAL RECORD, my favorite person in the whole world, Marcelle Leahy. She, too, is one of those who sat around the kitchen table with Betty Bumpers and talked about what we might do to remove ourselves from this threat of nuclear holocaust.

Now, over 20 years of marriage, I have probably referred to Marcelle in many different ways, I hope always lovingly, but I certainly have never referred to her as subversive, nor have I ever heard any Vermonter refer to her as that, nor have I ever heard any Member of this Chamber before now refer to her or Betty Bumpers as that.

I agree very much with the distinguished Senator from Arkansas that when somebody who is going to speak of peace, when somebody is going to try to give voice to the inherent feeling of virtually every American for peace, those people are not going to be smeared with a label of being somehow Communist or subversive.

My most distinguished predecessor from the State of Vermont in this century was Ralph Flanders, the quintessential Vermont conservative Republican, who stood up on the floor of this body and said, "Enough is enough; the McCarthy era has gone to far," and he called a halt to it.

I think we should serve notice right here and now that to talk of peace in this country is not subversive, to talk of peace in this country is not a sellout, to ask that we avoid what would be the ultimate holocaust, nuclear war, does not show softness but, rather, shows rationality and sanity.

Mr. President, let me just conclude with one thing. The State of Vermont is probably the most cautious conservative Republican State in this Union, and they are conservative in the best sense of the word. They look at things carefully, very, very carefully. This spring, the action of the State of Vermont was heard around the world with 80 percent of our towns, in their town meetings, where everybody comes to discuss everything from what roads will be plowed to what the school tax will be, in 80 percent of those towns where they debated the issue of a nuclear freeze, Vermonters voted for it overwhelmingly.

That was this spring. What they were saying, those careful, cautious Vermonters, was: "Wake up! Wake up!" They were saying that to the President and to Congress. "Wake up and let us have peace."

Maybe it is a good thing that this issue has come up here tonight. Maybe it is good that the U.S. Senate talks about such an issue. In my 8 years here, I have heard more talk about pay raises and Senate gymnasiums than I have heard about nuclear war.

I am sorry though, that this is the issue that brought it forward. But I say to my friend from Arkansas, with a great deal of pride, I have been able to support him in this resolution. I stand with a great deal of pride knowing that my wife and Betty Bumpers have joined hands in this. I thank him for the service that he and his wife have given to the United States.

Several Senators addressed the Chair.

Mr. TSONGAS. Mr. President, will the Senator yield?

Mr. LEAHY. I yield the floor.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I had no intention of being involved in this debate; but in listening to it, I feel compelled to rise.

I happen to know Betty Bumpers very, very well. I consider her a great former first lady of the State of Arkansas. If there has been any aspersion today, directly or indirectly, on her character or her ability or her intentions as a great American, I stand with Betty Bumpers.

I say that as one who is not a signatory to the so-called nuclear freeze proposal.

I think it should be clearly stated on the floor of the U.S. Senate that none of us in this body, on either side of the aisle, nor any of our wives, nor, I suspect, any person in the United States today, so far as this Senator is concerned, has a clear mandate to say what is proper wording as to the desire of all of us—and that is to reduce the ever-increasing buildup of nuclear arms.

I think it is sad that we have degenerated—and I use the word "degenerated"—to a place where, on the floor of the U.S. Senate, the individual rightful activities of a distinguished Member of this body, the Senator from Arkansas, and his wife, Betty, have been questioned in any way. They are both great Americans. I know them well, I know that they would not be associated with any cause which they believed was in the fundamental interests of the United States of America.

Let me go a little beyond that, Mr. President, if I may. I think that entirely too much today is being said about a nuclear freeze, as if someone had the right to dictate what a nuclear freeze means.

I happened to have seen today a political commercial on television, a 30-second spot, made by an organization associated with this side of the aisle, which was clearly designed to attack, if not the patriotism, the fundamental beliefs of a member of the Republican Party who is running for office in this fall's election.

The thrust of the commercial was that because this particular Republican candidate voted against the nuclear freeze proposal when it was brought up on the floor of the House of Representatives, he is sympathetic toward nuclear war. The commercial had little children running around.

It reminded me of a similar commercial that I happened to view in Washington, D.C., during the time we Democrats were plotting the demise of the Republican candidate for President at that time, who is sitting in the Chamber right now. It shook me to my bootstraps at that time, that my party would become involved in a situation where they showed a little girl in a field, picking a daisy, and there was a mushroom cloud. It was aimed, of course, at a man I did not know well then, but a man whom I have come to

admire greatly, the senior Senator from Arizona.

Over the years, politics has degenerated to the place where it is amazing to me that any of us have any respect for the other. The commercial to which I just referred, which I saw today, I am pleased to say was automatically rejected as inappropriate and out of hand by several of my Democratic colleagues in that room, and it will not be used.

I noticed in the newspaper this morning that the Democratic candidate for the U.S. Senate from California is attacking his Republican opponent on the ground that he is somehow soft on the freeze issue and therefore should not be elected to serve the State of California in this body. It seems to me that the people of California should make their decision between the Democratic and Republican candidates in California on the basis of truth, on the basis of what the legitimate issues are, rather than on false issues.

While I am saying that, though, and blaming the Democrats for some of our shortcomings, I must say that I also saw an ad the other day that allegedly was sponsored by the Republican senatorial campaign committee, against the Senator from Tennessee (Mr. SASSER), which said in no uncertain terms that JIM SASSER, because he voted for foreign aid, was giving money away to Cuba.

It was a very telling ad, allegedly sponsored by the money collected on that side of the aisle, because it panned up to a man representing Fidel Castro. He pulled out of his pocket American currency, took a $100 bill, and lit it with a cigarette lighter, and proceeded to light his cigar; and he said, "Mucho gracias, Senator SASSER."

I bring this up only because I think we should not become guilty of not representing the rights of each of us in the ability to wage a campaign on legitimate issues.

I hope that some of the cooler heads on both sides of the aisle will try as best we can to elevate the political discussion in this country.

Elsewise, I would suggest we are going to see less and less quality people submitting themselves to the rigors of the campaign and political office.

I yield the floor.

SEVERAL SENATORS addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. TSONGAS. Mr. President, I was listening to this discussion on the squawkbox about what is Communist inspired and what is not. I was rather perplexed because I had just been outside and I saw no full Moon. So I went back out again to see whether the full Moon had come out to explain this phenomenon and to my surprise it is still not there.

So there must be something else afoot here.

The hint that Peace Links and Betty Bumpers and Communist inspired speak volumes for those who would say it. I do not think it is necessary to defend Betty Bumpers because her record is rather obvious.

It happens that my wife is also part of that organization. I know my wife better than anyone else in this body—I think you would agree with that—and the suggestion that she also may be Communist inspired is on its face ridiculous. There is no need to go into it.

But I think it is suggestive of the demons that rattle through the minds of some of our Members that something like this could be said.

Peace Links is a group that believes in peace. That may be a radical statement for some, but you are going to have to learn to live with it.

There are those in this country who would not mind a final blowout with the Soviets in the last, if you will, orgasm of righteousness. I do not happen to be one of them. But if you want to do it, do it. We will set aside a part of the United States for you and a part of the Soviet Union for your Soviet counterparts so you can blow each other to smithereens. You will feel better, and I will feel better.

I have responsibility for my children today because my wife flew off to California to visit her sister for a week and some of you saw my 1-year-old. My 1-year-old is not going to be responsible for what is decided here, but she will receive the consequences of that.

I suppose it is boilerplate wisdom on the part of some to believe if you say something is Communist inspired that everyone is going to run for cover. I do not see anyone running. I think they are going to be running all right—for a net.

We talk about Betty Bumpers who is simply trying to bring peace to the world. Why do we not talk about T. K. Jones who is in the Defense Department who believes that you can survive a nuclear war with a shovel and dirt?

Peace Links and Peace Day is not Communist inspired, but I know something that is. They are called missiles, SS-18's and others. They are not only Communist inspired they are Communist conceived, they are Communist built, they are Communist deployed, and someday they may be Communist fired.

It is time for rationality. It is interesting how history has dealt with those who have seen fit to raise the red herring of communism. All those vitreolic diatribes are not treated well by history and those that mouth those diatribes are treated even worse and that will be the fate of those who continue that very unfortunate tradition.

If this body were peopled with Senators who had the compassion, rationality, and good sense of Betty Bumpers, we would be a lot better off and we would truly serve the interests of this Nation.

I would hope the time would come eventually when this kind of slanderous statement would not be heard in this body. It diminishes, it belittles, it stains the U.S. Senate, and that has to be said.

I will yield back.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, will my colleague yield to me a couple minutes without losing his right to the floor?

Mr. EAST. Mr. President, I yield to my senior colleague without losing my right to the floor.

Mr. HELMS. Mr. President, if there is to be a referendum on Mrs. Bumpers, I want to be the first to vote in her favor.

But should we not get on with the business of the Senate? I must say, however, that I do hope the news media will take note of the fact that according to what I heard—and it was difficult to hear because of the noise in the Senate—but according to what I heard the distinguished Senator from Alabama clearly paid his respect to Mrs. Bumpers. In no way did he impugn her integrity or her dedication. He said he disagreed with the organization which is promoting the so-called peace rally.

The Senator from Alabama can speak for himself, but I hope that before too much is made of this, all of us will look at precisely what Senator DENTON really said—and not be misled by the unfortunate attempts to put words in his mouth.

Mr. President, I have heard criticism of Senator DENTON here tonight which astonished me because if there is an American hero in this Chamber, in this body, it has to be JEREMIAH DENTON of Alabama.

What other Senator has spent 7 years of his life suffering the tortures of the damned at the hands of brutal Communist tyrants? There is not a Senator in this body who can touch his dedication, his sacrifice, his patriotism.

I will never forget that morning when the first contingent of prisoners of the Communist Vietnamese returned home and came down the ramp of that airplane. I am afraid I may become a little emotional even trying to talk about it now. But who led the delegation and who spoke for them? It was JEREMIAH DENTON.

And I will never forget, and I do not think many Americans will forget, that the first thing he said was: "God bless America."

So no Senator, unless he has suffered the tortures of the damned at the hands of the cruel Communist tyrants, should attempt to lay one political or rhetorical finger on that man, particularly, if I understood him correctly—and I am sure I did—he carefully made clear that he was not criticizing Mrs. Bumpers.

So I say again, if we are going to have a referendum of Senate wives, let us start with Mrs. Bumpers and Mrs. Tsongas and give them our blessing. Then we can add Mrs. Thurmond, Mrs. Bradley, Mrs. Pryor, and Mrs. Helms, and all the rest. We will vote affirmation that they are fine, dedicated ladies. But the point is that a mountain is being made out of less than a molehill, and what JEREMIAH DENTON actually said is being totally misrepresented.

I hope the media will not fall for it, and I certainly hope Senators will not fall for it because being castigated at this moment by some of our friends on the other side of the aisle is a man who has done 10,000 times more for his country than all of the rest of us put together. Mr. President, I rest my case for JEREMIAH DENTON, and I have no apologies for defending him. He did not attack Mrs. Bumpers nor did he intend to do so. He did not imply it, and no reasonable Senator will infer that he did.

I thank my colleague from North Carolina for yielding to me.

Mr. EAST. Mr. President, I would like to comment very briefly on this matter. First, I agree with my colleague from North Carolina that a careful reading of what Senator DENTON said could in no way be interpreted as a personal affront to Mrs. Bumpers. Senator BUMPERS is a man who is held in great respect in this Chamber and his wife likewise, and knowing Senator DENTON as I do, as a great friend and a great colleague, there is not any way that one can tease out of all of this any criticism of the distinguished Senator from Arkansas or his wife or any other Member of this Chamber or their wives or members of their families. I think it is imperative that that be made as clear as one can do it through the use of the English language that is employed here in this Chamber.

I wanted to make that point as clear and as categorical as I can, that that is not the intent or the purpose of Senator DENTON, and I do not think the facts will bear it out in any reasonable way, shape, or form.

If I might put this in perspective, Senator DENTON and I on the Judiciary Committee when this resolution was presented last week asked that a hold be placed upon it not because we did not think the distinguished Senator from Arkansas raised a valid point, but we felt that it deserved a very extensive deliberation and study because it does deal in a very substantive way with the whole question of nuclear preparedness and the nuclear freeze, a very substantive issue. So we put a hold upon it because we wanted this to be conducted in a more deliberative way.

Now it ultimately turned up on the continuing resolution which we felt was not a good vehicle for it because as we all know we are all being pressured to rush things through. That is not to say there is not a legitimate point of view for the freeze. There are, of course, those of us—and I include myself in that category—who are troubled with this approach. But that is not the issue. We were concerned about the time frame and the format. I would like to put that into perspective.

That was the origin of the problem, that we had put a hold on it and then it turned up as an amendment on the continuing resolution, and we think it raises too important a substantive question on the freeze issue to be resolved at this time by the Senate.

So again to get back to this question of whether there is any personal affront involved in all of this, I say again and a thousand times no, there is not.

I know that was not the intent and the purpose of the Senator, and with all due respect to those who may see it another way I know him too well and that was not the intent, and the record must show that. I think we must lay that point to rest and focus upon the substantive question of the freeze, whether it is a good idea but, more importantly at the moment, whether this is the proper forum and vehicle for discussing it.

I hope in some small way then, Mr. President—and I shall cease and desist—that that would help put this matter into perspective so that we can get the decibel level of the debate down and focus on the substance of the thing, the proper forum for it, and then move on to the very pressing business of disposing of the continuing resolution.

I thank the Chair for the opportunity to clarify the point.

SEVERAL SENATORS addressed the Chair.

Mr. HART. Mr. President, I thank the Chair.

It is indeed unfortunate that the remarks of the Senator from Alabama have become directed toward personalities. The issue before the Senate raised by the remarks of the Senator from Alabama is not related to any individuals, be they members of the families of Senators or be they ordinary Americans. Likewise the issue is not the military record of the Senator from Alabama.

I think the remarks that have been made here with regard to defending the patriotism and loyalty of various Senate wives misses the point. The point is: Can any American, regardless of his or her military service, impugn the loyalty and patriotism of any other American using the fundamental practices of guilt by association? That is the issue before the Senate.

Those who have stood to defend the character of Senator BUMPER'S wife or any other wife have done so properly, but that is not the issue. Those who have stood to remind us of the military record of the Senator from Alabama have done so wisely, but that is not the issue. It is certainly not the issue that anything the Senator from Alabama has ever done gives him or anyone else the right to question the patriotism, the loyalty, or the motives of any other American.

A great American a few years ago said, "We have become a nation of nuclear giants and moral pygmies." That was not some KGB-inspired peacenik; that was General of the Army Omar Bradley.

The search for disarmament began with the great American general and President Dwight D. Eisenhower. That search has been the official policy of this country under six Presidents of both political parties for over 20 years.

The Senator from Alabama wants to try to instruct the Senate about what the policy of the United States is. I say the policy of the United States for over 20 years has been to seek bilateral disarmament. That is our policy.

The Senator seeks to link by scurrilous, conspiratorial, ideological literature people who seek to promote that policy with the Communist threat and the Communist menace. He seeks to suggest that anyone involved in this effort is taking his or her orders from Moscow.

I wonder how many Senators would be on their feet tonight if that charge had been leveled against some average American. I think that is the issue before the Senate. That is what I hope we will keep our eye on tonight.

What if the founders of this organization had been a few unknown people in Denver, Colo., or Little Rock, Ark., or Montgomery, Ala., or somewhere else? The Senator would probably have gotten away with this. We would have read the RECORD, it would have been pointed out, there would have been some columns written, and that would have been it.

I hope we are not on our feet tonight defending the wives of Senators. I hope we are on our feet tonight defending the rights of Americans because that is what is being threatened.

Betty Bumpers does not need me or even her husband to defend her patriotism. I hope that the Senator from Arkansas, the Senator from Oregon, the Senator from Massachsetts, and all of us would be on our feet defending the right of that individual if her name were Betty Smith.

We are missing the point. The issue is not the wives of Senators or the military record of the Senator from Alabama. The issue is the right of American people to state their case without some Government official trying to suggest their link to the Communists.

The Senator from Arkansas rightly said that we were subject to a bitter experience in this country over 30 years ago. It was a bitter experience, and I think because of that experience many of us are on our feet tonight. Unfortunately, 30 years ago it took people of goodwill over 2 years to build up their courage to speak out. I can say to the Senator from Alabama tonight that I am on my feet because I do not intend to wait 2 years for this kind of thing to build up, guilt by association, implications of disloyalty and unpatriotism on the part of any American.

I hope if the Senator from Alabama or anyone else seeks to do what the Senator did tonight for any American I will have the courage to stand up and oppose it whether it is a Senator's wife or not.

Now, Mr. President, I intend consciously and on purpose to breach the protocol of the U.S. Senate and address the Senator from Alabama directly. I say to the Senator from Alabama, shame on you.

Mr. BRADLEY. Mr. President, I will be brief in these comments about communism because I have an amendment to build capitalism in the Caribbean.

I do think that the Senator from Alabama's comments cannot go unanswered and, indeed, they have been answered eloquently by a broad cross section of this body tonight.

The Senator seems to be saying several things: he says you cannot call for peace because to do so is in some way subversive, although the Senator himself called for peace. He seems to be saying that strength means only to build a massive military machine that has a hair trigger which could be pulled as a result of human miscalculation as well as human intention and incinerate us all.

But maybe the Senator is not saying that, maybe he is saying that only some people can call for peace and be legitimately heard.

It is beyond me how anyone can see a bunch of housewives, citizens, Senators, and small children in this country who call for a day to recognize the desires all of us have for peace, how they somehow or other are manipulated and controlled by something external to this country, by a Soviet-inspired conspiracy.

I think the Senator underestimates the strength of this Nation. I think the Senator underestimates the strength of our citizens and their desire for an open society. He underestimates, I think, because the Senator misunderstands what the strength of this Nation is all about.

That strength in my view is that we are not about fear, we are about freedom—the freedom to express your views openly, the freedom to become as good as you can be given your ability, and, yes, the freedom to be left alone. That strength does not proceed from a fear that the next knock on your door means they are coming for you, but rather it flows from a belief that our institutions provide an opportunity for all of us to engage in debate and discussion, and at the same time preserve that which we all hold most dear—freedom.

Mr. President, I would hope that the Senator, when he gets home tonight, might look in the mirror. I do not question the Senator's good intention, I only express my belief that he is confused.

I yield the floor.

Mr. EAST addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. EAST. Mr. President, I would like to once again underscore what I have said earlier—and I have been privy to this from the very beginning—that in no way, shape, or form can you tease out of this series of events that Senator JEREMIAH DENTON, of Alabama, has attacked the character or the loyalty of any U.S. Senator or any relative thereof. And I am going to stand categorically on that point. And I made it and I will not ad nauseam repeat it.

I am going to add one addendum here based upon what Senator HART, whom I greatly admire, and the Senator from New Jersey have said. They have now managed to do the impossible and turn this into a personal attack upon the distinguished Senator from Alabama. So we go from the ridiculous to the absurd.

When Senator HART, the distinguished Senator from Colorado says, "I am going to break the protocol of the Senate and say, 'Shame on you,'" I am appalled. I do not know of any man in this Chamber that I revere more than JEREMIAH DENTON, who spent 7 years in a Communist prison camp and held firm and came back with body, mind, and spirit and now serves in this body. And for any one, let alone a colleague, to say shame on him, I find appalling. And I, for one Senator, will totally disassociate myself from it and I would think every Member of this Chamber would feel likewise.

And when the distinguished Senator from New Jersey says, he does not understand what this country is about, if he does not understand it, I do not know who does, because of the sacrifice that he made we might be here practicing democracy.

Now I had asked earlier that we turn down the decibel level and I agree I have turned it up for one reason. They have now managed to turn this brouhaha, this tempest in a teapot, into a personal attack on a great Amerian.

Mr. President, I want the RECORD to show, the CONGRESSIONAL RECORD, that one Senator vehemently protested that. I think the RECORD of this body ought to show that this is a great man and a good man. I wish I had his record. To say shame on him and to say he does not understand what this country stands for, how could anyone possibly say that in terms of the sacrifice that he made and people like him? I do not understand it. I simply could not understand how anyone could get up and utter something of that kind.

So I have gotten back in this debate, because when the wheel turned and all of a sudden it was a personal attack upon this man, it was a new game as far as I am concerned. I would go anywhere in this country and anywhere in the world to defend the contribution and the integrity of this man. I do not know of a man in this Chamber I admire more than this man because of the sacrifice he has made for you and me and for this country as a whole.

To take a great American hero and in a matter of 10 or 15 minutes to try to attack him personally and destroy him, why, you end up with some form of horrible guilt by association, the very thing they were trying to head off. And I agree, this is a great man. Let the RECORD show it.

Mr. President, I thank you for the opportunity to speak and I yield.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina has the floor. Did he yield the floor?

Mr. EAST. Yes; I have completed my comments.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I rise to support the Senators from Arkansas, support the cause for which they are speaking and working. Let me recall the remark of Clemenceau when he said, "War is too important to leave to generals." Now, when we get to nuclear war, it can be said it is too important to leave to governments.

What is happening here is a movement of people taking over because nuclear war is too important to leave to these governments; 700,000 people met in Central Park, New York to show their belief in peace. And that was not Communist inspired, although there are those in the highest reaches of Government who believe that it is. I know that the buses that went down from my State were not Communist inspired and I doubt that any Rhode Islanders there had anybody under Communist Party discipline.

I speak as one who has lived under communism and was arrested three times under the Communists and also

as one who served in our Government in the McCarthy years. I hate to see the shades of McCarthyism that are creeping into our lives at this time.

I think all of us should be proud to be associated with the causes for which the wife of the Senator from Arkansas works, and I know that I am proud to associate myself with the values and goals in which she believes.

Mr. GOLDWATER addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, I rise to implore my colleagues to let this thing calm down. I understand it is all about an article appearing in a magazine. I have not read that magazine. I think, if my information is correct, I know the writer. And before I got excited about it, I would be sure that that writer is the one I know because he does not have a great background in the area of truth.

Now, I think that everything that can be said about this has been said. The Senator from Alabama, I think has his right to become disturbed about an article he has read in a magazine.

I think the others have the right to defend the Senator from Arkansas, whom I do not know well. But I think we have made enough out of this right now. I speak honestly because I would be just as concerned myself if I were on one side of the charges or the other.

Just a few weeks ago this body passed, at my request, a patriotism week written by a young girl in Stocksdale, Ariz., and I have not been called a Communist yet. I might be. But it has not gotten around. [Laughter.]

I do not think we should go on any more because we are impugning the patriotism of one of the greatest Americans we have ever produced, and at the same time we are questioning the patriotism of a lovely woman and Members of this body.

I wonder if we cannot cool down. It is late at night. We have had a long, long hard session, a rather senseless one but it has been a hard one. [Laughter.]

I just wonder if we could not sort of cool it off. I would like to read the article. After I have read the article—and if it was written by the fellow I think it was—I may go home and kick the hell out of him. [Laughter.]

I do not know yet.

We have work to do, I think 120-odd pieces of legislation. The House is going to quit and go home as soon as they pass the continuing resolution, and they are about to do it.

I think this argument has been productive. It indicates that none of us want a repetition of any period of doubting the loyalty or the patriotism of any other Member. I hope I am not considered out of order. With all due respect to the admiral, whom I understand, I hope we can get sensible about this and cool it.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. GOLDWATER. You got it.

Mr. BAKER. Mr. President, as I have so many times in the past, I offer my thanks to the Senator from Arizona for his voice of reason and calm and stability that he brings so often, brings so respectfully, to the proceedings of the Senate. I am grateful for it.

I understand this issue is one of great feeling and that Members feel very keenly about it. But as the Senator from Arizona pointed out, we have an enormous, a prodigious, amount of work we have to do. What will happen if we spend much more time on this is that the House will not take up any of this stuff we are about to pass.

I have filed a stack there that is a half-foot thick, items which have been cleared for action on both sides. Virtually every Member of the Senate has something in there that they would like done today. They are cleared. But the House is going to be gone if we do not get on with the business at hand.

Perhaps that is an inadequate reason for suggesting that debate has perhaps proceeded far enough, but I am emboldened to make that suggestion at this time.

Mr. DENTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. DENTON. Mr. President, I have asked my friends not to make statements. I have asked those who did make statements to make their statements as brief as possible. It is not my intent to take up any substantial time of the Senate at this point. I intend to conclude my remarks about this subject.

I would like to start with that which I agree with. I agree there is no issue about Mrs. Bumpers' or Senator BUMPERS' loyalty. I leaned over backward to say that I had no question, not only about the sincerity but the well meaningness of the two of them.

I make it clear that I was disagreeing on the issue of how we achieve peace. I respectfully expect my colleagues to agree that I have that right.

I only rose in the first place because I had filed an objection to the Bumpers amendment before it reached the floor. Due to an error which the majority leader acknowledged Wednesday night, it was passed "by unanimous consent."

I must correct a couple of matters.

This is the first time in my life I have been called a bully. I have been called a lot of things. Without reference to my military career, and I did not previously make any such referance—I was called a lot of things over there. But even they did not call me a bully.

I certainly meant no attack on anyone's value system. I simply was questioning the value of unilateral disarmament or nuclear freeze as a means to peace.

My own concern runs not toward the fact that people are not sufficiently aware of the horrors of war. My wife, Jane, in the gallery had to deal with them. So did many wives of the people in this body and many of the Members themselves.

I feel no distinction regarding my military career. I regret that I am called a hero because I know I am not. If I am an average boy from Alabama, I exceed my own expectations.

But I am concerned that there is a mood of fear in the country, so I agree with that.

One of my fears is that we have a half-million youth who have not agreed to register for the draft in spite of punitive measures which our Government has tried to undertake to persuade them to do so.

I am very concerned about the prospects of nuclear war and said, contrary to that which the Senator from Colorado seemed not to hear, that from the very beginning our policy has been for disarmament, a central preoccupation of the country. I am curious as to whether he even heard my remarks.

I mentioned that the search for nuclear disarmament, truly verifiable, has been an important part of our foreign policy since the nuclear bomb came upon the scene.

True, the worst results of McCarthyism are that some are left with the belief that there is a Communist under every rock. I do not agree with that. Nor do I agree with the second result, the belief that there is no need to worry about the Communists or to expect that they do not have very persuasive ways of conveying premises which are contrary to our interests. I had to deal with that, and I say this with true humility, for 7 years and 7 months as a relatively senior officer over there. I can recognize the way they persuade.

I am afraid that all of us are susceptible to a degree, and I have been.

I have not tried to establish that George Ball has a bad character. I think he was a wonderful public servant.

I would invite attention to the fact that this body and the House may have suffered some illusions about the beneficence of the North Vietnam Government, that they may have underestimated the bad effects of losing that cause. I believe that our voters have tended to remember that they did, and they recognize that the events which have not been publicized in the media in Southeast Asia, Afghanistan, and elsewhere, which might be connected with a misperception on the part of this or the other body has been

a harmful omission, and I hope they continue to do so.

But I say again, I love every Member of this body. I am particularly attached, and I hope nobody puts me in the San Francisco gay chorus for saying this, to the Senator from Arkansas. I regard him as one of the finest men I have ever met. I am sure his wife, if I knew her better, would be known with the same respect for her as a woman.

If anyone heard me say anything else tonight, I will not look in the mirror, and I will permit myself to be beaten by any Member in this Chamber. I did not say anything of the kind. I can look in the mirror. That is my only refutory remark.

I hope this has not been a waste of time. I believe we have exposed beliefs, some of them objective, perhaps some of mine have been not objective, but all of us have exposed beliefs which I think are essential to the chances for survival of this country and the continued march of civilization because they deai with not "do we have enough bombs," and I say this to my tennis friend, not "how many times can we blow up the world."

The question on nuclear weapons is, "can we stay alive?" "Can we deter the Soviet Union with what they can expect from us in a response, which is not that great?" We cannot destroy the world four or five times after they have hit us. "Can we deter them from hitting us?" Those are the questions.

How can we do it without inspiring an anxiety within ourselves which psychologically commits us to do something crazy?

I am against all of those things, as you are. We are all for the same quest for peace, and I hope we can remain in that quest with evenhandedness and calm.

I hope that I have myself not departed from that tonight.

With that, Mr. Majority Leader, I yield the floor.

TAXES—PERIODIC PAYMENT SETTLEMENT ACT OF 1982

Mr. BAKER. Mr. President, the next item on this long agenda, consisting of more than 100 items, is H.R. 5470, which I believe has been cleared on both sides.

I ask that the Chair now lay before the Senate H.R. 5470.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 5470), an act to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages recieved on account of personal injury or sickness.

The Senate proceeded to consider the bill which had been reported from the Committee on Finance with an amendment to strike out all after the enacting clause, and insert the following:

SECTION 1. AMENDMENTS OF 1954 CODE.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

TITLE I—INCOME TAX PROVISIONS

SEC. 101. TREATMENT OF RECIPIENT OF SETTLEMENT PERIODIC PAYMENTS.

(a) TREATMENT OF RECIPIENT.—Paragraph (2) of section 104(a) (relating to compensation for injuries or sickness) is amended by striking out "Whether by suit or agreement" and inserting in lieu thereof "whether by suit or agreement and whether as lump sums or as periodic payments".

(b) TREATMENT OF ASSIGNEE-PAYOR.—

(1) IN GENERAL.—Part III of subchapter B of chapter 1 (relating to items specifically excluded from gross income) is amended by redesignating section 130 as section 131 and by inserting after section 129 the following new section:

"SEC. 130. CERTAIN PERSONAL INJURY LIABILITY ASSIGNMENTS.

"(a) IN GENERAL.—Any amount received for agreeing to a qualified assignment shall not be included in gross income to the extent that such amount does not exceed the aggregate cost of any qualified funding assets.

"(b) TREATMENT OF QUALIFIED FUNDING ASSET.—In the case of any qualified funding asset—

"(1) the basis of such asset shall be reduced by the amount excluded from gross income under subsection (a) by reason of the purchase of such asset, and

"(2) any gain recognized on a disposition of such asset shall be treated as ordinary income.

"(c) QUALIFIED ASSIGNMENT.—For purposes of this section, the term 'qualified assignment' means any assignment of a liability to make periodic payments as damages (whether by suit or agreement) on account of personal injury of sickness—

"(1) if the assignee assumes such liability from a person who is a party to the suit or agreement, and

"(2) if—

"(A) such periodic payments are fixed and determinable as to amount and time of payment,

"(B) such periodic payments cannot be accelerated, deferred, increased, or decreased by the recipient of such payments,

"(C) the assignee does not provide to the recipient of such payments rights against the assignee which are greater than those of a general creditor.

"(D) the assignee's obligation on account of the personal injuries or sickness is no greater than the obligation of the person who assigned the liability, and

"(E) such periodic payments are excludable from the gross income of the recipient under section 104(a)(2).

"(d) QUALIFIED FUNDING ASSET.—For purposes of this section, the term 'qualified funding asset' means any annuity contract issued by a life insurance company licensed under the laws of any State to issue such contract, or obligation of the United States, if—

"(1) such annuity contract or obligation is used by the assignee to fund periodic payments under any qualified assignment,

"(2) the periods of the payments under the annuity contract or obligation are reasonably related to the periodic payments under the qualified assignment and the amount of any such payment under the contract or obligation does not exceed the periodic payment to which it relates,

"(3) such annuity contract or obligation is designated by the taxpayer (in such manner as the Secretary shall be regulations prescribe) as being taken into account under this section with respect to such qualified assignment, and

"(4) such annuity contract or obligation is purchased by the taxpayer not more than 60 days before the date of the qualified assignment and not later than 60 days after the date of such assignment."

(2) CONFORMING AMENDMENT.—The table of sections for part III of subchapter B of chapter 1 is amended by striking out the item relating to section 130 and inserting in lieu thereof the following new items:

"Sec. 130. Certain personal injury liability assignments.

"Sec. 131. Cross references to other Acts."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after December 31, 1982.

SEC. 102. EXCLUSION FROM GROSS INCOME OF DIFFICULTY OF CARE PAYMENTS FOR CARE OF HANDICAPPED FOSTER CHILD.

(a) IN GENERAL.—Part III of subchapter B of chapter 1 (relating to items specifically excluded from gross income), as amended by section 101(b), is amended by redesignating section 131 as section 132 and by inserting after section 130 the following new section:

"SEC. 131. DIFFICULTY OF CARE PAYMENTS FOR CARE OF HANDICAPPED FOSTER CHILD.

"(a) GENERAL RULE.—Gross income shall not include amounts received by the taxpayer during the taxable year as difficulty of care payments for the taxpayer's care of an individual for the period that such individual is a handicapped foster child.

"(b) LIMITATION BASED ON NUMBER OF CHILDREN.—A taxpayer may not take into account payments with respect to more than 10 handicapped foster children for any period to which such payments relate.

"(c) DEFINITIONS.—For purposes of this section—

"(1) DIFFICULTY OF CARE PAYMENTS.—The term 'difficulty of care payments' means payments to individuals which are—

"(A) in addition to basic payments for the care of a foster child, and

"(B) designated by the payor as compensation for providing the additional care which is—

"(i) required by a handicapped foster child by reason of such child's handicap, and

"(ii) provided in the home of the individual receiving the payments.

"(2) HANDICAPPED FOSTER CHILD.—The term 'handicapped foster child' means an individual who—

"(A) is living in a foster family home in which such individual was placed by a child-placing agency which is—

"(i) an organization described in section 501(c)(3) and exempt from tax under section 501(a), or

"(ii) operated by a State or local government or political subdivision thereof,

"(B) has not attained age 19, and

"(C) has a physical, mental, or emotional handicap.".

(b) CLERICAL AMENDMENT.—The table of sections for part III of subchapter B of chapter 1 of such Code is amended by striking out the item relating to section 131 and

by inserting in lieu thereof the following items:

"Sec. 131. Difficulty of care payments for care of handicapped foster child.

"Sec. 132. Cross references to other Acts.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

TITLE II—TAX STATUS OF INDIAN TRIBAL GOVERNMENTS

SECTION 201. SHORT TITLE.

This title may be cited as the "Indian Tribal Governmental Tax Status Act of 1982".

SEC. 202. INDIAN TRIBAL GOVERNMENTS TREATED AS STATES FOR CERTAIN PURPOSES.

(a) GENERAL RULE.—Chapter 80 (relating to general rules) is amended by adding at the end thereof the following new subchapter:

"Subchapter C—Provisions Affecting More Than One Subtitle

"SEC. 7871. INDIAN TRIBAL GOVERNMENTS TREATED AS STATES FOR CERTAIN PURPOSES.

"(a) GENERAL RULE.—An Indian tribal government shall be treated as a State—

"(1) for purposes of determining whether and in what amount any contribution or transfer to or for the use of such government (or a political subdivision thereof) is deductible under—

"(A) section 170 (relating to income tax deduction for charitable, etc., contributions and gifts),

"(B) sections 2055 and 2106(a)(2) (relating to estate tax deduction for transfers of public, charitable, and religious uses), or

"(C) section 2522 (relating to gift tax deduction for charitable and similar gifts);

"(2) for purposes of any exemption from, credit or refund of, or payment with respect to, an excise tax imposed by—

"(A) chapter 31 (relating to tax on special fuels),

"(B) chapter 32 (relating to manufacturers excise taxes),

"(C) subchapter B of chapter 33 (relating to communications excise tax), or

"(D) subchapter D of chapter 36 (relating to tax on use of certain highway vehicles);

"(3) for purposes of section 164 (relating to deduction for taxes);

"(4) subject to section 103(m), for purposes of section 103 (relating to interest on certain governmental obligations);

"(5) for purposes of section 511(a)(2)(B) (relating to the taxation of colleges and universities which are agencies or instrumentalities of governments or their political subdivisions);

"(6) for purposes of—

"(A) section 37(e)(9)(A) (relating to certain public retirement systems),

"(B) section 41(c)(4) (defining State for purposes of credit for contribution to candidates for public offices),

"(C) section 117(b)(2)(A) (relating to scholarships and fellowship grants), and

"(D) section 403(b)(1)(A)(ii) (relating to the taxation of contributions of certain employers for employee annuities); and

"(7) purposes of—

"(A) chapter 41 (relating to tax on excess expenditures to influence legislation), and

"(B) subchapter A of chapter 42 (relating to private foundations).

"(b) TREATMENT OF SUBDIVISIONS OF INDIAN TRIBAL GOVERNMENTS AS POLITICAL SUBDIVISIONS.—For the purposes specified in subsection (a), a subdivision of an Indian tribal government shall be treated as a political subdivision of a State if (and only if) the Secretary determines (after consultation with the Secretary of the Interior) that such subdivision has been delegated the right to exercise one or more of the substantial governmental functions of the Indian tribal government.".

(b) CONFORMING AMENDMENTS RELATING TO CROSS REFERENCES.—

(1) Subsection (d) of section 41 is amended to read as follows:

"(d) CROSS REFERENCES.—

"(1) For disallowance of credits to estates and trusts, see section 642(a)(2).

"(2) For treatment of Indian tribal governments as States (and the political subdivisions of Indian tribal governments as political subdivisions of States), see section 7871.".

(2) Section 164(f) is amended by adding at the end thereof the following new paragraph:

"(3) For treatment of taxes imposed by Indian tribal governments (or their subdivisions), see section 7871.".

(3) Section 170(k) is amended by adding at the end thereof the following new paragraph:

"(8) For charitable contributions to or for the end use of Indian tribal governments (or their subdivisions), see section 7871.".

(4) Section 2055(f) is amended by adding at the end thereof the following new paragraph:

"(11) For treatement of gifts and bequests to or for the use of Indian tribal governments (or their subdivisions), see section 7871.".

(5) Subparagraph (F) of section 2106(a)(2) is amended to read as follows:

"(F) CROSS REFERENCES.—

"(i) For option as to time for valuation for purposes of deduction under this section, see section 2032.

"(ii) For exemption of certain bequests for the benefit of the United States and for rules of construction for certain bequests, see section 2055(f).

"(iii) For treatment of gifts and bequests to or for the use of Indian tribal governments (or their subdivisions), see section 7871.

(6) Subsection (d) of section 2522 is amended to read as follows:

"(d) CROSS REFERENCES.—

"(1) For exemption of certain gifts to or for the benefit of the United States and for rules of construction with respect to certain bequests, see section 2055(f).

"(2) For Treatment of gifts to or for the use of Indian tribal governments (or their subdivisions), see section 7871.".

(7) Section 4227 is amended to read as follows:

"SEC. 4227. CROSS REFERENCES.

"(1) For exemption for a sale to an Indian tribal government (or its subdivision) for the exclusive use of an Indian tribal government (or its subdivision), see section 7871.

"(2) For credit for taxes on tires and tubes, see section 6416(c).".

(8) The table of sections for subchapter G of chapter 32 is amended by striking out the item relating to section 4227 and inserting in lieu thereof the following new item:

"Sec. 4227. Cross references.".

(9) Section 4484 is amended to read as follows:

"SEC. 4484. CROSS REFERENCES.

"(1) For penalties and administrative provisions applicable to this subchapter, see subtitle F.

"(2) For exemption for uses by Indian tribal governments (or their subdivisions), see section 7871.".

(10) The table of sections for subchapter D of chapter 36 is amended by striking out the item relating to section 4484 and inserting in lieu thereof the following new item:

"Sec. 4484. Cross references.".

(11) Sections 6420(h) and 6421(j) are each amended by adding at the end thereof the following new paragraph:

"(4) For treatment of an Indian tribal government as a State (and a subdivision of an Indian tribal government as a political subdivision of a State), see section 7871.".

(12) Sections 6424(g) and 6427(k) are each amended by adding at the end thereof the following new paragraph:

"(3) For treatment of an Indian tribal government as a State (and a subdivision of an Indian tribal government as a political subdivision of a State), see section 7871.".

(c) CLERICAL AMENDMENTS.—The table of subchapters for chapter 80 is amended by adding at the end thereof the following new item:

"Subchapter C. Provisions affecting more than one subtitle."

SEC. 203. INTEREST ON GOVERNMENTAL OBLIGATIONS.

(a) IN GENERAL.—Section 103 (relating to interest on certain governmental obligations) is amended by redesignating subsection (m) as subsection (n) and by inserting after subsection (l) the following new subsection:

"(m) SPECIAL RULES FOR INDIAN TRIBAL GOVERNMENTS.—

"(1) REQUIREMENTS WITH RESPECT TO INDUSTRIAL DEVELOPMENT BONDS.—An industrial development bond issued by an Indian tribal government (or political subdivision thereof) may be treated as an obligation described in subsection (a)(1) only if—

"(A) the principal activities of the trade or business are to be conducted on the reservation, and

"(B) substantially all of the activities of the trade or business to be conducted off the reservation are purchasing, marketing, or similar activities directly related to the activities described in subparagraph (A).

"(2) APPLICATION OF CERTAIN INDUSTRIAL DEVELOPMENT BOND PROVISIONS.—For purposes of applying subsection (b)(6) and subparagraphs (E) and (J) of subsection (b)(4)—

"(A) if county lines (or lines of incorporated municipalities) established by the State do not exist on the reservation, the Secretary, after consultation with the Secretary of the Interior, may prescribe such maximum and minimum sizes for the geographical areas on the reservation which may be treated as counties (or incorporated municipalities) as may be necessary to ensure that the benefits of subsection (b)(6) for the geographical areas on the reservation shall be approximately equal to the benefits of such provisions for the counties (or incorporated municipalities) in the same general area of the United States as the reservation, and

"(B) if part of a county (or incorporated municipality) is within a reservation and part is not within a reservation, each such part shall be treated as a separate county (or incorporated municipality).

"(3) REQUIREMENTS FOR OBLIGATIONS WHICH ARE NOT INDUSTRIAL DEVELOPMENT

BONDS.—Subsection (a) shall apply to any obligation issued by an Indian tribal government (or subdivision thereof) which is not an industrial development bond only if such obligation is part of an issue substantially all of the proceeds of which are to be used in the exercise of any essential governmental function or for a public utility substantially all the services of which are provided on the reservation.

"(4) RESERVATION DEFINED.—For purposes of this subsection, the term 'reservation' means—

"(A) the area reserved by treaty, Federal statute, or Executive order for the Indian tribe, the government of which is issuing the obligation,

"(B) areas designated by the Secretary of the Interior as a reservation for the Indian tribe the government of which is issuing the obligation, or

"(C) land which—

"(i) is contiguous to a reservation within the meaning of subparagraph (A) or (B),

"(ii) has been acquired in trust for the Indian tribe through consolidation, land exchange or purchase, or

"'(iii) is proclaimed by the Secretary of the Interior to be part of such reservation.".

(b) CLERICAL AMENDMENT.—Subsection (n) of section 103 (as redesignated by subsection (a)) is amended to read as follows:

"(n) CROSS REFERENCES.—

"For provisions relating to the taxable status of—

"(1) Certain obligations issued by Indian tribal governments (or their subdivisions), see section 7871.

"(2) Exempt interest dividends of regulated investment companies, see section 852(b)(5)(B).

"(3) Puerto Rican bonds, see section 3 of the Act of March 2, 1917, as amended (48 U.S.C. 745).

"(4) Virgin Islands insular and municipal bonds, see section 1 of the Act of October 27, 1919 (48 U.S.C. 1403).

"(5) Certain obligations issued under title I of the Housing Act of 1949, see section 102(g) of title I of such Act (42 U.S.C. 1452(g)).".

SEC. 204. DEFINITION OF INDIAN TRIBAL GOVERNMENT.

Subsection (a) of section 7701 (relating to definitions) is amended by adding at the end thereof the following new paragraph:

"(40) INDIAN TRIBAL GOVERNMENT.—The term 'Indian tribal government' means the governing body of any tribe, band, community, village, or group of Indians which is determined by the Secretary, after consultation with the Secretary of the Interior, to exercise substantial governmental functions and in Alaska shall include only the Metlakatia Indian Community.".

SEC. 205. EFFECTIVE DATES.

The amendments made by this title—

(1) insofar as they relate to chapter 1 of the Internal Revenue Code of 1954 (other than section 103 thereof), shall apply to taxable years beginning after December 31, 1982,

(2) insofar as they relate to section 103 of such Code, shall apply to obligations issued after the date of the enactment of this Act,

(3) insofar as they relate to chapter 11 of such Code, shall apply to estates of decedents dying after December 31, 1982,

(4) insofar as they relate to chapter 12 of such Code, shall apply to gifts made after December 31, 1982, and

(5) insofar as they relate to taxes imposed by subtitle D of such Code, shall take effect January 1, 1983.

TITLE III—PENSIONS

SEC. 301. WAIVER OF PREEMPTION IN CASE OF HAWAIIAN HEALTH CARE PLAN.

(a) IN GENERAL.—Section 514(b) of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new paragraph:

"(5) (A) Except as provided in subparagraph (B), subsection (a) shall not apply to the Hawaii Prepaid Health Care Law (Haw. Rev. Stat. 393-1 through 51), as in effect on January 1, 1976.

"(B) Nothing in subparagraph (A) shall be construed to exempt from subsection (a) any State tax law relating to employee benefit plans.

"(C) Notwithstanding subparagraph (A), parts 1, 4, and 5 of this subtitle shall supersede the State law described in such subparagraph, but the Secretary may enter into cooperative arrangements under this paragraph and section 506 with officials of Hawaii to assist them in effectuating the policies of provisions of such laws which are superseded by such parts.".

(b) STUDY OF APPLICATION TO OTHER STATES.—The Secretary of Labor shall conduct a study on the feasibility of extending the exemption from section 514(a) of the Employee Retirement Income Security Act of 1974 to include other State laws which establish health care plans and report to the Congress on such study within 2 years after the date of the enactment of this Act.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the bill.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. There will be 10 minutes of debate for the bill and all amendments.

Mr. DOLE. Mr. President, this will take just a few moments. We have cleared this with all the interested parties. I would like to yield first to the distinguished Senator from New Jersey to offer an amendment which has been agreed to. It has been acted upon by the Senate Finance Committee and will be offered as an amendment to a series of amendments in H.R. 5470.

UP AMENDMENT 1388

(Purpose: To amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income)

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Jersey (Mr. BRADLEY) proposes an unprinted amendment numbered 1388.

At an appropriate place insert the following:

SECTION . REDUCTION IN INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME.

(a) In General.—Subpart D of part III of subchapter N of chapter 1 of the Internal Revenue Code of 1954 (relating to possessions) is amended by inserting after section 934 the following new section:

"SEC. 934A. REDUCTION IN INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME.

"(a) General Rule.—For purposes of determining the tax liability incurred by citizens and resident alien individuals of the United States, and corporations organized in the United States, to the Virgin Islands pursuant to this title with respect to amounts received from sources within the Virgin Islands—

"(1) the rate of the taxes imposed by sections 871(a)(1) and 881 shall not exceed 10 percent, and

"(2) subsection (a) of section 934 shall not apply to such taxes.

"(b) Reduced Rates Not To Apply to Pre-Effective Date Earnings.—

"(1) In general.—The reduction under subsection (a)(1), and any reduction under section 934 pursuant to subsection (a)(2), in a rate of tax imposed by section 871(a)(1) or 881 shall not apply to dividends paid out of earnings and profits accumulated for taxable years beginning before the effective date of the reduction.

"(2) Ordering rule.—For purposes of paragraph (1), dividends shall be treated as first being paid out of earnings and profits accumulated for taxable years beginning before the effective date of the reduction (to the extent thereof)."

(b) Withholding.—Subchapter A of chapter 3 of such Code (relating to withholding of tax on nonresident aliens and foreign corporations) is amended by adding at the end thereof the following new section:

"SEC. 1444. WITHHOLDING ON VIRGIN ISLANDS SOURCE INCOME.

"For purposes of determining the withholding tax liability incurred the Virgin Islands pursuant to this title with respect to amounts received from sources within the Virgin Islands by citizens and resident alien individuals of the United States, and corporations organized in the United States, the rate of withholding tax under sections 1441 and 1442 on income subject to tax under section 871(a)(1) or 881 shall not exceed the rate of tax on such income under section 871(a)(1) or 881, as the case may be."

(c) Technical Amendment.—Subsection (a) of section 934 of such Code is amended by inserting before the period at the end thereof "or in section 934A".

(d) Clerical Amendments.—

(1) The table of sections for subpart D of part III of subchapter N of chapter 1 of such Code is amended by inserting after the item relating to section 934 the following new item:

"Sec. 934A. Reduction in income tax rate on Virgin Islands source income."

(2) The table of sections for subchapter A of chapter 3 of such code is amended by adding at the end thereof the following new item:

"Sec. 1444. Withholding on Virgin Islands source income."

(e) Effective Dates.—

(1) In general.—Except as provided in paragraph (2), the amendments made by this section shall apply to amounts received after the date of the enactment of this Act in taxable years ending after such date.

(2) Withholding.—The amendment made by subsection (b) shall apply to payments made after the date of the enactment of this Act.

Mr. BRADLEY. Mr. President, the treasury and the Government of the Virgin Islands take the position that present law imposes a 30-percent tax

on the non-Virgin Islands recipient of certain Virgin-Islands source passive investment income, and that present law also imposes withholding at the source by the Virgin Islands payor of such income. The bill will reduce this tax to 10 percent when the recipient is a U.S. citizen, resident alien, or corporation and imposes a corresponding withholding obligation on the Virgin Islands payor of such income. The bill will allow the Virgin Islands Government further to reduce this 10-percent rate in its discretion. The bill will not affect payments of Virgin Islands source passive income to non-U.S. persons.

Mr. DOLE. Mr. President, the Senator from Kansas and, I believe, the distinguished Senator from Louisiana are familiar with the amendment. We have no objection to the amendment. We accept it.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1388) was agreed to.

UP AMENDMENT NO. 1389

(Purpose: To extend for one year the taxes authorized by law to be collected for the Highway Trust Fund established pursuant to the Highway Revenue Act of 1956)

Mr. DOLE. Mr. President, on behalf of the distinguished Senator from Idaho (Mr. SYMMS), for himself and the distinguished Senator from Vermont (Mr. STAFFORD), the distinguished Senator from Texas (Mr. BENTSEN), and the distinguished Senator from West Virginia (Mr. RANDOLPH), I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for Mr. SYMMS, Mr. STAFFORD, Mr. BENTSEN, and Mr. RANDOLPH, proposes an unprinted amendment numbered 1389.

At the appropriate place in the bill, insert the following.

TITLE —HIGHWAY REVENUE ACT OF 1982

SEC. . The title may be cited as the "Highway Revenue Act of 1982".

1-YEAR EXTENSION OF THE TAXES WHICH ARE TRANSFERRED INTO THE HIGHWAY TRUST FUND

SEC. . (a) GENERAL RULE.—The following provisions of the Internal Revenue Code of 1954 are amended by striking out "1984" each place it appears and inserting in lieu thereof "1985":

(1) Section 4041(e) (relating to rate reduction).

(2) Section 4061(a)(1) (relating to imposition of tax on trucks, buses, etc.).

(3) Section 4061(b)(1) (relating to imposition of tax on parts and accessories).

(4) Section 4071(d) (relating to imposition of tax on tires and tread rubber).

(5) Section 4081(b) (relating to imposition of tax on gasoline).

(6) Section 4481(a) (relating to imposition of tax on use of highway motor vehicles).

(7) Section 4481(e) (relating to period tax in effect).

(8) Section 6156(e)(2) (relating to installment payments of tax on use of highway motor vehicles).

(9) Section 6421(h) (relating to tax on gasoline used for certain nonhighway purposes or by local transit systems).

(b) AMENDMENT OF SECTION 6412(a)(1).—Section 6412(a)(1) of such Code (relating to floor stock refunds) is amended:

(1) by striking out "1984" each place it appears and inserting in lieu thereof "1985"; and

(2) by striking out "1985" each place it appears and inserting in lieu thereof "1986".

EXTENSION OF HIGHWAY TRUST FUND

SEC. . (a) HIGHWAY TRUST FUND.—Subsections (c), and (f)(3), (4), (6), and (7), of section 209 of the Highway Revenue Act of 1956 (relating to the Highway Trust Fund; 23 U.S.C. 120 note) are amended:

(1) by striking out "1984" each place it appears and inserting in lieu thereof "1985", and

(2) by striking out "1985" each place it appears and inserting in lieu thereof "1987".

(b)(1) MANAGEMENT OF TRUST FUND.—Subsection (e)(1) of section 209 of the Highway Revenue Act of 1956 is amended by striking "1985" and inserting in lieu thereof "1987" and by striking "Commerce" and inserting in lieu thereof "Transportation".

(2) EXPENDITURES FROM TRUST FUND.—Subsection (f)(1) of section 209 of the Highway Revenue Act of 1956 is amended as follows:

"(1) FEDERAL-AID HIGHWAY PROGRAM.—Amounts in the Trust Fund shall be available, as provided by appropriation acts, for making expenditures after June 30, 1956, and before October 1, 1986, to meet those obligations of the United States heretofore or hereafter incurred under title 23, United States Code, as amended and supplemented, which are attributable to Federal-aid highway (including those portions of general administrative expenses of the Federal Highway Administration payable from such appropriations).".

(c) INVESTIGATION AND REPORT TO CONGRESS.—Section 210 of the Highway Revenue Act of 1956 is repealed.

(d) CONFORMING AMENDMENTS TO LAND AND WATER CONSERVATION FUND.—Subsection (b) of section 201 of the Land and Water Conservation Fund Act of 1956 (16 U.S.C. 4061-11 is amended—

(1) by striking out "1984" and inserting in lieu thereof "1985"; and

(2) by striking out "1985" each place it appears and inserting in lieu thereof "1986".

SEC. . —YEAR EXTENSION OF REFUND OF TAXES ON FUEL USED IN TAXICABS.—Paragraph (3) of section 6427(e) of the Internal Revenue Code of 1954 (relating to use in certain taxicabs) is amended by striking out "December 31, 1982" and inserting in lieu thereof "December 31, 1983".

Mr. DOLE. Mr President, I can explain very quickly what this amendment is about.

It simply extends the highway trust fund and the excise taxes coming into the fund for 1 year, to 1985. The distinguished Senator from Idaho has asked that I offer this amendment for him.

Again, the amendment has been cleared on all sides by the majority leader, the minority leader, and other interest parties.

HIGHWAY TRUST FUND EXTENSION

● Mr. SYMMS. Mr. President, I thank the distinguished chairman of the Senate Finance Committee, Mr. DOLE, and the distinguished ranking minority member, Mr. LONG, for expeditiously reporting an extension of the highway trust fund.

This legislation provides for the simple extension of the highway trust fund and the excise taxes coming into the fund for 1 year, to 1985.

The extension of the highway trust fund is essential in order to reauthorize the Federal-aid highway program for fiscal year 1983. The authorizations for the highway program will expire on October 1 of this year, and States will receive no additional highway funds unless this program is reauthorized. In addition, any new authorizations for the highway program would be limited to approximately $6.5 billion if the highway trust fund is not extended. In fiscal year 1982 new authorizations of $8.6 billion were made available to the States for highway construction and rehabilitation.

Mr. President, the urgent need of funds to maintain and preserve the highway infrastructure in this country is well documented. The program structure to accomplish this revitalization is already in place. It is imperative that Congress move forward to provide the necessary funds. The Senate has taken a major step today by approving a simple extension of the highway trust fund. It is my sincere hope that the House will do likewise as quickly as possible.●

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1389) was agreed to.

UP AMENDMENT NO. 1390

(Purpose: To clarify the status of Alaska Native Corporations)

Mr. DOLE, Mr. President, I have a technical amendment I send to the desk and ask for its immediate consideration. It will take the Alaska Natives out of the bill dealing with Indian tribal governments.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for Mr. STEVENS, proposes an unprinted amendment numbered 1390.

Page 14, lines 13 and 14, strike "or Alaska Natives".

Line 16, strike "." insert "and in Alaska shall include only the Metlakatla Indian Community."

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1390) was agreed to.

UP AMENDMENT 1391

Mr. DOLE. Mr. President, I send an amendment to the desk for the distin-

guished Senator from Hawaii (Mr. MATSUNAGA) which is simply a date change. Senator MATSUNAGA is not present and asked me to present this amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for Mr. MATSUNAGA, proposes an unprinted amendment numbered 1391.

On page 15, line 17, strike "1977" and insert "1976".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP 1391) was agreed to.

Mr. DOLE. Mr. President, the Senator from Kansas urges the Senate to consider favorably H.R. 5470 as reported by the Committee on Finance. The bill includes four provisions, each of merit and, I believe noncontroversial.

EXCLUSION FROM INCOME FOR PERIODIC PAYMENTS, H.R. 5470

Under present law, the Internal Revenue Service has rule that damages for personal injuries are excludable from gross income. This provision of the bill is intended to codify present law.

The bill specifically excludes from gross income damages for personal injuries or sickness, whether the damages are paid as lump sums or as periodic payments. In addition, the bill provides that, under certain circumstances, any amount received for agreeing to assume liability to make periodic payments of personal injury damages is also excluded from gross income. Therefore, any amount received will not be included in gross income to the extent it is used to purchase a commercial annuity or an obligation of the United States if the annunity or obligation is designated, under regulation prescribed by the Secretary, to fund the periodic payments and the purchase is made within certain time limits.

HAWAII PREPAID HEALTH CARE LAWS

The bill amends ERISA to provide that Hawaii law relating to employer maintained health insurance plans would not be preempted by ERISA to the extent that the Hawaiian law does not relate to matters thoroughly regulated under ERISA or impose tax liability on insurance premiums or benefits.

INDIAN TRIBAL GOVERNMENTS

The bill extends certain tax provisions which apply to States so that they will also apply to American Indian tribal governments. Among these provisions is an income tax exemption for certain governmental obligations. However, special limitations are imposed regarding the tax treatment of industrial development bonds issued by an Indian tribal government.

HANDICAPPED FOSTER CHILDREN

Finally, the bill settles the tax treatment of certain "difficulty of care" payments made to a taxpayer for care of a handicapped foster child. The bill makes clear that difficulty of care payments, as defined in the bill, are excluded from income for Federal income tax purposes.

Mr. MATSUNAGA. Mr. President, the Senator from Hawaii would like to express his gratitude to the chairman of the Finance Committee, Mr. DOLE, and the distinguished ranking member of the committee, Mr. LONG, for their help. The bill now before the Senate, H.R. 5470, contains a committee amendment which rescues the Hawaii Prepaid Health Care Act from preemption by the Federal Employee Retirement Income Security Act of 1974 (ERISA). I thank the two Senators for their assistance in preserving a State program which means very much to the people of Hawaii.

ERISA's preemption of State laws governing employee benefits, particularly the Hawaii State law in question, has been raised several times in Congress. The House Education and Labor Subcommittee on Labor Standards received testimony on this matter on June 1, 1978. The Senate Labor and Human Resources Committee heard witnesses on this issue during the committee hearings on ERISA improvement in August 1978 and February 1979. On December 4, 1979, the Senate Finance Subcommittee on Private Pension Plans and Employee Benefits heard testimony on this issue also. At one point during recent congressional consideration of the Multiemployer Plan Amendments Act, the U.S. Chamber of Commerce and the National Association of Manufacturers opposed passage of the multiemployer bill because of an amendment to preserve the Hawaii Health Care Act.

I would like to review briefly the Hawaii Prepaid Health Insurance Act, relate the development of the present issue, examine the arguments made against Hawaii's mandated health insurance plan, and analyze the reasoning behind these arguments.

First, let me explain the State program. The Hawaii Prepaid Health Insurance Act requires all employers in the State of Hawaii to provide their workers with prepaid medical health insurance. This coverage is comparable to the medical insurance provided by the Federal Government to its civil service employees. This required insurance coverage provides comprehensive care, not limited to work-related injuries. The coverage must be comparable to the community standard. In effect, the community standard is the level of benefits provided by the commercial prepaid health plan having the largest number of subscribers. Current benefits include:

First, hospital benefits plus outpatient service for 120 days;

Second, surgical benefits;

Third, medical services, including home, office, hospital visits, and intensive medical care, and

Fourth, laboratory, X-ray, and radiotherapy services.

Fifth. Maternity benefits for workers who have participated in a plan 9 or more months before childbirth.

Sixth. Drug and alcohol abuse treatment.

Unlike the Federal program where each worker selects his own health insurance program, under the Hawaii law, the employer selects one program for all its employees. The employer may either secure commercial coverage or it may undertake a self-insurance program. Under a self-insurance program, the employer must prove to the State Department of Labor that the employer has adequate resources to pay for the requisite health benefits. If the employer wishes to select commercial coverage, it is free to choose a commercial carrier based on the carrier's services and premiums. While the Hawaii State insurance commissioner has licensed over 200 carriers to provide such prepared health insurance, all but 1,000 of the State's 18,500 employers subscribe to one of the State's two major commercial insurers—Kaiser Permanente Health Plan or the Hawaii Medical Services Association.

The Hawaii statute requires an employer to pay half the premiums for this insurance coverage. Many employers voluntarily pay for their worker's full premium cost. Where a worker contributes to his or her own coverage, the State law restricts this contribution to no more than 1.5 percent of the worker's annual wages. For financially pressed businesses that have difficulty covering the premium cost, the State provides premium supplements out of its reserve funds. Between 1974 and 1977, the State expended about $30,000 to supplement employer's premium payments.

Excluded from the statute's mandatory coverage are:

First. Government employees.

Second. Agricultural seasonal workers.

Third. Employees working less than 20 hours a week or at wages less than 86.67 percent of the prevailing State minimum hourly wage.

Fourth. Workers covered by a Federal program or receiving public assistance.

Fifth. Religious objectors.

Sixth. Individuals working in family employment.

Seventh. Commissioned insurance and real estate salesmen.

Despite these exceptions, 98 percent of the State of Hawaii's population has some form of comprehensive or catastrophic medical coverage through the State-mandated program for work-

ers or through the Federal civil service, medicare, and medicaid program.

Furthermore, the comprehensive health care benefit programs available for employers in Hawaii, are generally better and cheaper than comparable programs in other States. It is important to stress that reliance on private medical treatment and commercial carriers in Hawaii, has led to effective utilization and cost control programs. Inpatient hospital care has been reduced in Hawaii to half the national average. In addition, monthly premiums for medical insurance in Hawaii compare very favorably with the premiums required by plans nationwide under the Federal civil service health insurance program.

Second, let me relate the background of the present controversy. The Hawaii prepaid health care law was enacted on June 2, 1974. On November 21, 1977, the Federal district court for the Northern District of California held that ERISA preempted the Hawaii statute. In other words, ERISA rendered the State's prepaid health insurance act invalid.

This litigation arose out of a 1976 amendment to the Hawaii Act adding drug and alcohol abuse treatment. Standard Oil Co. of California up to this point had complied with Hawaii requirements. Some of the company's workers in Hawaii had elected to participate in Standard Oil's self-funded health care program which provides 80 percent reimbursement. This self-funded program did not provide drug and alcohol treatment, and Standard Oil sought to enjoin the State of Hawaii from enforcing this new requirement.

Reviewing ERISA, the district court stated that:

> The legislative history discloses no explicit Congressional decision that State health insurance laws should be preempted. Neither the parties nor the Court in its independent research found any specific discussion in Congress about the pros and cons of that course.

The court's statement was later supported by Senator LLOYD BENTSEN, the chief drafter of ERISA in the Senate Finance Committee. At a public hearing on August 15, 1978, on this issue, Senator BENTSEN stated that the Finance Committee did not deal with the question of preempting health insurance. Nevertheless, the court ruled that the broad language of ERISA preempted all State laws relating to private employee benefit plans including Hawaii's Prepaid Health Insurance Act, and relief, if any, must come from Congress. Both the Ninth Circuit Court of Appeals and the U.S. Supreme Court affirmed this decision.

Shortly after the lower court's decision, the State of Hawaii sought remedial legislation to save the Hawaii statute from ERISA preemption.

In 1977, with Senator DAN INOUYE as cosponsor, I introduced S. 1383 to exempt from ERISA preemption, State health insurance laws. At our urging Senator HARRISON WILLIAMS, then chairman of the Senate Committee on Labor and Human Resources, included as part of his ERISA Improvements Act of 1979, a provision exempting from ERISA preemption, the Hawaii prepaid health care law, as well as any other State law determined to be substantially identical to the Hawaii statute and requiring benefits substantially identical to those required under the Hawaii law. Under the Williams bill, State health insurance requirements for reporting, disclosure, fiduciary responsibility, and enforcement, would not be preempted if they were similar to ERISA provisions. In the version of S. 209, the ERISA Improvements Act, reported favorably by the Senate Committee on Labor and Human Resources, this provision was expanded to exempt from preemption all State health insurance law.

Because of strong opposition from the U.S. Chamber of Commerce and the National Association of Manufacturers to the expanded Williams exemption proposal, I subsequently offered an amendment to the Multiemployer Pension Plan Amendments Act to exempt only the Hawaii statute. This approach was taken in bills which were later introduced by Senator INOUYE and myself, S. 3151 in the 96th Congress, and S. 1232 in the present Congress. These bills exempt only the Hawaii prepaid health care law, while retaining ERISA reporting, disclosure, fiduciary, and enforcement requirements for the Hawaii health insurance program.

During the lengthy congressional consideration of this issue, national business organizations opposed any legislation to preserve the Hawaii statute. It was argued that the Hawaii statute would detract from the coverage already provided by multistate employers to their workers. It was further argued that the Hawaii statute, if preserved and especially if followed by other States, would prevent multistate employers from providing a uniform compensation package for their workers nationwide. Behind these arguments was the general apprehension that the Hawaii statute might be used as the basis for a national health insurance program. I would now like to discuss these points.

In a statement presented at the 1978 oversight hearings on ERISA, Robert S. Stone, senior counsel of IBM, argued that the Hawaii statute could detract from higher health insurance coverage provided by multistate employers. Its was argued that the Hawaii statute could override the compensation package reached in collective-bargaining agreements.

This argument obviously stems from a misunderstanding of the Hawaii State law. The Hawaii statute merely sets a minimum standard for health insurance coverage required of employers. Benefits in excess of those required by the Hawaii statute, are not affected by the law. Indeed, a prepaid health care plan included in collective bargaining is presumed to meet the requirements of the statute. The Hawaii law does not override health benefits obtained in collective bargaining.

Furthermore, the minimum standards established for a comprehensive health care program by the Hawaii statute should not pose additional burdens on multistate employers, for the Hawaii State requirements are generally lower than the benefits already extended to workers by multistate employers. Boris Auerbach, secretary of Federated Department Stores and vice president of the ERISA Industry Committee or ERIC, noted during the hearings on S. 209 in February 1979, that the Federal Health Maintenance Organization Act of 1973 which governs federally qualified health maintenance organizations, is more extensive than that required under the Hawaii law. Moreover, he stated that employers in his association already provide adequate and, in most cases, more generous plans than those required by the State of Hawaii. Thus, Hawaii's statute would add no financial cost to multistate employers' current health programs.

The chief argument against exempting Hawaii's prepaid health insurance program from preemption by ERISA has focused on the potential obstacles posed against an employer intent on establishing a uniform benefit package for its workers nationwide. Mr. Stone in the 1978 hearings stated that if other States followed Hawaii's example, the multiplicity of State requirements would prevent multistate employers from providing uniform benefits to its workers. George J. Pantos, counsel to ERIC, stated that ERISA's preemption provision reflected an overriding concern for interstate employers who must develop a uniform benefit system, since these interstate employers with 10 percent of all plans cover 85 percent of all pension plan participants. At the same hearings, Peter Nash, also a counsel to ERIC, added that the State-mandated health premiums could reduce the compensation available to workers in that State, because to meet State-mandated health coverage, an employer would reduce compensation in another area, thereby creating nonuniformity for workers in different States. The administrative cost and difficulty in meeting different State health insurance requirements were again raised by Mr. Auerbach during hearings in February 1979.

All of these arguments fail to recognize the long-established fact that the

several States have different requirements for group life insurance, health insurance, workmen's compensation, unemployment compensation, and disability insurance. For social as well as economic reasons, multistate employers have met these requirements which differ from State to State.

To determine the administrative cost and complexity for meeting different State health insurance requirements, I talked with a consultant at a major accounting firm and with the Financial Management Office of the Federal Office of Personnel Management. I was informed that any employer using an automated payroll would not encounter any difficulty or extraordinary cost in meeting different State health care requirements, for the following reasons: First, medical benefits are fairly uniform nationwide. Second, payroll offices using automated systems can easily cope with any variations as they do with existing differences in pay packages for workers in different States—differences in such matters as local tax withholdings, fringe benefits negotiated by local unions such as pregnancy coverage, holidays, vacation schedules, and reimbursement for protective clothing and work tools. If all 50 States developed varying health insurance programs, these experts were fairly confident that a computer program could deal with varying benefit packages.

In addition, the expert at the Federal Office of Personnel Management noted that the existing Federal health insurance program, although immense, is neither costly nor complicated to administer. The Federal employees health benefits program covers four basic categories of health insurance—Government-wide plans, employee organization plans, individual practice plans, and local group practice plans. Each Federal worker must make his own election as to the plan he or she wishes to join. The biggest task for the Office of Personnel Management is to educate the worker on the various alternative plans available and to process the employee's selection. This selection process is opened at the time the worker joins the Federal work force and each November for the entire Federal work force. Besides the educational task and the task of processing elections, the Office of Personnel Management has not encountered significant problems in making the appropriate payroll deduction, collecting the withheld funds, and transmitting the collected funds to the appropriate carrier selected by the individual worker. For the total 3,491,091 individuals enrolled in the Federal employees health benefit program in 1979, the program received a total of $3.3 billion in income. Expenses incurred by the Office of Personnel Management for 1979, amounted to $6.8 million. In other words, the administrative cost for the program in 1979 amounted to only 0.2 percent, or one-fifth of 1 percent of the total income.

The Federal employees health benefits program annually copes with the extreme difficulty posed by individual employee selection from over 100 plans which differ from State to State. Yet the administrative cost for this program is practically insignificant. In comparison, the greater simplicity of private employer's plans should require even less administrative cost.

The two arguments of administrative complexity and nonuniformity have been repeated almost as if they were articles of faith. The real reason behind these arguments may well be rooted in an apprehension of national health insurance. Taking the administrative complexity argument at face value, some members of the Senate Committee on Labor and Human Resources expanded the initial Hawaii exemption in S. 209 to permit dissimilar State health insurance programs. This was undertaken in the hope that the burden of meeting different State requirements would lead multistate employers to support national health legislation.

In truth, some representatives of the business community view the Hawaii statute as an undesirable experiment in national health insurance. It is feared that the Hawaii experience would familiarize Americans with the benefits of such a program and establish a favorable environment for expanding the program to other States.

The controversy over national health insurance leads me to the fourth and final portion of my discussion, regarding the implications raised by the business community. It should be here noted that during the 3 years that the Hawaii prepaid health insurance program was being considered, the State legislature questioned the need for such legislation. State action was deemed unnecessary in view of "imminent national health legislation." However, after 3 years' wait, the State legislature in 1974 decided to enact Hawaii's own Prepaid Health Insurance Act.

The enactment of a national health insurance program appears as unlikely today as it appeared in 1974, 1978, or 1979. Yet, during the debate on the Matsunaga amendment to the Multiemployer Pension Plans Amendment Act, the National Association of Manufacturers and the U.S. Chamber of Commerce argued that the amendment was inappropriate and nongermane to the legislation under consideration. They argued that the Hawaii exemption provision should be considered only in the context of national health legislation; and, although the Ninth Circuit Court of Appeals has affirmed the lower court's decision invalidating the Hawaii Prepaid Health Act, The State of Hawaii should postpone seeking remedial legislation until the Congress considers national health legislation. The effect of such a delay would be to strip health insurance coverage from thousands of workers in Hawaii.

Ironically, the handful of multistate employers who oppose Hawaii's program and who operate in Hawaii will not terminate their own health insurance programs; nor will local, established employers. As employers have conceded, and as the Health, Education, and Welfare Department has confirmed, the Hawaii State minimum standards are exceeded by many industries. The Hawaii legislative bureau report estimated in 1971 that only 11.7 percent of the State's work force did not have hospital coverage, 13.5 percent lacked surgical coverage, and 17.2 percent did not have regular medical insurance. Consequently, for the majority of employers and workers, the mandated State requirements of 1974 imposed no additional burden.

According to an HEW report issued in 1977, 46,000 workers, chiefly in small, new, or marginal businesses, benefited from the State-mandated health insurance coverage. The 46,000 who are affected are chiefly minimum wage workers, mostly women who must support their families. These are workers in the garment, hotel, or restaurant industries.

In summary, let me note that the Hawaii Prepaid Health Care Act was in effect in 1974. It has guaranteed continued health insurance coverage in preexisting programs and it has expanded coverage to 46,000 workers in the State who previously did not enjoy health insurance benefits. It has imposed minimal financial burdens on established employers, especially multistate employers. By mandating near-universal coverage, and relying on competition among commercial carriers and private doctors, the statute has kept premium costs sufficiently low to be borne by new, small, or marginal businesses with minimal adverse effect.

The alleged administrative complexity for multistate employers has not been substantiated, and, in fact, only a handful of multistate employers operate in Hawaii. Those that do operate in the State, easily meet the State requirement with the company's voluntary or collective-bargained plan. Hawaii's health insurance plan is unique and limited to a single State. However, even if other States were to enact similar legislation, automated payroll systems which already cope with numerous compensation differences from State to State, could readily cope with variations in health insurance plans at minimal cost.

Fear of the favorable precedent the Hawaii statute might create for na-

tional legislation has motivated opponents of the Hawaii Health Care Act. They have argued for broad ERISA preemption of the Hawaii act and all State health insurance laws, and they have counseled against such State action except in the context of national health proposals. In view of the unlikely prospect for national health legislation, ERISA preemption would preclude State initiative in this area. In the meantime, 46,000 workers in Hawaii would be deprived of their health insurance coverage guaranteed under the State's preempted law.

Mr. President, I have limited the scope of the exemption to the Hawaii Health Care Act as it was on January 1, 1976. This freezes the Hawaii program and eliminates the alcohol and drug abuse components that were added by the State legislature in 1976. I reluctantly do this only to facilitate House approval of the amendment. The bill, as reported by the committee, was technically defective and does not carry out this intention. My technical amendment submitted by the distinguished Senator from Kansas makes the necessary technical correction to achieve the stated objective. For the foregoing reasons, I strongly urge the passage of this bill before us, H.R. 5470 with the committee amendment to exempt Hawaii's Prepaid Health Insurance Act from the preemption provisions of ERISA.

FOSTER CARE AUDITS

Mr. DURENBERGER. Mr. President, I am pleased that the Senate is today adopting a bill that includes the provision I offered in Finance Committee to exclude from gross income the difficulty of care payments made to foster parents caring for handicapped children.

Under present law, payments for foster care that reimburse the parents for expenses are not includible in income. But those payments that compensate parents for their services are. In this latter category I think of those parents who are in the business of being foster care parents, while those in the previous category are simply opening up their homes to foster children because of love, not money.

The foster care provision in this bill deals with a category of foster parents who are in a class by themselves—those who voluntarily take children into their homes that have handicaps. Some of these children have handicaps so severe that they cannot feed themselves or must wear diapers even though they are past infancy. Others of them have severe mental handicaps that manifest themselves in behavioral problems.

In Minnesota and other States parents who care for handicapped children receive additional payments, called difficulty of care payments, for the extra costs and burdens of caring for these children. In Minnesota these extra payments average about $4 per day but can run as high as $20 per day.

These extra expenses are legion—extra laundry, extra transportation, special equipment. There are also extra expenses in the types of sitters that must be hired if the parents want to go out for an evening, or in respite care if the parents can get away for a much-needed weekend. And, these payments can compensate in small part for the extra wear and tear on the parents for caring for these children.

In Minnesota the Internal Revenue Service had audited a number of foster care parents. The audits are on hold as they examine State law to determine legislative intent on these difficulty of care payments—whether they cover expenses or compensate for services.

The consternation these audits have caused is understandable. Parents who believed these payments were nontaxable are suddenly confronted with the possibility of owing thousands of dollars in back taxes. The publicity generated by these audits has been damaging to the cause of foster care—they have a chilling effect on those considering being a foster parent of a handicapped child.

With this bill the Senate is declaring that these payments made to foster care parents over and above those payments made for nonhandicapped children are not income to the parents, regardless of whether they, dollar for dollar only cover expenses. There parents are saving the taxpayers' money by preventing institutionalization of these children. But more importantly, they are providing a sense of belonging, a sense of love and family to society's most vulnerable children—those with handicaps but without parents to provide them this love.

The Federal Government should be encouraging, not discouraging foster care for these most vulnerable of children—the multiply handicapped, the severely retarded, the mentally ill. Today we strike down one of these barriers to a giving, loving family for these kids. The Senate can make no better use of its time.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and third reading.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 5470), as amended, was passed.

Mr. DOLE. I move to reconsider the vote by which the bill was passed.

Mr. BRADLEY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I yield the floor.

Mr. CHAFEE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COASTAL BARRIER RESOURCES ACT—CONFERENCE REPORT

Mr. BAKER. Mr. President, may I inquire of the minority leader if he is prepared to consider a conference report on S. 1018, the Coastal Barrier Resources Act?

Mr. ROBERT C. BYRD. This side is ready to proceed, Mr. President.

Mr. BAKER. Mr. President, I submit a report of the committee of conference on S. 1018 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1018) to protect and conserve fish and wildlife resources, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. CHAFEE. Mr. President, this is a simple, straightforward bill. Its purpose is to conserve our fragile, undeveloped coastal barrier beaches and islands by prohibiting Federal financial assistance for new development. At the same time, the legislation will save the taxpayers billions of dollars over the course of future years.

This legislation has received broad support. Last week, the Senate passed S. 1018 unanimously. Earlier this week, the House passed a similar version by a vote of 399 to 4. Although there were some differences between the two bills, I believe the substitute bill agreed to by the conferees is good, strong, responsible legislation. I would like to briefly comment on the contents of the conference report.

The legislation as passed by the Senate and House differed to some degree on what areas should be included in the legislation. Resolving the differences was what consumed the time of the conferees.

This bill before us today is a massive step forward in attempting to preserve these islands and beaches. When we started out this process a year and a half ago, we delineated about 600 miles of coast that would be protected. We have ended up with the delineation of about 700 miles, so we have greatly increased the number of protected areas compared to our first proposal.

Now some may suggest that we would be better off just letting the Department of the Interior cut off Federal flood insurance on undeveloped coastal barriers pursuant to the Omnibus Budget and Reconciliation Act of 1981. I strongly disagree with that approach. Cutting off Federal flood insurance is not going to stop, or probably even dramatically slow down, the development of undeveloped coastal barriers. That was a conclusion drawn by the General Accounting Office in a recent report prepared at my request.

What GAO said was that in order to discourage development on barrier islands, flood insurance must be cut off along with the cessation of other Federal assistance for roads, bridges, sewers, and other infrastructures. That is what this legislation does. It prohibits Federal expenditures for these projects, because the goal is to discourage development on undeveloped coastal barriers. To have a cutoff of only Federal flood insurance would leave us with less than half a loaf.

The only other major difference between the Senate and House bills, besides areas included, pertains to general revenue sharing. The House bill contained a provision which exempted general revenue sharing from the prohibitions of Federal expenditures and assistance on undeveloped coastal barriers. The Senate bill had no such provision. The Senate agreed to the House position because the revenue-sharing program provides localities with Federal funds with no strings attached. Because these funds can be used at the discretion of the local governments, to prohibit their use on undeveloped coastal barriers seemed inconsistent with the philosophy of the law. However, we are somewhat concerned about the effect general revenue sharing will have on undeveloped coastal barriers, so we have asked the Department of the Interior to examine this issue and report back to us.

Mr. President, as I have pointed out earlier, this legislation has the overwhelming support of both the Senate and House. It is also supported by Interior Secretary James Watt, all of the major environmental organizations, the American Red Cross, the National Taxpayers Union, and a variety of coastal groups. Of special help were Americans for the Coast, a group of distinguished Americans from a variety of fields. Mr. Laurance Rockefeller of that group and Ms. Sharon Newsome of the National Wildlife Federation worked extremely diligently and were most valuable allies. In short, Mr. President, this legislation has the support of conservatives and liberals, Democrats, Republicans, and Independents. The conference substitute is an intelligent approach to conserving our remaining undeveloped coastal barriers. I urge my colleagues to give it their full support.

Mr. President, I would like to thank all those who participated in this legislation. In particular, those members of the Environment and Public Works Committee who worked so hard—our chairman, Senator STAFFORD, our ranking member, Senator RANDOLPH, and Senators GORTON, MOYNIHAN, and MITCHELL. I would also like especially to thank Senator THURMOND for his strong support and invaluable assistance in getting this measure passed in the Senate last week.

Special thanks also go to Congressman TOM EVANS for the leadership he has shown on this matter. As the chief sponsor of the bill in the House, Congressman EVANS skillfully guided this legislation through the legislative process, overcoming what often seemed insurmountable obstacles. Congressman WALTER JONES, chairman of the House Merchant Marine and Fisheries Committee, and Congressman JOHN BREAUX, chairman of the Subcommittee on Fisheries and Wildlife, should be commended for their leadership and commitment to protecting our undeveloped coastal barriers. They have been key players in the legislation from the beginning, and without their support, understanding and willingness to work out the issues, we would have never gotten this far along.

Finally, Mr. President, I would like to thank all of the staff who have worked so long and hard on this bill in the Senate. We owe them great praise for their perseverance and hard work on this legislation. Special praise goes to Bob Hurley of my staff. Without his efforts and those of Mr. Steve Shimberg of the Environment and Public Works Committee staff, we would not have this legislation.

Mr. President, I thank the majority leader and the minority leader and all who have helped in expediting the passage of this important bill.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEES OF THE COPYRIGHT OFFICE—CONFERENCE REPORT

MR. BAKER. Mr. President, is the minority leader prepared to accept the conference report on the copyright bill, which is H.R. 4441?

Mr. ROBERT C. BYRD. Mr. President, this side is ready to proceed.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask the Chair to lay before the Senate the conference report on H.R. 4441.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4441) to amend title 17 of the United States Code with respect to the fees of the Copyright Office, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. THURMOND. Mr. President, this legislation provides that nonprofit veterans' and fraternal organizations would be exempt from the requirement of paying certain performance royalty fees for musical works which are used for charitable fundraising. It will promote nonprofit activities and community service without unduly depriving composers and other artists of the fruit of their labors. An organization can qualify for this exemption only if the performance is in conjunction with a social function, where members and invited guests attend, and the proceeds are to be used for charitable purposes.

This change in the copyright law will provide relief from copyright liability for organizations like the American Legion, Veterans of Foreign Wars. Elks, Kiwanis, Shriners, and other nonprofit, fraternal organizations. The groups raise large amounts of money for worthwhile purposes and should not be required to be subject to copyright liability if copyrighted materials are used in connection with raising these funds.

In addition these groups, where invited guests attend and not just members, should be exempt from copyright liability. It does not make sense to restrict the exemption to members only where the purpose of the group's activities is to raise money for a worthy cause.

Mr. President, I want to commend Senator ZORINSKY and Senator DECONCINI for their efforts to get this small change in the copyright law en-

acted this year. I believe a good compromise has been forged with the House Judiciary Committee on this legislation. I urge the Senate to adopt the conference report.

Mr. ZORINSKY. Mr. President, I have been looking forward to this day for a long time. It was almost 3 years ago, in the 96th Congress, that I originally introduced a bill to provide an exemption to the Copyright Act for nonprofit veterans' and nonprofit fraternal organizations.

The need for this legislation was first brought to my attention by a fellow member of the Fraternal Order of Eagles in Omaha.

The community services provided by veterans and fraternal organizations are many and varied. The Loyal Order of Moose, for example, renders services to orphaned and dependent children at the Moosehaven in Orange Park, Fla. The Fraternal Order of Eagles has raised and distributed over $12 million in the last 5 years for heart research, cancer research, gerontological research, and research into catastrophic childhood diseases. Another fraternal organization, the Benevolent Protective Order of Elks, is famous for each State's major project program, which seeks to aid cerebral palsy victims, crippled children, eye banks, youth camps, and other worthy recipients of attention.

Veterans' organizations also are generous with their revenues. The American Legion annually assists hundreds of thousands of veterans and their families, both financially and by volunteering needed services. The Legion also subsidizes Scout troops and baseball teams. The Veterans of Foreign Wars of the United States sponsor scholarships and drug abuse seminar. This summary, though merely a cursory review of the benevolent activities of these groups, illustrates the munificent nature of their work.

In view of the fact that these organizations provide many services which benefit the public at large, and particularly less fortunate members of society, it is deemed appropriate to amend the 1976 act to reflect the situation that existed before its passage into law.

The intent of this legislation is to provide assistance only to organizations whose purpose is to provide charitable services to the community. Some of the services which these organizations provide include, among others, aid to orphans, the handicapped, and the elderly; aid to hospitals, blood banks, and health research institutions; and aid to organization members and their families in times of distress. This new exemption is not intended to apply to organizations whose primary function is not to provide charitable service to the community. For example, organizations whose primary function may be financial gain, social recreation, or political education may not be covered.

The mere fact that an organization is a nonprofit veterans' or fraternal organization does not mean that all performances of music by such organizations are exempt from copyright royalty fee payment requirements. The performance must not be open to the public, it must accompany a social function, and the proceeds must be used for charitable purposes.

I thank the distinguished chairman of the Senate Judiciary Committee, Senator THURMOND, for his invaluable assistance in bringing this effort to fruition. In addition Senator DECONCINI deserves a very special note of thanks for his support and for chairing the hearings that proved so helpful in studying this matter.

Mr. MELCHER. Mr. President, as a cosponsor of the legislation exempting nonprofit veterans and fraternal organizations from copyright performance royalties, I am happy to see that our efforts will now become law.

While some might view this success as a small victory, I feel the opposite is true.

This law is very important to the organizations involved. Many of the groups impacted do not survive on lavish budgets, but are working every day just to survive as are most of our Nation's people. This bill will make their efforts a little easier.

Certainly the creative genius of the authors and composers is an important national asset.

I am pleased that, in helping these nonprofit organizations, we have not perilously harmed nor denied this genius its fair reward.

As a former actor himself, I am sure the President realizes the value of this legislation and I encourage his approval.

Mr. GRASSLEY. Mr. President, I congratulate Senator ZORINSKY for successfully shepherding H.R. 4441 to this level of consideration. As a cosponsor of this legislation, I have been happy to lend my support to a bill that encourages private action in community-sponsored events.

The message that I as a fiscal conservative must necessarily convey is that more persons must get involved in community-based charitable programs as a means of rendering service to the less fortunate in our society. This legislation bolsters the concept of community service. Nonprofit veterans' and fraternal organizations would be exempted from the requirement of paying certain performance royalty fees for musical works which are used for charitable fundraising.

The intent of this legislation is to provide assistance only to organizations that have a primary purpose of providing charitable services to the community. In order to qualify for the exemption the performance must not be open to the public, as opposed to invitees, must accompany a social function and the proceeds must be used for a charitable purpose.

After reviewing the many worthwhile and needed activities that are conducted by groups such as the Lions' Clubs' work with seeing eye dogs, the youth program of the American Legion, the numerous activities for the elderly sponsored by the Moose lodges, as well as many other examples, it is clear to me that this legislation is invaluable. I urge all of my colleagues to support its enactment.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MISSING CHILDREN ACT—CONFERENCE REPORT

Mr. BAKER. Mr. President, will the minority leader advise me as to whether he is in a position to consider the conference report on the missing children's bill, H.R. 6976?

Mr. ROBERT C. BYRD. Mr. President, this side of the aisle is ready to proceed.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask that the Chair lay before the Senate the conference report on H.R. 6976.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6976) to amend title 28, United States Code, to require the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing persons (including unemancipated persons), having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, I was pleased to act as a conferee yesterday on the Missing Children's Act and I thank all my fellow colleagues who worked together to reach an agreement on this legislation. Particularly, Senator HAWKINS who has shepherded this legislation through the Congress. I have repeatedly asked myself how can we in Congress ever overcome the community shock and sadness felt over the disappearance and senseless death of a 3-year-old girl, Rachel Runyon? This girl, from my home State, Utah, was playing on her school ground when a man approached her, enticed her away with candy, and after a month search was found dead. Rachel's mangled body was found only 50 miles from her home. What torture she must have endured. What heartbreak her family and friends felt, unaware of where their helpless child might be, or of what help she might need. On November 9, 1980, 11-year-old Kim Peterson of South Salt Lake left his parents' home to see a man who wanted to buy his roller skates. He has not been seen since. Almost a year later, 4-year-old Danny Davis disappeared from a Salt Lake City supermarket where he was shopping with his grandfather. Police are still looking for Danny and his two abductors. Elements of these tragic crimes, where children virtually vanish, are repeated too many times each year in Utah and across the Nation.

This legislation is not a total cure-all for these senseless crimes. But it is an additional tool to help solve and possibly halt these senseless crimes. All too often, police officers are faced with the impossible task of solving these cases without clues. Families' lives are disrupted as they must deal with uncertainty. But this legislation provides a major component to aid in locating the children involved in the estimated annual 1.8 million missing persons cases. This act allows State and local law enforcement agencies to place the names of missing children on the National Crime Information Center computer. Enacted in the compromise agreement, parents will be able to ascertain whether or not their child's name has been placed into the computer files. In addition, the Attorney General may then acquire, collect, classify and preserve such information from parents. I have secured an agreement from the FBI that they will in fact collect such information from the parent if the State and local agencies do not comply with this legislation.

We have learned in Senate hearings that we have the technology and the computer time to develop this accessibility for local and State agencies to utilize. But when Kim Peterson and Danny Davis and others like them who have been missing so long, and their parents have suffered and agonized over their children, the Missing Children's Act cannot be implemented soon enough. We must do everything in our power to help these families find their children.

Mr. BOREN. Mr. President, I support Senator HAWKINS' bill which would establish a national clearinghouse to facilitate the location of missing children. I believe that this is an important initiative. It would provide a Federal information bank so that those unfortunate families whose offspring have disappeared could have some hope of finding them.

Fifty thousand children disappear every year whose families never find them. We can all imagine the agony of those parents who are unsuccessful in learning the fate of their lost offspring. I am aware of one such case in particular. At last year's Oklahoma State Fair, two young girls disappeared in mysterious circumstances. They are yet to be found. Hopefully, this sort of tragedy could be averted in the future by Senator HAWKINS' proposed legislation.

Missing children cause great grief for parents, families and communities. The benefits of establishing a national data bank on missing children far outweigh the relatively minuscule costs of such a program. The need for missing children legislation becomes strikingly evident when we compare the type of national information service that is currently supplied for missing cars. Surely children of America deserve at least the same attention as a mislaid automobile? The FBI presently collates computer information on stolen cars on a national basis, but holds information on only 10 percent of all missing children. Such a simple solution would make a meaningful difference to Americans distressed by the unexplained loss of a child. I urge my colleagues to join in the effort to eradicate unnecessary suffering in families across the country.

Mr. THURMOND. Mr. President, the conferees on S. 240, the Missing Children Act, have worked diligently and have come to a reasonable reconciliation of the differences between the House and the Senate.

The compromise reached will allow parents of missing children to determine from the FBI the existence of information pertaining to their child in the national crime information computer.

The compromise bill authorizes the Attorney General, through the FBI, to collect information concerning a missing child directly from parents in instances where local law enforcement authorities have failed to do so.

Judge William Webster, the Director of the FBI, has assured the conference committee that information obtained directly from parents will be placed in the National Crime Computer in instances where local law enforcement authorities have failed to do so.

I commend the conference committee for a job well done.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Now, Mr. President, let me have just a moment to get my bearings. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have a few items here that I believe have been cleared on both sides. First, I would inquire of the minority leader if he is prepared to proceed to the consideration of S. 1573, a House message on Lake Oswego, Oreg.

Mr. ROBERT C. BYRD. Yes, Mr. President, this side is ready and delighted to proceed.

Mr. BAKER. I thank the minority leader.

LAKE OSWEGO HYDROELECTRIC FACILITY

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1573.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1573) entitled "An act to exempt the Lake Oswego, Oregon, hydroelectric facility from part I of the Federal Power Act (Act of June 10, 1920) as amended, and for other purposes", do pass with the following amendment:

Page 1, line 7, after the period, insert:

Notwithstanding the preceding sentence, this Act shall not be construed to affect the applicability of the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.) to the Lake Oswego, Oregon, hydroelectric facility or to Lake Oswego.

The PRESIDING OFFICER. The Senator from Oregon.

LAKE OSWEGO LEGISLATION

Mr. HATFIELD. Mr. President, I rise to ask unanimous consent that the Senate agree to an amendment of S.

1573, added in the House, and pass the bill as amended.

This legislation passed this body unanimously in May of this year. It was introduced by me, and cosponsored by Senator PACKWOOD. The bill exempts Lake Oswego, a small lake near Portland, Oreg., from part I of the Federal Power Act of 1920 and section 408 of the Energy Security Act of 1980, thus bringing it outside of the regulatory reach of the Federal Energy Regulatory Commission.

S. 1573 was unanimously passed by the House with an amendment. The amendment was added during consideration of the bill by the House Energy and Commerce Committee. It was offered by the distinguished chairman of that committee, Mr. DINGELL, and, after striking the final words, states:

Provided, however, That nothing in this Act shall affect the applicability of the Fish and Wildlife Coordination Act to Lake Oswego.

The effect of this amendment is to make certain that in exempting Lake Oswego from FERC jurisdiction and part I of the Federal Power Act the triggers contained in part I of that act, which would normally bring into effect the Fish and Wildlife Coordination Act, are preserved in this legislation.

Senator PACKWOOD and I have no objection to this amendment. On the contrary, we applaud it, as do the homeowners around Lake Oswego, who make up the Lake Oswego Corp. As I read the Fish and Wildlife Coordination Act, what will be required as a consequence of this amendment is that the Lake Oswego authorities may consult with the Fish and Wildlife Service of the Department of the Interior, together with State of Oregon fish and wildlife preservation authorities, to determine the best way in which the natural habitat of Lake Oswego can be preserved.

Mr. President, I would like to take this opportunity to thank my distinguished colleagues, Mr. WYDEN and Mr. AUCOIN for their help in moving this important legislation through the House of Representatives. Together, we have removed a regulatory impediment from a homeowner's association that should have never become a problem in the first place.

I therefore move that we accept S. 1573 with the House amendment, and pass the bill unanimously.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

Mr. BAKER. Mr. President, before I call up the next item, I understand the distinguished chairman of the Budget Committee wishes me to yield to him.

SECOND BUDGET RESOLUTION FOR FISCAL YEAR 1983

Mr. DOMENICI. Mr. President, today October 1, 1982, is the first day of fiscal year 1983. I remind the Senate that today is also the day on which the Congress has an approved second budget resolution for the fiscal year which begins today.

The first budget resolution for fiscal year 1983 (S. Con. Res. 92) was approved by the House and Senate on June 23 1982. That resolution included a provision for its automatic conversion into the second budget resolution for fiscal year 1983. Specifically, section 7 of Senate Concurrent Resolution 92 reads as follows:

If Congress has not completed action by October 1, 1982, on the concurrent resolution on the budget required to be reported under section 310(a) of the Budget Act for the 1983 fiscal year, then, for the purposes of section 311 of such act, and section 4 of this resolution, this concurrent resolution shall be deemed to be the concurrent resolution required to be reported under section 310(a) of such act.

October 1 has arrived and Congress has not adopted a budget resolution revising Senate Concurrent Resolution 92. That resolution thus becomes the second budget resolution for fiscal year 1983, effective today.

Neither the House nor the Senate Budget Committee has reported a proposed revision of Senate Concurrent Resolution 92 to their respective bodies.

As chairman of the Senate Budget Committee, I feel I should explain briefly to my colleagues why I did not recommend a revision of Senate Concurrent Resolution 92 to the other members of the Budget Committee and why I do not recommend such revision to the full Senate.

Certain economic and technical changes in the budget outlook have been reported by both the Office of Management and Budget (OMB) and the Congressional Budget Office (CBO) since adoption of the first budget resolution. In the case of the economic outlook, the CBO has updated its projection of economic trends while the OMB basically adopted the first budget resolution economic assumptions. Although the midpoint of the CBO economic forecast is more pessimistic than the economic forecast used in constructing the first budget resolution, that forecast remains within the range of the latest CBO estimates. Given these facts, as well as the uncertainty in the economic outlook, I believe the best course of action is not to change the first budget resolution economic assumptions at this time.

In the case of the technical budget estimates, although the CBO technical revisions for fiscal year 1983–85 are sizable, two-thirds of the CBO revisions consist of technical reestimates known at the time of the first budget resolution and specifically rejected at that time by the Congress. Moreover, the OMB technical revisions for the same period are very small. Under these circumstances, I believe it unwise to change the technical estimates at this time.

Likewise, I believe that it would be unwise to change the policy assumptions of the first budget resolution at this time. The Congress has made considerable progress in implementing the policy assumptions of the budget resolution, but that effort is not yet completed for this session of Congress. The revenue and spending changes that the first budget resolution mandated through the reconciliation process are now complete, but the appropriations actions are far from complete. As we all know, we are now destined to have a lameduck session after the election at which further work will be done on fiscal year 1983 appropriations.

I believe the best course of action is to give the appropriations process the time necessary to run its course without the intrusion of policy changes in the middle of that action. To do otherwise would be totally confusing and unfair. Two days ago in a colloquy with me here on the Senate floor, the chairman of the Appropriations Committee reiterated his commitment to carry out his committee's portion of the policies incorporated in the budget resolution. I am confident that will be done with the same vigor as the authorizing committees discharged their responsibilities with respect to the reconciliation legislation. The Appropriations Committees should be given the chance to complete their work without the complexities which would be added if the budget resolution were revised.

If policy changes are required beyond those mandated in the existing budget resolution—and I suspect this may ultimately prove to be needed—it would be far better to make such changes during the next session of Congress in connection with deliberations on the first budget resolution for fiscal year 1984. That will allow the Appropriations Committees to complete their work this year under the same ground rules followed by the authorizing committees in the reconciliation process. And by next spring, when all of this year's policy actions will have been completed, the Congress will be in a much better position to judge what further policy changes will be required to carry out an appropriate Federal fiscal policy.

For all these reasons, I concluded that the second budget resolution for fiscal year 1983 should be provided through operation of section 7 of Senate Concurrent Resolution 92

rather than through approval of a new resolution.

ADMISSION OF CERTAIN CHILDREN OF UNITED STATES CITIZENS

Mr. BAKER. Next, Mr. President, I am prepared to take up a House message on S. 1698, if the minority leader has no objection.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I ask the Chair then to lay before the Senate a message from the House on S. 1698.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1698) entitled "An Act to amend the Immigration and Nationality Act to provide preferential treatment in the admission of certain children of United States citizens", do pass the following amendments:

Page 2, line 9, strike out "(h)(1)" and insert: "(g)(1)".

Page 2, line 10, strike out "(2)", and insert: "(21)(A)".

Page 2, line 14, strike out all after "shall," down to and including "subsection," in line 16, and insert: "if the conditions described in paragraph (2) are met,".

Page 2, line 17, strike out "Department", and insert: "secretary".

Page 2, strike out lines 18 to 25, and insert:

"(2) The Attorney General may approve a petition for an alien under paragraph (1) if—

"(A) he has reason to believe that the alien (i) was born in Korea, Vietnam, Laos, Kampuchea, or Thailand after 1950 and before the date of the enactment of this subsection, and (ii) was fathered by a United States citizen;

"(B) he has received an acceptable guarantee of legal custody and financial responsibility described in paragraph (4); and

"(C) in the case of an alien under 18 years of age, (i) the alien's placement with a sponsor in the United States has been arranged by an appropriate public, private, of State child welfare agency licensed in the United States and actively involved in the intercountry placement of children and (ii) the alien's mother or guardian has in writing irrevocably released the alien for emigration.".

Page 3, strike out lines 6 and 7, and insert: "determinations described in subparagraphs (A) and (C)(i) of paragraph (2); and".

Page 3, line 15, strike out "financial support", and insert "legal custody and financial responsibility".

Page 3, line 20, after "older.", insert: ", is of good moral character,".

Page 3, line 23, after "agrees", insert:

"(I) in the case of an alien under 18 years of age, to assume legal custody for the alien after the alien's departure to the United States and until the alien becomes 18 years of age, in accordance with the laws of the State where the alien and the sponsor will reside, and (II)".

Page 4, line 1, after "or", insert: "during the period".

Page 4, line 16, strike out "financial support," and insert: "legal custody and financial responsibility".

Page 4, line 20, strike out "of his estate", and insert: "or his estate".

Page 4, line 22, strike out "title II", and insert: "title 11".

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

AMENDMENT OF THE DISTRICT OF COLUMBIA SELF-GOVERNMENT AND GOVERNMENTAL REORGANIZATION ACT

Mr. BAKER. Mr. President, if the minority leader has no objection, I would like to proceed to H.R. 6276, calendar No. 864.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I thank the minority leader.

I ask that the Chair lay before the Senate H.R. 6276.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 6276) to amend the District of Columbia Self-Government and Governmental Reorganization Act to allow the issuance of revenue bonds to finance college and university programs which provide student educational loans.

The Senate proceeded to the consideration of the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 6276) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Next, Mr. President, is S. 2580, if the minority leader is prepared to consider it.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 925, S. 2580.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2580) to establish the Christopher Columbus Quincentenary Jubilee Commission.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary with amendments, as follows:

On page 3, line 10, strike "shall", through and including "Act." on line 11, and insert "shall be made by October 1, 1983, members of the Commission, except honorary members, shall take office on October 1, 1983";

On page 3, line 22, strike "one year after the date of the enactment of this Act", and insert "October 1, 1984";

On page 4, line 9, strike "two years after the date of the enactment of this Act", and insert "October 1, 1985";

On page 11, strike line 23, through and including page 12, line 2, and insert the following:

SEC. 11. (a) There are authorized to be appropriated to carry out the provisions of this Act, $200,000 for the fiscal year ending September 30, 1984, $250,000 per fiscal year for each of the fiscal years ending before October 1, 1992, and $50,000 for the period beginning on October 1, 1992, and ending on November 15, 1992.

(b) Amounts appropriated under this section for any fiscal year shall remain available until November 15, 1992.

On page 12, line 5, Strike "April 30, 1993" and insert "November 15, 1992".

So as to make the bill read:

S. 2580

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Christopher Columbus Quincentenary Jubilee Act".

DECLARATION OF POLICY

SEC. 2. As this Nation approaches the quincentennial of the voyages of discovery of Christopher Columbus, it is the policy of the Congress to celebrate and commemorate this anniversary through local, national, and international observances and activities planned, encouraged, coordinated, and conducted by a national commission representative of appropriate public and private authorities and organizations.

ESTABLISHMENT; COMPOSITION

SEC. 3. (a) There is established a commission to be known as the Christopher Columbus Quincentenary Jubilee Commission (hereinafter referred to as the "Commission") to plan, encourage, coordinate, and conduct the commemoration of the voyages of discovery of Christopher Columbus.

(b) The Commission shall be composed of thirty-one members, as follows:

(1) Four Members of the Senate shall be appointed by the President of the Senate.

(2) Four Members of the House of Representatives shall be appointed by the Speaker of the House of Representatives.

(3) Eighteen members who are not otherwise employees or officers of the United States shall be appointed by the President, no more than nine of whom may be identified with any one political party, and who are broadly representative of the people of the United States.

(4) The Secretary of State.

(5) The Secretary of the Interior.

(6) The Librarian of Congress.

(7) The Secretary of the Smithsonian Institution.

(8) The Chairman of the Federal Council on the Arts and Humanities.

(c) The Secretary of the Interior shall call the first meeting, for the purpose of electing a Chairman and Vice Chairman from among the members of the Commission described in clause (3) of subsection (b). The Commission may appoint honorary members, and may establish an Advisory Council to assist the Commission in its work.

(d) Appointments provided for in this section, with the exception of honorary members, shall be made by October 1, 1983. Members of the Commission, except honorary members, shall take office on October 1, 1983. Vacancies shall be filled in the same manner in which the original appointments were made.

DUTIES

SEC. 4. (a) It shall be the duty of the Commission to prepare a comprehensive program for commemorating the quincentennial of the voyages of discovery of Christopher Columbus, and to plan, encourage, coordinate, and conduct observances and activities commemorating events which took place primarily in 1492.

(b) The Commission may convene a national assembly not later than October 1, 1984. The national assembly shall consider and make recommendations to the Commission for the most fitting and appropriate activities to commemorate the quincentennial. The Commission may invite the chief executives of each of the several States and territories of the United States to appoint representatives to the national assembly. Appropriate Federal departments and agencies, State and local public bodies, learned societies, and historical, patriotic, philanthropic, civic, professional, and related organizations may also be invited to appoint representatives. The Commission shall establish procedures for the conduct of the national assembly.

(c) Not later than October 1, 1985, the Commission shall submit to Congress a comprehensive report incorporating its recommendations for the commemoration of the quincentennial of the voyages of discovery of Christopher Columbus. The report required by this subsection shall include—

(1) recommendations for appropriate activities for the commemoration, including—

(A) the production, publication, and distribution of books, pamphlets, films, and other educational materials focusing on the history, culture, and political thought of the lands Christopher Columbus traveled from and to during the voyages of discovery.

(B) bibliographical and documentary projects and publications,

(C) conferences, convocations, lectures, seminars, and other similar programs,

(D) the development of libraries, museums, and exhibits, including mobile exhibits,

(E) ceremonies and celebrations commemorating specific events,

(F) programs focusing on the international significance of the voyages of discovery of Christopher Columbus, and

(G) the issuance of commemorative coins, medals, and stamps;

(2) recommendations for the allocation of financial and administrative responsibility among the public agencies and private organizations recommended for participation by the Commission; and

(3) recommendations for such legislation and administrative actions as the Commission deems necessary to carry out the commemoration of the voyages of discovery.

The President shall transmit the Commission's report to the Congress together with such comments and additional recommendations for legislation and administrative actions as the President deems appropriate.

(d) The Commission shall prepare and submit to the Congress an annual report of the activities of the Commission, including an accounting of funds received and expended.

(e) In preparing its plans and programs, the Commission shall consider any related plans and programs developed by State and local, and foreign governments, and private groups.

(f) The Commission may designate special committees and invite representatives from such public agencies and private organizations to assist the Commission in carrying out this section as the Commission deems appropriate.

ADDITIONAL FUNCTIONS

SEC. 5. In carrying out the purposes of this Act, the Commission is authorized to provide for—

(1) the preparation, distribution, dissemination, exhibition, and sale of historical, commemorative, and informational materials and objects which will contribute to public awareness of, and interest in, the quincentennial;

(2) competitions, commissions, and awards for historical, scholarly, artistic, literary, musical, and other works, programs, and projects relating to the quincentennial; and

(3) a quincentennial calendar or register of programs and projects, and in other ways provide a central clearinghouse for information and coordination regarding dates, events, places, documents, artifacts, and personalities and quincentennial historical and commemorative significance.

COORDINATION OF EFFORTS

SEC. 6. (a) In carrying out the purposes of this Act, the Commission is authorized and directed to consult, cooperate with, and seek advice and assistance from appropriate Federal departments and agencies, State and local public bodies, foreign governments, learned societies, and historical, patriotic, philanthropic, civic, professional, and related organizations. Such Federal departments and agencies are authorized and requested to cooperate with the Commission in planning, encouraging, coordinating, and conducting appropriate commemorative activities.

(b) The Secretary of State shall undertake a study of appropriate cooperative actions which might be taken with foreign governments to preserve and develop historic sites related to the voyages of discovery of Christopher Columbus, at such time and in such manner as will insure that fitting observances and exhibits may be held at each such site during the commemoration. (In particular, the Secretary shall consult with the governments of the nations of the Western Hemisphere which share the Columbian heritage and with the governments of Italy and Spain with respect to joint participation in events in the United States and in such nations.) The Secretary shall submit the results of the study to the Commission, together with his recommendations, affording the Commission an opportunity to review the study, and to incorporate such of its findings and recommendations as the Commission may deem appropriate in the report required by section 3(d).

(c) The Chairman of the Federal Council on the Arts and Humanities, the Chairman of the National Endowment for the Arts, and the Chairman of the National Endowment for the Humanities are authorized and directed to cooperate with the Commission, especially in the encouragement and coordination of scholarly works and presentations focusing on the history, culture, and political thought of the period surrounding the voyages of discovery.

(d) The Librarian of Congress, the Secretary of the Smithsonian Institution, and the Archivist of the United States are authorized and directed to cooperate with the Commission, especially in the development and distribution of bibliographies, catalogs, and other materials relevant to the period.

DONATIONS

SEC. 7. (a) The Commission is authorized to accept donations of money, property, or personal services.

(b) All books, manuscripts, miscellaneous printed matter, memorabilia, relics, and other materials relating to the period and donated to the Commission may be deposited for preservation in national, State, or local libraries or museums or be otherwise disposed of by the Commission after consultation with the Librarian of Congress, the Secretary of the Smithsonian Institution, the Archivist of the United States, and the Administrator of General Services, as the case may be.

ADMINISTRATION

SEC. 8. (a)(1) The Chairman, with the advice of the Commission, shall appoint, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, a Director who will be compensated at level IV of the Executive Schedule established under section 5315 of such title and a Deputy Director who will be compensated at level V of the Executive Schedule established under section 5316 of such title. Such officers shall serve at the pleasure of the Chairman.

(2) The Commission shall delegate such powers and duties to the Director as may be necessary for the efficient operation and management of the Commission.

(b) Subject to such rules and regulations as may be adopted by the Commission, the Commission is authorized to—

(1) appoint and fix the compensation of such additional personnel as it deems advisable, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at such rates not in excess of the maximum rate for GS-18 of the General Schedule under section 5332 of such title;

(2) appoint such advisory committees as it deems necessary;

(3) procure services as authorized by section 3109 of title 5, United States Code;

(4) procure supplies, services, and property; make contracts; expend in furtherance of this Act funds appropriated, donated, or received in pursuance of contracts hereunder;

(5) enter into agreements with the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Chairman and the Administrator of the General Services Administration; and

(6) exercise such authority necessary to carry out efficiently and in the public interest the provision of this Act.

COMPENSATION

SEC. 9. The members of the Commission shall serve without compensation. All members of the Commission shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties.

PENALTY

SEC. 10. Any peson who, except as authorized under rules and regulations issued by the Commission, knowingly manufactures, reproduces, or uses any logos, symbols, or marks originated under authority of and certified by the Commission for use in connection with the commemoration of the quincentennial, or any facsimile thereof, or in such a manner as suggests any such logos, symbols, or marks, shall be fined not more than $250, or imprisoned not more than six months, or both. This section shall only apply in the case of such logos, symbols, and marks for which the Commission has published in the Federal Register a notification of certification.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 11. (a) There are authorized to be appropriated to carry out the provisions of this Act. $200,000 for the fiscal year ending September 30, 1984, $250,000 per fiscal year for each of the fiscal years ending before October 1, 1982, and $50,000 for the period beginning on October 1, 1992, and ending on November 15, 1992.

(b) Amounts appropriated under this section for any fiscal year shall remain available until November 15, 1992.

TERMINATION

SEC. 12. (a) A final report shall be made to the Congress no later than November 15, 1992, upon which date the Commission shall terminate.

(b) Any property acquired by the Commission remaining upon its termination may be used by the Secretary of the Interior for purposes of the National Park Service, or may be disposed of in accordance with the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.).

Mr. BAKER. Mr. President, I move that the committee amendments be agreed to en bloc.

The motion was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMPREHENSIVE FORFEITURE ACT OF 1982

Mr. BAKER. Mr. President, I would like to take up S. 2320, if the minority leader will agree.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate Calendar Order No. 749, S. 2320.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2320) to amend section 1963 of title 18, United States Code, and the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801 et seq.) to provide for the criminal foreiture of the proceeds of racketeering activity, to provide for the sanction of criminal forfeiture for all felony drug offenses, to facilitate forfeitures in drug related and racketeering cases, and for other purposes.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

(Subsequently, the foregoing action was initiated.)

Mr. BAKER. Mr. President, in connection with this item, I am advised that it is the wish of the managers that the Senate now proceed to consideration of H.R. 7140. In a moment I will ask that all after the enacting clause be stricken and the text of S. 2320 just adopted be substituted in lieu thereof. If the minority leader has no objection to that procedure, I am prepared to proceed.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. I thank the Senator.

Mr. President, I ask that the Senate now proceed to the consideration of H.R. 7140.

Mr. BAKER. Mr. President, if I may ask the indulgence of the minority leader, I am told that H.R. 7140 is in the Judiciary Committee.

I ask unanimous consent that the Judiciary Committee be discharged from further consideration of that measure and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7140) to amend the Controlled Substances Act and the Controlled Substances Import and Export Act to improve forfeiture provisions and strengthen penalties for controlled substances offenses, and for other purposes.

UP AMENDMENT NO. 1392

Mr. BAKER. Mr. President, I send to the desk an amendment to this measure, on behalf of the distinguished Senator from South Carolina (Mr. THURMOND), and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. THURMOND, proposes an unprinted amendment numbered 1392.

Mr. BAKER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection , it it so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert the following:

"TITLE—FORFEITURE

"SEC. . This title may be cited as the "Comprehensive Forfeiture Act of 1982".

"PART A

"SEC. . Section 1963 of title 18 of the United States Code is amended to read as follows:

"§ 1963. Criminal penalties

"(s) Whoever violates any provision of section 1962 of this chapter—

"(1) shall be fined not more than $25,000 or imprisoned for not more than twenty years, or both; and

"(2) shall forfeit to the United States any property, irrespective of any provision of State law—

"(A) constituting, or derived from, any interest in or contribution to an enterprise he has acquired, maintained, established, operated, controlled, conducted, or participated in the conduct of, in violation of section 1962 of this chapter;

"(B) constituting a means by which he has exerted influence or control over any enterprise he has acquired, maintained, established, operated, controlled, conducted, or participated in the conduct or control of, in violation of section 1962 of this chapter; and

"(C) constituting, or derived from, any proceeds which he obtained, directly or indirectly, from racketeering activity or unlawfurl debt collection in violation of section 1962 of this chapter.

The court, in imposing sentence on such person, shall order, in addition to any other sentence imposed pursuant to this section, that he forfeit to the United States all property described in paragraph (2).

"(b) Property subject to criminal forfeiture under this section includes—

"(1) real property, including things growing on, affixed to, and found in land; and

"(2) tangible and intangible personal property, including rights, privileges, interests, claims, and securities including, but not limited to—

"(A) any position, office, appointment, tenure, commission, or employment contract of any kind which the incumbent acquired or maintained in violation of section 1962 of this chapter, through which the incumbent conducted, or participated in or facilitated the conduct of, the affairs of an enterprise in violation of section 1962 of this chapter, or which afforded the incumbent a source of influence or control over the affairs of an enterprise which was exercised in violation of section 1962 of this chapter;

"(B) any compensation, right or benefit derived from a position, office, appointment, tenure, commission, or employment contract described in subparagraph (A) which the incumbent obtained, directly or indirectly, through a pattern of racketeering activity or unlawful debt collection in violation of section 1962 of this chapter, or which accrued to the incumbent during the period that he controlled, influenced, conducted, or participated in or facilitated the conduct of, the affairs of the enterprise in violation of section 1962 of this chapter; and

"(C) any amount payable or paid under any contract for goods or services which was awarded or performed through a pattern of racketeering activity or unlawful debt collection.

"(c) All right, title, and interest in property described in subsection (a)(2) vests in the United States upon the commission of the act giving rise to forfeiture under this sec-

tion. Any such property that is held in the name of, or possessed by, a person other than the defendant may be the subject of a special verdict of forfeiture and thereafter shall by ordered forfeited to the United States: *Provided*, That the Attorney General shall not direct disposition of any such property if, in a proceeding under subsection (h), the person establishes to the Attorney General by evidence contained in a petition for remission or mitigation of forfeiture, that—

"(1) the person was a bona fide purchaser of the property for value; and

"(2) the person was reasonably with cause to believe that the property was of the type described in subsection (a)(2).

"(d) If any of the property described in subsection (a)(2)—

"(1) cannot be located,

"(2) has been transferred to, sold to, or deposited with, third party,

"(3) has been placed beyond the jurisdiction of the court,

"(4) has been substantially diminished in value by any act or omission of the defendant, or

"(5) has been commingled with other property which cannot be divided without difficulty, the court shall order the forfeiture of any other property of the defendant up to the value of any property described in paragraphs (1) through (5).

"(e)(1) Upon application of the United States, the court may, after a hearing with respect to which any adverse parties have been given reasonable notice and opportunity to participate, enter a restraining order or injunction, require the execution of a satisfactory performance bond, or take any other action to preserve the availability of property described in subsection (a)(2) for forfeiture under this section--

"(A) upon the filing of an indictment or information charging a violation of section 1962 of this chapter and alleging that the property with respect to which the order is sought would, in the event of conviction, be subject to forfeiture under this section; or

"(B) prior to the filing of such an indictment or information, if the court determines—

"(i) that there is probable cause to believe that the property with respect to which the order is sought would, in the event of conviction, be subject to forfeiture under this section and that the property is in the possession or control of the party against whom the order is to be entered, and

"(ii) that the party against whom the order is to be entered has failed to demonstrate that the entry of the requested order would result in substantial and irreparable harm or injury to him that outweighs the need to preserve the availability the property through the entry of the requested order: *Provided, however,* That an order entered pursuant to subparagraph (B) shall be effective for not more than ninety days, unless extended by the court for good cause shown or unless an indictment or information described in subparagraph (A) has been filed.

"(2) Upon application of the United States, a temporary restraining order to preserve the availability of property described in subsection (a)(2) for forfeiture under this section may be granted without notice to the adverse party or his attorney if—

"(A) an indictment or information described in paragraph (1)(A) has been filed or if the court determines that there is probable cause to believe that the property with respect to which the order is sought would, in the event of conviction, be subject to forfeiture under this section and that the property is in the possession or control of the party against whom the order is to be entered; and

"(B) the court determines that the nature of the property is such that it can be concealed, disposed of, or placed beyond the jurisdiction of the court before the adverse party may be heard in opposition.

A temporary order granted without notice to the adverse party shall expire within such time, not to exceed ten days, as the court fixes, unless extended for good cause shown or unless the party against whom it is entered consents to an extension for a longer period. If a temporary restraining order is granted without notice to the adverse party, a hearing concerning the entry of an order under paragraph (1) shall be held at the earliest possible time and prior to the expiration of the temporary order.

"(f) Upon conviction of a person under this section, the court shall enter a judgment of forfeiture of the property to the United States and shall also authorize the Attorney General to seize all property ordered forfeited upon such terms and conditions as the court shall deem proper. Following the entry of an order declaring the property forfeited, the court may, upon application of the United States, enter such appropriate restraining orders or injunctions, require the execution of satisfactory performance bonds, appoint receivers, conservators, appraisers, accountants, or trustees, or take any other action to protect the interest of the United States in the property ordered forfeited. Any income accruing to or derived from an enterprise, or an interest in an enterprise, ordered forfeited under this section may be used to offset ordinary and necessary expenses to the enterprise which are required by law, or which are necessary to protect the interests of the United States or third parties.

"(g) Following the seizure of property ordered forfeited under this section, the Attorney General shall direct the disposition of the property by sale or any other commercially feasible means, making due provision for the rights of any innocent persons. Any property right or interest not exercisable by, or transferable for value to, the United States shall expire and shall not revert to the defendant, nor shall the defendant or any person acting in concert with him or on his behalf be eligible to purchase forfeited property at any sale held by the United States. Upon application of a person, other than the defendant or a person acting in concert with him or on his behalf, the court may restrain or stay the sale or disposition of the property pending the conclusion of any appeal of the criminal case giving rise to the forfeiture, if the applicant demonstrates that proceeding with the sale or disposition of the property will result in irreparable injury, harm or loss to him. The proceeds of any sale or other disposition of property forfeited under this section and any moneys forfeited shall be used to pay all proper expenses for the forfeiture and the sale, including expenses of seizure, maintenance and custody of the property pending in disposition, advertising and court costs. The Attorney General shall forward to the Treasurer of the United States for deposit in the general fund of the United States Treasury any amounts of such proceeds or moneys remaining after the payment of such expenses.

"(h) With respect to property ordered forfeited under this section, the Attorney General is authorized to—

"(1) grant petitions for mitigation, or remission of forfeiture, restore forfeited property to victims of a violation of this chapter, or take any other action to protect the rights of innocent persons which is in the interest of justice and which is not inconsistent with the provisions of this chapter;

"(2) compromise claims arising under this chapter;

"(3) award compensation to persons providing information resulting in a forfeiture under this section;

"(4) direct the disposition by the United States of all property ordered forfeited under this section by public sale or any other commercially feasible means, making due provision for the rights of innocent persons; and

"(5) take appropriate measures necessary to safeguard and maintain property ordered forfeited under this section pending its disposition.

A person who has filed a petition for remission or mitigation of forfeiture under this subsection, and who is dissatisfied with the Attorney General's decision regarding his petition, may obtain review of the Attorney General's decision in the district court in which the order of forfeiture was entered. The court shall set aside the decision of the Attorney General if it finds, based on the record of the petition proceedings, that the decision is arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law.

"(i) The Attorney General shall within one hundred and eighty days of the enactment of this Act promulgate regulations with respect to—

"(1) making reasonable efforts to provide notice to persons who may have an interest in property ordered forfeited under this section;

"(2) granting petitions for remission or mitigation of forfeiture;

"(3) the restitution of property to victims of an offense petitioning for remission or mitigation of forfeiture under this chapter;

"(4) the disposition by the United States of forfeited property by public sale or other commercially feasible means;

"(5) the maintenance and safekeeping of any property forfeited under this section pending its disposition; and

"(6) the compromise of claims arising under this chapter.

Pending the promulgation of such regulations, all provisions of law relating to the disposition of property, or the proceeds from the sale thereof, or the remission or mitigation of forfeitures for violation of the customs laws, and the compromise of claims and the award of compensation to informers in respect of such forfeitures shall apply to forfeitures incurred, or alleged to have been incurred, under the provisions of this section, insofar as applicable and not inconsistent with the provisions hereof. Such duties as are imposed upon the Customs Service or any person with respect to the disposition of property under the customs law shall be performed under this chapter by the Attorney General.

"(j) Except as provided in this section, no party claiming an interest in property subject to forfeiture under this section may—

"(1) intervene in a trial or appeal of a criminal case involving the forfeiture of such property under this section; or

"(2) commence an action at law or equity against the United States concerning the validity of his alleged interest in the property, prior to or during the trial or appeal of the

criminal case, or during the period in which any petition for remission or mitigation of forfeiture is pending before the Attorney General.

"(k) The district courts of the United States shall have jurisdiction to enter orders as provided in this section without regard to the location of any property which may be subject to forfeiture under this section or which has been ordered forfeited under this section.

"(l) In order to facilitate the identification or location of property declared forfeited and to facilitate the disposition of petitions for remission or mitigation of forfeiture, after the entry of an order declaring property forfeited to the United States the court may, upon application of the United States, order that the testimony of any witness relating to the property forfeited be taken by deposition and that any designated book, paper, document, record, recording, or other material not privileged be produced at the same time and place, in the same manner as provided for the taking of depositions under rule 15 of the Federal Rules of Criminal Procedure.".

PART B

SEC. . Part D of title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970 is amended by adding at the end thereof the following new section:

"CRIMINAL FORFEITURES

"PROPERTY SUBJECT TO CRIMINAL FORFEITURE

"SEC. . Any person convicted of a violation of this title or title III punishable by imprisonment for more than one year shall forfeit to the United States, irrespective of any provision of State law—

"(1) any property constituting, or derived from, any proceeds he obtained, directly or indirectly as the result of such violation;

"(2) any of this property used, or intended to be used, in any manner or part, to commit, or to facilitate the commission of, such violation; and

"(3) in the case of a person convicted of engaging in a continuing criminal enterprise in violation of section 408 of this title (21 U.S.C. 848), he shall forfeit, in addition to any property described in paragraphs (1) or (2), any of his interest in, claims against, and property or contractual rights affording a source of control over, the continuing criminal enterprise.

The court, in imposing sentence on such person, shall order, in addition to any other sentence imposed pursuant to this title or title III, that he forfeit to the United States all property described in this subsection.

"Meaning of Term 'Property'

"(b) Property subject to criminal forfeiture under this section includes—

"(1) real property, including things growing on, affixed to, and found in land; and

"(2) tangible and intangible personal property, including rights, privileges, interests, claims and securities.

"Third Party Transfers

"(c) All right, title, and interest in property described in subsection (a) vests in the United States upon the commission of the act giving rise to forfeiture under this section. Any such property that is held in the name of, or possessed by, a person other than the defendant may be the subject of a special verdict of forfeiture and thereafter shall be ordered forfeited to the United States: *Provided,* That the Attorney General shall not direct disposition of any such property if, in a proceeding under subsection (i), the person establishes to the Attorney General by evidence contained in a petition for remission or mitigation of forfeiture, or the Attorney General otherwise has reason to known, that—

"(1) the person was a bona fide purchaser of the property for value; or

"(2) the person was reasonably without cause to believe that the property was of the type described in subsection (a).

"Substitute Assets

"(d) If any of the property described in subsection (a)—

"(1) cannot be located,

"(2) has been transferred to, sold to, or deposited with a third party,

"(3) has been placed beyond the jurisdiction of the court,

"(4) has been substantially diminished in value by any act or omission of the defendant, or

"(5) has been commingled with other property which cannot be divided without difficulty,

the court shall order the forfeiture of any other property of the defendant up to the value of any property described in paragraphs (1) through (5).

"Protective Orders

"(e)(1) Upon application of the United States, the court may, after a hearing with respect to which any adverse parties have been given reasonable notice and opportunity to participate, enter a restraining order or injunction, require the execution of a satisfactory performance bond, or take any other action to preserve the availability of property described in subsection (a) for forfeiture under this section—

"(A) upon the filing of an indictment or information charging a violation of this title or title III for which criminal forfeiture may be ordered under this section and alleging that the property with respect to which the order is sought would, in the event of conviction, be subject to forfeiture under this section; or

"(B) prior to the filing of such an indictment or information, if the court determines—

"(i) that there is probable cause to believe that the property with respect to which the order is sought would, in the event of conviction, be subject to forfeiture under this section and that the property is in the possession or control of the party against whom the order is to be entered, and

"(ii) that the party against whom the order is to be entered has failed to demonstrate that the entry of the requested order would result in substantial and irreparable harm or injury to him that outweighs the need to preserve the availability of the property through the entry of the requested order:

Provided, however, That an order entered pursuant to subparagraph (B) shall be effective for not more than ninety days, unless extended by the court for good cause shown or unless an indictment or information described in subparagraph (A) has been filed.

* * *

"(A) an indictment or information described in paragraph (1)(A) has been filed or if the court determines that there is probable cause to believe that the property with respect to which the order is sought would, in the event of conviction, be subject to forfeiture under this section and that the property is in the possession or control of the party against whom the order is to be entered; and

"(B) the court determines that the nature of the property is such that it can be concealed, disposed of, or placed beyond the jurisdiction of the court before the adverse party may be heard in opposition.

A temporary order granted without notice to the adverse party shall expire within such time, not to exceed ten days, as the court fixes, unless extended for good cause shown or unless the party against whom it is entered consents to an extension for a longer period. if a temporary restraining order is granted without notice to the adverse party, a hearing concerning the entry of an order under paragraph (1) shall be held at the earliest possible time and prior to the expiration of the temporary order.

"Warrant of Seizure

"(f) The Government may request the issuance of a warrant authorizing the seizure of property subject to forfeiture under this section in the same manner as provided for a search warrant. If the court determines that there is probable cause to believe that the property to be seized would, in the event of conviction, be subject to forfeiture and that an order under subsection (f) may not be sufficient to assure the availability of the property for forfeiture, the court shall issue a warrant authorizing the seizure of such property.

"Execution

"(g) Upon entry of an order of forfeiture under this section, the court shall authorize the Attorney General to seize all property ordered forfeited upon such terms and conditions as the court shall deem proper. Following entry of an order declaring the property forfeited, the court may, upon application of the United States, enter such appropriate restraining orders or injunctions, require the execution of satisfactory performance bonds, appoint receivers, conservators, appraisers, accountants, or trustees, or take any other action to protect the interest of the United States in the property ordered forfeited. Any income accruing to or derived from property ordered forfeited under this section may be used to offset ordinary and necessary expenses to the property which are required by law, or which are necessary to protect the interests of the United States or third parties.

"Disposition of Property

"(h) Following the seizure of property ordered forfeited under this section, the Attorney General shall direct the disposition of the property by sale or any other commercially feasible means, making due provision for the rights of any innocent persons. Any property right or interest not exercisable by, or transferable for value to, the United States shall expire and shall not revert to the defendant, nor shall the defendant or any person acting in concert with him or on his behalf be eligible to purchase forfeited property at any sale held by the United States. Upon application of a person, other than the defendant or a person acting in concert with him or on his behalf, the court may restrain or stay the sale or disposition of the property pending the conclusion of any appeal of the criminal case giving rise to the forfeiture, if the applicant demonstrates that proceeding with the sale or disposition of the property will result in irreparable injury, harm, or loss to him.

"Authority of the Attorney General

"(i) With respect to property ordered forfeited under this section, the Attorney General is authorized to—

"(1) grant petitions for mitigation or remission of forfeiture, restore forfeited property to victims of a violation of this chapter, or take any other action to protect the rights of innocent persons which is in the interest of justice and which is not inconsistent with the provisions of this chapter;

"(2) compromise claims arising under this chapter;

"(3) award compensation to persons providing information resulting in a forefeiture under this section;

"(4) direct the disposition of the United States, in accordance with the provisions of section 511(e) of this title (21 U.S.C. 881(e)), of all property ordered forfeited under this section by public sale or any other commercially feasible means, making due provision for the rights of innocent persons; and

"(5) take appropriate measures necessary to safeguard and maintain property ordered forfeited under this section pending its disposition.

A person who has filed a petition for remission or mitigation of forfeiture under this subsection, and who is dissatisfied with the Attorney General's discision regarding his petition, may obtain review of the Attorney General's decision in the district court in which the order of forefeiture was entered. The court shall set aside the decision of the Attorney General if it finds, based on the record of the petition proceedings, that the decision is arbitrary, capricious, and abuse of discretion, or otherwise not in accordance with law.

"Applicability of Civil Forfeiture Provisions

"(j) Except to the extent that they are inconsistent with the provisions of this section, the provisions of section 511(d) of this title (21 U.S.C. 881(d)) shall apply to a criminal forfeiture under this section.

"Bar on Intervention; Exhaustion of Administrative Remedies

"(k) Except as provided in this section, no party claiming an interest in property subject to forfeiture under this section may—

"(1) intervene in a trial or appeal of a criminal case involving the forfeiture of such property under this section; or

"(2) commence an action at law or equity against the United States concerning the validity of his alleged interest in the property, prior to or during the trial or appeal of the criminal case, or during the period in which any petition for remission or mitigation of forfeiture is pending before the Attorney General.

"Jurisdiction to Enter Orders

"(l) The district courts of the United States shall have jurisdiction to enter orders as provided in this section without regard to the location of any property which may be subject to forfeiture under this section or which has been ordered forfeited under this section.

"Depositions

"(m) In order to facilitate the identification and location of property declared forfeited and to facilitate the disposition of petitions for remission or mitigation of forfeiture, after the entry of an order declaring property forfeited to the United States the court may, upon application of the United States, order that the testimony of any witness relating to the property forfeited be taken by deposition and that any designated book, paper, document, record, recording, or other material not privileged be produced at the same time and place, in the same manner as provided for the taking of depositions under rule 15 of the Federal Rules of Criminal Procedure.".

SEC. . Section 304 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 824) is amended by adding at the end of subsection (f) the following sentence: "All right, title, and interest in such controlled sustances shall vest in the United States upon a revocation order becoming final.".

SEC. . Section 408 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 848) is amended—

(a) in subsection (a)—

(1) by striking out "(1)";

(2) by striking out "paragraph (2)" each time it appears, and inserting in lieu thereof "section 413 of this title"; and

(3) by striking out paragraph (2); and

(b) by striking out subsection (d).

SEC. . Section 511 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 881) is amended—

(a) in subsection (a) by inserting at the end thereof the following new subsection:

"(7) All real property, including any right, title, and interest in the whole of any lot or tract of land and any appurtenances or improvements, which is used, or intended to be used, in any manner or part, to commit, or to facilitate the commission of, a violation of this title punishable by more than one year's imprisonment, except that no property shall be forfeited under this paragraph, to the extent of an interest of an owner, by reason of any act or omission established by that owner to have been committed or omitted without the knowledge or consent of that owner.";

(b) in subsection (b)—

(1) by inserting "civil or criminal" after "Any property subject to"; and

(2) by striking out in paragraph (4) "has been used or is intended to be used in violation of" and inserting in lieu thereof "is subject to civil or criminal forfeiture under ";

(c) in subsection (c)—

(1) by inserting in the second sentence "any of" after "Whenever property is seized under"; and

(2) by inserting in paragraph (3) ", if practicable," after "remove it";

(d) in subsection (d) by inserting "any of" after "alleged to have been incurred, under";

(e) in subsection (e)—

(1) by inserting "civilly or criminally" in the first sentence after "Whenever property is"; and

(2) by striking out in paragraph (3) "remove it for disposition" and inserting in lieu thereof "and dispose of it"; and

(f) by inserting at the end thereof the following new subsections:

"(h) All right, title, and interest in property described in subsection (a) shall vest in the United States upon commission of the act giving rise to forfeiture under this section.

"(i) Pending, or upon, the filing of an indictment or information charging a violation of this title or title III for which criminal forfeiture may be ordered under section 413 of this title, and alleging that property would, in the event of conviction, be subject to criminal forfeiture, any civil forfeiture proceeding concerning such property commenced under this section shall, for good cause shown, be stayed pending disposition of the criminal case.".

SEC. . Part A of title III of the Comprehensive Drug Abuse Prevention and Control Act of 1970 is amended by adding at the end thereof the following new section:

"CRIMINAL FORFEITURES

" 'SEC. 1017. Section 413 of title II, relating to criminal forfeitures, shall apply in every respect to a violation of this title punishable by imprisonment for more than one year.'.

"SEC. . The table of contents of the Comprehensive Drug Abuse Prevention and Control Act of 1970 is amended—

"(a) by adding immediately after

"Sec. . Applicability of treaties and other international agreements."

the following new item:

"Sec. . Criminal forfeitures.'; and

"(b) by adding immediately after

"Sec. 1016. Authority of Secretary of the Treasury."

the following new item:

"Sec. 1017. Criminal forfeitures.".

"PART C

"SEC. . (a) Section 511 (e)(1) of the Comprehensive Drug Abuse Prevention and Control Act of 1972 (21 U.S.C. 881) is amended by adding after "retain the property for official use" the following: "or transfer the custody or ownership of any forfeited property to any Federal, State, or local agency pursuant to section 616 of the Tariff Act of 1930 (19 U.S.C. 1616)".

"(b) Section 511 (e) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 881 (e)) is further amended by striking out all that follows 'this subchapter shall be' and inserting in lieu thereof the following: deposited in the Drug Assets Forfeiture Fund.

"SEC. . The Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 881 et seq.) is amended by inserting after section 516 the following new section to read as follows:

"§ 517. Drug assets forfeiture fund

"(a) There is hereby established in the Treasury of the United States a special account that shall be entitled the 'Drug Assets Forfeiture Fund.' This account shall be available without fiscal year limitations for the following purposes of the United States Department of Justice:

"(1) the payment of all expenses necessary to inventory, safeguard and maintain property under seizure, detention or forfeited pursuant to any provision of this Act. Expenses of maintenance may include payments for contract services and payments to reimburse any Federal, State, or local agency for any expenditures made to perform the foregoing functions;

"(2) the payment of awards for information or assistance leading to a civil or criminal forfeiture under, or regarding any violation of, this Act, at the discretion of the Attorney General;

"(3) the payment of valid liens and mortgages against any property that has been forfeited pursuant to any provision of this Act, subject to the discretion of the Attorney General to determine the validity of any such lien or mortgage and the amount of payment to be made.

"(b) The Drug Assets Forfeiture Fund shall be initially funded by any sums not otherwise obligated from the 1981 and 1982 fiscal year appropriations of the United States Department of Justice.

"(c) All proceeds from the sale or other disposition of property forfeited under any provision of this Act and any seized and forfeited currency shall be deposited to the Drug Assets Forfeiture Fund.

"(d) At the end of each calendar quarter, any sums in the Fund in excess of ten million dollars shall be transferred to the gen-

eral fund of the Treasury of the United States.

"(e) Amounts in the Fund which are not currently needed for the purposes of this subsection shall be kept on deposit or invested in obligations of, or guaranteed by, the United States.

"(f) Within sixty days of the end of each fiscal year, the Attorney General shall report to the appropriate oversight committee of the Congress on the receipts and disbursement of the Drug Assets Forfeiture Fund.

"(g) The provisions relating to payments to and disbursements from the Drug Assets Forfeiture Fund established by this section shall apply to all property disbursed of or in Department of Justice custody on or after the effective date of the Violent Crime and Drug Enforcement Improvement Act of 1982.

PART D

"SEC. . Section 607 of the Tariff Act of 1930 (19 U.S.C. 1607) is amended to read as follows:

"§ 607. Seizure; value $100,000 or less, prohibited articles, transporting conveyances

"If—

"(1) the value of such seized vessel, vehicle, aircraft, merchandise, or baggage does not exceed $100,000;

"(2) such seized merchandise consists of articles the importation of which is prohibited; or

"(3) such seized vessel, vehicle, or aircraft was used to import, export, or otherwise transport or store any controlled substances.

the appropriate customs officer shall cause a notice of the seizure of such articles and the intention to forfeit and sell or otherwise dispose of the same according to law to be published for at least three successive weeks in such manner as the Secretary of the Treasury may direct. Written notice of seizure together with information on the applicable procedures shall be sent to each party who appears to have an interest in the seized article.".

"SEC. . Section 608 of the Tariff Act of 1930 (19 U.S.C. 1608) is amended by striking out '$250' in the second sentence and inserting in lieu thereof the following: '$2,500 or ten percent of the value of the claimed property, whichever is less,'.

"SEC. . Section 609 of the Tariff Act of 1930 (19 U.S.C. 1609) is amended by striking out 'after deducting the actual expenses of seizure, publication, and sale in the Treasury of the United States.' and inserting in lieu thereof the following: 'into the Customs Forfeiture Fund.'.

"SEC. . Section 610 of the Tariff Act of 1930 (19 U.S.C. 1610) is amended by {triking out 'If the value of any vessel, vehicle, merchandise, or baggage so seized is greater than $10,000,' and substituting in lieu thereof the following: 'If any vessel, vehicle, aircraft, merchandise, or baggage is not subject to the procedure set forth in section 607.'.

"SEC. . Section 612 of the Tariff Act of 1930 (19 U.S.C. 1612) is amended by—

"(1) inserting 'aircraft,' immediately after 'vehicle,' wherever it appears in the section;

"(2) strking out 'and the value of such vessel, vehicle, merchandise, or baggage as determined under section 605 does not exceed $10,000,' in the first sentence and inserting in lieu thereof the following: 'and the article is subject to the provisions of section 607 of this Act,'; and

"(3) striking out 'if such values of such vessel, vehicle, merchandise, or baggage exceed $10,000,' in the second sentence and inserting in lieu thereof the following: 'If the article is not subject to the provisions of section 607 of this Act.'.

SEC. . (a) Section 613 (a) of the Tariff Act of 1930 (19 U.S.C. 1613(a)) is amended by striking out "disposed of as follows:" and clauses (1), (2), and (3), and inserting in lieu thereof the following: "deposited in the Customs Forfeiture Fund.".

"(b) Section 613 (b) of the Tariff Act of 1938 (19 U.S.C. 1613 (b)) is amended by striking out "(a) (1) and (2) of this section" and inserting in lieu thereof '(a) (4) of section 613a of this Act (19 U.S.C. 1613a (a) (4)'.

"SEC. The Tariff Act of 1930 is amended by adding a new section immediately after section 613 (19 U.S.C. 1613) to read as follows:

"§ 613a. Customs forfeiture fund

"(a) There is hereby established in the Treasury of the United States a special account for the United States Customs Service that shall be entitled the 'Customs Forfeiture Fund'. This account shall be available without fiscal year limitations for the following purposes of the United States Customs Service—

"(1) the payment of all expenses necessary to inventory, safeguard, and maintain property under seizure, detention, or forfeited pursuant to any law enforced or administered by the United States Customs Service, including payments for expenses of maintenance, contract services, and to reimburse any Federal, State, or local agency for any expenditures made for the maintenance of property;

"(2) the payment of awards of compensation to informers under section 619 of the Tariff Act of 1930, as amended;

"(3) the payment by appropriate customs officers for the purchase of information concerning violations or possible violations of any law enforced or administered by the Customs Service; and

"(4) the payment to persons whom the appropriate customs officer determines hold valid—

"(A) liens for freight, charges, and contributions in general average, notice of which has been filed with the appropriate customs officer according to law; and

"(B) liens against property that has been forfeited pursuant to any law enforced or administered by the United States Customs Service,

subject to the condition that no payment to a lienholder shall exceed the net proceeds of the sale or, where the property is retained or transferred for official use, the appraised value less all applicable expenses.

"(b) The Customs Forfeiture Fund shall be intially funded by any sums not otherwise obligated from the 1981 and 1982 fiscal year appropriations of the United States Customs Service.

"(c) All proceeds from the sale or other disposition of property forfeited under any law enforced or administered by the Customs Service and any seized and forfeited currency shall be deposited to the Customs Forfeiture Fund.

"(d) At the end of each calendar quarter, any sums in the Fund in excess of $10,000,000 shall be transferred to the general fund of the Treasury of the United States.

"(e) Amounts in the Fund which are not currently needed for the purposes of this subsection shall be kept on deposit or invested in obligations of, or guaranteed by, the United States.

"(f) Within sixty days of the end of each fiscal year, the Commissioner of Customs will report to the appropriate oversight committee of the Congress on the receipts and disbursement of the Customs Forfeiture Fund.

"(g) The provisions relating to payments and disbursements from the Fund established by this section shall apply to all property disbursed of or in Customs custody on or after the effective date of this Act."

"SEC. . A new section, section 616 is added to the tariff act of 1930 (19 U.S.C. 1616) to read as follows:

"§ 616. Disposition of forfeited property

"(a) Notwithstanding any other provision of law, the Commissioner is authorized to retain forfeited property for official use or to transfer such forfeited property on such terms or conditions as he may determine to—

"(1) any other Federal agency; or

"(2) to any State or local governmental agency which routinely assists in the enforcement of the laws of the United States or participated in any of the acts which led to the property being seized.

The United States shall not be liable in any action arising out of the use of any property the custody of which was transferred pursuant to this section to any non-Federal agency.

"(b) The Secretary of the Treasury is authorized to order the discontinuance of any Federal forfeiture proceedings in favor of the institution of forfeiture proceedings by State or local authorities under an appropriate State or local statute when he determines that such action is in the best interest of the United States. After the filing of a complaint for forfeiture in a United States District Court, the appropriate attorney for the Department of Justice shall also have the authority to seek a voluntary dismissal of the complaint in favor of State or local action when he deems it to be in the best interest of the United States.

"(c) Whenever forfeiture proceedings are discontinued by the Federal Government in favor of State or local proceedings, the Secretary is authorized to transfer custody and possession of the seized property to the appropriate State or local official immediately upon the initiation of the proper actions by such officials.

"(d) Whenever forfeiture proceedings are discontinued by the Federal Government in favor of State of local proceedings, notice shall be sent to all known interested parties advising them of such a decision. The United States shall not be liable in any action arising out of the seizure, detention, and transfer of seized property to State or local officials.".

SEC. . Section 619 of the Tariff Act of 1932 (19 U.S.C. 1619) is amended by striking out "$50,000 wherever it appears and inserting in lieu thereof '$250,000".

"SEC. (a) The Tariff Act of 1930 is amended by adding a new section 589, to read as follows:

"§ 589. Arrest authority of customs officers

"Subject to the direction of the Secretary of the Treasury, an officer of the Customs as defined in section 401 (i) of this Act, as amended, may—

"(1) carry a firearm;

"(2) execute and serve any order, warrant, subpena, summons, or other process issued under the authority of the United States for arrest, search or seizure, or production of evidence;

"(3) make an arrest without a warrant for any offense against the United States committed in the officer's presence or for a felony, cognizable under the laws of the United States committed outside the officer's presence if the officer has reasonable grounds to believe that the person to be arrested has committed or is committing a felony;

"(4) perform any other law enforcement duty that the Secretary of the Treasury may designate.".

"(b) Section 7607 of the Internal Revenue Act of 1954 (26 U.S.C. 7607) is repealed.

"SEC. . Sections 602, 605, 606, 608, 609, 611, 613, 614, 615, 618, and 619 (19 U.S.C. 1605, 1606, 1608, 1609, 1611, 1613, 1614, 1615, 1618, and 1619) of the Tariff Act of 1932 are amended by inserting the word 'aircraft,' immediately after the words 'vehicle' or 'vehicles,' wherever they appear."

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask that the Senate request a conference with the House, insist on its amendment, and that the Chair be authorized to appoint the conferees on behalf of the Senate.

The motion was agreed to, and the Chair appointed Mr. THURMOND, Mr. LAXALT, Mr. HATCH, Mr. BIDEN, and Mr. DECONCINI conferees on the part of the Senate.

Mr. BAKER. Mr. President, I ask unanimous consent that S. 2320, Calendar No. 749, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

The previous action taken on that measure is vitiated.

NATIONAL DIABETES MONTH

Mr. BAKER. Mr. President, next on my list is Senate Joint Resolution 257. I am prepared to ask that the Judiciary Committee be discharged from further consideration of that matter and that the Senate proceed to the matter, if the minority leader will agree.

Mr. ROBERT C. BYRD. Mr. President, this side has no objection.

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 257, National Diabetes Month, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S. Res. 257) to designate the month of November 1982, as "National Diabetes Month".

Mr. WEICKER. Mr. President, I am pleased to rise in support of Senate Joint Resolution 257 to designate November 1982 as National Diabetes Month.

Eleven million Americans suffer from diabetes. The monetary costs of this disease are almost $10 billion annually. Each year, persons with diabetes account for almost 20 million visits to physicians and for over 21 million hospital days. Of our nursing home population, 1 in 7 patients has diabetes and 40 percent of all persons with diabetes are age 65 or older—a substantial portion of our elderly population. Many who suffer from diabetes are poor. Thus, a major part of the economic burden fall on such public health programs as medicare and medicaid.

Mr. President, the designation of National Diabetes Month will help call the effects of the disease to the attention of the American people and will provide an opportunity for greater public and patient awareness and education of the effects of diabetes. I urge my colleagues to join me in adopting this resolution.

I ask unanimous consent that the names of the following Senators be added as cosponsors of Senate Joint Resolution 257, to designate November 1982 as National Diabetes Month.

There being no objection, the cosponsors were ordered to be printed in the RECORD, as follows:

Mr. BOSCHWITZ, Mr. CHAFEE, Mr. COHEN, Mr. D'AMATO, Mr. EAST, Mr. HATCH, Mr. HEINZ, Mr. HELMS, Mr. MATHIAS, Mr. SYMMS, Mr. GRASSLEY, Mr. BURDICK, Mr. CANNON, Mr. CHILES, Mr. DECONCINI, Mr. EAGLETON, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. INOUYE, Mr. KENNEDY, Mr. LONG, Mr. MELCHER, Mr. NUNN, Mr. PRYOR, Mr. RANDOLPH, Mr. RIEGLE, and Mr. TSONGAS.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the resolution is agreed to, and the preamble is agreed to.

The joint resolution (S.J. Res. 257), with its preamble, reads as follows:

S.J. RES. 257

Whereas diabetes kills more Americans than all other diseases except cancer and cardiovascular diseases;

Whereas eleven million Americans suffer from diabetes and five million seven hundred thousand of such Americans are not aware of their illness;

Whereas $9,700,000,000 annually are used for health care costs, disability payments, and premature mortality costs due to diabetes;

Whereas up to 85 per centum of all cases of noninsulin-dependent diabetes may be preventable through greater public understanding, awareness, and education; and

Whereas diabetes is a leading cause of blindness, kidney disease, heart disease, stroke, birth defects, and lower life expectancy, which complications may be reduced through greater patient and public understanding, awareness, and education: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of November 1982 is designated as "National Diabetes Month", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate programs, ceremonies, and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CERTAIN MEASURES ON THE CALENDAR

Mr. BAKER. Mr. President, the next item is Calendar Nos. 865 through 871. They are four private relief bills and three gratuity resolutions. I believe they have been cleared by both sides, and I ask unanimous consent that they be considered en bloc and that the Senate proceed to their immediate consideration in that manner.

Mr. ROBERT C. BYRD. There is no objection.

FRANK J. HULSEY

The bill (S. 534) for the relief of Frank L. Hulsey, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 534

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding the time limitation prescribed in section 2401(b) of title 28, United States Code, for the filing of a claim against the United States, Frank L. Hulsey may file a claim with the appropriate Federal agency for injuries allegedly resulting from having been administered an inoculation, in a Government-sponsored program, for swine flu. Such claim shall be filed in writing with the appropriate Federal agency within six months after the date of enactment of this Act.

SEC. 2. Notwithstanding the provisions of section 2401 of title 28, United States Code, any other statute of limitations, lapse of time, or bar of laches, an action in the proper United States court may be commenced by Frank L. Hulsey against the United States with respect to the claim described in the first section if such action is commenced within six months after the final denial of any claim filed under such section.

SEC. 3. Nothing in this Act shall be construed as an inference of liability on the part of the United States.

Mr. BAKER. Mr. President, I ask unanimous consent to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

APOLONIO P. TUMAMAO, AND OTHERS

The bill (S. 1510) for the relief of Apolonio P. Tumamao, and others, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1510

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That each of the following-named persons is relieved of all liability to repay the United States and is entitled to a refund of the amount which appears beside his name:

	Indebtedness
Apolonio P. Tumamao	$1,137.50
Milton M. Ikawa	2,032.50
Malcolm B. Shin	2,032.50
Mamerto A. Garma	1,938.00
John B. Mackinnon	2,028.75
Kenneth A. Grigsby	2,032.50

The amounts represent overpayments of per diem allowances as a result of administrative failures by officials of the United States Government in implementing a regulatory change in the per diem rate in the case of the above-named civilian employees of the Department of the Navy who were performing extended temporary duty training assignments during the period May 1977 to January 1980. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, credit shall be given for the amount of payments made pursuant to this Act.

Mr. BAKER. Mr. President, I ask unanimous consent to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DR. DAVID PASS

The bill (H.R. 3171) for the relief of Dr. David Pass, was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I ask unanimous consent to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEHI L. PITCHFORTH, JR.

The bill (H.R. 4490) for the relief of Lehi L. Pitchforth, Jr., was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I ask unanimous consent to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

GIANNINA V. DE CHELLIS

The resolution (S. Res. 481) to pay a gratuity to Giannina V. de Chellis, was considered, and agreed to as follows:

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

S. RES. 481

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Giannina V. de Chellis, mother of Genevieve V. de Chellis, an employee of the Senate at the time of her death, a sum equal to one year's compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

LINDA BOYCE SMITH

The resolution (S. Res. 482) to pay a gratuity to Linda Boyce Smith was considered and agreed to, as follows:

S. RES. 482

Resolved, That the Secretary of the Senate is authorized and directed to pay, from the contingent fund of the Senate, to Linda Boyce Smith, widow of Kirk Smith, an employee of the Senate at the time of his death, a sum equal to four months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ANDREA M. WRIGHT AND OTHERS

The resolution (S. Res. 483) to pay a gratuity to Andrea M. Wright, Lauree A. McDaniel, and Denet N. McDaniel was considered and agreed to, as follows:

S. RES. 483

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Andrea M. Wright; Lauree A. McDaniel and Demet N. McDaniel, daughters of Dianne L. McDaniel, an employee of the Senate at the time of her death, a sum to each equal to one-third of three months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CERTAIN MEASURES ON THE CALENDAR

Mr. BAKER. Mr. President, next is a series of 39 private relief bills, numbers 878 through 917, with the exception of Calendar Order 913, which have been cleared by the authorities on both sides of the aisle and are on my desk as approved for action by unanimous consent.

I inquire of the minority leader if he is prepared to proceed.

Mr. ROBERT C. BYRD. Yes, I am prepared to proceed.

Mr. BAKER. I ask unanimous consent that the calendar orders just identified by considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

RELIEF OF DENNIS L. DALTON AND JAMES EDWARD DALTON

The bill (S. 596) for the relief of Dennis L. Dalton and James Edward Dalton, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 596

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) Dennis L. Dalton is deemed to have been continuously physically present in the United States for a period of two years between the age of fourteen years and twenty-eight years for purposes of section 301(b) of the Immigration and Nationality Act as such section was in effect immediately before October 10, 1978.

(b) Notwithstanding the physical-presence requirement of his United States citizen-parent under section 301(g) of the Immigration and Nationality Act, James Edward Dalton, natural child of Dennis L. Dalton, is deemed to be a national and citizen of the United States under such paragraph.

RELIEF OF MAXFIELD-RAYNOR FAMILY

The bill (S. 717) for the relief of Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, and the children, Charlton Bruce Maxfield-Raynor and Maxine Ann Maxfield-Raynor, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 717

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, and their children Charlton Bruce Maxfield-Raynor and Maxine Anne Maxfield-Raynor shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon

payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by the proper number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 203(a) of the Immigration and Nationality Act or, if applicable, the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 202 of such Act.

SEELA JEREMIAH PIULA

The bill (S. 747) for the relief of Seela Jeremiah Piula was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 747

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Seela Jeremiah Piula shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by one number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, the total number of immigrant visas which are made available to natives of the country of the alien's birth under section 202 of such Act.

SAMUEL JOSEPH EDGAR

The bill (S. 1329) for the relief of Samuel Joseph Edgar, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1329

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Samuel Joseph Edgar shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by the proper number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, the total number of immigrant visas which are made available to natives of the country of the alien's birth under section 202 of such Act.

CIRILO RAAGAS COSTA AND WILMA RAAGAS COSTA

The bill (S. 1513) for the relief of Cirilo Raagas Costa and Wilma Raagas Costa, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1513

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Cirilo Raagas Costa shall be held and considered to be a child, and Wilma Raagas Costa shall be held and consdiered to be a child, within the meaning of section 101(b)(1)(E) of such Act upon approval of petitions filed on their behalf by Richard G. Costa and Evangeline M. Costa, citizens of the United States, pursuant to section 204 of such Act. No natural parent, brother, or sister of Cirilo Raagas Costa or Wilma Raagas Costa shall, by virtue of such relationship, be accorded any right, privilege, or status under such Act.

MARGIT LIBERDA AND VERONIKA KOSZEGI

The bill (S. 2039), for the relief of Margit Liberda and her daughter, Veronika Koszegi, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 2039

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding section 212(a)(14) of the Immigration and Nationality Act, for purposes of such Act, Margit Liberda and her daughter, Veronika Koszegi, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper office to reduce by the required numbers, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the aliens' birth under section 203(a) of the Immigration and Nationality Act, or if applicable, the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 202 of such Act.

KOK DJEN SU AND GRACE SU

The bill (S. 2103) for the relief of Kok Djen Su and Grace Su, husband and wife, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 2103

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding section 212(a)(14) of the Immigration and Nationality Act, for purposes of such Act, Kok Djen Su and Grace Su, husband and wife, shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the require visa fees. Upon the granting of permanent residence to these aliens as provided for in this Act, the Secretary of States shall instruct the proper officer to reduce by the proper number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 203(a) of the Immigration and Nationality Act or, if applicable, the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 202 of such Act.

CARLOS MEBRANO GATSON

The bill (S. 2116) for the relief of Carlos Mebrano Gatson, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 2116

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Carlos Mebrano Gatson, the father of a citizen of the United States, shall be deemed to be an immediate relative within the meaning of section 201(b) of such Act, and the provisions of section 204 of that Act shall not be applicable in this case.

LUDINA V. DAVE

The Senate proceeded to consider the bill (S. 369) for the relief of Ludina V. Dave, which had been reported from the Committee on the Judiciary with an amendment:

On page 2, beginning on line 3, strike "paragraphs (1) through (8) of";

So as to make the bill read:

S. 369

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That, for the purposes of the Immigration and Nationality Act, Ludina V. Dave shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by one number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act, or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CECILIA DAGMANG

The Senate proceeded to consider the bill (S. 370) for the relief of Cecilia

Dagmang, which had been reported from the Committee on the Judiciary with an amendment:

On page 2, beginning on line 2, strike "paragraphs (1) through (8) of ";

So as to make the bill read:

S. 370

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Cecilia Dagmang shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act, or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DR. MAHMOODA HAQUANI

The Senate proceeded to consider the bill (S. 372) for the relief of Dr. Mahmooda Haquani, which had been reported from the Committee on the Judiciary with an amendment, as follows:

On page 2, beginning on line 3, strike "paragraphs (1) through (8) of";

So as to make the bill read:

S. 372

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Doctor Mahmooda Haquani shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by one number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act, or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ROSITA A. GENIO

The Senate proceeded to consider the bill (S. 374) for the relief of Rosita A. Genio, which had been reported from the Committee on the Judiciary with an amendment:

On page 2, beginning on line 2, strike "paragraphs (1) through (8) of"

So as to make the bill read:

S. 374

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Rosita A. Genio shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act, or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

IRMA A. GUNDA

The Senate proceeded to consider the bill (S. 375) for the relief of Irma A. Gunda, which had been reported from the Committee on the Judiciary with an amendment:

On page 2, beginning on line 2, strike "paragraphs (1) through (8) of"

So as to make the bill read:

S. 375

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Irma A. Gunda shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act, or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ESTRELLITA TAPANG

On page 2, strike "paragraphs (1) through (8) of",

So as to make the bill read:

S. 377

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Estrellita Tapang shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act, or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

LILY T. PARAGAS

The Senate proceeded to consider the bill (S. 379) for the relief of Lily T. Paragas, which had been reported from the Committee on the Judiciary with an amendment:

On page 2, strike "paragraphs (1) through (8) of ";

So us to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Lily T. Paragas shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, from the total number of such visas entries which are made available to such natives under section 202(e) of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MRS. ELSIE B. LAWSON

The Senate proceed to consider the bill (S. 617) for the relief of Mrs. Elsie B. Lawson, which had been reported from the Committee on the Judiciary with an amendment:

On page 2, strike "paragraphs (1) through (8) of section 203(a) of such Act." and insert "section 203(a) of the Immigration and Nationality Act or, if applicable, from the total

number of such visas and entries which are made available to such natives under section 202(e) of such Act";

So as to make the bill read:

S. 617

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of section 212(a)(14) of the Immigration and Nationality Act, for purposes of such Act, Mrs. Elsie B. Lawson shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by one number, during the current fiscal year or the fiscal year next, following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

KWOK TUNG YU

The Senate proceeded to consider the bill (S. 1465) for the relief of Kwok Tung Yu, which had been reported from the Committee on the Judiciary with an amendment:

On page 1, line 3, strike "notwithstanding section 212(a)(19)", and insert "for the purposes";

So as to make the bill read:

S. 1465

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Kwok Tung Yu shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by the proper number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, the total number of immigrant visas which are made available to natives of the country of the alien's birth under section 202 of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PRASHANT AGARWAL

That, in the administration of the Immigration and Nationality Act, Prashant Agarwal may be classified as a child within the meaning of section 101(b)(1)(F) of such Act, upon approval of a petition field in his behalf by Anil Bhikulal and Saroj Anil Agarwal, a citizen and lawful permanent resident of the United States, respectively, pursuant to section 204 of such Act: Provided, That the natural parents or brothers of sisters of the beneficiary shall not, by virtue of relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ALBERTO HERNANDEZ PEREZ

The Senate proceeded to consider the bill (S. 1547) for the relief of Alberto Hernandez Perez, which has been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause, and insert the following:

That, notwithstanding the provisions of section 203(a) of the Immigration and Nationality Act, Alberto Hernandez Perez shall be granted a visa and admitted to the United States for permanent residence, if otherwise qualified, upon filing an application for a visa and payment of the required visa fee. Upon the granting of permanent residence to such alien as provided in this Act, the Secretary of State shall instruct the proper officer to reduce by one number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act, or if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

NESCA NICHOLAS

The Senate proceeded to consider the bill (S. 642) for the relief of Nesca Nicholas, which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause, and insert the following:

That, for the purposes of the Immigration and Nationality Act, Nesca Nicholas and her children Patricia Robert Nicholas and Bernard Robert Nicholas shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by the required numbers, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the aliens' birth under paragraphs (1) through (7) of section 203(a) of the Immigration and Nationality Act or, if applicable, the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 202(e) of such Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read "A bill for the relief of Nesca Nicholas and her children Patricia Robert Nicholas and Bernard Robert Nicholas.".

HAE OK CHUNG

The Senate proceeded to consider the bill (S. 1636) for the relief of Hae Ok Chung, which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause, and insert the following:

That, in the administration of the Immigration and Nationality Act, Kim Hae Ok Heimberger may be classified as a child within the meaning of section 101(b)(1)(F) of such Act upon approval of a petition filed on her behalf by Mr. and Mrs. John Albert Heimberger, citizens of the United States, pursuant to section 204 of such Act: Provided, That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill for the relief of Kim Hae Ok Heimberger."

CESAR NOEL ORANTES

The Senate proceeded to consider the bill (S. 1838) for the relief of Cesar Noel Orantes, which had been reported from the Committee on the Judiciary, with an amendment, to strike out all after the enacting clause and insert the following:

That, in the administration of the Immigration and Nationality Act, Cesar Noel Jump may be classified as a child within the meaning of section 101(b)(1)(E) of such Act upon approval of a petition filed on his behalf by Mr. and Mrs. Robert I. Jump, citizens of the United States: *Provided,* That the natural parents, brothers, and sisters of the said Cesar Noel Jump shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill for the relief of Cesar Noel Jump.

RANKOVIC FAMILY

The Senate proceeded to consider the bill (S. 273) for the relief of William Vojislav Rankovic, Stanislava Rankovic, husband and wife; and William Rankovic, Junior, and Natalie Rankovic, their children, which had been reported from the Committee on the Judiciary with amendments, as follows:

On page 2, line 2, strike "fee", and insert "fees";

On page 2, line 8, strike "paragrahs (1) through (8) of";

So as to make the bill read:

S. 273

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of section 212(a)(14) of the Immigration and Nationality Act, for the purposes of such Act, William Vjislav Rankovic, Stanislava Rankovic, husband and wife; and William Rankovic, Junior, and Natalie Rankovic, their children, shall be held and considered to have been lawfully adiitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by the required number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the aliens' births under section 203(a) of the Immigration and Nationality Act or if applicable, the total number of immigrant visas and conditional entries which are made available to natives of the country of the aliens' birth under section 202 of the Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BEUMER FAMILY

The Senate proceeded to consider the bill (S. 1470) for the relief of Grietje Rhea Pietens Beumer, John Christian Beumer, Cindy Larissa Beumer, and Cedric Grant Beumer, which had been reported from the Committee on the Judiciary, with amendments, as follows:

On page 2, line 1, strike "fee", and insert "fees";

On page 2, line 2, strike "alien", and insert "aliens";

On page 2, line 6, strike "alien's", and insert "aliens' ";

So as to make the bill read:

S. 1470

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Grietje Rhea Pietens Beumer, Johan Christian Beumer, Cindy Larissa Beumer, and Cedric Grant Beumer shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa *fees.* Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct four from the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 203(a) of the Immigration and Nationality Act or, if applicable, from the total number of such visas which are made available to such natives under section 202(e) of such Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MELGAR FAMILY

The Senate proceeded to consider the bill (S. 2052) for the relief of Raul M. Melgar, Maria Cristina Rey de Melgar, Steven Marcelo Melgar and Serrana Ivon Melgar, which had been reported from the Committee on the Judiciary with amendments, as follows:

On page 1, line 4, strike "and their unmarried minor children";

On page 2, line 8, strike "alien's" and insert "aliens'";

On page 2, line 11, strike "alien's", and insert "aliens'";

So as to make the bill read:

S. 2052

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Raul M. Melgar, Maria Cristina Rey de Melgar, Steven Marcelo Melgar and Serrana Ivon Melgar shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of enactment of this Act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct the required numbers from the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 203(a) of the Immigration and Nationality Act or, if applicable, the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 202 of such Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

KANG OK BOON

The bill (H.R. 684) for the relief of Kang Ok Boon, was considered, ordered to a third reading, read the third time, and passed.

YICK BONG AU YEUNG

The bill (H.R. 4662), for the relief of Eun Ok Han, was considered, ordered to a third reading, read the third time, and passed.

ALEJO WHITE AND SONIA WHITE

The bill (H.R. 6811) for the relief of Alejo White and Sonia White, was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I ask unanimous consent that it be in order to move to reconsider en bloc the votes by which the measures were passed, and I so move.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The PRESIDING OFFICER. Without objection it is so ordered, and the action is taken en bloc.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, Calendar No. 920, Senate Resolution 471, and Calendar No. 824, H.R. 6188, are two items that are cleared on this side. The first is a budget waiver to accompany the second. I am prepared to take up that series, if the minority leader is agreeable.

Mr. ROBERT C. BYRD. Mr. President, this side is ready to proceed.

Mr. BAKER. I thank the minority leader.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 471, the budget waiver to accompany H.R. 6188.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 471) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 6188.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to, as follows:

S. RES. 471

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 6188, a bill to authorize the Secretary of the Interior to participate with the State of Nebraska in studies of Platte River water resource use and development, and for other purposes. H.R. 6188, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983.

The waiver of section 402(a) of such Act is necessary to permit congressional consideration of H.R. 6188. Such bill was not reported on or before May 15, 1982, required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The State of Nebraska has been actively engaged in the preparation of the comprehensive Platte River Basin study since January 1982. Contracts have been let for portions of the study and funds have been appropriated by the State legislature. In addition, funds have been contributed at the local level as well as a grant has been made by the Platte River Whooping Crane Trust. The study and related activities have been premised on participation by the Bureau of Reclamation and Federal financial assistance. Without that participation, the study will be indefinitely delayed resulting in increased costs and possibly lost opportunities for advancement of water resource management in Nebraska.

U.S. PARTICIPATION IN CERTAIN WATER RESOURCE STUDIES

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 824, H.R. 6188.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6188) to authorize the Secretary of the Interior to participate with the State of Nebraska in studies of Platte River water resources use and development, and for other purposes.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DONATION OF FEDERAL PERSONAL PROPERTY

Mr. BAKER. Mr. President, next is Calendar No. 924, S. 1444, if the minority leader can clear that.

Mr. ROBERT C. BYRD. Mr. President, that matter has been cleared.

Mr. BAKER. I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 924, S. 1444.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1444) to authorize the Administrator of General Services to donate to State and local governments certain Federal personal property loaned to them for civil defense use, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Governmental Affairs with an amendment:

On page 2, line 3, strike "under", and insert "as a result of".

So as to make the bill read:

S. 1444

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) all Federal personal property which—

(A) was transferred by a component of the Department of Defense to the Defense Civil Preparedness Agency by July 15, 1979,

(B) is, on the date of enactment of this Act, on loan to a State or a State and local government jointly as a result of a written loan agreement executed by such Agency, and

(C) was transferred with the functions and property of such Agency to the Federal Emergency Management Agency.

shall be disposed of in accordance with subsection (b).

(b) Whenever the Director of the Federal Emergency Management Agency certifies that property described in subsection (a) is being used by the State or local government holding such property for a purpose consistent with the purpose for which the property was furnished, the Administrator of General Services shall transfer title to such property to the appropriate State or local government.

Mr. THURMOND. Mr. President, I rise today to urge my colleagues to support S. 1444. This legislation would authorize the Administrator of General Services to donate to State and local governments certain Federal personal property loaned to them for civil defense use.

Literally thousands of small communities across our Nation rely heavily on military surplus equipment to help them meet their civil defense needs. Under present law, Mr. President, all this material, which has outlived its military usefulness, is merely on loan to the State and local agencies. Since this material does not belong to them, these local agencies cannot modify it to make it more suitable for their specific needs.

My bill would authorize the General Services Administration to transfer title to this military surplus property to the State or local governments holding it on the date of enactment, provided that the Director of the Federal Emergency Management Agency certifies it is actually being used for civil defense purposes.

Mr. President, this legislation will do much to strengthen the civil defense network and it is my hope that my colleagues will support it.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ALCOHOL ABUSE AND ALCOHOLISM AND DRUG ABUSE AMENDMENTS OF 1982

Mr. BAKER. Mr. President, the next item is Calendar No. 651, S. 2365. If the minority leader is prepared to proceed, we are prepared on this side.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. I ask unanimous consent that the Senate proceed to the consideration of S. 2365.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2365) to revise and extend programs relating to alcohol abuse and alcoholism and drug abuse.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Labor and Human Resources with amendments, as follows:

On page 4, after line 20, insert "(1) by inserting "(a) before "The"; ";

On page 4, line 22, strike "(1)"; and insert "(2)";

On page 5, after line 6, strike through and including line 10, and insert the following:

"(B) a description of the extent to which Federal and State programs, departments, and agencies are concerned and are dealing effectively with the problems of alcohol abuse and alcoholism, including information with respect to services provided for alcohol abuse and alcoholism under part B of title XIX of Public Health Service Act;

On page 6. , line 2, strike "and";

On page 6, line 3, strike "(2)", and insert "(3)";

On page 6, line 4, strike "respectively", and insert the following: respectively; and

(4) by adding at the end thereof the following new subsection:

"(b)(1) In order to obtain the information required under subsection (a)(1)(B) with respect to services provided for alcohol abuse and alcoholism under part B of title XIX of the Public Health Service Act, the Secretary shall work with appropriate national organizations to insure that State and local governments use compatible means of data collection so that uniform national data with respect to the provision of such services will be available to the States and to the Secretary.

"(2) In carrying out paragraph (1) of this subsection and subsection (a)(1)(B), the Secretary may not require any State to submit any information which is not required under section 1916(a) of the Public Health Service Act.".

On page 6, after line 21, insert the following:

GRANTS AND CONTRACTS

SEC. 106. Section 311 (c) (4) (42 U.S.C. 4577(c)(4)) is amended by inserting "(including Native Hawaiians and Native American Pacific Islanders)" after "Native Americans".

On page 7, line 4, strike "106.", and insert "107.";

On page 8, line 20, strike "107.", and insert "108.";

On page 8, line 22, strike "$24,813,000", and insert "$32,911,000";

On page 8, line 23, strike "$24,813,000", and insert "$32,911,000";

On page 8, after line 24, insert the following:

NATIONAL COMMISSION ON ALCOHOLISM

SEC. 109. Section 18(b)(10) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act Amendments of 1979 (42 U.S.C. 4541 note) is amended by inserting "Native Hawaiians, Native American Pacific Islanders," after "Alaskan Natives,".

On page 13, line 16, strike "(5) and inserting in lieu thereof a comma and "and";", and insert "(5)";

On page 13, line 19, strike "paragraph", and insert "paragraphs";

On page 13, line 23, strike "appropriate."; and", and insert the following:

"(7) a description of the extent to which Federal and State programs, departments, and agencies are concerned and are dealing effectively with the problems of drug abuse, including information with respect to services provided for drug abuse under part B of title XIX of the Public Health Service Act."; and

On page 14, after line 7, insert the following:

(b) Section 405 is further amended by adding at the end thereof the following new subsection:

"(c)(1) In order to obtain the information required under subsection (b)(7) with respect to services provided for drug abuse under part B of title XIX of the Public Health Service Act, the Secretary shall work with appropriate national organizations to insure that State and local governments use compatible means of data collection so that uniform national data with respect to the provision of such services will be available to the States and to the Secretary.

"(2) In carrying out paragraph (1) of this subsection and subsection (b)(7), the Secretary may not require any State to submit any information which is not required under section 1916(a) of the Public Health Service Act.".

On page 14, line 22, strike "(b)", and insert "(c)";

On page 14, after line 23, insert the following:

GRANTS AND CONTRACTS

SEC. 208. Section 410(d) (21 U.S.C. 1177(d)) is amended by striking out "native Americans" and inserting in lieu thereof "Native Americans (including Native Hawaiians and Native American Pacific Islanders)".

On page 15, line 7, strike "208.", and insert "209.";

On page 15, line 9, strike "$41,733,000", and insert "$46,356,000";

On page 15, line 10, strike "$41,733,000", and insert "$46,356,000";

On page 15, line 13, strike "209.", and insert "210.";

On page 15, after line 22, insert the following:

TITLE III—MISCELLANEOUS

PUBLIC HEALTH SERVICES CORPS

SEC. 301. Section 207(a)(1) of the Public Health Services Act (42 U.S.C. 209(a)(1)) is amended by inserting "psychology," after "pharmacy,".

So as to make the bill read:

S. 2365

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Alcohol Abuse and Alcoholism and Drug Abuse Amendments of 1982".

TITLE I—ALCOHOL ABUSE AND ALCOHOLISM

REFERENCE

SEC. 101. Except as otherwise specifically provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970.

SHORT TITLE

SEC. 102. The first section is amended by striking out "Prevention, Treatment, and Rehabilitation" and inserting in lieu thereof "Research and Prevention".

CONGRESSIONAL FINDINGS AND DECLARATION OF PURPOSE

SEC. 103. (a) Section 2(a)(3) (42 U.S.C. 4541(a)(3)) is amended by striking out "$43,000,000,000" and inserting in lieu thereof "$49,000,000,000".

(b) Section 2(b) (42 U.S.C. 4541(b)) is amended to read as follows:

"(b) It is the policy of the United States and the purpose of this Act to provide leadership in the national effort to reduce the incidence of alcoholism and alcohol-related problems through—

"(1) a continued Federal commitment to research into the behavioral and biomedical etiology, the treatment, and the mental and physical health and social and economic consequences of alcohol abuse and alcoholism;

"(2) a commitment to—

"(A) extensive dissemination to States, units of local government, community organizations, and private groups of the most recent information and research findings with respect to alcohol abuse and alcoholism, including information with respect to the application of research findings; and

"(B) the accomplishment of such dissemination through up-to-date publications, demonstrations, educational programs, and other appropriate means:

"(3) the provision of technical assistance to research personnel, services personnel, and prevention personnel in the field of alcohol abuse and alcoholism;

"(4) the coordination, in cooperation with all governmental and nongovernmental sources of assistance for alcohol abuse and alcoholism, of Federal, State, and local planning for, and effective use of, Federal assistance to States to meet the urgent needs of special populations;

"(5) the provision of a Federal response to alcohol abuse and alcoholism which recognizes the importance of State decisionmaking with respect to treatment needs;

"(6) the development and encouragement of prevention programs designed to combat the spread of alcoholism, alcohol abuse, and the abuse of other legal and illegal drugs;

"(7) the development and encouragement of effective occupational prevention and treatment programs within Government and in cooperation with the private sector; and

"(8) the provision of a Federal response to alcohol abuse and alcoholism which encourages the greatest participation by the pri-

vate sector, both financially and otherwise, and concentrates on carrying out functions relating to alcohol abuse and alcoholism which are truly national in scope.".

REPORTS BY THE SECRETARY

SEC. 104. Section 102 (42 U.S.C. 4552) is amended—

(1) by inserting "(a)" before "The";

(2) by striking out paragraphs (1) and (2) and inserting in lieu thereof the following:

"(1) submit to the Congress on or before the expiration of the one-year period beginning on the date of enactment of this Act, and every three years thereafter, a report which shall include—

"(A) a description of the actions taken and funds expended under this Act, and an evaluation of the effectiveness of such actions and expenditures;

"(B) a description of the extent to which Federal and State programs, departments, and agencies are concerned and are dealing effectively with the problems of alcohol abuse and alcoholism, including information with respect to services provided for alcohol abuse and alcoholism under part B of title XIX of the Public Health Service Act;

"(C) current information on the health consequences of using alcoholic beverages;

"(D) a description of current research findings with respect to alcohol abuse and alcoholism;

"(E) such recommendations for legislation and administrative action as the Secretary considers appropriate; and

"(F) such other information as the Secretary considers appropriate;";

(3) by redesignating paragraphs (3) and (4) as paragraphs (2) and (3), respectively; and

(4) by adding at the end thereof the following new subsection:

"(b)(1) In order to obtain the information required under subsection (a)(1)(B) with respect to services provided for alcohol abuse and alcoholism under part B of title XIX of the Public Heath Service Act, the Secretary shall work with appropriate national organizations to insure that State and local governments use compatible means of data collection so that uniform national data with respect to the provision of such services will be available to the States and to the Secretary.

"(2) In carrying out paragraph (1) of this subsection and subsection (a)(1)(B), the Secretary may not require any State to submit any information which is not required under section 1916(a) of the Public Health Service Act.".

ABOLITION OF INTERAGENCY COMMITTEE

SEC. 105. Section 103 (42 U.S.C. 4553) is repealed.

GRANTS AND CONTRACTS

SEC. 106. Section 311(c)(4) (42 U.S.C. 4577(c)(4)) is amended by inserting "(including Native Hawaiians and Native American Pacific Islanders)" after "Native Americans".

RESEARCH

SEC. 107. Section 501(b) (42 U.S.C. 4585(b)) is amended—

(1) by striking out "make available" in paragraph (1) and inserting in lieu thereof "disseminate";

(2) by inserting "including the development of curriculum materials," after "appropriate means," in paragraph (1);

(3) by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) make grants to universities, hospitals, laboratories, and other public or nonprofit institutions, and individuals for projects for such research, investigations, experiments, demonstrations, studies, and evaluations as are recommended by the National Advisory Council on Alcohol Abuse and Alcoholism and such Council shall give special consideration to projects relating to—

"(A) the relationship between alcohol abuse and domestic violence;

"(B) the effects of alcohol use during pregnancy;

"(C) the impact of alcoholism and alcohol abuse on the family, social systems, and health service systems;

"(D) the relationship between the abuse of alcohol and other drugs;

"(E) the effect on the incidence of alcohol abuse and alcoholism of social pressures, legal requirements respecting the use of alcoholic beverages, the cost of such beverages, and the economic status and education of users of such beverages;

"(F) the cost and effectiveness of treatment, prevention, and intervention among youth, women, and the elderly; and

"(G) the interrelationship between alcohol use and other health problems;"; and

(4) by inserting "or the impact of alcohol abuse on other health problems" before the semicolon in paragraph (5).

AUTHORIZATION OF APPROPRIATIONS

SEC. 108. The first sentence of section 504(a) (42 U.S.C. 4587(a)) is amended by inserting before the period a comma and $32,911,000 for the fiscal year ending September 30, 1983, and $32,911,000 for the fiscal year ending September 30, 1984".

NATIONAL COMMISSION ON ALCOHOLISM

SEC. 109. Section 18(b)(10) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act Amendments of 1979 (42 U.S.C. 4541 note) is amended by inserting "Native Hawaiians, Native American Pacific Islanders," after "Alaska Natives,".

TITLE II—DRUG ABUSE

REFERENCE

SEC. 201. Except as otherwise specifically provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Drug Abuse Prevention, Treatment, and Rehabilitation Act.

SHORT TITLE

SEC. 202. The first section is amended by striking out "Prevention, Treatment, and Rehabilitation" and inserting in lieu thereof "Research and Prevention".

CONGRESSIONAL FINDINGS

SEC. 203. Section 101 (21 U.S.C. 1101) is amended—

(1) by striking out "is rapidly increasing" in paragraph (1) and inserting in lieu thereof "has rapidly increased";

(2) by striking out "abuse, especially heroin addiction," in paragraph (3) and inserting in lieu thereof "abuse";

(3) by striking out "drug abuse, especially the causes, and" in paragraph (5), and inserting in lieu thereof "the";

(4) by inserting "and State" before "drug abuse programs" in paragraph (6);

(5) by striking our paragraphs (7), (8), (10), and (11);

(6) by redesignating paragraphs (9), (12), (13), and (14) as paragraphs (7), (8), (9), and (10), respectively;

(7) by striking out "the Federal Government" in paragraph (7) (as redesignated by clause (6) of this section) and by inserting in lieu thereof "Federal and State governments"; and

(8) by inserting "State activities and" before "Federal international" in paragraph (9) (as redesignated by clause (6) of this section).

DECLARATION OF NATIONAL POLICY

SEC. 204. Section 102 (21 U.S.C. 1102) is amended to read as follows:

"§ 102. Declaration of national policy

"The Congress declares that it is the policy of the United States and the purpose of this Act to utilize the comprehensive resources of the Federal Government to provide a leadership role in reducing the incidence, as well as the social and personal costs, of drug abuse in the United States and to develop and assure the implementation of a comprehensive, coordinated long-term Federal and State strategy to combat drug abuse. To reach these goals, the Congress further declares that it is the policy of the United States and the purpose of this chapter to meet the problems of drug abuse through—

"(1) a continued Federal commitment to research into the behavioral and biomedical etiology of, the treatment of, and the mental and physical health and social and economic consequences of, drug abuse;

"(2) a commitment to—

"(A) extensive dissemination to States, units of local government, community organizations, and private groups of the most recent information and research findings with respect to drug abuse, including information with respect to the application of research findings; and

"(B) the accomplishment of such dissemination through up-to-date publications, demonstrations, educational programs, and other appropriate means;

"(3) the provision of technical assistance to research personnel, services personnel, and prevention personnel in the field of drug abuse;

"(4) the coordination, in cooperation with all other governmental and nongovernmental sources of assistance for drug abuse, of Federal, State, and local planning for, and effective use of, Federal assistance to States to meet the urgent needs of special populations;

"(5) the provision of a Federal response to drug abuse which recognizes the importance of State decisionmaking with respect to treatment needs;

"(6) the development and support of community-based prevention programs;

"(7) the development and encouragement of effective occupational prevention and treatment programs within the Government and in cooperation with the private sector; and

"(8) the provision of a Federal response to drug abuse which encourages the greatest participation by the private sector, both financially and otherwise, and concentrates on carrying out functions relating to drug abuse which are truly national in scope.".

ELIMINATION OF ANNUAL REPORT

SEC. 205. Section 207 (21 U.S.C. 1117) is repealed.

REVIEW OF NATIONAL DRUG ABUSE STRATEGY

SEC. 206. Section 305 (21 U.S.C. 1165) is amended by striking out "each year" and inserting in lieu thereof "each even-numbered year, beginning with 1982".

REPORTS

SEC. 207. (a) Section 405(b) (21 U.S.C. 1172(b)) is amended—

(1) by striking out "with respect to each fiscal year" in the matter preceding paragraph (1);

(2) by inserting "including a description of current research findings with respect to drug abuse," after "United States," in paragraph (1);

(3) by striking out "and" after the comma the last place it appears in paragraph (4);

(4) by striking out the period at the end of paragraph (5);

(5) by inserting after paragraph (5) the following new paragraphs:

"(6) current information on the health consequences of marihuana use and such proposals for legislative and administrative action as the Secretary considers approprite; and

"(7) a description of the extent to which Federal and State programs, departments, and agencies are concerned and are dealing effectively with the problems of drug abuse, including information with respect to services provided for drug abuse under part B of title XIX of the Public Health Service Act."; and

(6) by striking out "each year" in the last sentence and inserting in lieu thereof "each even-numbered year, beginning with 1984".

(b) Section 405 is further amended by adding at the end thereof the following new subsection:

"(c)(1) In order to obtain the information required under subsection (b)(7) with respect to services provided for drug abuse under part B of title XIX of the Public Health Service Act, the Secretary shall work with appropriate national organizations to insure that State and local governments use compatible means of data collection so that uniform national data with respect to the provision of such services will be available to the States and to the Secretary.

"(2) In carrying out paragraph (1) of this subsection and subsection (b)(7), the Secretary may not require any State to submit any information which is not required under section 1916(a) of the Public Health Service Act.".

(c) Effective January 15, 1984, the Marihuana and Health Reporting Act (42 U.S.C. 242 note) is repealed.

GRANTS AND CONTRACTS

SEC. 208. Section 410(d) (21 U.S.C. 1177(d)) is amended by striking out "native Americans" and inserting in lieu thereof "Native Americans (including Native Hawaiians and Native American Pacific Islanders)".

AUTHORIZATION OF APPROPRIATIONS FOR RESEARCH

SEC. 209. Section 503(c) (21 U.S.C. 1193(c)) is amended by inserting before the period a comma and $46,356,000 for the fiscal year ending September 30, 1983, and $46,356,000 for the fiscal year ending September 30, 1984".

DISSEMINATION OF MATERIALS

SEC. 210. Section 301 of the Public Health Service Act (42 U.S.C. 241) is amended by adding at the end thereof the following new subsection:

"(c) In carrying out subsection (a)(1), and in order to educate the public with respect to the health hazards of drug abuse, the Secretary shall take such actions as may be necessary to insure the complete and widespread dissemination of up-to-date publications of the National Institute on Drug Abuse relating to the most recent research findings with respect so such health hazards.".

TITLE III—MISCELLANEOUS

PUBLIC HEALTH SERVICES CORPS

SEC. 301 Section 207(a)(1) of the Public Health Service Act (42 U.S.C. 209(a)(1)) is amended by inserting "psychology," after "pharmacy,".

Mr. BAKER. Mr. President, I ask unanimous consent that the committee amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the amendments are agreed to.

Mr. HUMPHREY. Mr. President, S. 2365 reauthorizes the activities of the National Institute on Drug Abuse and the National Institute on Alcohol Abuse and Alcoholism for 2 years.

The devastation which alcohol and drug abuse causes this Nation annually demands the coordinated response of Federal, State, and local governments as well as voluntary efforts. One recent study conducted by the Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA) estimates that the cost to the U.S. economy of alcohol and drug abuse in 1977 was in excess of $65 billion. Needless to say, that rather astounding number does not take into account the pain, suffering, and family disruption that can never be assigned a monetary value.

The need for continued Federal leadership in addressing this national problem is obvious. Last year the Budget Reconciliation Act established the alcohol, drug abuse, and mental health block grant to allow the States to allocate funding for treatment programing within their areas. I believe this was an important innovation in establishing the appropriate roles of the Federal, State, local governments, and the voluntary sector.

Last year the Senate Subcommittee on Alcoholism and Drug Abuse held extensive oversight hearings to evaluate the research and prevention programing of the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse. During the research hearings the subcommittee heard scientists, researchers, and program administrators testify about the grant review process, the placement of the Institutes in ADAMHA, and the effectiveness of this country's research efforts in the field of alcohol and drug abuse.

During the prevention hearing the subcommittee heard from administration officials as well as State and local program administrators and members of the voluntary sector who are crucial in the pursuit of effective prevention programing. These hearings assisted the subcommittee in assessing the most beneficial and effective roles of the Federal Government, the State government, and the voluntary sector.

The results of those hearings are reflected in this legislation which focuses the Federal effort on programs which are truly national in scope; that is on research, information dissemination technical assistance to the States, and the encouragement of investigations, demonstrations and studies.

While I believe it is necessary to move treatment decisions to the States and look forward to the successes the block grant will produce, I believe that research is a critical national imperative in order to produce advances in treatment methods, screening techniques, and prevention programing as well as a greater understanding of the physical effects of alcohol and drugs. These activities must continue to be the focus of the Federal Government.

In addition, perhaps the most important national function is the dissemination of information once it has been acquired. To spend vast amounts of money on research and have it shared by only a few expert scientists in the field would be unforgiveable. The decline indicated in the annual "High School Senior Survey" in the regular use of marihuana by this Nation's young people has been a tribute to the efforts of all those institutions and organizations who have been actively disseminating information to the public to dispel the misconceptions about marihuana.

Indeed, testimony at subcommittee hearings last year indicated that marihuana is a dangerous substance with serious health and behavioral consequences. This information must be readily available to the public. Too often I have heard from individuals and groups who have been unable to obtain Government publications on drug abuse because they have been out of print or otherwise unavailable. I hope that this legislation will make clear that dissemination of information is one of the most important functions of the Federal Government.

In addition, this legislation will streamline and make more useful the reports which must be submitted by the Institutes. These reports have been consolidated and made biennial in the case of the National Institute on Drug Abuse, and triennial for the National Institute on Alcohol Abuse and Alcoholism. Finally, I have asked that the report on the Federal strategy be biennial.

In summary, this legislation will streamline some of the current procedures, will eliminate reports which are costly and ineffective because they are too frequently written, and will emphasize the importance of the Federal effort's concentration on strictly national functions, that is information dissemination, research, technical assistance, and coordination of strategy.

I therefore wholeheartedly support this legislation in all aspects but one—the funding level. As originally introduced S. 2365 reflected funding levels which would not have raised spending above 1982 levels but would have redis-

tributed that spending so more funding could be allocated to research and information dissemination. During the full committee markup of this legislation these funding levels were amended to reflect the administration's request for additional funding for alcohol and drug research. I opposed this amendment.

I have carefully reviewed all the budget justifications from the administration on the need for expanded programs at both the National Institute on Drug Abuse and the National Institute on Alcohol Abuse and Alcoholism. My work as chairman of the Subcommittee on Alcoholism and Drug Abuse has made it painfully clear to me that alcohol and drug abuse are having a crippling effect on our citizens and particularly our young people. This year the subcommittee's oversight hearings on NIDA and NIAAA found their work in this field to be of the highest caliber. There is no question in my mind that these Institutes are deserving of additional funding and could put it to effective use.

In my view that is not the question before us. The Congress has recently been called upon to raise the debt ceiling and projections of the national debt this year have been projected as high as $182 billion for 1983 if nothing is done to reduce current spending. OMB has estimated that the interest on the public debt in 1982 will be $115.7 billion. This has placed the U.S. Government in the position of borrowing more than one-third of the money available in domestic credit markets. This Federal borrowing is crowding out private sector borrowing, making it more difficult for businesses to expand and for individuals to purchase homes and cars.

My concern is that continued growth in spending will seriously threaten this Government's ability to provide vital programing in the future. I believe it is imperative that we defer increased spending to a time when the economy can accommodate it. Now is not that time. It is for this reason, and only this reason, that I recommended that the programs authorized in this legislation not exceed the aggregate spending levels of the 1982 continuing resolution.

Mr. HATCH. Mr. President, I am privileged to support S. 2365, "The Alcohol Abuse and Drug Abuse Amendment of 1982," Alcohol and drug abuse are our society's two most serious health problems. They demand the Congress deliberate attention because they pervade every level of our national health. Alcohol and drug abuse injures everyone—our Nation's economy, our Nation's personal welfare, our Nation's children. But they also demand our serious and careful attention because they are completely preventable.

At this time, I would like to thank Senator HUMPHREY, chairman of the Subcommittee on Alcohol and Drug Abuse. Through his interest and dedication, the Committee on Labor and Human Resources has reported this timely legislation which reauthorizes the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse. Senator HUMPHREY has been particularly influential in focusing our national attention on the serious problems of marihuana abuse among our Nation's youth.

I cannot open a newspaper without reading a tragedy caused by someone who misused either alcohol or drugs. The estimated personal costs to society are immeasurable, but attempted calculations to the economic costs are several billion. Because of the serious concerns of the problems associated with alcohol and drug abuse in our society, the continuation of research in these substances is an important function of the Federal Government. In addition, the funding levels contained in this legislation recognizes the increased cost of alcohol and drug treatment and research, and it also directs the Federal Government to maintain an active leadership role in research and dissemination of the most recent findings to governmental and private groups involved in alcohol and drug abuse treatment. Also included in this legislation is adoption of my recommendation that an evaluation of the success of the alcohol, drug abuse and mental health block grant be included in the Secretary's report to Congress.

I continue to urge my fellow colleagues in both the Senate and the House to continue to support effective methods that will attempt to cure some of the ills, like these, which drain the economy and welfare of our society.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished majority leader withdraw that request?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. In order to break the monotony, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, it is a distinct pleasure to revert to the form I enjoyed for so long.

I move to table the motion to reconsider.

Mr. ROBERT C. BYRD. I thank the majority leader.

The motion was agreed to.

PUBLIC HEALTH SERVICE ACT AMENDMENT

Mr. BAKER. Mr. President, next I have Calendar Order No. 832 on my list, H.R. 6458. If the minority leader is prepared to do so, I wish to ask the Senate to proceed to that item.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. I thank the Senator.

Mr. President, then I ask that the Chair lay before the Senate H.R. 6458, Calendar Order No. 832.

THE PRESIDING OFFICER. The bill will be stated by title.

The assistance legislative clerk read as follows:

A bill (H.R. 6458) to amend the Public Health Service Act and related laws to consolidate the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse, and for other purposes.

The Senate proceeded to consider the bill.

Mr. BAKER. Mr. President, I move to strike all after the enacting clause and substitute in lieu thereof the text of Calendar Order No. 651, S. 2365, as amended, just adopted by the Senate.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion wss agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 6458) was passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD, Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that Calendar Order No. 651, S. 2365, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I move that the Senate insist on its amendment and request a conference with the House of Representatives and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer (Mr. HAYAKAWA) appointed Mr. HUMPHREY, Mr. HATCH, Mr. DENTON, Mr. MATSUNAGA, and Mr.

RIEGLE conferees on the part of the Senate.

ECONOMIC AND SELF-SUFFICIENCY FOR AMERICAN INDIANS, HAWAIIAN NATIVES, AND ALASKAN NATIVES

Mr. BAKER. Mr. President, the next item on my list is S. 1088, calendar order No. 137.

Mr. ROBERT C. BYRD. Mr. President, that item has been cleared on this side.

Mr. BAKER. Mr. President, I thank the minority leader.

Mr. President, I beg the pardon of the minority leader and other Members for the delay, but I now ask the Chair to lay before the Senate calendar order No. 137, S. 1088.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1088) to promote the goal of economic and self-sufficiency for American Indians, Hawaiian Natives, and Alaskan Natives,

The Senate proceeded to the consideration of the bill, which had been reported from the Select Committee on Indian Affairs with amendments, as follows:

On page 5, line 5, strike "(a)" and insert "(a)(1)";

On page 5, line 8, strike "(b)" and insert "(a)(2)";

On page 5, after line 9, insert the following:

SUPPORT TO TRIBAL AND VILLAGE GOVERNMENTS; ECONOMIC DEVELOPMENT

SEC. 7. (a) The Secretary shall provide financial assistance through grants to eligible governing bodies described in subsection (b) for employment of tribal or village government employees, for programs which increase the skills and qualifications of such employees, and for such other activities, including the awarding of grants or contracts by such governing bodies to Indian organizations, to enable such governing bodies to more effectively assume local responsibility for the economic and social well-being of the Indians or Alaskan Natives.

(b) The governing bodies which are eligible recipients of grants described in subsection (a) are the governing bodies of Indian tribes, bands, or groups residing on Federal or State reservations, including Alaskan Native villages or groups as defined in the Alaska Native Claims Settlement Act.

(c) No financial assistance may be provided to any eligible governing body under subsection (a) unless a plan has been submitted to the Secretary describing the manner in which—

(1) the tribal or village government will be strengthened, and

(2) the social or economic well-being of the Indians or Alaskan Natives will be enhanced.

On page 6, line 12, strike "7." and insert "8.";

On page 7, line 17, strike "8." and insert "9.";

On page 8, line 9, strike "9." and insert "10.";

On page 8, line 23, strike "10." and insert "11.";

On page 10, line 12, strike "11." and insert "12.";

On page 11, line 4, strike "12." and insert "13.";

On page 12, beginning with line 2, strike all through and including line 4, and insert the following:

SEC. 14. (a) There are authorized to be appropriated, for the purpose of carrying out the provisions of sections 3, 4, and 5 of this Act, $28,000,000 for each of the fiscal years 1982 and 1983.

(b) There are authorized to be appropriated, for the purpose fo carrying out the provisions of section 7 of this Act, $50,000,000 for fiscal year 1982 and such sums as may be necessary for fiscal year 1983.

On page 12, line 14, strike "14." and insert "15.";

On page 12, after line 15, insert the following:

EFFECTIVE DATE

SEC. 16. The provisions of this Act shall become effective on October 1, 1981.

So as to make the bill read:

S. 1088

Be is enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Native American Programs Act".

STATEMENT OF PURPOSE

SEC. 2. The purpose of this Act is to promote the goal of economic and social self-suficiency for American Indians, Hawaiian Natives, and Alaskan Natives.

FINANCIAL ASSISTANCE FOR NATIVE AMERICAN PROJECTS

SEC. 3. (a) The Secretary of Health and Human Services (hereinafter referred to in this Act as the "Secretary") is authorized to provide financial assistance to public and nonprofit private agencies, including but not limited to, governing bodies of Indian tribes on Federal and State reservations, Alaskan Native villages and regional corporations established by the Alaska Native Claims Settlement Act, and such public and nonprofit private agencies serving Hawaiian Natives and Indian organizations in urban or rural nonreservation areas, for projects pertaining to the purposes of this Act. In determining the projects to be assisted under this Act, the Secretary shall consult with other Federal agencies for the purpose of eliminating duplication or conflict among similar activities or projects and for the purpose of determining whether the findings resulting from those projects may be incorporated into one or more programs for which those agencies are responsible.

(b) Financial assistance extended to an agency under this Act shall not exceed 80 per centum of the approved costs of the assisted project, except that the Secretary may prove assistance in excess of such percentage if the Secretary determines, in accordance with regulations establishing objective criteria, that such action is required in furtherance of the purposes of this Act. Non-Federal contributions may be in cash or in kind, fairly evaluated, including but not limited to plant, equipment, and services. The Secretary shall not require non-Federal contributions in excess of 20 per centum of the approved costs of programs or activities assisted under this Act.

(c) No project shall be approved for assistance under this Act unless the Secretary is satisfied that the activities to be carried out under such project will be in addition to, and not in substitution for comparable activities previously carried out without Federal assistance, except that the Secretary may waive this requirement in any case in which the Secretary determines, in accordance with regulations establishing objective criteria, that application of the requirement would result in unnecessary hardship or otherwise be inconsistent with the purposes of this Act.

TECHNICAL ASSISTANCE AND TRAINING

SEC. 4. The Secretary may provide, directly or through other arrangements, (1) technical assistance to public and private agencies in developing, conducting, and administering projects under this Act, and (2) short-term inservice training for specialized or other personnel which is needed in connection with projects receiving financial assistance under this Act.

RESEARCH, DEMONSTRATION, AND PILOT PROJECTS

SEC. 5. (a) The Secretary may provide financial assistance through grants or contracts for research, demonstration, or pilot projects conducted by public or private agencies which are designed to test or assist in the development of new approaches or methods that will aid in overcoming special problems or otherwise furthering the purposes of this Act.

(b) The Secretary shall establish an overall plan to govern the approval of research, demonstration, and pilot projects and the use of all research authority under this Act. The plan shall set forth specific objectives to be achieved and priorities among such objectives.

ANNOUNCEMENT OF RESEARCH, DEMONSTRATION, OR PILOT PROJECTS

SEC. 6. (a) The Secretary shall make a public announcement concerning—

(1) the title, purpose, intended completion date, identity of the grantee or contractor, and proposed cost of any grant or contract with a private or non-Federal public agency for a research, demonstration, or pilot project; and

(2) except in cases in which the Secretary determines that it would not be consistent with the purposes of this Act, the results, findings, data, or recommendations made or reported as a result of such activities.

(b) The public announcements required by subsection (a)(1) shall be made within thirty days of making such grants or contracts, and the public announcements required by subsection (a)(2) of this section shall be made within thirty days of the receipt of such results.

SUPPORT TO TRIBAL AND VILLAGE GOVERNMENTS; ECONOMIC DEVELOPMENT

SEC. 7. (a) The Secretary shall provide financial assistance through grants to eligible governing bodies described in subsection (b) for employment of tribal or village government employees, for programs which increase the skills and qualifications of such employees, and for such other activities, including the awarding of grants or contracts by such governing bodies to Indian organizations, to enable such governing bodies to more effectively assume local responsibility for the economic and social well-being of the Indians or Alaskan Natives.

(b) The governing bodies which are eligible recipients of grants described in subsection (a) are the governing bodies of Indian tribes, bands, or groups residing on Federal or State reservations, including Alaskan Native villages or groups as defined in the Alaska Native Claims Settlement Act.

(c) No financial assistance may be provided to any eligible governing body under subsection (a) unless a plan has been submitted to the Secretary describing the manner in which—

(1) the tribal or village government will be strengthened, and

(2) the social or economic well-being of the Indians or Alaskan Natives will be enhanced.

SUBMISSION OF PLANS TO STATE AND LOCAL OFFICIALS

SEC. 8. (a) No financial assistance may be provided to any project under section 3 or any research, demonstration, or pilot project under section 5, which is to be carried out on or in an Indian reservation or Alaskan Native village, unless a plan setting forth the project has been submitted to the governing body of that reservation or village and the plan has not been disapproved by the governing body within thirty days of its submission. If financial assistance is provided to such a project, the Secretary shall not alter the terms and objectives of such project by terminating, suspending or withholding such assistance without the approval of the governing body of the reservation or village on or in which the project is carried on.

(b) No financial assistance may be provided to any project under section 3 or any research, demonstration, or pilot project under section 5, which is to be carried out in a State other than on or in an Indian reservation or Alaskan Native village or Hawaiian Homestead, unless the Secretary has notified the chief executive officer of the State of the decision of the Secretary to provide that assistance.

(c) No financial assistance may be provided to any project under section 3 or any research, demonstration, or pilot project under section 5, which is to be carried out in a city, county, or other major political subdivision of a State, other than on or in an Indian reservation or Alaskan Native village, or Hawaiian Homestead, unless the Secretary has notified the local governing officials of the political subdivision of the decision of the Secretary to provide that assistance.

RECORDS AND AUDITS

SEC. 9. (a) Each agency which receives financial assistance under this Act shall keep such records as the Secretary may prescribe, including records which fully disclose the amount and disposition by that agency of such financial assistance, the total cost of the project in connection with which such financial assistance is given or used, the amount of that portion of the cost of the project supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any book, documents, papers, and records of any agency which receives financial assistance under this Act that are pertinent to the financial assistance received under this Act.

APPEALS, NOTICE, AND HEARING

SEC. 10. The Secretary shall prescribe procedures to assure that—

(1) financial assistance under this Act shall not be suspended, except in emergency situations, unless the assisted agency has been given reasonable notice and opportunity to show cause why such action should not be taken; and

(2) financial assistance under this Act shall be terminated, and application for refunding shall not be denied, and a suspension of financial assistance shall not be continued for longer than thirty days, unless the assisted agency has been afforded reasonable notice and opportunity for a full and fair hearing.

EVALUATION

SEC. 11. (a) The Secretary shall provide, directly or through grants or contracts, for the evaluation of projects assisted under this Act, including evaluations that describe and measure the impact of such projects, their effectiveness in achieving stated goals, their impact on related programs, and their structure and mechanisms for delivery of services, including, where appropriate, comparisons with appropriate control groups composed of persons who have not participated in such projects. Evaluations shall be conducted by persons not directly involved in the administration of the program or project evaluated.

(b) Prior to obligating funds for the programs and projects covered by this Act with respect to fiscal year 1976, the Secretary shall develop and publish general standards for evaluation of program and project effectiveness in achieving the objectives of this Act. The extent to which such standards have been met shall be considered in deciding whether to renew or supplement financial assistance authorized under this Act.

(c) In carrying out evaluations under this Act, the Secretary may require agencies which receive assistance under this Act to provide for independent evaluations.

(d) In carrying out evaluations under this Act, the Secretary shall, whenever feasible, arrange to obtain the specific views of persons participating in and served by programs and projects assisted under this Act about such programs and projects.

(e) The Secretary shall publish the results of evaluative research and summaries of evaluations of program and project impact and effectiveness not later than ninety days after the completion thereof. The Secretary shall submit to the appropriate committees of the Congress copies of all such research studies and evaluation summaries.

(f) The Secretary shall take the necessary action to assure that all studies, evaluations, proposals, and data produced or developed with assistance under this Act shall become the property of the United States.

DELEGATION OF AUTHORITY

SEC. 12. (a) The Secretary is authorized to delegate to the heads of other departments and agencies of the Federal Government any of the functions, powers, and duties of the Secretary under this Act, as the Secretary may deem appropriate, and to authorize the redelegation of such functions, powers, and duties by the heads of such departments and agencies.

(b) Departments and agencies of the Federal Government shall exercise their powers, duties, and functions in such manner as will assist in carrying out the objectives of this Act.

(c) Funds appropriated for the purpose of carrying out this Act may be transferred between departments and agencies of the Government, if such funds are used for the purposes for which they are authorized and appropriated.

DEFINITIONS

SEC. 13. As used in this Act, the term—

(1) "financial assistance" includes assistance advanced by grant, agreement, or contract, but does not include the procurement of plant or equipment, or goods or services;

(2) "Indian reservation or Alaskan Native village" includes the reservation of Alaskan Native village" includes the reservation of any federally or State recognized Indian tribe, including any band, nation, pueblo, or rancheria, any former reservation Oklahoma, any community under the jurisdiction of an Indian tribe, including a band, nation, pueblo, or rancheria, with allotted lands or lands subject to a restriction against alienation imposed by the United States or a State, and any lands of or under the jurisdiction of an Alaskan Native village or group, including any lands selected by Alaskan Natives or Alaskan Native organizations under the Alaska Native Claims Settlement Act; and

(3) "Native Hawaiian" means any individual any of whose ancestors were natives of the area which consists of the Hawaiian Islands prior to 1778.

AUTHORIZATION OF APPROPRIATIONS

SEC. 14. (a) There are authorized to be appropriated, for the purpose of carrying out the provisions of sections 3, 4, and 5 of this Act, $28,000,000 for each of the fiscal years 1982 and 1983.

(b) There are authorized to be appropriated, for the purpose of carrying out the provisions of section 7 of this Act, $50,000,000 for fiscal year 1982 and such sums as may be necessary for fiscal year 1983.

REPEAL OF NATIVE AMERICAN PROGRAMS ACT OF 1974

SEC. 15. Title VIII of the Economic Opportunity Act of 1964 (42 U.S.C. 2991, et seq.) is repealed.

EFFECTIVE DATE

SEC. 16. The provisions of this Act shall become effective on October 1, 1981.

UP AMENDMENT NO. 1396

(Purpose: To provide guidelines for the allotment of financial assistance, to require notice prior to termination, suspension, or withholding of assistance, and for other purposes)

Mr. BAKER. Mr. President, on behalf of the distinguished Senator from Maine (Mr. COHEN) I send an amendment to the desk in the nature of a substitute, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. COHEN, proposes an unprinted amendment numbered 1396 in the nature of a substitute.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows.

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Native American Programs Act".

STATEMENT OF PURPOSE

SEC. 2. The purpose of this Act is to promote the goal of economic and social self-

sufficiency for American Indians, Hawaiian Natives, and Alaskan Natives.

FINANCIAL ASSISTANCE FOR NATIVE AMERICAN PROJECTS

SEC. 3. (a) The Secretary of Health and Human Services (hereinafter referred to in the Act as the "Secretary") is authorized to provide financial assistance to public and nonprofit private agencies, including but not limited to, governing bodies of Indian tribes on Federal and State reservations, Alaskan Native villages and regional corporations established by the Alaska Native Claims Settlement Act, and such public and nonprofit private agencies serving Hawaiian Natives and Indian organizations in urban or rural nonreservation areas, for projects pertaining to the purposes of this Act. In determining the projects to be assisted under this Act, the Secretary shall consult with other Federal agencies for the purpose of eliminating duplication or conflict among similar activities or projects and for the purpose of determining whether the findings resulting from those projects may be incorporated into one or more programs for which those agencies are responsible.

(b) Financial assistance extended to an agency under this Act shall not exceed 80 percent of the approved costs of the assisted project, except that the Secretary may approve assistance in excess of such percentage if the Secretary determines, in accordance with regulations establishing objective criteria, that such action is required in furtherance of the purposes of this Act. Non-Federal contributions may be in cash or in kind, fairly evaluated including but not limited to plant, equipment, and services. The Secretary shall not require non-Federal contributions in excess of 20 percent of the approved costs of programs or activities assisted under this Act.

(c) No project shall be approved for assistance under this Act unless the Secretary is satisfied that the activities to be carried out under such project will be in addition to, and not in substitution for comparable activities previously carried out without Federal assistance, except that the Secretary may waive this requirement in any case in which the Secretary determines, in accordance with regulations establishing objective criteria, that application of the requirement would result in unnecessary hardship or otherwise be inconsistent with the purposes of this Act.

TECHNICAL ASSISTANCE AND TRAINING

SEC. 4. The Secretary may provide, directly or through other arrangements, (1) technical assistance to public and private agencies in developing, conducting, and administering projects under this Act, and (2) short-term inservice training for specialized or other personnel which is needed in connection with projects receiving financial assistance under this Act.

RESEARCH, DEMONSTRATION, AND PILOT PROJECTS

SEC. 5. (a) The Secretary may provide financial assistance through grants or contracts for research, demonstration, or pilot projects conducted by public or private agencies which are designed to test or assist in the development of new approaches or methods that will aid in overcoming special problems or otherwise furthering the purposes of this Act.

(b) The Secretary shall establish an overall plan to govern the approval of research, demonstration, and pilot projects and the use of all research authority under this Act. The plan shall set forth specific objectives to be achieved and priorities among such objectives.

ANNOUNCEMENT OF RESEARCH, DEMONSTRATION, OR PILOT PROJECTS

SEC. 6. (a) The Secretary shall make a public announcement concerning—

(1) the title, purpose, intended completion date, identity of the grantee or contractor, and proposed cost of any grant or contract with a private or non-Federal public agency for a research, demonstration, or pilot project; and

(2) except in cases in which the Secretary determines that it would not be consistent with the purposes of this Act, the results, findings, data, or recommendations made or reported as a result of such activities.

(b) The public announcement required by subsection (a)(1) shall be made within thirty days of making such grants or contracts, and the public announcements required by subsection (a)(2) of this section shall be made within thirty days of the receipt of such results.

SUPPORT TO TRIBAL AND VILLAGE GOVERNMENTS; ECONOMIC DEVELOPMENT

SEC. 7. (a) The Secretary shall provide financial assistance through grants to eligible governing bodies described in subsection (b) to enable such governing bodies more effectively to assume local responsibility for the economic and special well-being of the Indians or Alaskan Natives, as the case may be, to enhance tribal and village governance and administration, to develop tribal and village economies, to increase the skills and qualifications of persons employed in any project of an Indian tribe or Alaskan Native village for the promotion of self-sufficiency of such tribe or village, and for similar purposes. The Secretary shall also provide financial assistance through grants to eligible governing bodies to enable such governing bodies to award to Indian or Alaskan Native organizations, as the case may be, grants or contracts to achieve the purposes of this subsection.

(b) The governing bodies which are eligible recipients of grants described in subsection (a) are the governing bodies of Indian tribes, bands, or groups residing on Federal or State reservations, including Alaskan Native villages or groups as defined in the Alaska Native Claims Settlement Act.

(c) No financial assistance may be provided to any eligible governing body under subsection (a) unless a plan has been submitted to the Secretary describing the manner in which—

(1) the tribal or village government will be strengthened, and

(2) the social or economic well-being of the Indians or Alaskan Natives will be enhanced.

(d)(1) Not later than sixty days after the date of the enactment of this Act, the Secretary shall promulgate interim regulations to govern allotment of funds to eligible governing bodies in fiscal year 1983. Such regulations shall provide that, in allotting funds, the Secretary shall consider each of the factors set forth in paragraph (2)(B) and, in addition, shall consider the ratio of the number of Indians or Alaskan Natives that are, or may become, unemployed to the total number of Indians or Alaskan Natives that reside within the reservation or village.

(2)(A) In fiscal year 1984, Federal funds appropriated under section 15(b) of this Act shall be allotted in accordance with the formula established under subparagraph (B) and subject to the provision of paragraph (3).

(B) The Secretary shall establish a formula for determining the amount of funds to be allotted to each eligible governing body under subsection (a). Such formula shall provide that, in allotting funds, the Secretary shall consider—

(i) the financial resources of the eligible governing body;

(ii) the population of the tribe or village served by such eligible governing body;

(iii) the comparative individual income of members of such tribe or village;

(iv) the isolation of such tribe or village;

(v) the minimum needs of the eligible governing body with respect to governance and administration; and

(vi) such other relevant factors as the Secretary determines to be appropriate.

(3) Notwithstanding paragraph (2), the Secretary shall provide funds to any eligible governing body when necessitated by an emergency or any unforeseen contingency not provided for in the formula established under paragraph (2)(B). Whenever the Secretary provides funds under this paragraph, the Secretary shall report such action to the appropriate committees of Congress.

SUBMISSION OF PLANS TO STATE AND LOCAL OFFICIALS

SEC. 8. (a) No financial assistance may be provided to any project under section 3 or any research, demonstration, or pilot project under section 5, which is to be carried out on or in an Indian reservation or Alaskan Native village, unless a plan setting forth the project has been submitted to the governing body of that reservation or village and the plan has not been disapproved by the governing body within thirty days of its submission. When financial assistance is provided to any such project, the Secretary shall not terminate, suspend, or withhold such assistance without good cause and first giving the recipient written notice not less than thirty days prior to taking such action. The notice shall clearly specify the reasons for such action and set forth the procedures by which the recipient can appeal the proposed action. The Secretary shall establish administrative procedures for appeal of any such action.

(b) No financial assistance may be provided to any project under section 3 or any research, demonstration, or pilot project under section 5, which is to be carried out in a State other than on or in an Indian reservation or Alaskan Native village or Hawaiian Homestead, unless the Secretary has notified the chief executive officer of the State of the decision of the Secretary to provide that assistance.

(c) No financial assistance may be provided to any project under section 3 or any research, demonstration, or pilot project under section 5, which is to be carried out in a city, county, or other major political subdivision of a State, other than on or in an Indian reservation or Alaskan Native village, or Hawaiian Homestead, unless the Secretary has notified the local governing officials of the political subdivision of the decision of the Secretary to provide that assistance.

RECORDS AND AUDITS

SEC. 9. (a) Each agency which receives financial assistance under this Act shall keep such records as the Secretary may prescribe, including records which fully disclose the amount and disposition by that agency of such financial assistance, the total cost of the project in connection with which such financial assistance is given or used, the amount of that portion of the cost of the

project supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of any agency which receives financial assistance under this Act that are pertinent to the financial assistance received under this Act.

APPEALS, NOTICE, AND HEARING

SEC. 10. The Secretary shall prescribe procedures to assure that—

(1) financial assistance under this Act shall not be suspended, except in emergency situations, unless the assisted agency has been given reasonable notice and opportunity to show cause why such action should not be taken; and

(2) financial assistance under this Act shall not be terminiated, and application for refunding shall not be denied, and a suspension of financial assistance shall not be continued for longer than thirty days, unless the assisted agency has been afforded reasonable notice and opportunity for a full and fair hearing.

EVALUATION

SEC. 11. (a) The Secretary shall provide, directly or through grants or contracts, for the evaluation of projects assisted under this Act, including evaluations that describe and measure the impact of such projects, their effectiveness in achieving stated goals, their impact on related programs, and their structure and mechanisms for delivery of services, including, where appropriate, comparisons with appropriate control groups composed of persons who have not participated in such projects. Evaluations shall be conducted by persons not directly involved in the administration of the program or project evaluated.

(b) Prior to obligating funds for the programs and projects covered by this Act with respect to fiscal year 1976, the Secretary shall develop and publish general standards for evaluation of program and project effectiveness in achieving the objectives of this Act. The extent to which such standards have been met shall be considered in deciding whether to renew or supplement financial assistance authorized under this Act.

(c) In carrying out evaluations under this Act, the Secretary may require agencies which receive assistance under this Act to provide for independent evaluations.

(d) In carrying out evaluations under this Act, the Secretary shall, whenever feasible, arrange to obtain the specific views of persons participating in and served by programs and projects assisted under this Act about such programs and projects.

(e) The Secretary shall publish the results of evaluative research and summaries of evaluations of program and project impact and effectiveness not later than ninety days after the completion thereof. The Secretary shall submit to the appropriate committees of the Congress copies of all such research studies and evaluation summaries.

(f) The Secretary shall take the necessary action to assure that all studies, evaluations, proposals, and data produced or developed with assistance under this Act shall become the property of the United States.

DELEGATION OF AUTHORITY

SEC. 12. (a) The Secretary is authorized to delegate to the heads of other departments and agencies of the Federal Government any of the functions, powers, and duties of the Secretary under this Act, as the Secretary may deem appropriate, and to authorize the redelegation of such functions, powers, and duties by the heads of such departments and agencies.

(b) Departments and agencies of the Federal Government shall exercise their powers, duties, and functions in such manner as will assist in carryng out the objectives of this Act.

(c) Funds appropriated for the purpose of carrying out this Act may be transferred between departments and agencies of the Government, if such funds are used for the purposes for which they are authorized and appropriated.

REGULATIONS

SEC. 13. (a)(1) Within six months after the date of enactment of this Act the Secretary shall consult, to the extent practicable, with national and regional organizations representing American Indians, Hawaiian Natives, or Alaskan Natives to consider and formulate appropriate rules and regulations to implement the provisions of this Act.

(2) Within eight months after the date of enactment of this Act the Secretary shall publish proposed rules and regulations in the Federal Register for the purpose of receiving comments from interested parties.

(3) Within sixty days after the closing date for receipt of comments on proposed rules and regulations published under paragraph (2), the Secretary shall promulgate rules and regulations to implement the provisions of this Act.

(b) The Secretary may revise and amend any rules or regulations promulgated pursuant to this Act and may promulgate additional rules or regulations to carry out the provisions of this Act. Prior to revising or amending rules or regulations, or promulgating additional rules or regulations, the Secretary shall consult, to the extent practicable, with appropriate national or regional organizations representing American Indians, Hawaiian Natives, or Alaskan Natives and shall publish any proposed revision, amendment, or additional rule or regulation in the Federal Register not less than sixty days prior to the effective date of such revision, amendment, or additional rule or regulation for the purpose of receiving comments from interested parties.

(c) New regulations are not required by this section with respect to programs contained in this act which were previously authorized by title VIII of the Economic Opportunity Act of 1964 (42 U.S.C. 2991-2992d). Any revision or amendment of rules or regulations previously promulgated under such title of such Act shall be made in accordance with subsection (b) of this section.

DEFINITIONS

SEC. 14. As used in this Act, the term—

(1) "financial assistance" includes assistance advanced by grant, agreement, or contract, but does not include the procurement of plant or equipment, or goods or services;

(2) "Indian reservation or Alaskan Native village" includes the reservation of any federally or State recognized Indian tribe, including any band, nation, pueblo, or rancheria, any former reservation in Oklahoma, any community under the jurisdiction of an Indian tribe, including a band, nation, pueblo, or rancheria, with allotted lands or lands subject to a restriction against alienation imposed by the United States or a State, and any lands of or under the jurisdiction of an Alaskan Native village or group, including any lands selected by Alaskan Native or Alaskan Native organizations under the Alaska Native Claims Settlement Act; and

(3) "Native Hawaiian" means any individual any of whose ancestors were natives of the area which consists of the Hawaiian Islands prior to 1778.

AUTHORIZATION OF APPROPRIATIONS

SEC. 15. (a) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of sections 3, 4, 5, and 11 of this Act for each of the fiscal years 1983 and 1984.

(b) There are authorized to be appropriated, for the purpose of carrying out the provisions of section 7 of this Act, $50,000,000 for fiscal year 1983 and such sums as may be necessary for fiscal year 1984.

REPEAL OF NATIVE AMERICAN PROGRAMS ACT OF 1974

SEC. 16. Title VIII of the Economic Opportunity Act of 1964 (42 U.S.C. 2991, et seq.) is repealed.

EFFECTIVE DATE

SEC. 17. The provisions of this Act shall become effective October 1, 1982.

Mr. COHEN. Mr. President, I rise today on behalf of S. 1088, the Native American Programs Act.

S. 1088 was introduced on April 30 of last year by Senator DENTON. As introduced, the bill would simply have reauthorized the Administration for Native Americans (ANA), an organization situated in the Department of Health and Human Services (HHS) whose purpose is to promote economic and social self-sufficiency for native American Indians, Hawaiian Natives, and Alaskan Natives.

Upon introduction, S. 1088 was referred to the Indian Affairs Committee where it was amended to include a new program, the tribal government support program in section 7. The bill was then reported from the committee to meet the May 15 deadline for reporting authorization legislation.

The Indian Affairs Committee subsequently held two hearings on the tribal government support provision and, in a business meeting held on July 24, approved changes which expanded and refined this program. As drafted in the amendment in the nature of a substitute which the Indian Affairs Committee has approved and which I will offer shortly, the tribal government support program in S. 1088 would make grants available to Indian tribes and Alaskan Native villages to enable those entities to fulfill their governmental obligations to the people within their jurisdiction. They would also become eligible for grants to enhance the economic well-being of tribal members, and to increase the job skills of those tribal members working on the reservation.

Indian tribes located on Federal and State reservations would be eligible for the tribal government support program. The program would be administered by the administration for native Americans (ANA) within the Depart-

ment of Health and Human Services (HHS). Under Section 7, eligible tribal governments must submit plans to the Secretary of HHS setting forth how the grant will benefit the people under the tribes' jurisdiction.

The secretarial review, in the initial year of implementation, will be conducted with reference to seven criteria including the unemployment rate on the reservation. In fiscal year 1984, the Secretary must review grant applications based on the following six criteria: First, the financial resources of the tribe; second, the population of the tribe; third, the comparative individual income of members of the tribe; fourth, the isolation of the tribe; fifth, the minimum needs of the tribe for the purpose of governing; and sixth, other relevant factors that the Secretary may deem appropriate. The Secretary is also empowered to provide money to a tribe in an emergency without respect to the criteria I have just described. In that event, however, the Secretary must make a report to Congress of the circumstances that prompted the disbursement.

In discussing the tribal government support program as it appears in the amendment in the nature of a substitute which I will offer, I would like to cover first, the purpose behind the program; second, the level of funding authorized by the bill; third, the placement of the program in the Administration for Native Americans; fourth, the innovative and important parts of the program; and, finally, the relationship of the program to current programs in the field of Indian affairs.

PURPOSE OF SECTION 7

Mr. President, since the earliest days of our Republic, the United States has considered Indian tribes to be separate and distinct units of government with the authority to exercise the powers of a government over persons within their jurisdiction. This understanding was recognized by the U.S. Supreme Court in *Cherokee Nation* v. *Georgia.* 30 U.S. (5 Pet.) 1 (1831), and was recently reaffirmed by the Supreme Court in January of this year in *Merrion* v. *Jicarilla Apache Tribe,* 102 S. Ct. 894 (1982). This legal principle is fundamental to the field of Indian affairs and the United States has always observed it by insuring that, in its relations with each Indian tribe, it acts as one government to another.

The governmental nature of Indian tribes and its place in the field of Indian affairs was also recognized by President Reagan during his campaign for the Presidency. At that time, in response to a question, he wrote:

By necessary implication, it follows that as governments, Indian tribes have responsibilities toward the people within their jurisdiction that are identical to those that are held by other governments, such as municipalities or States, toward their citizens. For a variety of reasons, however, including the absence of strong economies from most reservations, Indian tribes lack the traditional revenue-raising devices and the traditional revenue-raising resources that other governments use to meet the needs of their citizens. It is this most basic problem that section 7 of S. 1088 is intended to address.

NEED FOR THE TRIBAL GOVERNMENT SUPPORT PROGRAM

The inability of Indian tribes to fund their own governmental services has placed them in the worst of all possible circumstances where they have the responsibility for providing those services without the means to do so. This state of affairs touches virtually every governmental function that people in the non-Indian world take for granted. For example, such essential services as police protection, wildlife and game supervision and management, ambulance service, overall reservation management—an Indian tribe's equivalent to city management—judges for the tribal court, and so forth, are either understaffed or not staffed at all.

The resulting vacuum of authority and expertise creates an environment that is most unattractive to non-Indian enterpreneurs who might invest their private capital on Indian reservations. Furthermore, those Indian-tribes that have developed some economic acitivity on their reservations through tribally-owned enterprises face the temptation, raised by a needy constituency, to divert the profits from the enterprise to the provision of essential services, rather than reinvesting them in the enterprise. This dual demand on tribal business profits is unlike anything that faces most non-Indian businesses.

The tribal government support program is intended to provide direct assistance to Indian tribes to meet their governmental obligations, and, at the same time, to enable Indian tribes to maintain a core of experienced and responsible civil servants who will, in turn, enable the tribes to prepare for the future.

THE LEVEL OF FUNDING FOR THE TRIBAL GOVERNMENT SUPPORT PROGRAM

I would like, at this point, to make a few remarks about the level of funding for the tribal government support program and, at the same time, shed some additional light on the purpose and background of this bill.

Since fiscal years 1974 and 1975, with a gap in 1978, Indian tribes have received funding under titles II-D and VI of the Comprehensive Employment and Training Act (CETA). Indian tribes used the assistance provided pursuant to these two titles to provide public service employment on their reservations. These public service employees provided a wide array of governmental services to the people living on the reservations. In fiscal year 1979, the Indian programs in titles II-D and VI were funded at nearly $120 million. The following year, funding for these two titles was reduced to about $82 million and, in fiscal year 1981, funding was reduced still further to $41,642,077. In fiscal year 1982, funding was eliminated altogether.

Title II-D and VI of CETA had not been well drawn to meet the needs of Indian tribes and their demise from a policy standpoint was unobjectionable. Nevertheless, the Indian Affairs Committee had long been aware of the numerous governmental functions that had been funded under titles II-D and VI, and was concerned that the simple elimination of the programs would seriously impair many tribal governments.

In June 1982, the committee held two hearings at which it received testimony the impact of the elimination of the two programs. At the first of these hearings, one witness told the committee that:

The persons funded under titles II and VI are our accountants, our police, our game wardens, our bus drivers, our maintenance men, our nutrition program, our secretaries, and our aging program staff. They serve as the basic support staff making up what is, in effect, the infrastructure of our tribe.

The tribal government support program is designed to meet these needs and it is authorized at $50 million. The funding level was reached as a 20-percent reduction over the funding level that had been anticipated for titles II-D and VI for fiscal year 1981 before the budget reductions were submitted to Congress.

PLACEMENT OF THE TRIBAL GOVERNMENT SUPPORT PROGRAM IN THE ADMINISTRATION FOR NATIVE AMERICANS

Under S. 1088, the tribal government support program will be administered by the Administration for Native Americans (ANA) within the Department of Health and Human Services. This placement is deliberate and, I believe, necessary to the success of the program. The agency that stands as the most logical alternative to ANA is the Bureau of Indian Affairs (BIA). BIA would, in my view, administer the program with much less success than ANA for several reasons.

To begin with, although BIA has existed now for more than 150 years, it has never developed a program to assist tribal governments in running their own affairs. The tendency, I am afraid, has been for BIA to simply take over those functions that Indian tribes cannot fulfill and perform them through BIA personnel. As a prominent provider of services on Indian reservations, the BIA would not be the most effective administrator of a program designed to enhance the capacity of tribal governments to provide their own services.

ANA, on the other hand, does not provide services on Indian reserva-

tions. Its mandate is to assist Indian tribes and taking control of their destinies. It has an experienced staff of about 50 who have spent years administering grants to tribes under the general mandate of the ANA enabling act. To the extent that Congress can insure, through the placement of a program in a particular agency, program will be properly administered, the placement of the tribal government support program in ANA is sound.

INNOVATIVE FEATURES OF THE TRIBAL GOVERNMENT SUPPORT PROGRAM

Besides the establishment of Federal policy to assist tribal governments in meeting their obligations, the tribal government support program in section 7 would establish, for the first time, criteria which would require ANA to distinguish between have and have-not tribes in reviewing grant applications. These criteria, which I mentioned at the outset of my statement, have never been embodied in any statute nor, to my knowledge, are they employed in the administration of any Federal program of assistance to Indian tribes.

Under the current system, the wealthier and more sophisticated tribes tend to benefit from Federal programs of assistance to Indians while the poorer tribes with less experience find their needs are not met. The criteria set forth in this bill constitute a long step toward ending this inequity. The use of these criteria will also prompt the collection of much-needed raw data on the different reservations which may then be used to develop strategies to meet the economic problems of each reservation.

RELATIONSHIP TO THE INDIAN SELF-DETERMINATION AND EDUCATION ASSISTANCE ACT

A word is also in order about the relationship of the tribal government support program to the Indian Self-Determination and Education Assistance Act. This act, also known as Public Law 93-638, was enacted in 1973 and was intended to provide the means by which Indian tribes would take over a wide variety of programs which at that time were administered by the United States.

The Self-Determination Act, however, instead of beginning with the expenses the tribe would encounter in operating the Federal programs began with the expenses the United States meets in operating the program. The disparity between these two costs has had the ironic result of propelling some Indian tribes who have sought to operate "638" programs to the point of bankruptcy.

On June 30 of this year, the Indian Affairs Committee held an oversight hearing on the Self-Determination Act. At that time, one of the administration witnesses—who was seconded by another—suggested that the problem of administrative costs could be met by establishing a separate fund for those programs that would reflect the cost to the tribes of administering Federal programs. Although the tribal government support program does not pretend to meet the administrative costs problem in the Self-Determination Act, the suggestion of the administration witnesses on June 30 are in keeping with the intent of this program and spring from the same analysis that brought forth the policy embodied in this bill.

CONCLUSION

Mr. President, we are all aware of the devastating poverty that afflicts Indian reservations in this Nation. Many believe these problems cannot be solved. I believe that they can—and will—be solved when Indian tribes gain the capacity to make decisions for themselves and to fashion their own destiny. With the development of reliable, responsible, and experienced tribal governments, Indian tribes will begin to address the problems that have turned their reservation into economic wastelands.

Although I do not see the tribal government support program in S. 1088 as a panacea, I do see the establishment of such a program as a precondition to responsible tribal government, and a functioning tribal government is a precondition to economic development.

An analysis of section 7 follows:

ANALYSIS OF SECTION 7, OF S. 1088, the Native American Programs Act

Sec. 7(a) provides that the Secretary of Health and Human Services (HHS) shall provide assistance to the eligible governing bodies of Indian tribes and Alaska Natives. The assistance shall be provided in the form of grants. The purpose of the grants is to enable the eligible governing bodies to assume more effective responsibility for the economic and social well-being of those persons under their jurisdiction, to improve the capacity of the eligible governing bodies to discharge the duties of government including administration, and to increase the skills and qualifications of any person employed in any project of the eligible governing bodies if that project is intended to promote the self-sufficiency of the affected tribe or Alaskan Native village.

Subsection 7(a) provides, in addition, that the Secretary is empowered to make grants to the eligible governing bodies where the funds from those grants are to be used to enable the eligible governing bodies to award grants or contracts to Indian or Native Alaskan organizations which are designed to achieve the purposes of subsection 7(a). These purposes have been described above.

Sec. 7(b) sets forth those entities that qualify as "eligible governing bodies" under section 7. Subsection 7(b) provides that the governing bodies of Indian tribes, bands or groups residing on Federal and State reservations are encompassed in the term "eligible governing bodies." Alaskan Native villages or groups as defined in the Alaskan Native Claims Settlement Act are expressly included within the meaning of the term "eligible governing bodies" by this subsection.

Sec. 7(c) sets forth the elements that must be included in any proposal for assistance under section seven of this Act. Under subsection 7(c), before the Secretary may provide financial assistance to any eligible governing body pursuant to section seven, he must receive a plan which describes, first, how the financial assistance will strengthen the tribal or village government and, second, how it will enhance the social or economic well-being of the Indians or Alaskan Natives who are under the jurisdiction of the eligible governing body submitting the proposal.

Sec. 7(d) sets forth criteria which the Secretary shall employ in allotting funds made available under section seven. Subsection 7(d)(1) requires the Secretary to promulgate interim regulations to govern the allotment of funds made available under section seven during fiscal year 1983. The regulations shall require the Secretary to consider each of the factors set forth in subsection 7(d)(2)(B). These factors are explained in greater detail below. In addition to the factors set forth in subsection 7(d)(2)(B), the Secretary shall also consider, only for the distribution of funds in fiscal year 1983, the present or prospective unemployment rate on the affected reservation or within the affected village.

Subsection 7(d)(2) comprises subparagraphs (A) and (B). Subparagraph 7(d)(2)(A) provides that, during fiscal year 1984, the funds made available under section seven shall be allotted in accordance with the criteria set forth in subparagraph 7(d)(2)(B). An explanation of the criteria follows:

(i) requires that the Secretary shall consider the financial resources of the eligible governing body. This factor is intentionally broad and requires the consideration of those financial resources, whatever they may be, unless otherwise precluded by law.

(ii) requires the Secretary to consider the population of the eligible governing body. This factor should be used with reference to the population served by the eligible governing body including, when appropriate, those persons who, although not members of the tribe or village served by the eligible governing body, nevertheless receive services from it.

(iii) requires the Secretary to consider the comparative individual incomes of the members of the eligible governing body. The intent of this factor ensure that, in the allotment of funds under section seven, the Secretary considers the relative prosperity of eligible governing bodies based on the individual incomes of their members. The word "comparative" is used to require the Secretary to compare the individual incomes on the reservations or in the villages with the individual incomes on other reservations or in other villages.

(iv) requires the Secretary to consider the isolation of the eligible governing body. This factor is intended to ensure that the increased costs and limited access to private capital that are associated with great distances from transportation points and centers of population are considered by the Secretary.

(v) requires the Secretary to consider the minimum needs of the eligible governing body in governing and administering the persons and area within its jurisdiction. Services such as the provision of security for the inhabitants of the village or reservation and its natural resources, the operation of health, aging, and other programs, as well as ensuring the technical and administrative

competence of those responsible for administering the eligible governing body and services, are included within this factor. The foregoing list is only for illustrative purposes and is in no way exhaustive.

(vi) empowers the Secretary to consider other relevant factors as he may deem appropriate in the allotment of funds under section seven.

The six factors described above, taken together, are intended to provide the Secretary with a basis for distinguishing between those eligible bodies with little or no capacity to meet their governmental needs from those that do. The factors embody the policy of section seven to ensure that tribes with significant revenue raising resources do not receive funding on an equal basis with tribes that do not have such resources. It is the strong intent of the section seven program that those Indian tribes and villages that have the resources to support sophisticated and experienced staffs not benefit from this program at the expense of those tribes and villages that have little or no ability to provide for themselves.

Subsection 7(d)(3) provides that in an emergency or under conditions created by an unforeseen contingency, the Secretary shall provide funds pursuant to section seven to assist an eligible governing body in meeting the demands arising out of the emergency without regard to the factors set forth in subparagraph 7(d)(2)(B). This is an unusual procedure and is only to be exercised under exigent circumstances. Whenever the Secretary acts under this subsection, he is required to report his action to the appropriate committees of the House of Representatives and the Senate along with his reasons for taking the action.

Mr. HATFIELD. Mr. President, I rise today to express my support for S. 1088, the Native American Programs Act, and particularly for section 7—the tribal government support program—which was added to the bill by the Select Committee on Indian Affairs. The purpose of the section 7 program is to establish a new program to strengthen tribal governments and, by so doing, to provide greater opportunities to increase employment and enhance economic development on Federal and State Indian reservations.

Before the Indian Affairs Committee reported S. 1088, Senator DOMENICI and I joined in a letter advising the committee of our view that the elimination of titles II-D and VI of the Comprehensive Employment and Training Act (CETA) had created a real need on Indian reservations. Moreover, we did not believe it was likely that these needs would be met through the efforts on the part of the administration to stimulate the economy generally. In our experience, Indian reservations had not prospered even in times when the rest of the Nation was making great economic gains. This is so because the factors that have inhibited the development of strong reservation economies are diverse and unique to the Indian world. As a result they require special solutions. We asked the Indian Affairs Committee to consider the adoption of a new program to help meet the growing unemployment on Indian reservations. They responded by adding section 7—the tribal government support program—to the bill.

Mr. President, I support the tribal government support program for two important reasons. First, it places the emphasis of the program where it should be—the support of the tribal governments themselves. Second, it establishes criteria for differentiating between those tribes that have and those that have not. These criteria have never been embodied in any Federal statute nor are they even found in any Federal regulation. As a result, many Indian programs administered by the Federal Government have gone to assist those Indian tribes who are least in need of assistance. This program is designed to benefit those tribes that are in the greatest need.

I would like to say a word at this point about the importance of tribal government to the development of strong, self-reliant Indian communities. The tribal government, like any unit of government, bears toward its people the obligations of providing public security, insuring and adequate level of health care, dispensing reliable and competent justice, and a host of other functions that make up the day-to-day life of a local government and that insure the right-functioning of a community.

In addition to these duties, each tribal government has a further obligation to oversee the provident development of its resources. The tribe, therefore, must act as both a government and a business. In order to properly discharge these obligations, it is crucial that the tribal government be manned by well-trained and competent staff. Unfortunately, few Indian tribes have the resources, at present, to support such a staff. The tribal government support program is designed to provide assistance from the Federal Government to enable tribal governments to function.

Mr. President, funding for titles II-D and VI of CETA reached its height in fiscal year 1979. At that time, it was funded at nearly $120 million and it supported about 15,000 positions. I would note that as of February of 1981, according to a survey conducted by the Bureau of Indian Affairs, these two titles supported a total of 8,051 jobs in Indian country. Of these jobs, 2,011 were in general tribal administration, 1,036 were in health and the environment, another 742 were in public safety, and 496 were in housing. The remainder of these jobs fell into such categories as farming and ranching, maintenance workers, child care, and programs for the elderly. Most of these jobs are public service positions.

The BIA survey also concluded that the cost of these positions was not great: The average CETA position cost $5,547 with an average of $4,734 for a job in tribal administration to $5,350 in the health and environment categories.

A sound tribal government which can administer the public affairs of the community and deal effectively with the non-Indian world regarding the resources of the reservation is an essential element in the development of reservation economies. I believe that the tribal government support program in section 7 of S. 1088 properly focuses the Federal Government on this aspect of Indian affairs and I urge my colleagues to support it.

Mr. ANDREWS. Mr. President, I rise in support of S. 1088, a bill to provide for the reauthorization of the administration for Native Americans at the Department of Health and Human Services. As amended by the Select Committee on Indian Affairs, a new section is added to provide a new program initiative directed to the support of the Indian tribal governments. The purpose of this program is to support and develop the basic infrastructure of tribal government and also to stimulate the development of economies on Indian reservations.

In fiscal year 1982 the public service components of title II-D and VI of the Comprehensive Employment Training Act were disfunded. In fiscal year 1979 these two titles were funded at a combined total of $19.8 million and funded approximately 15,000 positions within Indian tribal structures. The loss of these positions through the shrinkage, and now termination, of funding of the public service component of CETA has had a devastating impact on the Indian tribes, resulting not only in the loss of jobs on Indian reservations, but also the loss of capacity to undertake tribal economic initiatives that will stimulate reservation economies necessary to lessen the dependency on Federal funds.

Mr. President, perhaps the best way to illustrate the problem this legislation is intended to address is to describe the situation of one of the tribes located in my own State of North Dakota. At hearings before the Select Committee on Indian Affairs on June 10 of last year, Mr. Frank Lawrence, then chairman of the Standing Rock Sioux Tribe, described the importance that CETA funding has had since its inception in 1974. Mr. Lawrence testified that over the years some 2,000 members of his tribe had been employed with CETA funds performing a number of valuable public functions: Serving as police patrolmen and security guards in isolated local Indian communities; conservation officers; clerical staff for the elderly nutritional program; and as ambulance drivers for reservation health facilities.

Mr. Lawrence testified that the tribe started fiscal year 1981 with 161 posi-

tions and $1,003,037 under title II-D, 72 positions and $45,156 under title III, and 97 positions and $613,993 under title VI. It came to a total of 330 positions and $2,062,236. Mr. Lawrence stated that if funding for the title II-D and VI programs was lost: The nutrition for the elderly program would lose 23 persons; the ambulance program would lose 22 positions; the day care program 16 people; and the law enforcement program 26 people. Those positions are now lost.

Mr. President, this is the position of but one of the four tribes in North Dakota. In fiscal year 1980 the combined total of funding to the four tribes in my State under title II-D and VI was $2.9 million; in fiscal year 1981 it was reduced to $1.7 million; and in fiscal year 1982 it was of course zeroed. I would like to point out, Mr. President, that due to lack of reservation-based economies, nearly all of this money is spent directly in nearby non-Indian communities. Thus, the loss of this funding has not only hurt the governmental capabilities of the tribes and the delivery of services to Indians, but has also had a severe impact on the economy of the local non-Indian communities.

Mr. President, I believe that tribal governments must play a central role in the delivery of services to its people and, more importantly, in the development of economic enterprises on Indian reservations. I strongly believe that the approach encompassed in section 7 of S. 1088, as reported by the committee, is sound and I urge my colleagues to join with me in support of this measure.

Mr. DOMENICI, Mr. President, recession in the general economy means depression in Indian country, unless we keep our established legal and treaty obligations. Unemployment among our Nation's Indian labor force hovers around 45 percent. Isolation, poor infrastructure, and a large lag in education characterize the relatively low levels of Indian participation in private enterprise. While we work to reduce deficits to stimulate the private sector, we must be aware of the persistent economic problems faced by Indians on a reservation or in a pueblo.

While titles II-D and VI of CETA were available to Indians, much of the lack of private enterprise jobs could be alleviated. Between fiscal year 1975 and 1981, total CETA funds to Indians ranged from $71 million to $248 million per year, and averaged $154 million. I raise these figures to illustrate the severe impact felt by Indians with the loss of title II-D and VI funds which were used primarily to strengthen tribal government and essential services like fire protection, health services, and transportation. Under the new Trainings for Jobs Act, we estimate that $80 million would be available to the tribes. This is almost half of what had been available to Indians for the past 6 years. Of this reduction in funds about $42 million per year on average is due directly to title II-D and VI which are no longer available.

Indians in New Mexico are feeling the impact of the loss of CETA job slots. They tell me of the rising dependence on general assistance and the difficulty of finding replacement jobs due to the economic factors I mentioned above. When S. 1088 offered the prospect of replacing these very dear and necessary positions, Indian leaders in my State urge $50 million for new authorizations in the economic and social development programs of the Administration for Native Americans in the Department of Health and Human Services. With the $80 million anticipated in the new Jobs Act, the total potential for Indian job programs would be about $130 million. S. 1088 at present allows $30 million in new job slots for Indians.

Even if we are fortunate enough to obtain full funding, $110 million from both the new jobs act and S. 1088 would represent about 70 percent of CETA funding to Indians over the past 6 years. It is clear to me that these job slots are needed. Therefore, I urge my colleagues to support S. 1088 and the new jobs provisions that are very vital to Indian people who have fewer alternative opportunities.

UP AMENDMENT NO. 1397

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the distinguished Senator from Oklahoma (Mr. NICKLES) and I ask it be stated by the clerk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) on behalf of Mr. NICKLES proposes an unprinted amendment numbered 1397.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 11, line 10, strike $50,000,000 and insert in lieu thereof $30,000,000.

Mr. NICKLES. Mr. President, I express my sincere appreciation to my colleague, Mr. COHEN, for his leadership in directing the attention of the Senate to the needs of the Native Americans. His awareness of the continued appalling poverty caused by the lack of economic development among the Native American groups in the United States had led him to devote an inordinate amount of his time and expertise to finding solutions for these problems in Indian country.

Section 7, the tribal government support program, contains some excellent criteria that, perhaps for the first time, will force the Federal Government to recognize that Indian groups are diverse in their needs and resources. I feel that these initiatives should be extended to all Indian programs in the Federal Government. The concern has been stated that the Administration for Native Americans should handle tribal government support programs because the Bureau of Indian Affairs, throughout its long history, has not demonstrated a willingness to lead tribes to self-sufficiency. The Bureau of Indian Affairs has a $1 billion budget to administer programs to less than 1 million Native American service population. I strongly suggest that we must not ignore the BIA but should do all we can to insist that they, too, recognize the varying needs and resources of the tribes and approach solutions to Native American problems with that in mind.

My amendment to S. 1088 would lower the authorization level for section 7 from $50 million to $30 million. In these days of constraints on the growth in social programs, I cannot in good conscience condone a tripling of the budget for the Administration for Native Americans.

I urge the adoption of my amendment to this legislation. I then urge my colleagues in the U.S. Senate to work toward a comprehensive approach to economic development for Native Americans through a concentrated effort at consolidation of the splintered attempts that presently exist throughout many departments in the executive branch of the Federal Government.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 1397) was agreed to.

UP AMENDMENT NO. 1398

Mr. BAKER. Mr. President, I have another amendment on behalf of the distinguished Senator from Maine (Mr. COHEN) which I send to the desk and ask that it be stated.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. COHEN, proposes an unprinted amendment numbered 1398.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Page 11, line 13, strike section 16, and renumber the following section 17 accordingly.

Mr. ROBERT C. BYRD. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ROBERT C. BYRD. Are these amendments to the substitute?

The PRESIDING OFFICER. They are amendments to the substitute set forth by the majority leader.

Mr. ROBERT C. BYRD. I thank the Chair. I thought I understood the Chair earlier to say the substitute had been agreed to.

The PRESIDING OFFICER. No.

Mr. ROBERT C. BYRD. I was in error.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (UP No. 1398) was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the substitute, as amended.

The amendment (UP NO. 1396), as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and to be read a third time. The bill was read the third time and, as amended, was passed.

Mr. BAKER. I can hardly wait.

PACIFIC SALMON STOCKS

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate, Senate Resolution 455.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 455) instructing the Secretary of Commerce to strengthen and define his position regarding the status of Pacific salmon stocks.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. GORTON. Mr. President, I take this opportunity to speak on behalf of Senate Resolution 455, a resolution which addresses the status of Pacific salmon stocks and the ongoing interception negotiations between the United States and Canada.

On October 4, the United States will commence a new round of negotiations with Canada concerning the valuable Chinook salmon resource of the Northeast and Alaska. These salmon originate in the waters of Washington, Oregon, Alaska, and British Columbia, and during their life cycle, they are caught by both United States and Canadian fishermen. Yet the resource is at an all-time low, and while the United States has taken significant steps to conserve Chinook salmon, similar significant steps have not yet been taken by Canada. Without a management regime in force in both countries, we cannot hope to rebuild and protect this valuable resource.

Mr. President, because I am deeply concerned about the need for a bilateral management regime for Chinook salmon, I have cosponsored this resolution, introduced by my colleague, Senator MURKOWSKI, from the outset. The resolution directs the Secretary of Commerce to establish a strong negotiating position which would insure that our salmon stocks are protected and that both countries bear the costs of conservation equitably and equally. I believe that the effect of this resolution will be to emphasize to all who are involved in the negotiations and to the Canadian Government the full extent of the Senate's concern about this issue.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 455) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 455

Whereas Pacific salmon orginating in the waters of Washington, Oregon, British Columbia, and Alaska wander freely across boundaries, both as rearing juveniles and maturing fish bound for their spawning streams; and

Whereas as a result of this migratory pattern, fish of one country are caught in the fisheries of the other country both as an incidental harvest to domestic salmon fisheries and, in some cases, in targeted fisheries; and

Whereas the mixed stock nature of Chinook (king salmon) fisheries which harvest fish both as immatures and matures (due to their long-life history at sea) complicates the management of this species, which must also take into account attempts to harvest both healthy stocks and hatchery stocks, as well as providing for the conservation needs of depressed stocks, and not neglecting that this species also enters many different forms of fishery and is taken by a number of different user groups: commercial, recreational, and personal use in the United States and Canada; and

Whereas severe conservation problems have been identified with most Chinook stocks from the Columbia River to southeastern Alaska and recent work by scientists of both nations has highlighted stock problems in British Columbia, where those stocks are estimated to be reaching only one-third of their optimum escapement requirements; and

Whereas Chinook salmon fisheries in British Columbia harvest well over one million Chinook salmon annually compared to a harvest of slightly more than two hundred and fifty thousand fish in southeast Alaska as a result of the adoption by the State of Alaska of a fifteen-year rebuilding program designed to return natural Chinook runs in major rivers in southeast Alaska to their historical levels of abundance; and

Whereas the realization that neither country will be able to optimize production from its salmon stocks without an agreed upon set of management ground rules governing intercepting fisheries on both sides of the border and recognizing that unregulated escalation of interceptions and intercepting fisheries in British Columbia can only aggravate the allocation and conservation problems currently being faced by both nations: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Secretary of Commerce should take all appropriate steps necessary to strengthen and define a United States position that will insure—

(1) that our anadromous fish stocks are perpetuated at productive levels;

(2) that our fishermen are treated in an equitable manner in terms of sacrifices necessary to achieve conservation goals;

(3) that interception problems are addressed in a manner having minimum impact on our user groups; and report back to Congress on at least a semiannual basis progress in these areas.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEASIBILITY OF CERTAIN WATER RESOURCE DEVELOPMENTS

Mr. BAKER. Mr. President, next on my list is S. 2443, Calendar Order 570. I wonder if the minority leader can clear that?

Mr. ROBERT C. BYRD. Yes, Mr. President, that item is cleared.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask the Chair to lay before the Senate S. 2443, Calendar Order 570.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 2443) to authorize the Secretary of the Interior to engage in feasibility investigations of certain water resource developments.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 1395

(Purpose: To authorize the Secretary of the Interior to conduct a feasibility study of the Muddy Creek erosion control project, Montana)

Mr. ROBERT C. BYRD. Mr. President, I offer an amendment on behalf of Mr. MELCHER.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) on behalf of Mr. MELCHER proposes an unprinted amendment numbered 1395.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 11, add the following new section.

(15) Muddy Creek Basin hydrologic, surge relief, and erosion control study, near Great Falls, Montana.

● Mr. MELCHER. Mr. President, at a time when soil erosion is becoming a national concern, I bring before this body's attention a problem that cannot be ignored. The soil erosion and natural resource problems taking place in the Muddy Creek Basin near Great Falls, Mont., are considered to be among the worst in the State. This small drainage system is comprised of about 314 square miles, some of the most productive farm and grazing lands in the State. Yet, this land area is stripped of some 213,000 tons of its rich top soil each year. That great river already known as the "Big Muddy," the Missouri River, receives this soil to carry it irretrievably away.

Efforts to come to grips with the Muddy Creek problem over the past 3 years have been long and exasperating for those 540 ranchers and farmers whose livelihoods depend on the depleting productivity of this area. Landowners formed the Muddy Creek Landowners Association. With the help of grants from the State, and with the assistance of local agencies, an extraordinary attempt has been made to determine how the erosion problems can be fatally attacked. Further attempts and expenditures of money will be, in a large part, less effective unless the Bureau of Reclamation is authorized to determine the feasibility of what is considered to be the final solution, a relief system designed to lessen impacts of irrigation water return flows. I repeat, further work toward the final solution of this severe erosion problem is contingent upon authorization for this study. It has already been estimated that a water surge relief plan could reduce return flows of irrigation water some 61 percent, which would be a major complement to other irrigation improvements being made to irrigation systems in the drainage area.●

● Mr. BAUCUS. Mr. President, I rise in support of an amendment offered by my colleague from Montana. This is a very simple amendment about a very serious problem. The amendment would simply authorize the Bureau of Reclamation to conduct two feasibility studies on Muddy Creek. The amendment is identical to a bill (S. 1489) that I introduced in July of 1981.

Mr. President, Muddy Creek is a serious soil erosion problem located in northcentral Montana. The problem directly affects over 540 small farmers and ranchers. For the past 3½ years, I have been working with local, State and Federal officials in Montana to devise ways to solve the Muddy Creek soil erosion problem. Part of our efforts included the formation of an interagency Federal task force to evaluate the problem and to recommend some solutions. Led by the Soil Conservation Service in USDA, the task force included members of the Bureau of Reclamation, the Environmental Protection Agency, and U.S. Army Corps of Engineers.

Mr. President, this amendment is a direct result of this task force's recommendations. Among its recommendations are two that call for studies to be conducted by the Bureau of Reclamation. One is a hydrology study and the other is a feasibility grade surge release study. According to the report, these studies are essential to the ongoing efforts to solve the Muddy Creek problem.

The amendment does not add a dime to the Federal budget. It simply authorizes the Bureau of Reclamation to conduct these studies. It is my hope, furthermore, that the Bureau of Reclamation can conduct these studies with available funds.

Mr. President, as I mentioned, the efforts on the Muddy Creek problem have been cooperative. I hope that the Department of Agriculture will also be able to move forward with their efforts on the Muddy Creek project. Let me quote from a July 2, 1982, letter from Secretary Block to Mr. David Stockman:

> The entire Muddy Creek Basin Erosion Control project involves coordinated implementation of measures to be undertaken by the U.S. Department of Agriculture and the Environmental Protection Agency in addition to the Bureau of Reclamation. We believe that any bill to authorize the Bureau of Reclamation to construct the project should also authorize the U.S. Department of Agriculture portion of the project.

The amendment before us does not authorize construction, but does authorize feasibility studies on Muddy Creek. I hope that the Department of Agriculture will be able to complete a post authorization report on the onfarm technical and financial assistance portion of the project.

I want to mention the untiring efforts of John P. Andrews, Muddy Creek project coordinator, and the entire board of supervisors of the Cascade County Conservation District. The efforts of the Board have allowed the interagency cooperation to make real progress toward a resolution of the Muddy Creek problem.

Mr. President, I urge passage of the amendment and of the omnibus bill, S. 2443.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia.

The amendment (UP No. 1395) was agreed to.

Mr. BAKER. I ask the Chair to inquire if there are any further amendments.

The PRESIDING OFFICER. Are there further amendents? If not, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and to be read a third time. The bill was read the third time.

Mr. BAKER. Mr. President, I ask the Chair now to lay before the Senate H.R. 5536, Calendar Order No. 763.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. There being no objection, the clerk will state the bill by title.

The assistant legislative clerk read as follows:

> A bill (H.R. 5536) to authorize the Secretary of the Interior to engage in a feasibility study of water resource development and for other purposes in the Central Platte Valley, Nebraska.

Mr. BAKER. Mr. President, I move to strike all after the enacting clause of H.R. 5536 and insert in lieu thereof the text of S. 2443, as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

Mr. MURKOWSKI. Mr. President, the Committee on Energy and Natural Resources does not intend that this measure authorize any additional budget authority for fiscal year 1982 than that already available to the Department of the Interior. The committee intends that any fiscal year 1982 costs incurred from the bill will be absorbed from existing funds.

Mr. CHAFEE. Mr. President, earlier this month I introduced an amendment (No. 2011) which calls for cost sharing for the water reclamation feasibilities studies contained in S. 2443 on a 75 percent Federal, 25 percent non-Federal interest basis.

The language of my amendment is simple and quite similar to S. 1809, a bill I introduced last year which calls for non-Federal interests to pay 50 percent of future water resources studies undertaken by the Army Corps of Engineers. The only difference is the lower rate of the local, non-Federal interest cost sharing required under this amendment.

Specifically, this amendment requires that a non-Federal interest—a State or States, or a local governmental entity, agree to pay 25 percent of the cost of each of the studies authorized by this bill.

The rationale for this approach is simple. Anyone who has seen our Federal water resources process at work recognizes the scattergun effect of the program. We fail to target projects. The States take whatever is made available. The Federal Government pays the full cost of the study and consequently there is no local constraint.

When I was Governor of Rhode Island I saw this happen. In the Senate, I see it replicated time and again.

My amendment simply says that none of these projects can be studied unless the local entities—the beneficiaries—agree to put up a small portion of the cost.

The benefit of this approach is twofold. First, since State and local government would fund a portion of the study there would be more Federal money available to fund necessary studies. Second, and perhaps most important, only those studies which have substantial local support would be undertaken. This will result in the completion of high-priority studies at a faster rate than under the current system.

Mr. President, I believe this approach is very close to one that has been developing within the administration. Earlier this year Assistant Secretary of the Army, William Gianelli, testified before the Senate's Water Resources Subcommittee, chaired by my good friend Senator ABDNOR, in which he said he was developing an approach for cost-sharing on studies. I would like to enter his statement in the record for my colleagues to review.

Recently I also received a letter from Assistant Secretary Gianelli which I would like to submit for the record. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,
Washington, D.C. August 12, 1982.

Hon. JOHN H. CHAFEE,
Chairman, Committee on Environment and Public Works, Washington, D.C.

DEAR MR. CHAIRMAN: I had a good conversation on Tuesday with Bob Hurley of your staff and, based on that conversation, I felt it might be appropriate for me to share with you some of my thinking on cost recovery for water projects and for the planning process. I believe the Administration's cost-sharing proposals should be viewed as a positive response to the current state of the Federal water program. The reality is that the program has become increasingly unable to compete for even a small share of the Federal budget.

This comes at a time when there is a real demand for good solid water projects. The administration wants the cost of water projects which can be assigned to beneficiaries to be recovered over time in accord with the realization of the projects' benefits. The fully marketable nature of navigation services and many other water projects' services provide a basis for non-Federal sponsors to finance the major portion of the capital costs of these projects.

I am convinced that there will never be a return to traditional approaches and historic formulas and if we expect to build new projects and adequately maintain and modernize existing projects, we are going to have to move aggressively in a new direction.

I also believe that reliance on substantial cost-sharing will provide an excellent screening device to prevent the construction of unneeded or unsound water projects.

I am also proposing that, beginning in fiscal year 1983, new studies pertaining to specific problem areas (other than inland navigation) be undertaken in two phases. The first phase will be a reconnaissance phase financed 100 percent with Federal funds and normally completed within a year at about 20-25 percent of the cost of the full study. The second phase will be a detailed feasibility study to be cost-shared with local project sponsors on a 50-50 basis with one-half of the non-Federal share available in the form of "in kind" services if the parties agree. I would view the reconnaissance study to be fully funded when it receives its initial appropriation. I believe that this procedure will not only speed up the planning process, but will increase the proportion of studies which leads to successful solution of problems.

I am enclosing a copy of my testimony before your companion subcommittee chaired by Senator Abdnor. This statement outlines in much greater detail what we are proposing in the cost-sharing area.

I am aware of your own legislative initiative on cost-sharing of studies, and I believe your leadership in this regard will be of great assistance to us. I further believe that our cost-sharing proposals on project construction and operations and maintenance also warrant your close consideration and support. I am convinced that we will not succeed unless we receive some stong leadership from prominent Members of the Senate such as yourself.

Sincerely,

WILLIAM R. GIANELLI,
Assistant Secretary of the Army (Civil Works).

Enclosure.

STATEMENT OF WILLIAM R. GIANELLI

Mr. Chairman and members of the Committee: Pursuant to your letter of invitation dated June 3rd, Mr. Chairman, I welcome this opportunity to discuss the President's budget recommendations for new construction starts for the Army Corps of Engineers in fiscal year 1983. My prepared statement is brief, Mr. Chairman. The details of the President's proposed Budget Amendment for new starts are included in my letter to you of May 25th, and in the attachments to that letter.

Last February, I stated that pressure on the Federal budget precludes the Federal Government from being able to finance all—or even a major portion—of the water projects which this Nation needs. I stated that the Civil Works Program of the Army Corps of Engineers was at a crossroads, that no major legislation authorizing new projects has passed Congress since the middle of the past decade, and that new financing and cost-sharing proposals were necessary to enable us to move out in fiscal year 1983 with a modest construction new starts program.

We started with a list of 12 projects which we found to be sound on the basis of engineering, economics, and the environment. Subsequently, three additional projects were identified. We consulted with non-Federal agencies and sought their participation in finanicng and cost-sharing. I am pleased to report now that we are recommending nine of these projects for constructions starts in fiscal year 1983. Letters from the local sponsors expressing their intention to accept our financing proposals are found in the attachments I provided to you.

The proposed new starts and their financing are described as follows:

[In millions of dollars]

Project and purpose	Capital cost	Financing		Federal funds 1983
		Federal	Local	
Bradley Lake, AK—Hydro	478.0	0	478.0	[1]6.0
Strube Lake, OR—Hydro	106.0	0	106.0	[1]0.4
Bonneville Units, OR—Hydro	21.3	0	21.3	[1]0.5
Davenport, IA—[2]FC	50.6	30.7	19.9	1.3
Kahoma, HI—FC	20.0	13.0	7.0	3.0
Merced, CA—Fe	116.0	75.3	40.7	4.0
Virginia Beach, VA—FC	5.4	3.5	1.9	2.2
Randleman Lake, NC—[3]MP	159.0	68.7	90.3	8.2
Freeport Harbor, TX—[4]	26.2	13.1	13.1	3.4
Total	982.5	204.3	778.2	29.0

[1] Temporary advance.
[2] FC—flood control.
[3] MP—multipurpose.
[4] North jetty replacement in lieu of rehabilitation of existing jetty.

The President's Budget submitted to Congress in February indicated that additional funds would be requested for sound new construction starts that met the Administration's criteria for non-Federal financing and cost-sharing. However, it is now possible to initiate the projects within the original $1,209.4 million proposed for Civil Works Construction, General in fiscal year 1983. Specifically, we have reviewed the original program project-by-project and have determined that it is reasonable to expect that a savings and slippage reduction of nearly $93 million can be taken without detriment to project schedules. The basis for an increase in the estimate of anticipated savings and slippage of $31 million, from $62 million to nearly $93 million, is shown on the list of projects attached to my letter of May 25th. In general, the continued good bidding climate in Fiscal Year 1982, reflecting stabilizing prices, has reduced funding requirements for a number of projects.

We have sought non-Federal, up-front financing in accordance with the following percentages, the primary basis of which is vendibility of outputs. The traditional percentages are shown in parenthesis.

For cost allocated to	*Percent Non-Federal financing*
Hydropower	100% (0%)
Municipal and industrial water.	100 % (0%)
Flood control	35% (18% av.)
Separable recreation	50% (50%)[1]
Commercial navigation	75%[2] (–)[3]

[1] Either up-front or repayment.
[2] 25% Federal financing is reimbursable.
[3] Disposal areas, generally less than 20 percent.

In our discussions with the project sponsors, we specifically pointed out that our financial and cost-sharing objectives are different from traditional requirements and that they should consider all options open to them, including that of not participating.

On an overall basis, our proposed financing (and cost-sharing) of all nine projects combined as compared with traditional financing is as follows:

	Traditional		Proposed	
	Million	Percent	Million	percent
Federal Financing	$859.1	87	$204.3	21
Local Financing	123.4	13	778.2	79
Total	982.5	100	982.5	100

These percentages are heavily weighted by the three hydroelectric projects, for which 100 percent non-Federal financing is proposed. The proposed financing on the other other six projects is 54 percent Federal and 46 percent local.

I should point out that our proposals are consistent for all project purposes nationwide; we have not made different deals with different people. In addition, all the projects are responsive to high priority needs; all are authorized; all have favorable benefit-cost ratios, and all can be placed under construction in 1983.

I would like now to address the specific issues set forth in Chairman Abdnor's letter of June 3rd.

1. "The proposed funding arrangements on each project and the timetable for initiating construction on each project."

The funding arrangements for each project are set forth in the attached tabulation. Our timetable is to begin construction on each project in Fiscal 1983, as soon as the budget is enacted and a contract is negotiated with the local sponsors. In this regard, we are already preparing draft contracts for discussion with the sponsors. Of course, we cannot implement the provisions of any such contracts until the Congress has acted on the budget. In any case, October 1, 1982 is the earliest date when we could begin construction of any project.

2. "The degree of commitment that you have received from each local sponsor."

Copies of the pertinent correspondence with each local sponsor are attached to my letter of May 25th.

In general, the commitments are official letters of intent signed by responsible local officials. These letters were developed on the basis of numerous contacts and meetings, and they indicate the sponsor's intention to specifically provide the non-Federal financing that we sought. The letters do not constitute contracts, but they are much more than a mere expression of interest.

In the case of the Strube Lake and Bonneville Fishway hydropower projects, we do not have firm letters of intent, but we have received written expressions of interest from two public power agencies in the area, and we consider the prospects of success to be very good for both projects. However, the probable necessity to advertise in the Federal Register and to resolve any legal restrictions related to power marketing made it impossible to complete arrangements prior to submission of the Budget Amendment.

3. "The degree of flexibility remaining for funding of each of these projects."

There is no flexibility at all, so far as the overall division of financing is concerned. For example, a local sponsor who agrees to pay 65 percent of the total cost of a multipurpose reservoir project will be expected to pay that share by the time the project construction is complete. Normally, it would advance non-Federal financing each year in the amount of 35 percent of the actual expenditures in that year. However we do have flexibility to vary the amounts in any year to fit local financing capabilities, so long as the overall percentage is met on the whole project. In some instances, it may be appropriate, for example, to provide a temporary advance of Federal funds pending a local sale of revenue bonds. We intend to be reasonable in such cases. For local flood protection projects, the sponsor will provide lands, easements and rights-of-way and supplement its traditional financing requirement with a cash contribution where necessary to bring the non-Federal financing to 35 percent of the projects' cost.

4. "Any information that you can provide regarding Administration proposals for statutory changes in existing cost-sharing arrangements."

The Administration has not yet completed its deliberations on the full spectrum of cost-sharing policies governing Federal water projects. However, the Cabinet Council on Natural Resources and Environment will be forwarding shortly its proposals to the President. The initiatives we have taken for Civil Works fiscal year 1983 new construction starts are consistent with overall Administration policies. While the Administration's legislative program cannot be definitively stated at this time, a number of observations can be made.

First, existing project authorizations and generic legislation give the President and Congress a great deal of flexibility in applying new cost-sharing and financing policies to authorized projects. This flexibility is reflected in the fact that the nine new construction starts we have proposed for initiation in fiscal year 1983 require no modifications in their authorizations to permit them to proceed under the new financing and cost-sharing arrangements we are proposing. Second, the Administration will reflect its policies in the reports on projects it recommends be authorized in the future. Thus, new policies can be applied in the legislation authorizing these projects without any need for new generic legislation. Third, whenever legislation is necessary to modify existing policies, the Administration will present its proposals to Congress as soon as possible so as not to constrain the implementation of important and productive projects any longer than necessary.

We are hopeful that most innovations can be made without new generic legislation because we are painfully aware of the complexity of the issues relating to the areas of user charges, cost recovery, financing and cost-sharing which make them difficult for Congress to address in a comprehensive way within a relatively short period of time.

5. "The position of the Administration on cost-sharing in project studies."

I have long been concerned over several aspects of the Corps planning process. These concerns seem to be shared by Members of Congress and others interested in water resource development. Specifically, I am concerned with the length of time it takes to complete a typical feasibility study, the high cost of individual studies, the high proportion of unfavorable studies upon which substantial resources have been expended, and the small share of studies resulting in projects that are actually authorized and funded. I therefore feel it is imperative that we take steps to allow the Corps to concentrate its planning resources (manpower and budgetary) on the more important studies which have the best chance of implementation.

I am proposing that, beginning the fiscal year 1983, new studies pertaining to specific problem areas (other than inland navigation) be undertaken in two phases. The first phase will be a reconnaissance phase financed 100 percent with Federal funds and normally completed within a year at about 20-25 percent of the cost of the full study. The second phase will be a detailed feasibility study to be cost-shared with local project sponsors on a 50-50 basis with one-half of the non-Federal share available in the form of "in kind" services if the parties agree.

I would view the reconnaissance study to be fully funded when it receives its initial appropriation. It would establish:

a. The definition of the problem and its potential solutions;

b. A determination of whether or not the study should proceed further, based on a preliminary appraisal of costs, benefits, and environmental impacts of alternative solutions;

c. An estimate of the costs of the second phase feasibility study;

d. Identification of the local sponsor and indication of its willingness to participate in the feasibility study on a cost-sharing basis.

I believe that this procedure will not only speed up the planning process, but will increase the proportion of studies which leads to successful solutions of problems.

6. "The reasons the Administration did not propose a new start on projects, such as the Ellicott Creek flood control project in New York, that you had recommended."

The Ellicott Project was a difficult case to handle. In the first place, the State had categorically rejected our offer on the Dansville Project, saying that any change from traditional cost-sharing should be established by the Congress. The Ellicott Project—along with three others—was added to our original list of 12 projects late in the game when minor impediments to its readiness for construction were removed. By coincidence, the cost estimate for the rights-of-way and relocations exceeded the 35 percent cost-sharing criterion. The State's letter on the Ellicott Project did not make it clear that it was accepting our program and our offer. Nevertheless, we did include the project in the group of 10 projects to be considered.

In brief, when all 10 projects were considered as a package, there was considerable doubt that the State was really willing to participate in the program, in view of its previous rejection in the case of the Dansville Project and of the qualifications in the State's letter of March 23rd. The offer agreed to by all other sponsors of flood control projects was to finance 35 percent of the costs allocated to flood control, or rights-of-way and relocations, whichever is greater. If the latter costs actually turned out ot be less than 35 percent, then the State would have received a better deal than anyone else.

7."A discussion of the potential impacts of the use of this new marketplace test for projects as it affects the ability of less affluent states and regions to develop projects."

There have been some objections raised to the innovative financing approach we have proposed on the basis that these policies favor the more affluent states and regions. We do not believe this to be the case. Our policies favor sound and productive projects nationwide. In the case of hydropower, watersupply and both deep-draft and inland navigation, we have proposed that the beneficiaries bear 100 percent of the costs assigned to these purposes. This is based on the fact that these functions are fully vendible and are fully comparable with private sector goods and services. Indeed, most electric power and a good share of water supply are supplied by private firms. The Federal Government provides only a minor share of both. In the case of costs assigned to commercial navigation, the complementary services necessary to realize the projects' benefits are subject to full cost recovery and market-based pricing.

While there is common agreement with this principle, some have argued that it does not follow that these project services should be financed by the non-Federal sector. However, the marketable nature of project services provides the basis for non-Federal financing through the sale of revenue bonds. When revenue bond financing is used, it is the certainty and magnitude of the potential project revenues which permit the project costs to be funded, not the wealth or lack thereof of the non-Federal party. Thus,

it should not be argued that in the case of the vendible outputs we have favored the affluent regions.

In the case of other project purposes such as flood control and recreation, we have asked for considerably less than 100 percent non-Federal financing in recognition that the revenue bond approach is not appropriate. The amounts we are requesting, however, in our view, should be able to be contributed by the non-Federal sponsors if the project benefits are real.

The Budget Amendment to initiate construction of nine new starts reflects the Administration's desire to construct good water projects that meet its cost-sharing and financial policies. I believe that the program for 1983 offers the opportunity to break the stalemate that has existed for some time in the overall program for water projects. I believe this proposal merits the support of the Committee and Congress. To that end, I would like to work cooperatively with you in any way you may consider appropriate. Mr. Chairman, this concludes my statement; we will be pleased to respond to any questions or concerns you may have.

Mr. CHAFEE. In the letter he clearly points out the need for cost sharing on water project studies. Assistant Secretary Gianelli also mentions in his letter the idea of a "reconnaissance" study which I believe merits further consideration.

I would also like to point out that last year when we enacted reforms to the Clean Water Act's construction grants program, the share local and State governments had to bear for new sewage treatment plants was increased in phases from 25 to 45 percent. That change was supported by the entire Senate, as well as the administration. Another innovative change we made in the Clean Water Act amendments last year was to require the local entity to put up 100 percent of the cost for the planning and design of the treatment plant. If the plan was approved by EPA for construction the local entity would be reimbursed at the prevailing rate of the Federal-local cost share.

Mr. President, I am convinced my amendment is the proper approach to take with regard to these studies. Not only will we be able to save the Federal Treasury scarce funds with this amendment, we will be able to facilitate needed studies and define high priority projects. I believe the adminstration shares this belief. I would hope my colleagues will also recognize the value of this approach.

Mr. MURKOWSKI. Mr. President, I applaud the spirit in which the distinguished Senator from Rhode Island offered his amendment. The Senator and I have a common interest in assuring that the Federal investment in water resource studies is prudently managed.

As chairman of the Water and Power Subcommittee of the Committee on Energy and Natural Resources, I have had the opportunity to visit Bureau of Reclamation projects in the Western States and I have learned to appreciate the full value—both social and economic—that the careful development of our water resources can mean. I am convinced that we must move forward with appropriate development, but this development can only take place based upon sound planning. Planning in the water resource field is an investment in the future and we must maintain a strong planning and related data base if we are going to be able to meet future needs.

I particularly note the Senator's and I might add the administration's support for cost-sharing. But cost-sharing has become a buzz word and means different things to different people. However, I can say this, cost-sharing, or up-front funding, or reimbursement, or whatever you want to call it, has always been a part of the reclamation program—both for studies as well as projects. To the beneficiaries of the reclamation program this is not a new concept at all. There has always been the opportunity for non-Federal financial support, and many instances have occurred in the reclamation program where non-Federal contributions have served to initiate studies or projects. In turn, for the most part, project costs are paid back to the Federal Treasury either by water users or revenues from hydroelectric power generation.

Reclamation feasibility level investigations cannot be initiated by the Secretary of the Interior—they can be authorized only by a specific act of Congress such as S. 2443 before us today. Up until 1972, the costs associated with feasibility investigations were considered project costs and were subject to repayment by the project beneficiaries when the project was built.

However, following hearings and action in both Houses of Congress, legislation was signed into law, which brought the costs of reclamation feasibility investigations more in line with the way that costs of similar studies conducted by the Corps of Engineers and the Soil Conservation Service were treated. That is, the costs were to be nonreimbursable. And that is the way that feasibility study costs are treated today. I should point out that after a project is authorized, further study costs are treated as project costs and are subject to repayment pursuant to reclamation law.

As I said, I support the spirit in which the good Senator offered his amendment, but I cannot support the amendment at this time. I share his strong belief that it is necessary for the Congress to examine the appropriateness of encouraging non-Federal participation or repayment of costs associated with water resource development studies. But water resources development in the United States has entered a period of uncertainty and transition. And we all know what transition means. Things are different now than they were, but we are not sure in which direction they are going.

In any case, I firmly believe that Congress should undertake to solicit the views of the administration, and the public regarding the direction of water resource studies and the need for non-Federal participation. Toward this end I would propose that a joint hearing be held by my Subcommittee on Water and Power and Senator ABDNOR's Subcommittee on Water Resources of the Environment and Public Works Committee. I would hope that such a hearing could be held in September of this year so that we can establish a firm base upon which to build an appropriate legislative response.

Mr. President, I would like to take this opportunity to assure the Senator from Rhode Island and the Members of the Senate that the Senator from Alaska is strongly supportive of the need and desirability of overhauling the procedures of the water resources agencies in developing their studies. But until a thorough public record has been established, I believe that adoption of the Senator from Rhode Island's amendment at this time would be premature.

Therefore I am glad that the Senator has not offered his amendment, but with the certain understanding that the direction of his amendment, and indeed, the future thrust of water resource studies will be examined in detail by the joint hearing that I have proposed.

Mr. CHAFEE. I believe that my good friend from Alaska has made a point. I would, however, like to ask him several questions.

I gather from my friend's statement that he believes, in principle, that cost sharing is an appropriate concept and that we should work together to develop such a concept into legislation? Is that correct?

Mr. MURKOWSKI. My friend from Rhode Island is certainly correct that I strongly favor non-Federal participation when appropriate.

Mr. CHAFEE. I think joint hearings between the Energy Committee's Subcommittee on Water and Power and the Environment Committee's Subcommittee on Water Resources would be most useful. And I trust the Senator from Alaska will make every effort to hold hearings in September.

Mr. MURKOWSKI. I will work closely with the Senator from South Dakota (Mr. ABDNOR) in setting a date.

The PRESIDING OFFICER. If there be no further amendments, the question is on third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that Calendar Order No. 570, S. 2443, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSFER OF NINE NAVAL VESSELS TO CERTAIN FOREIGN GOVERNMENTS

Mr. BAKER. Mr. President, next is a matter in connection with H.R. 7115, if the minority leader is prepared to consider that.

Mr. ROBERT C. BYRD. Mr. President, I am so prepared.

Mr. BAKER. Mr. President, H.R. 7115 was erroneously referred to the Committee on Foreign Relations. Therefore, I ask unanimous consent that the Committee on Foreign Relations be discharged from further consideration, and I ask for the immediate consideration of that matter.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7115) to authorize the transfer of nine navel vessels to certain foreign governments.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The question is on third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. The chairman of the Foreign Relations Committee concurs in this discharge as a means of expediting this legislation. The Armed Services Committee and the Foreign Relations Committee share mutual interest in leases of such naval vessels to foreign countries and the two committees have worked out a procedure to handle such legislation. In the future, such legislation would be referred to the Armed Services Committee with a sequential referral to the Foreign Relations Committee.

Mr. BAKER. Mr. President, there may be other matters that can be dealt with.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I see a messenger from the House at the door seeking admission and I yield so that he may be received.

(The Senate received a message from the House of Representatives on House Joint Resolution 599, continuing appropriations, 1983.)

Mr. BAKER. Mr. President, it is the intention of the leadership on this side to ask the Senate to proceed to the consideration of that item shortly if there is no objection by the minority leader. I will not do that at this moment since there are other matters that need to be done before we do that.

Mr. ROBERT C. BYRD. Mr. President, there will be no objection.

Mr. BAKER. Mr. President, while our faithful and dedicated staff continue with their efforts to sort through the pile of material we have to deal with, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DESIGNATION OF NAMES OF CERTAIN FEDERAL BUILDINGS

Mr. BAKER. Mr. President, H.R. 5941 is in the Governmental Affairs Committee. I would like to discharge that committee if the minority leader has no objection to the immediate consideration of that measure.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Governmental Affairs Committee be discharged from further consideration of H.R. 5941, a bill regarding memorial designations of buildings and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5941) to designate the building known as the Federal Building and United States Courthouse in Greenville, South Carolina, as the "Clement F. Haynsworth, Jr., Federal Building", the building known as the Quincy Post Office in Quincy, Massachusetts, as the "James A. Burke Post Office", and the United States Post Office Building, Portsmouth, Ohio, as the "William H. Harsha United States Post Office Building".

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. BAKER. Mr. President, I might say that at the special request of the Speaker and other Members of the other body, we are taking this action tonight. There are three buildings named: The Clement F. Haynsworth, Jr., Federal Building; the James A. Burke Post Office; and the William H. Harsha U.S. Post Office Building.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill was ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on table was agreed to.

Mr. BAKER. Mr. President, I have a few other matters here that we can do and then there is a bill that the distinguished Senator from Utah wishes to take up.

But first I am prepared to ask the Senate to proceed to the consideration of H.R. 5238, the Orphan Drug Act, which I understand has now been cleared.

Is the Senator from Utah prepared to represent that that is the case?

Mr. HATCH. Mr. President, it is my understanding that Senator KENNEDY has cleared this.

Mr. BAKER. May I inquire of the minority leader if he is prepared to proceed on that measure?

Mr. ROBERT C. BYRD. Mr. President, this side is prepared to procced.

Mr. BAKER. I thank the minority leader.

Mr. HEINZ. Mr. President, reserving the right to object. Is this a Ways and Means Committee bill?

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, it is my understanding that the bill that is presently before the Senate has a provision relating to a tax credit on drugs. Mr. President, I am not familiar with that bill and so far as I know there is no Member on this side of the aisle who serves with me on the committee who is familiar with it.

I must object, Mr. President.

So far as I know, the measure has not been considered by the Committee. This is the first I have heard of it. If any Members on my side of the aisle know about it, it is news to me.

I will ask the Senator from Montana.

Mr. BAUCUS. Mr. President, I was going to object for the same reason. I feel I have to object.

Mr. BAKER. Mr. President, before we go any further, I have no desire to move if any Senator has an objection to this. For the time being, Mr. President, I withdraw my request that the chair lay before the Senate that measure.

Mr. ROBERT C. BYRD. Mr President, I also express my apologies. The message went out on the hotline asking for clearance and there was no objection that came back. That is why the minority leader thought the matter was ready for consideration.

Mr. LONG. Mr. President, I hope the Senator will understand that I was not in my office waiting for a hotline. I was sitting here in the Chamber. I had no knowledge of it. So far as I know, no member on my side of the aisle on the committee had any knowledge of it.

NATIONAL PORT WEEK

Mr. BAKER. Mr. President, could I inquire of the minority leader if he is prepared to consider a discharge of Senate Joint Resolution 246, which is presently in the Judiciary Committee?

Mr. ROBERT C. BYRD. Mr. President, that matter has been cleared.

Mr. BAKER. Mr. President, in view of that, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 246 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection it is so ordered. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 246) to authorize and request the President of the United States to issue a proclamation designating the first week in October for the Calendar years 1982, 1983, and 1984 as "National Port Week."

The PRESIDING OFFICER. Without objection, the Senate will proceed to consider the joint resolution.

Mr. LONG. Mr. President, I ask that the following Senators be added as cosponsors to Senate Joint Resolution 246, authorizing and requesting the President of the United States to issue a proclamation designating the first week in October for the calendar years 1982, 1983, and 1984 as "National Port Week": the Senator from Mississippi (Mr. STENNIS), the Senator from South Carolina (Mr. THURMOND), the Senator from West Virginia (Mr. BYRD), the Senator from Nevada (Mr. CANNON), the Senator from Texas (Mr. TOWER), the Senator from Hawaii (Mr. INOUYE), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Oregon (Mr. PACKWOOD), the Senator from Florida (Mr. CHILES), the Senator from Ohio (Mr. GLENN), the Senator from Missouri (Mr. DANFORTH), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Indiana (Mr. LUGAR), the Senator from Maryland (Mr. SARBANES), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Montana (Mr. BAUCUS), the Senator from Mississippi (Mr. COCHRAN), the Senator from Alabama (Mr. HEFLIN), the Senator from Virginia (Mr. WARNER), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Florida (Mrs. HAWKINS), the Senator from New York (Mr. D'AMATO), the Senator from South Dakota (Mr. ABDNOR), the Senator from Georgia (Mr. MATTINGLY), and the Senator from New Jersey (Mr. BRADY).

Mr. ROBERT C. BYRD. Mr. President, would the Senator add the name of Mr. METZENBAUM?

Mr. LONG. Yes. I ask that Mr. METZENBAUM's name be added.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1399

(Purpose: To designate only October 3 through October 9, 1982, as "National Port Week")

Mr. LONG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an unprinted amendment numbered 1399.

Mr. LONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the title of the joint resolution, strike out "the first week in October for the calendar years 1982, 1983, and 1984" and insert in lieu thereof "the week of October 3, 1982, through October 9, 1982,".

In the resolve clause of the joint resolution, strike out "in each of calendar years 1982, 1983, and 1984 designating the first week in October" and inserting in lieu thereof "designating the week of October 3, 1982, through October 9, 1982,".

THE PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana.

The amendment (UP No. 1399) was agreed to.

The joint resolution (S.J. Res. 246), as amended, was agreed to.

The preamble was agreed to.

The joint resolution, as amended, with its preamble, reads as follows:

S.J. RES. 246

Whereas the past development of the public ports of the United States is the result of a fruitful partnership with the Federal Government constructing and maintaining the navigable waterways and harbors of the United States, and local municipalities assuming major responsibility for land-based port development;

Whereas our Nation's commercial seaports and inland river ports are indispensable to foreign and domestic waterborne commerce and to the economic well-being and national security of the United States;

Whereas the maintenance and development of our national network of commercial ports is vital to expanded international trade and to the attainment of a favorable trade balance;

Whereas commercial ports serving the waterborne commerce of the United States are responsible for the continued employment of more than one million workers and in 1981 generated a total of $70,000,000,000 in direct and indirect benefits to the United States economy;

Whereas there is a continuing need to focus public attention upon the value of a viable and competitive system of commercial ports; and

Whereas the National Port Week observance promotes public recognition of the vital role that our ocean and inland ports have played in the economic growth and national security of the United States: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating the week of October 3, 1983, through October 9, 1982, as "National Port Week" and to invite the Governors of the several States, the chief officials of local governments, and the people of the United States to observe that week with appropriate ceremonies and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I ask the minority leader if he is in a position to consider the budget waiver, Senate Resolution 433, calendar No. 737, and the underlying bill, H.R. 6273, at this time.

Mr. ROBERT C. BYRD. Yes, Mr. President, this side is ready to proceed.

Mr. BAKER. First, Mr. President, I ask the Chair to lay before the Senate, Senate Resolution 433.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 433) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 6273.

The Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 433) was agreed to, as follows:

S. RES. 433

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 6273. Such waiver is necessary because H.R. 6273 authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1978, as required by section 402(a) of the Congressional Budget Act of 1974.

Specifically section 2 of H.R. 6273 would authorize the appropriation of $53,580,000 for fiscal year 1983 for various programs under the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act. These programs include: Overall motor vehicle safety responsibilities of the National Highway Traffic Safety Administration (NHTSA) ($51.4 million); establishment of bumper standards ($320,000); compilation and provision of information to the public on passenger motor vehicles ($1.677 million); and prevention of odometer fraud ($183,000).

Congress has not authorized appropriations since 1978 for NHTSA operations under the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act. The authorizations contained in H.R. 6273 are necessary to assure that sufficient funds are available for NHTSA to carry out its safety programs, which include continuing development and promulgation of safety standards, conducting safety research, and ordering recalls or remedies of automotive defects.

MOTOR VEHICLE SAFETY AND COST-SAVINGS AUTHORIZATION ACT OF 1982

Mr. BAKER. Now, Mr. President, I ask that the Chair lay before the Senate the underlying measure, H.R. 6273.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6273) to amend the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost-Savings Act to authorize appropriations for fiscal years 1983, 1984, and 1985, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

● Mr. DANFORTH. Mr. President, we have under consideration today H.R. 6273, the Motor Vehicle Safety and Cost Authorization Act of 1982. This bill does three things:

First, it authorizes appropriations for fiscal years 1983, 1984, and 1985 for funding the National Highway Traffic Safety Administration;

Second, it specifies that States are not prevented from enforcing any safety standard which is identical to a Federal safety standard; and

Third, it establishes a voluntary tire registration program for independent dealers and distributors, and modifies tire recall procedure.

Mr. President, the Department of Transportation's National Highway Traffic Safety Administration is responsible for implementing and enforcing the provisions of three landmark pieces of legislation—the National Traffic and Motor Vehicle Safety Act of 1966, the Highway Safety Act of 1966, and the Motor Vehicle Information and Cost Savings Act of 1972. Under these acts, NHTSA is required to establish motor vehicle safety standards, undertake safety research and development, order recalls where there are automotive defects, mandate compliance with safety standards, and provide consumers with information relating to the purchase and maintenance of motor vehicles.

Motor vehicle safety is of profound national importance. Over 49,000 people were killed in traffic accidents last year alone. Recent studies indicate that those death figures will significantly increase in the years to come, due largely to the shift to smaller cars, unless major safety improvements are made. Clearly, Congress charged NHTSA with a solemn obligation in assigning it the task of curtailing this slaughter.

However, over the past 18 months, NHTSA has undertaken numerous disturbing actions which call into question its commitment to improving highway safety.

Mr. President, recent NHTSA initiatives seem completely at odds with its congressional mandate to save lives. NHTSA has set a course that is causing serious setbacks in long-standing highway safety efforts. For example, NHTSA rescinded the passive restraint standard—a standard which would have saved an estimated 9,000 to 12,000 lives annually, prevent over 100,000 serious injuries annually, and save consumers $10 for every $1 cost.

NHTSA refused to rescind a regulation that prevents installation of a safety windshield in U.S. automobiles. This windshield, which is currently in use in Europe, would prevent vehicle occupants from severe lacerations caused by shattering window glass. This would spare an estimated 360,000 Americans from being scarred each year by windshields that shatter into tiny knives.

NHTSA changed its requirement that bumpers must be able to withstand damage in 5 mph barrier crashes. NHTSA reduced this requirement to 2.5 mph, despite agency data showing that a 5 mph "no damage" rule would be beneficial to consumers, despite results of surveys which show overwhelming public support for the 5 mph bumper, and despite the fact that insurance collision coverage costs are reduced by 10 to 20 percent with the 5 mph bumper.

Finally, NHTSA canceled the standard which would have required odometers to be tamper-resistant, to protect against consumer fraud, and would have limited speedometers to top speeds of 85 mph.

Mr. President, this is not all NHTSA has been doing. Let me list just a few of NHTSA's other recent actions which call into question its commitment to safety:

Multipiece rims—Rulemaking canceled.

Low tire pressure warning indicator—Rulemaking terminated.

Visibility requirements—Requirements for passenger cars terminated; rulemaking to apply the standard to other vehicles terminated.

Fuel economy—Post 1985 standards for passenger cars rescinded.

Theft protection—Standard delayed 1 year.

Battery explosions—Exploratory rulemaking canceled.

Side door strength—Rulemaking to upgrade protection terminated.

As I said in my comments accompanying the report on this bill, I really do not know if NHTSA is aiding traffic safety or whether it is engaged in some sort of search and destroy mission against any useful safety idea that is put forward. Indeed, NHTSA now seems to be doing all it can to thwart safety.

Mr. President, I am also concerned because two of NHTSA's actions—the rescission of the passive restraint standard and the rollback of the bumper standard—have been challenged in court. This puts NHTSA, the agency created by Congress to promote safety, in the inconsistent position of arguing against auto safety. In addition, NHTSA is wasting valuable time and our tax dollars fighting these court battles. It is time for NHTSA to stop dismantling the existing auto safety program and start making efforts to improve safety.

Mr. President, I would like to submit for the record some background on these and other examples of recent NHTSA actions which are likely to result in significant setbacks in efforts to improve highway safety.

I must admit that I am reluctant to continue funding the type of safety program administered by NHTSA if we want to improve highway safety. Frankly, I question NHTSA's intent in the highway safety area. But I reluctantly move the passage of this legislation in the hope that, in approving additional funds, NHTSA will seek to fulfill its congressional mandate to encourage motor vehicle safety. I assure my colleagues that, as chairman of the Surface Transportation Subcommittee, I will conscientiously perform my oversight responsibilities by closely monitoring NHTSA's use of these funds and its highway safety activities.

AUTOMATIC RESTRAINTS

According to the Center for Auto Safety, passive restraint regulations would save 9,000 to 12,000 lives annually, prevent over 100,000 serious injuries, and save consumers $10 for every $1 cost.

Early in 1981, NHTSA issued a final rule delaying the automatic restraint requirement for large cars from the 1982 model year to the 1983 model year. Later in 1981, however, NHTSA issued an order to cancel the passive restraint regulation, thus relieving auto manufacturers selling cars in the United States of the obligation to provide their customers with automatic restraints for improved protection in crashes.

NHTSA named two principal reasons for dropping standard:

First. "Uncertainty" about public acceptability and use of automatic safety belts; and

Second. "The relatively substantial cost of automatic restraints"—NHTSA estimated that the standard would have resulted in roughly $1 billion a year in vehicle price increases.

In testimony before the Surface Transportation Subcommittee in March 1982, NHTSA Administrator Peck said:

(W)hen I rescinded the passive restraint standard it was precisely because it was not going to work as it was intended. As I said at the time, had I had any assurance that we were going to in fact have, under that regulation, truly automatic occupant protection, I would have had a much different decision before me * * * I am confident at this point—and I have received no negative implications from any manufacturer—that we will have airbags in cars. We will have airbags in all probability earlier than we would have had under the 208 standard. We have in fact been pressing on that technology issue.

NHTSA was taken to court on its rescission of the passive restraint standard. On June 1, 1982, the U.S. Court of Appeals for the District of Columbia Circuit reversed NHTSA's rescission of the standard, with the following comment:

NHTSA's rescission of the safety standard presents a paradigm of arbitrary and capricious agency action because NHTSA drew conclusions that are unsupported by evidence in the record and then artifically narrowed the range of alternatives available to it under its legislative mandate. NHTSA thus failed to demonstrate the reasoned decisionmaking that is the essence of lawful administrative action.

NHTSA subsequently filed with the court a notice of proposed supplemental rulemaking to be published in the Federal Register in order to comply with and meet the deadline imposed by the court for resolving the questions raised in the court's opinion. Further comments from both sides were filed and on August 4, the court reinstated the passive restraint standard, effective September 1, 1983. NHTSA must inform the court by October 1, 1982, whether such a compliance date is achievable or whether a longer period is required. NHTSA is now appealing this case to the Supreme Court.

ANTI-LACERATIVE WINDSHIELD

An estimated 300,000 Americans are scarred each year by windshields that shatter into tiny knives. A new type of safety windshield, which would protect vehicle occupants from severe lacerations caused by shattering windshield glass, has been developed. This windshield, the securiflex inner guard, is currently in use in Europe. It molds a thin layer of a special clear plastic on the interior surface of the windshield. This plastic film acts as a shield between occupants and shattered glass. A NHTSA regulation aimed at precluding the use of plastic on the outside of windshields for abrasion-resistance reasons has prevented the introduction of this proven safety feature in America. Laminated windshields currently must pass an abrassion test developed for both interior and exterior surfaces.

NHTSA is aware of the problem in this area. In an August 1981 "request for proposal" for a research project to study windshield characteristics, NHTSA noted:

* * * more than 210,000 laceration injuries to passenger car occupants are occurring per year in the United States due to broken windshield glass, with an additional 100,000 lacerations involving broken side window glass.

Nevertheless, when asked more than a year ago to rescind this regulation, NHTSA refused to do so, saying that it "simply does not know enough yet about glass plastic hazing to make a decision."

NHTSA has been evaluating the benefits (or disbenefits) of two windshield standards—glazing materials an windshield mounting—both singly and in combination. According to NHTSA, the windshield of the Calspan/Chrysler Research Safety Vehicle (RSV) provides much improved protection against facial lacerations, but it does not meet current Federal requirements. NHTSA is testing this type of glazing further and reviewing its requirements to see if this windshield could be used.

In July 1982, NHTSA issued a notice of proposed rulemaking to amend its glazing materials safety standard to permit a new type of bullet-resistant glazing. The amendment would allow a transparent, plastic, bullet-resistant shield to be installed inside a vehicle behind the windshield and other windows. NHTSA notes, however, that the proposed amendment should have no major impact on safety, apparently neither favorably nor unfavorably.

BUMPER STANDARDS

At present, automatic bumpers must be able to withstand damage in 5 mph barrier crashes. This requirement started with 1974 model year cars.

A 1979 NHSTA analysis concluded that a 5 mph "no damage" rule would be beneficial to consumers. In 1981, using revised cost estimate assumptions, NHTSA concluded that a 5 mph frontal test impact requirement would be beneficial for consumers while such a standard for rear bumpers is not worth the cost.

Nevertheless, NHTSA announced in early 1981 plans to roll back the bumper standard and this year reduced the bumper requirement to 2.5 mph front and rear.

A 1981 Insurance Institute for Highway Safety (IIHS) survey of 1,103 car owners found that a overwhelming number of respondents said the 5 mph bumpers are a good feature of new cars and are worth $50 to $100 more in a car's value.

A more recent IIHS survey found that when the people interviewed knew that 2.5 mph bumpers would save gas, cost $20 to $40 less in the purchase price of their new car, and increase insurance collision coverage costs by 10 to 20 percent, more than three-quarters of them prefered 5 mph bumpers.

The IIHS has petitioned NHTSA to reconsider its decision to roll back the Federal bumper standard to 2.5 mph. Among other things, IIHS notes that NHTSA gave no serious consideration to amending its standard to encourage "lighter-weight, effective, and inexpensive 5 mph bumpers" on future new cars.

State Farm Mutual Insurance Co. and the Center for Auto Safety have also filed petitions with the U.S. Court of Appeals for the District of Columbia asking judicial review of the NHTSA decision.

MULTIPIECE RIMS

Certain rims consisting of two or more parts for trucks and campers have been subject to explosive separations. NHTSA acknowledged that it had verified 549 incidents of explosive separations of multipiece rims between 1954-78, which resulted in 368 injuries and 89 deaths.

Early in 1982, NHTSA canceled a rulemaking to require certain performance levels for these rims. In terminating the rulemaking, NHTSA said that "introduction of the problematic multipiece rims has virtually ceased" and that OSHA is regulating the occupational hazards involved.

NHTSA estimated that the cost of converting the trucking industry from multipiece rims would be from $598 million to $747 million. NHTSA said:

This substantial cost cannot be justified in light of the agency's belief that the separations of multipiece rims will decrease without the imposition of these costs.

LOW TIRE PRESSURE WARNING

In 1981, NHTSA terminated a rulemaking on the low tire pressure warning indicator. This standard would have required low tire pressure warning devices for all vehicles.

According to the Center for Auto Safety, 25 percent of the cars on the road have underinflated tires. Inflating these tires to the proper pressure could save 41 million barrels of petroleum each year and improve gas mileage by about 5 percent which would save each motorist about $30 per year, according to CAS.

An EPA study estimated that over 60 percent of vehicle tires are underinflated.

ODOMETERS/SPEEDOMETERS

Early in 1982, NHTSA canceled the standard on speedometer display and tamper-resistant odometers. This standard would have required tamper-resistant odometers to protect against consumer fraud and required speedometers to have top speeds of 85 mph.

In March 1982 testimony before the Surface Transportation Subcommittee, the NHTSA Administrator said that:

Speedometers and odometers was a well-intentioned standard aimed at the wrong end of the problem * * * (T)he minor technical changes, expensive but ineffective, that would have been required for compliance with that standard would not have addressed the real problem, which occurs when an entire fleet of well-maintained cars changes hands twice in a few days, with 90,000 miles gone from the speedometer.

CONSUMER INFORMATION

NHTSA decided not to print a 1982 edition of "The Car Book," a consumer guide to car-buying produced during the Carter administration. A 1982 edition of "The Car Book," however, was published privately. Over 1.25 million copies of the 1981 version were mailed to consumers.

In February 1982, NHTSA announced the start of an expanded program to provide automobile consumer and safety information to the American public through broader use of a toll-free nationwide NHTSA hotline service. The information program is an outgrowth of NHTSA's belief that, an informed marketplace is the key to improving automobile safety and performance.

Former NHTSA Administrator Joan Claybrook, however, has charged that the number of citizens who could be serviced by the hotline is far smaller than the potential users of "The Car Book."

It is interesting to note that a 1981 NHTSA survey of 2,331 recent or prospective new car purchasers found that 78 percent of those surveyed agreed with the statement made by interviewers that they like the idea of Government ratings of things, like safety and maintenance costs. Further, more than 71 percent of the respondents said they would be willing to spend an additional $400 for a safer car.

VISIBILITY REQUIREMENTS

In mid-1981, NHTSA rescinded the "fields of direct view" requirements for passenger cars and terminated a proposed rulemaking to apply these requirements to trucks, buses, and multipurpose passenger vehicles. This standard would have required adequate views from the front, rear, and sides of the vehicle's window.

NHTSA Administrator Peak said in March 1982 testimony before the Surface Transportation Subcommittee that:

It is not an accurate characterization of the fields of direct view standard to describe it as something designed to prevent major holes in vision. The fields of direct view standard was rescinded because based on our review of actual design plans it was not necessary and because the tolerances that were imposed by it, the tolerances down to one-sixteenth of one inch, were beyond the levels that manufacturers could reasonably meet in actual assembly line processes.

At the same hearing, Joan Claybrook, the former NHTSA Administrator, stated:

This standard had been under development for 11 years by the agency and was virtually a no-cost standard to the automotive industry. It merely required that by 1985-86 some 15 percent of the cars today which don't already meet it be cleaned up so that occupants can readily see traffic both frontally and rearward. It would have affected mostly the "hot" Trans-Am and other sporty cars which are heavily over-involved in crashes today. It would have also required a reduction in tinting of the glass to assist night-time visibility, a time when a large proportion of crashes occur. Reductions of tinting is particularly important for older drivers. This change would have been required primarily in General Motors' cars with limited luminous transmittance.

FUEL ECONOMY

In 1981, NHTSA terminated its rulemaking on post-1985 fuel economy standards for passenger cars.

In March 1982 testimony before the Surface Transportation Subcommittee, NHTSA Administrator Peck said:

Current plans of the major manufacturers for the early to mid-1980's indicate that they will easily meet or exceed the existing fuel economy standards through FY 1985 for both passenger cars and light trucks. The primary reason for this trend is the increased demand in the marketplace for fuel-efficient vehicles.

NHTSA is now undertaking a survey of drivers of late-model vehicles (1977-81), asking them to maintain a record of their fuel purchases for a 1-month period.

Of NHTSA's decision to terminate the fuel economy requirements, former NHTSA Administrator Joan Claybrook charged that:

The agency ignored the historical reluctance of the automotive industry to significantly improve the fuel economy of their vehicles.

OTHER NHTSA ACTIONS

The final rule on occupant crash protection was rescinded in October 1981.

NHTSA has initiated a rulemaking for "substantial simplification and revision" of the uniform tire quality grading standards. NHTSA has also proposed suspending on an interim basis the treadwear grading requirements of the standards. The standard now provides consumers at retail tire outlets with comparative information on treadwear, traction, and heat resistance by tire make and model.

NHTSA has also proposed to eliminate information requirements on tire reserve load capacity and reduce the minimum advance notice manufacturers are required to give NHTSA on new model introduction.

NHTSA amended the regulation on safety belt comfort and convenience to eliminate all requirements except belt tension and to delay the effective date for 1 year. As most of the provisions of this regulation were applicable to automatic safety belts, however, the regulation is being reevaluated as a result of the decision to rescind the passive restraint requirements.

NHTSA delayed for 1 year the theft protection standard and removed from it a provision that vehicles be so equipped that the ignition key cannot be removed while the vehicle is in motion.

NHTSA terminated exploratory rulemaking activity which would have established test procedures and standards to prevent battery explosions.

NHTSA terminated a rulemaking proceeding to amend its side door strength standard to upgrade motor vehicle side impact protection and to extend the applicability of the standard to light trucks, vans, and multipurpose passenger vehicles. NHTSA said the rulemaking will be reopened "after research has progressed to the point that definitive test methods and performance parameters can be developed."●

● Mr. HAYAKAWA. Mr. President, there is another part of this bill which gives me some cause for concern.

Specifically, I am referring to that language in section 4 relating to tire registration procedures which states that tire manufacturers will have to reimburse independent tire dealers and distributors for all "reasonable" costs associated with those latter groups having to comply with some unknown and as yet unwritten regulations.

I have discussed my anxiety over this provision with NHTSA Administrator Raymond Peck, and Mr. Peck assured me that he believes voluntary registration will serve to greatly improve on the current situation. There would thus appear to be no possibility that he, or any other Administrator,

would be faced with a set of circumstances which would trigger the rulemaking authority provided in this part of the bill. As to my concern that this possible transfer of authority, which would permit one segment of an industry to exercise control over and fix regulatory costs on another segment of the same industry, is of questionable constitutionality, Mr. Peck agrees that there are constitutional questions raised, although he has observed that the provision in the bill calls for any mandatory requirements to be implemented through a rulemaking proceeding in which all interested parties would be able to express their views. Finally, I believe that this provision in the bill gives the Administrator a level of authority to allocate financial burdens he should not have in the absence of any recall, and one which is probably unprecedented, and Mr. Peck concurs.

Mr. President, it troubles me that we are about to pass a bill which includes questionable language, however remote the possibility of its being brought into play. Yet I do recognize that there are other compelling and overriding concerns which indicate that this legislation should move forward.

I thank the Chair.

Mr. DANFORTH. Mr. President, the committee does not foresee circumstances occurring that would put the rulemaking authority into effect, although admittedly the possiblity does exist.

I appreciate the time and effort my colleauge from California has taken to clarify the language and intent in section 4 of this bill. I would like to add that it was not the intent of this Senator, nor that of the committee, to impose excessive regulation on any segment of the tire industry.

Mr. HAYAKAWA. I thank the Senator from Missouri, and I thank the Chair.●

The bill was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SMALL BUSINESS CONTRACT PAYMENTS PROCEDURE ACT OF 1982

Mr. BAKER. Mr. President, is the minority leader prepared to consent to the consideration of Calendar Order No. 932, S. 1782?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate S. 1782.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1782) to amend section 305 of the Federal Property and Administrative Services Act of 1949 pertaining to contract progress payments made by agencies of the Federal Government, providing for the elimination and retainage in certain instances, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Governmental Affairs with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Construction Business Contract Payment Procedures Act."

FINDINGS

SECTION 1. The Congress finds that—

(1) the present practice of retaining a portion of progress payments otherwise due to contractors performing satisfactory work on Federal construction projects places an unnecessary and unfair financial burden on such contractors, adversely affecting their financial position by restricting cash flow and often requiring otherwise unnecessary borrowing;

(2) the highly adverse effects of unnecessary retainage fall most heavily on small construction firms, restricting entry of such firms into the Federal procurement marketplace as either prime contractors or subcontractors;

(3) the current retainage practice, inadequately related to the contractor's performance, represents an unnecessary burden on the Federal procurement process;

(4) other existing requirements currently applicable to Federal construction contracts provide the Government with adequate protection against the default of a contractor;

(5) the discretion accorded the contracting officer to withhold a portion of progress payments otherwise due the contractor upon making a finding of untimely or otherwise unsatisfactory performance provides adequate protection to the Government's interest; and

(6) the elimination of unnecessary retainage under the provisions of this Act will result in cost savings to the taxpayer and improved relations between the Government and its contractors.

PROGRESS PAYMENT PROCEDURES

SEC. 2. Section 305 of the Federal Property and Administrative Services Act of 1949 (63 Stat. 396; 41 U.S.C. —) is amended by adding at the end thereof the following new subsections:

"(d) Whenever an executive agency elects to make progress payments under a construction contract pursuant to subsection (a)(1)—

"(1) such progress payments shall be made monthly, or at such more frequent interval as is stipulated in the contract;

"(2) such progress payments shall be made in full to the contractor without retention of any of the progress payment due unless the contracting officer finds and determines that the contractor is not making timely or otherwise satisfactory progress toward the completion of the contract in accordance with its terms and conditions;

"(3) upon making a finding and issuing a determination that a contractor is not making timely or otherwise satisfactory progress, the contracting officer may retain from each of one or more progress payments due such amount, not exceeding 10 percent of such progress payment, as is necessary to protect the Government's interest in timely and satisfactory performance of the contract;

"(4) amounts retained under clause (3) may be released whenever the contracting officer finds that the contractor is making such satisfactory progress; and

"(5) upon the executive agency's final acceptance of the work under the construction contract, any amount still retained under clause (3) shall be promptly paid to the contractor in accordance with the terms and conditions of the contract and shall be subject to the provisions of the Prompt Payment Act (95 Stat. 85; 31 U.S.C. 1801 et seq.).".

CONSTRUCTION SUBCONTRACT PAYMENT PROCEDURES

SEC. 3. To obtain fully the intended benefits of this Act, prime contractors are urged to make provision in their agreements with their subcontractors and material suppliers for the prompt payment in full of any progress payments otherwise due, without retainage of any part thereof, unless the prime contractor finds that the performance of the subcontrator or material supplier is untimely or otherwise not in accordance with the terms and conditions of its agreement with the prime contractor. Similarly, subcontrctors below the first tier of subcontractors are urged, in turn, to make provision in their agreements to accord the same fair treatment concerning prompt payment in full of any progress payments otherwise due to their subcontractors or material suppliers, in accordance with the same standard.

REGULATIONS

SEC. 4. Regulations to implement this Act and the amendments made by this Act, including regulations specifying contract provisions, shall be issued and become effective within 120 days after the date of enactment of this Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, is there an amendment?

The PRESIDING OFFICER (Mr. ARMSTRONG). A committee amendment in the nature of a substitute.

Mr. BAKER. A single amendment?

The PRESIDING OFFICER. The Senator is correct.

● Mr. WEICKER. Mr. President, I am delighted that the Senate is today considering S. 1782, the Contract Payments Procedure Act of 1982. I wish to commend my good friend and colleague, Senator DANFORTH, for his outstanding leadership on this issue. He has worked dilgently and expertly to move this bill through the legislative process and I would like to personally thank him for his efforts. I also would like to express my appreciation to William Montalto, procurement counsel to the Subcommittee on Federal Expenditures, Research and Rules and to Reid Detchon, subcommittee staff director, for their fine work on this legislation.

I believe that S. 1782, as reported, is a fair and equitable bill, which will do much to improve the cash flow position of many small construction contractors. It ties Federal retainage practices to the timely and satisfactory performance of a contractor, rather than automatically penalizing Federal contractors by withholding up to 10 percent of their progress payments. At the same time, the legislation adequately protects the Government by allowing a contracting officer to impose retainage requirements on any contractor who is performing work in an unsatisfactory manner, or who is behind schedule.

Mr. President, I believe that this legislation will not only improve relations between construction contractors and the U.S. Government, it will significantly improve the cash flow situation of many small construction firms as well. I would like to remind my colleagues that the impact of retainage on small business construction firms is staggering. According to an industry study, small contractors must cover an average of $200,000 annually in outstanding retainages. Like the Government late pay problem, the retainage situation causes severe financial problems for small firms. Specifically, by slowing the flow of money to those performing the work, retainage often delays construction thus drives up costs due to inflation.

The result is that contractors and subcontractors are often forced into a situation of borrowing money—at today's high interest rates—just to cover outstanding retainages and maintain an adequate cash flow. The cost is then factored into their bids and passed along to the end user. I need not point out that on Government jobs, the end user is the American taxpayer.

In addition to saving the Government money, I belive this bill will give a much-needed boost to our overall economy. By eliminating the routine use of retainage, we will provide small contractors with more capital for business expansion and job creation: stimuli that are badly needed in the construction industry at the present time.

I also believe that S. 1782, as reported, strikes a good balance on the issue of whether or not the legislation should be extended to subcontractors. I sincerely hope that the advisory nature of section 4 of the bill will encourage prime contractors to treat their subcontractors in the same way that they will be treated by the Federal Government. Although this language is not mandatory—and let me state that I believe this is the right approach, for this section—I hope that prime contractors will routinely eliminate retainage if a subcontractor is performing on time and in a satisfactory manner.

Finally, in closing, I would be remiss if I did not extend my sincere appreciation to several small business construction associations that actively supported S. 1782 and were willing to work with me to craft the piece of legislation we have before us today. I wish to thank the sheet metal and air-conditioning contractors; the National Electrical Contractors Association; the American Subcontractors Association; the National Association of Plumbing, Heating, & Cooling Contractors; the Associated Builders & Contractors, Inc.; the Prestressed Concrete Institute; the Door & Hardware Institute; the Associated Specialty Contractors; the Small Business Legislative Council; and the American Consulting Engineers Council. With the help of these organizations, the Senate has drafted an important piece of legislation that will eliminate the routine use of retainage unless a good cause is shown for imposing it.

Mr. President, I urge all of my colleagues to join me in voting for passage of S. 1782.●

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 1782), as amended, was passed.

AUTHORITY AND AUTHORIZATION OF APPROPRIATIONS FOR CERTAIN PROGRAMS UNDER THE FISH AND WILDLIFE ACT OF 1956

Mr. BAKER. Mr. President, next is the discharge of H.R. 5662 from the Environmental and Public Works Committee, if the minority leader is willing to proceed.

Mr. ROBERT C. BYRD. Yes, Mr. President.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of H.R. 5662, the Fish and Wildlife Act of 1956, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5662) to extend until October 1, 1983, the authority and authorization of appropriations for certain programs under the Fish and Wildlife Act of 1956.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

Mr. PACKWOOD. I would like to discuss with the senior Senator from Vermont a jurisdictional question regarding H.R. 5662, the reauthorization of the Fisheries Loan Fund, a program contained in the Fish and Wildlife Act of 1956. H.R. 5662 provides a 1-year extension of spending authority for this program.

As Senator STAFFORD can verify, questions have been raised between the committee he chairs, Environment and Public Works, and the committee I chair, Commerce, Science, and Transportation, concerning proper jurisdiction over this measure.

I am pleased to say that it is my understanding that our two committees have now resolved this difference. Under our agreement, the Commerce Committee will have sole jurisdiction in the future over the fisheries loan fund. This in no way changes the fact that the Committee on Environment and Public Works will retain jurisdiction over the preponderance of the Fish and Wildlife Act of 1956.

This appears to me to be a reasonable solution. The fisheries loan fund is strictly a marine fisheries program and therefore properly belongs in the Commerce Committee.

I would like to ask Senator STAFFORD, at this point, if my characterization of the situation is in line with his understanding and if he is willing to accept this compromise on behalf of the Committee on Environment and Public Works.

Mr. STAFFORD. I would say to the Senator from Oregon that he has indeed accurately described the situation. The agreement which has been reached regarding the fisheries loan fund does appear reasonable to me. The fisheries loan fund, as Senator PACKWOOD has said, is concerned solely with marine fisheries, which is the jurisdiction of the Commerce Committee.

On behalf of the Committee on Environment and Public Works I am pleased to accept this agreement. The compromise will facilitate the work of our two committees and will promote more effective fisheries legislation.

Mr. PACKWOOD. I thank the Senator from Vermont for his cooperation in this matter. At this point, I would ask unanimous consent that the Parliamentarian be directed to follow this agreement in making referrals of future measures covering this issue.

Mr. STAFFORD. I concur with the Senator's suggestion.

The bill was ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

89-059 O-86-8 (Pt. 20)

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Will the minority leader permit me to take up Senate Resolution 465 by unanimous consent?

Mr. ROBERT C. BYRD. I will ask the chairman of the committee.

Mr. LONG. I have no objection.

COMPETITIVENESS IN AGRICULTURAL TRADE

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate Calendar No. 848, Senate Resolution 465.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 465) to express the sense of the Senate that the restoration of United States competitiveness in agricultural trade should be pursued through every legitimate means, and without reference to political or economic problems in nonagricultural areas.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

● Mr. DOLE. Mr. President, Senate Resolution 465 was favorably reported by the Committee on Finance on September 15, 1982. This resolution which I introduced for myself, Senator LONG, Senator MOYNIHAN, Senator DURENBERGER, Senator GRASSLEY, Senator HELMS, and Senator WALLOP expresses the sense of the Senate that the U.S. agricultural sector is facing very severe economic conditions, which are being compounded by the unfair trading practices of other countries which in turn are appreciably reducing U.S. agricultural exports. Mr. President, we believe that the administration should make every effort at the November GATT ministerial meeting to restore the competitive position of U.S. agriculture. These efforts must be made without reference to other political or economic problems. The severe conditions in the U.S. agricultural community demand this.

Pending restoration of competitive trading conditions through the international trading system we must be prepared to prevent further erosion of our agricultural exports, including value added products, through every appropriate and legitimate means. Mr. President, these means may include making funds available to assist in the competitive exportation of the U.S. products. Certainly we would prefer to restore competitive conditions through restoration of fair trading conditions, but if this fails we must be prepared to take other steps.

I urge my colleages to support this resolution.●

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 465) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 465

Whereas net United States farm income in 1982 is estimated to have declined for a third consecutive year, and about 25 per centum from 1981;

Whereas bumper harvests continue to place downward pressure on farm prices, despite United States efforts to restrain production;

Whereas increased United States farm exports will reduce the Nation's balance of payments deficit, increase personal income and tax revenues, and provide additional employment;

Whereas America's full competitive advantage in agricultural exports is not being realized because of foreign export subsidies and other unfair trade practices, which are becoming increasingly injurious to United States exports, including value-added products;

Whereas the American farmer and agribusiness are finding it increasingly difficult to compete for export markets with the foreign governments which finance these unfair trade practices; and

Whereas these unfair acts by foreign governments are resulting in the loss of additional jobs and tax receipts, and in increased outlays by the Treasury of the United States for farm supports: Now, therefore, be it

Resolved, That during the forthcoming ministerial-level meeting of the General Agreement on Tariffs and Trade (GATT), the United States Government should seek every means of restoring United States competitiveness in agricultural trade:

(1) with particular emphasis on correcting the disparate treatment of primary and nonprimary products provided in the Agreement on Implementation and application of articles VI, XVI, and XXII of the GATT (the Subsidies Code); and

(2) without reference to any existing political or economic problems or disagreements in nonagricultural areas; and be it further

Resolved, That pending restoration of fair and equitable trading conditions under the GATT, it is the sense of the Senate that the United States pursue every appropriate and legitimate means to prevent further erosion of our agricultural exports, including value-added products, and to regain a fair share of foreign markets commensurate with the competitive market advantage of the American farmer; and be it further

Resolved, That in restoring United States competitiveness in agricultural trade, it is the sense of the Senate that the United States make available the funds necessary to assist in the competitive exportation of primary and value-added products and to counteract the continued use of foreign export subsidies and other unfair trading practices; and be it further

Resolved, That restoration of full competitiveness for United States farm products in export markets will serve the twin objectives of creating additional jobs and raising net farm income.

Mr. BAKER. I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ALCOHOL TRAFFIC SAFETY PROGRAMS

Mr. BAKER. Mr. President, a House measure, H.R. 6170, is cleared on this side if the minority leader is ready to proceed.

Mr. ROBERT C. BYRD. Mr. President, that item has been cleared on this side.

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate H.R. 6170.

The PRESIDING OFFICER. The clerk will state it by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6170) to amend title 23, United States Code, to encourage the establishment by States of effective alcohol traffic safety programs and to require the Secretary of Transportation to administer a national driver register to assist State dirver licensing officials in electronically exchanging information regarding the motor vehicle driving records of certain individuals.

The Senate proceeded to consider the bill.

● Mr. DANFORTH. Mr. President, we have under consideration today H.R. 6170, legislation aimed at combating the drunk driving problem and establishing a National Driver Register (NDR).

Mr. President, drunk driving is a national tragedy. Of the more than 50,000 Americans who die in motor vehicle accidents every year, the National Highway Traffic Safety Administration (NHTSA) estimates that at least 26,000 are killed in drunk driving incidents, 125,000 are permanently disabled, and 650,000 are seriously injured. This translates into estimated annual economic costs of $17 to $24 billion in medical rehabilitation, and insurance expenses, forgone work income and tax revenue, property damage, and expenses for police and emergency services. Added to this economic cost is the emotional cost to the hundreds of thousands injured or disabled in drunk driving accidents, and to the friends and relatives left behind by the accident victims. This cost is truly immeasurable.

Mr. President, the magnitude of the drunk driving menace almost defies comprehension. A recent Newsweek story on drunk driving contained these examples of awesome statistics on this problem:

During the past 2 years, more Americans have died at the hands of drunk drivers than were killed in Vietnam.

On average, about 3 Americans are killed and 80 are injured by drunk drivers every hour of every day.

One out of two Americans will be victimized by a drunk driver in his lifetime.

Up to 10 percent of all drivers on weekend nights are legally intoxicated.

On May 11, 1982, the drunk driving legislation introduced by Senator PELL and myself to address this serious national problem (S. 2158) passed the Senate unanimously. Earlier this week, the House of Representatives passed the drunk driving legislation which is now before us for consideration.

H.R. 6170, as passed by the House, represents a careful compromise of the Senate and House approaches to the drunk driving problem. This bill is designed to encourage and assist State and local efforts to reduce the loss of life and serious injury caused by drunk driving. The bill contains two titles. Title I would provide incentive grants to States which enact a comprehensive antidrunk driving program. Title II would update the current National Driver Register to an electronic system that would assist States in exchanging driver record information.

I believe it is important to note, Mr. President, that this bill would not require States to take specific actions, nor would in penalize States if they do not adopt the Federal scheme. The bill would, however, assist and encourage States efforts against drunk driving by offering significant financial incentives to States which are prepared to enact a comprehensive attack on the problem.

INCENTIVE GRANTS FOR STATES

The incentive grant program is directed at getting drunk drivers off the road and encouraging States to adopt comprehensive alcohol traffic safety programs. States applying for incentive grants would be required to take the following four specific steps.

First. State statutes must require prompt suspension of the driver's license of an individual found to be intoxicated or who refuses to submit to a chemical test. For a first offender, the license must be suspended for at least 90 days; for a repeat offender, at least 1 year.

Historically, license revocation has been treated as a discretionary criminal sanction. This bill, however, recognizes that license revocation is a highly effective deterrent against drunk driving that should not be used exclusively as a criminal penalty imposed only after lengthy court proceedings. In the report on S. 2158, the Senate Commerce Committee noted that it was not aware of a single jurisdiction where the opportunity to operate a motor vehicle is granted as a matter of right. In fact, most jurisdictions, in recognition of drunk driving's serious threat to public safety, require the prompt suspension of any driver's license where the driver refuses to submit to a chemical test to determine whether he is intoxicated. Oddly enough, only a handful of States require revocation where a driver submits to a test and is determined to be intoxicated.

Even before the U.S. Supreme Court upheld administrative license suspensions without a presuspension hearing, Minnesota enacted a law under which a law enforcement officer who upon his determination that a driver is drunk takes the driver's license and reports the chemical test results to the Minnesota commissioner of public safety, who in turn notifies the driver of the suspension of his driving privileges and informs him/her of his right to a postsuspension review.

This bill endorses wider use of the prompt license suspension. Under this bill, the Secretary of Transportation is directed to find that a State has complied with this element of the incentive grant program when the State mandates the prompt suspension of a license upon receipt of a law enforcement officer's submission of chemical test results showing that an individual was driving while intoxicated. For purposes of determining compliance with this element of the program, the Secretary need not consider the forum for postsuspension review—that is, whether the State allows a person to argue his case for reinstatement before an administrative, as opposed to a judicial, official—or whether it requires the law enforcement officer to take the driver's license immediately or allows the substitution of the license with a temporary permit effective for 1 week or less. The key is that, within a matter of days after a drunk driver has been apprehended, his license has been suspended for at least 90 days for the first incident and 1 year for the second, unless and until the suspension has been challenged successfully in a postsuspension hearing.

Second. States must accept a 0.10 blood alcohol content test result as per se evidence of intoxication in criminal and administrative proceedings.

Third. State statutes must provide for a mandatory jail sentence of at least 48 hours or require at least 10 days community service for those convicted of a second or subsequent drunk driving offense within 5 years. This sentence will be mandatory, not subject to suspension or probation.

Fourth. States must provide for increased efforts or resources dedicated to the enforcement of alcohol-related traffic laws and increased efforts to inform the public of such enforcement.

This bill also requires the Secretary of Transportation to initiate a rulemaking to establish additional criteria for effective alcohol traffic safety programs. States wishing to receive larger incentive grants would be required to meet some or all of the supplemental criteria in addition to the four minimum requirements just described.

The Secretary would be required to consider several possible criteria, including: the establishment and maintenance of a statewide driver record-keeping system; the creation and operation of rehabilitation and treatment programs for persons arrested and convicted of drunk driving; the impoundment of any vehicle operated on a State road by any individual whose driver's license is suspended or revoked for an alcohol-related driving offense; the establishment of locally coordinated alcohol traffic safety programs; the granting of presentence screenings authority to the courts; the setting of the minimum drinking age in a State at 21 years of age; and the consideration and adoption of the recommendations of the Presidential Commission on Drunk Driving.

The bill authorizes appropriation of a total of $125 million for fiscal years 1983 through 1985 for the incentive grant program.

NATIONAL DRIVER REGISTER

Title II of this bill would update the current National Driver Register operated by the Department of Transportation to an electronic system. The register would give local officials an effective tool to keep bad drivers off the highways. The NDR would assist States in exchanging the following information on problem drivers:

First, license revocation, cancellation, denial, or suspension;

Second, conviction of drunk or drug-related driving;

Third, violations stemming from a fatal accident; and

Fourth, reckless driving, hit and run, or perjury.

This bill would establish a pilot test program using four States, representatives of varying geographic and population characteristics, to demonstrate the potential effectiveness of an electronic NDR. The bill would also establish a National Driver Register Advisory Committee to advise the Secretary of Transportation on the NDR's operation and would require the Secretary to report to Congress on the NDR within 4 years of enactment. In addition, the legislation specifies criminal penalties for NDR violations.

This bill would authorize appropriations of a total of $9.1 million between fiscal years 1983 and 1987 for the National Driver Register.

I believe this legislation represents the proper role of the Federal Government in the Federal/State partnership to combat drunk driving. It recognizes that the most effective way to attack this problem is on the State and local level, and provides Federal support for that effort. Mr. President, this is important legislation which is long overdue. I strongly urge prompt passage of this bill.●

● Mr. PACKWOOD. Mr. President, I support H.R. 6170. Every day, 70 people are killed and 2,000 injured in alcohol-related motor vehicle accidents. This bill takes important steps toward controlling drunk driving—the No. 1 highway safety problem in our Nation. This bill represents a thoughtful and reasoned compromise between the drunk driving legislation passed by the Senate last May (S. 2158) and the House approach to this problem.

This legislation recognizes the importance of State and local efforts in fighting drunk driving and offers an incentive to the States to adopt drunk driving statutes incorporating the requirements specified in the bill. States are not required to participate in this program, but if a State chooses to participate it will receive additional money from the Federal Government to fight drunk driving.

I would also like to point out, Mr. President, that this legislation upgrades the National Driver Register by establishing an electronic system. This will greatly assist State driver licensing officials in identifying problem drivers.

Mr. President, I commend Senator DANFORTH for his efforts on this legislation. In developing this compromise with the House and in his earlier efforts which led to Senate passage of S. 2158 in May, Senator DANFORTH has demonstrated outstanding leadership and an unwavering commitment to enacting tough legislation aimed at the drunk driving problem.

I also commend Senator PELL for his work in behalf of this legislation. Senator PELL has long recognized the problem of drunk driving and his efforts have played an important part in the development of the compromise bill we have before us today.●

● Mr. DECONCINI. Mr. President, I want to extend my appreciation to the chairman of the Commerce Committee Subcommittee on Transportation, Mr. DANFORTH, for doing such an outstanding job in trying to come up with a bill which attacks the extensive drunk driving problem in this country while being responsive to the concerns of many of our colleagues who have varying degrees of drunk driving laws in their States. I think the bill before us is a fine one and one which will effectively counter the growing number of drunk driving fatalities. I would like to lend my support to this new bill but, before I do, Mr. President, I would like a little clarification. It is my understanding that the bill, as passed by the House and currently written, would allow the State of Arizona to be eligible for increased highway safety grants. Mr. President, am I correct in assuming Arizona would be eligible for grants under this existing language?

Mr. DANFORTH. Yes, Mr. President, the Senator is correct. My understanding of the provisions in the Arizona law are that they are much more restrictive than the provisions outlined in the bill before us. Therefore, I would expect Arizona to be eligible for increased, and well deserved, highway safety grants to implement their commendable law.

Mr. DECONCINI. Mr. President, I thank the Senator very much for that clarification, Senator. I would like my colleagues in the Senate to know I fully endorse this bill and hope my colleagues will join me so we can have an attack on drunk driving law at the Federal level this session.●

● Mr. PELL. Mr. President, I am pleased to join Senator DANFORTH in urging the adoption of H.R. 6170, the drunk driver bill.

As one who for a number of years has advocated a strong national program to reduce the slaughter on our highways caused by drunk drivers, I am proud that we have reached the final step in the congressional approval process for this legislation. I commend Senator DANFORTH for his leadership in steering drunk driving legislation through the Senate earlier this year. In recent weeks, Senator DANFORTH and I have worked closely with House Public Works and Transportation Committee Chairman JAMES HOWARD and Congressman MICHAEL BARNES to reach an agreement on this legislation. Without the cooperation and impetus from Chairman HOWARD, we would not be at the point of sending a drunk driver bill to the President. I express my appreciation to both Chairman HOWARD and Congressman BARNES for working with Senator DANFORTH and me to bring about this successful result.

This bill will not end the carnage brought about by drunk drivers. Legislation alone will not change the attitudes and tolerance of drunk driving that have prevailed for so long. This bill does reinforce what has become a national movement to end the public indifference and reduce the slaughter that claims 25,000 lives on our highways, year after year. It provides incentives for the States to increase penalties and enact the comprehensive programs that we know will reduce deaths. Title II of the bill upgrades the National Driver Register, and provides an effective means of keeping known dangerous drivers off our highways. Together, the incentive grant program and the National Driver Register constitute the strongest highway safety initiative the Congress has ever adopted. I am proud to have been a sponsor of this legislation in the Senate.●

STATEMENT OF SENATOR ROBERT DOLE IN SUPPORT OF H.R. 6170—A BILL TO ENCOURAGE EFFECTIVE ALCOHOL TRAFFIC SAFETY PROGRAMS

Mr. DOLE. I urge my colleagues to support this legislation that takes aim at aiding the States in their battle against the No. 1 criminal killer in our Nation, the drinking driver.

In hearings held last fall in my Judiciary Courts Subcommittee I heard firsthand the incredible shock, sorrow, and anger that drunk drivers bring to a family that has forever lost a son, or had a daughter instantly condemned by a drunk driver crash to live a life in a wheelchair. I also heard how Federal, State, and local officials and citizen activists have closed ranks to strike back against drinking drivers who take more American lives every year than cold-blooded murderers.

It is clear that we must encourage tough State laws that treat the drinking driver like the dangerous criminal he is, threatening or reaping death and injury in every community in our Nation. We must also encourage stronger traffic enforcement programs, court adjudication procedures, driver record tracking methods and rehabilitation efforts. These activities are all countermeasures that have proven effective in various combinations throughout the country as I have learned at our hearings and through convincing evidence presented at hearings held by the President's Commission on Drunk Driving.

These critical elements of a systematic antidrunk driving campaign are the very ones found in the bill now before the Senate. As a member of the President's Commission on Drunk Driving, I am pleased that the bill provides that the recommendations of the Commission, due next spring, are to be considered in the criteria for awarding some of the incentive grants under the bill.

I am convinced that well-drafted State laws, supported by popular sentiment and enforced with swiftness and certainty, can save many families the agony of a deadly or crippling encounter with a drunk driver. We should not only encourage State laws that threaten severe punishment for drunk drivers but also must look to support State and local actions implementing those laws. Hollow threats will only lead back to business as usual for the drinking driver who rarely is deterred by the remote chance of an arrest, conviction, or swift and certain punishment.

Citizen action groups such as MADD (Mothers Against Drunk Drivers) and RID (Remove Intoxicated Drivers) have been fervently and successfully working to make the battle against drunk drivers a top priority in their cities, States, and at a national level. This bill will serve as an effective incentive for even more potent State and local initiatives that were initially catalyzed by groups such as MADD and RID through a sympathetic and concerned media.

Since this bill represents an important and effective step in supporting

drunk driving countermeasures as a vital priority in the administration of our national highway traffic safety program, I wholeheartedly urge its passage.

Mr. CANNON. Accidents due to drunk driving are a serious problem in this country today—over 25,000 deaths per year are caused by drinking drivers. Everyone familiar with the magnitude of this problem is concerned and anxious to find a solution. Enforcement of driving standards is the primary responsibility of State and local governments, not the Federal Government. Therefore, I believe legislative initiatives should originate at those levels. I voted in favor of S. 2158, the Senate drunk driving bill, because an amendment was added on the Senate floor by Senator DECONCINI to allow the States some flexibility in formulating their own solutions to this problem as long as the penalties in their legislation equaled or exceeded the penalties set out in S. 2158. I agreed with Senator DANFORTH, the sponsor of the bill, that Senator DECONCINI's amendment was "constructive" and added a "degree of flexibility in the administration of the bill." That flexibility is not contained in the bill we are voting on today. H.R. 6170 contains mandatory provisions which each State statute must contain for the State to qualify for a basic grant under this program.

My concern is that some States, such as Nevada, may have very strict drunk driving laws which do not contain the magic mix of required provisions as set out in H.R. 6170. In fact, it is my understanding that today only two States would be eligible for a basic grant. I am wary of Federal legislation which takes authority away from the States. In my opinion, Nevada has a tough drunk driving statute. It provides for first offenders—mandatory attendance at classes on alcohol use and abuse, up to 6 months in jail, minimum $100 fine, discretionary 30-day license suspension; for second offenders—within a 5-year period—minimum 10-day jail sentence, minimum $500 fine and minimum license suspension for 6 months.

This statute has some of the elements required in H.R. 6170 but not all of them; however, it also has stricter penalties than H.R. 6170 requires in some respects. In spite of the fact that this is a strict statute, Nevada will not qualify for an incentive grant unless it changes its statute.

In a 1981 report done by H. Lawrence Ross for the National Highway Traffic Safety Administration, Ross found that it is not the provisions of the particular drunk driving statute that are important in deterrence. The key factors are the level of enforcement and the perception by the drivers of the likelihood of being apprehended. The Ross report underscores the crucial role of State and local law enforcement in this area, regardless of the nature of the statute. The Ross report also calls into question the necessity of toughening the penalties for driving while intoxicated.

Even though I have some reservations about this bill, I will vote for final passage. It is my hope that the increased attention given to this problem and the heightened awareness this bill may engender will help to change the public's perception of the chances of being apprehended and penalized for driving while intoxicated, and will help to encourage greater enforcement of drunk driving statutes, regardless of the penalties those statutes contain.

I fully support title II of the bill—updating of the National Driver Register (NDR). The NDR, when fully operational will aid the States in their consideration of applicants for a driver's license. This function—that of serving as a national clearinghouse for information concerning problem drivers—is a role which can best, and only, be fulfilled by the Federal Government. I am hopeful that there will eventually be full participation by all 50 States, for it is only with 100 percent participation that the NDR can be most effective.

Mr. DECONCINI. Mr. President, I want to extend my appreciation to the chairman of the Commerce Committee Subcommittee on Transportation, Mr. DANFORTH, for doing such an outstanding job in trying to come up with a bill which attacks the extensive drunk driving problem in this country while being responsive to the concerns of many of our colleagues who have varying degress of drunk driving laws in their States. I think the bill before us is a fine one and one which will effectively counter the growing number of drunk driving fatalities. I would like to lend my support to this new bill but, before I do, Mr. President, I would like a little clarification. It is my understanding that the bill, as passed by the House and currently written, would allow the State of Arizona to be eligible for increased highway safety grants. Mr. President, am I correct in assuming Arizona would be eligible for grants under this existing language?

Mr. DANFORTH. Yes, Senator, you are correct. My understanding of the provisions in the Arizona law are that they are much more restrictive than the provisions outlined in the bill before us. Therefore, I would expect Arizona to be eligible for increased, and well deserved, highway safety grants to implement their commendable law.

Mr. DECONCINI. Thank you very much for that clarification, Senator. I would like my colleagues in the Senate to know I fully endorse this bill and would hope my colleagues will join me so we can have an attack on drunk driving law at the Federal level this session.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VESSELS FOR HUMANITARIAN SERVICES

Mr. BAKER. Mr. President, next I propose to discharge the Commerce Committee from consideration of H.R. 4828, if there is no objection.

Mr. METZENBAUM. Mr. President, what is that?

Mr. ROBERT C. BYRD. That is cleared on this side of the aisle. It even has Mr. METZENBAUM's OK.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Commerce be discharged from further consideration of H.R. 4828, vessels for humanitarian services, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the clerk will state it.

The assistant legislative clerk read as follows:

A bill (H.R. 4828) to set aside certain surplus vessels for use in the provision of health and other humanitarian services to develping countries.

The bill was considered, ordered to a third reading, and passed.

Mr. BAKER. I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SAFETY OF INTELLIGENCE PERSONNEL AND CERTAIN OTHER PERSONS

Mr. BAKER. Mr. President, if the minority leader agrees, I ask the Chair to lay before the Senate Calendar No. 843.

The PRESIDING OFFICER. The clerk will state it.

The assistant legislative clerk read as follows:

A bill (S. 2552) to protect the safety of intelligence personnel and certain other persons.

The Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary with an amendment on page 2, line 3, after "duties", insert "or on account of the performance of his official duties".

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2552

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1114 of title 18, United States Code is amended—

(a) by inserting "or attempts to kill" after "kills";

(b) by striking out "while engaged in the performance of his official duties or on account of the performance of his official duties" and inserting in lieu thereof "or any officer or employee of any department or agency within the Intelligence Community (as defined in section 3.4(F) of Executive Order 12333, December 8, 1981, or successor orders) not already covered under the terms of this section"; and

(c) by inserting before the period at the end thereof a comma and the following: "except that any such person who is found guilty of attempted murder shall be imprisoned for not more than twenty years".

SEC. 2. Chapter 51 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 1118. Murder, manslaughter, assaults, threats, extortion, or kidnaping of persons given entry into the United States for permanent residence pursuant to section 7 of the Central Intelligence Agency Act of 1949

"(a) Whoever kills or attempts to kill a person given entry into the United States for permanent residence pursuant to the provisions of section 7 of the Central Intelligence Agency Act of 1949 (50 U.S.C. 403h) shall be punished as provided under sections 1111, 1112, and 1113 of this title, except that any such person who is found guilty of murder in the first degree shall be sentenced to imprisonment for life, and any such person who is found guilty of attempted murder shall be imprisoned for not more than twenty years.

"(b) Whoever engages in conduct proscribed by section 112, 878, or 1201 of this title against any person described in subsection (a) shall be punished as provided under those sections.".

SEC. 3. Chapter 51 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 1119. Murder, manslaughter, assaults, threats, extortion or kidnaping of persons present in the United States under intelligence auspices

"(a) Whoever kills or attempts to kill a person certified by the Director of Central Intelligence or his designee to be present in the United States under the auspices of any department or agency within the Intelligence Community (as defined in section 3.4(F) of Executive Order 12333, December 8, 1981, or successor orders) shall be punished as provided under sections 1111, 1112, and 1113 of this title, except that any such person who is found guilty of murder in the first degree shall be sentenced to imprisonment for life, and any such person who is found guilty of attempted murder shall be imprisoned for not more than twenty years.

"(b) Whoever engages in conduct proscribed by section 112, 878, or 1201 of this title against any person described in subsection (a) shall be punished as provided under those sections.".

SEC. 4. The table of sections for chapter 51 of title 18, United States Code, is amended by adding at the end thereof the following new items:

"1118. Murder, Manslaughter, assaults, threats, or kidnaping of persons given entry into the United States for permanent residence pursuant to section 7 of the Central Intelligence Agency Act of 1949.

"1119. Murder, manslaughter, assaults, threats, extortion, or kidnaping of persons present in the United States under intelligence auspices.".

Mr. BAKER. I move to reconsider the vote.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, while we take stock one more time and gain some time, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BOSCHWITZ). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Will the distinguished majority leader tell us when we may proceed with the continuing resolution?

Mr. BAKER. I am very anxious to do that. While we have the quorum, I am about to suggest we check with the cloakroom on this side and see what we have cleared and that is very essential to do. I hope we get to the continuing resolution soon.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business to extend not past the hour of 9:30 p.m. in which Senators may speak for not more than 2 minutes each.

JAPANESE TRADE BARRIERS

Mr. FORD. Mr. President, yesterday's Wall Street Journal contains an article by Urban C. Lehner that details continued Japanese Government efforts to prevent the import of U.S. tobacco products.

For many months now, the United States has been negotiating with the Japanese Government to remove impediments to the sale of U.S. tobacco products which now account for 1.4 percent of the Japanese market. There is a potential for greatly increased sales of U.S. tobacco products that can serve to lower our $18 billion trade deficit with Japan. Despite all matter of obstacles thrown up by the Japanese, some agreements have been reached to allow greater import of U.S. cigarettes. But, every time progress is made in negotiations between the United States and Japanese Government, further obstacles are thrown up by the Japanese to shut out American products.

Yesterday's Wall Street Journal article exposes an internal document of the Japan Tobacco and Salt Corp., a government-owned monopoly that exercises exclusive control over the distribution of tobacco products in Japan. The document directs one of the Government corporation's local offices in Tokyo to carry out sales and promotional activities that impede foreign cigarette sales by forbidding the placement of foreign brands in cigarette vending machines and requiring the removal of promotional signs.

This is in direct contravention of all Japanese Government promises to the U.S. Government. And, it is not an isolated situation. The U.S. Special Trade Representative has been negotiating for many months now with the Japanese to remove a myriad of nontariff barriers to the importation of U.S. products. Some agreements have been made for greater market access, but once made, they often are not carried out.

After nearly 2 years of negotiations, the Japanese Government agreed last April to remove nontariff restrictions on the importation of U.S. sporting goods, including aluminum baseball bats. But once an agreement was reached with the Government, Japan's sporting goods organizations moved to enforce their own restrictions that have effectively kept out American-made products.

This practice must stop. No one wants to build protectionist walls around our trade relations with Japan. But, let us not fool ourselves that we have a free trade relationship with Japan today. So far, they have had a free ride down a one-way street. It is time to open up the street to two-way traffic or else we may see roadblocks thrown up to Japanese goods exported to the United States.

I ask unanimous consent that the Wall Street Journal article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Sept. 30, 1982]

HOW JAPAN TRIES TO SHUT OUT FOREIGN GOODS

(By Urban C. Lehner)

A document from a Japanese government-owned corporation has surfaced in business circles here that provides rare, firsthand evidence in writing of Japanese attempts to

shut out foreign products—something foreign businessmen and officials have long alleged but have rarely been able to prove. Indeed a broader look at the controversy underlying the document provides a case study of the kind of elaborate web of restrictions the Japanese can weave when they're determined to have their domestic market to themselves.

The document came out of the Japan Tobacco & Salt Corporation (JTS), a government-owned monopoly that exercises exclusive control over all tobacco-products distribution in Japan. U.S. officials and the three American tobacco makers who sell here through the JTS have long believed and have at times formally complained to the Japanese government that the monopoly tries to obstruct foreign cigarette sales.

The document could well become a cause celebre in the ongoing efforts of the U.S. and Europe to persuade Japan to open its market to foreign products. The Japanese government has been trumpeting the claim that it's doing everything possible in that respect. But the document, a six-page battle plan detailing how one of JTS's local offices in Tokyo was to carry out its sales and promotion activities last July, specifically orders steps to squelch foreign cigarette sales.

"Curb stocking of imported cigarettes in vending machines," the document says at one point, indicating further that no foreign brands should appear in small machines containing fewer than 10 columns of cigarettes.

RETAILERS WON'T TESTIFY

"Remove displayed POP (point-of-purchase promotion) items for imported cigarettes in prominent locations," it says. (The American makers say many Japanese retailers have told them that JTS salesmen tear down posters and other promotional materials for foreign cigarettes. But they say the retailers won't testify to that because they depend on the JTS for licenses to do business and for a continuing supply of tobacco products.)

A JTS official involved in drawing up the battle plan confirmed that the document is authentic. A JTS spokesman declined direct comment because he hadn't seen the document. But he said "it's unlikely" that JTS would tear down promotional material or change the brands in vending machines "without the retailers' consent."

The document emerges at a time when officials in Washington are showing increasing displeasure at what they regard as Japanese foot dragging in carrying out earlier promises to open their market. The Japanese government earlier this year announced two packages of measures aimed at removing obstacles to foreign products, and missions of Japanese Dietmen have come to the U.S. to tout the measures. But U.S. officials say most of the measures that Japan announced with such fanfare have yet to be carried out. And a reading of the JTS document and talks with the American tobacco companies suggest that in the case of the JTS at least, new "impediments" are being thrown in the path of imported tobacco products every day.

Promoting the success of cigarette sales here is especially important to Washington, because cigarettes are one product that U.S. officials believe could easily make a significant dent in Uncle Sam's enormous ($18 billion last year) trade deficit with Japan. Cigarette sales come to a staggering $5 billion a year here, and U.S. cigarettes have proved very competitive in other foreign markets. Moreover the JTS, sole manufacturer of Japanese domestic cigarettes, is hardly a tower of business strength; there are moves afoot in the Japanese government to dismantle the monopoly because of its inefficiency.

"If American-made cigarettes were allowed to gain just 10 percent of the Japanese market," argues Philip Morris International, one of the American makers, in a position paper, "the imbalance in trade would be reduced by half a billion dollars."

But as it stands, foreign cigarettes claim only 1.4 percent of the Japanese market. They're hindered in getting a bigger share by innumerable legal restrictions—even forgetting about such underhanded measures as those outlined in the JTS document. For example, under Japanese law and JTS regulation, foreign cigarette makers;

May sell their products through only 20,035 of the 247,801 Japanese retailers licensed to sell tobacco products. (As one of the measures announced earlier this year, that number is scheduled to rise to 40,041 by next March 31 and to all of the retailers by March 31, 1986. But the American makers say JTS is carrying out the measure in a way designed to minimize foreign sales as long as possible.)

Sell their products subject to a 35 percent tariff and to a tax and pricing formula, which combined with the tariff causes foreign cigarettes to sell at a retail price 60 percent above domestic Japanese brands. That's true even through the price of American cigarettes when they land in Japan is about the same as the factory price of the Japanese cigarettes.

Are sharply limited in their ability to advertise and test-market their products.

Must distribute their products solely through their chief competitor—the monopoly JTS "There's no way your principal competitor is going to help you," says Joel Silverstein, Japan representative for Brown & Williamson Tobacco Corp., another of the American makers.

John Sandor, who runs Philip Morris's operations locally, complains that JTS never seems to have enough of Philip Morris's products in stock to meet orders from retailers. For example, he says, when retailers order Lark, Japan's best-selling foreign brand (Japanese smokers favor "charcoal filters" like the one Lark features), "The monopoly will normally indicate that a sufficient number aren't in the warehouse and a competing domestic product—in the case of Lark, Cabin—will be partially substituted.

The JTS internal document suggests that the monopoly uses a variety of subtle tricks to hold down foreign sales. For July in Tokyo's Sumida ward, the document ordered special emphasis on sales of five domestic brands. One of them was Marlboro (though a Philip Morris brand, it has been produced by JTS under license here for over 10 years). According to Tsuyoyuki Asaka, one of the JTS officials who helped draw up the document, Mariboro was chosen because it's considered an effective domestic "rival brand to counter imported brands."

Then there are the not-so subtle tricks like tearing down or stopping the posting of foreign posters, advertising displays or the electrically lit "light boxes" placed on top of a vending machine displaying the name and logo of a brand, R. J. Reynolds Tobacco International, a subsidary of R. J. Reynolds Industries Inc., complained several months ago to the new ombudsmen's office that JTS salesmen were telling retailers they weren't legally allowed to display promotional material for foreign brands. The case was settled when JTS agreed to inform retailers in writing that such materials could be displayed.

Then in early August a retailer in Tokyo's Shibuya section informed an American maker that a JTS salesman appeared to have taken away the retailer's "light box" atop the vending machine. But when Japanese government investigators acting on a complaint from the maker that didn't name the retailer, blanketed the area to interview retailers, no one mentioned the JTS. Missing light boxes were blamed on other causes—one was said to have blown away in a typhoon. The moral the investigators drew was that Americans make reckless allegations without proof.

U.S. officials and cigarette makers drew a different conclusion: Retailers are so vulnerable to the JTS pressure, explicit or implicit, that they can't afford to testify against the monopoly. There is at least some evidence that JTS doesn't shrink from using pressure to get its way with retailers.

Some retailers themselves make the same point. "Sure there's pressure (not to use foreign cigarette posters)," says Hinako Nakajima, a tobacco-shop owner in Nagoya. "The government hasn't abolished the monopoly system." Asked if JTS salesmen have ever forcibly removed posters from her shop, she will say only "please don't make me answer that question."

BLITHELY UNCONCERNED OFFICIALS

David Guilfoile, R. J. Reynolds's Japan country manager, says Reynolds's agents talk at least once a month to a large percentage of the 4,300 retailers in Tokyo licensed to sell foreign brands, "and the most common problem is the retailer will say, I can't allow you to put up that (poster or light box) because the JTS will get upset." Mr. Guilfoile says Reynolds hesitates even to complain about such abuses to the government because "we end up getting the retailers we're trying to develop as customers into trouble."

Japanese officials, for their part, seem blithely unconcerned with the tobacco question. Before one of the Dietmen's missions went to the U.S. a few months ago, one of the Dietmen was asked about tobacco at a special press conference for foreign correspondents. He replied that Japan's cigarette maker was "completely free" and thus there was nothing to discuss with the U.S. government.

Nonetheless, in the second package of measures the Japanese did come up with some tobacco concessions. They agreed that the U.S.-Japan "study group," which had been scheduled under the November 1980 Japan-U.S. tobacco agreement to be formed by March 31, 1983, will convene instead next month, an acceleration of six months. It isn't clear what scope the study group will have, however. U.S. officials say the Japanese have agreed to put the tariff question "on the agenda" but haven't agreed to negotiate a lower tariff.

It also isn't clear how meaningful the other concession in the second package—the increase in the number of retail outlets—will prove in the short run. U.S. officials and makers complain, for example, that all the outlets the Japanese have unilaterally selected to be included in the increase to take effect next March are outside the two regions of Japan where 60 percent of the foreign cigarettes are currently sold. That means the foreign makers won't be able to get more bang out of the sharply limited

television advertising dollars they're allowed to spend, which by necessity are concentrated in those two regions.

"That isn't the way you'd do it if you were operating in the spirit" of opening the market, Mr. Silverstein contends.

THE APPROPRIATION PROCESS IS OUT OF CONTROL

Mr. FORD. Mr. President, today marks the start of a new fiscal year for the Federal Government and, once again, the year will begin with Government operating under a continuing resolution.

By now, we should have finished action on 13 separate appropriations bills and sent them to the President for his signature. But, as of this moment, we have finished only one piece of appropriations legislation—the Housing and Urban Development conference report—and it is unlikely that we will act on more than one other before we recess.

Today also marks the first anniversary of legislation I proposed a year ago to switch the Federal Government over to a 2-year authorization and appropriations cycle. My reasoning for this recommendation was that the annual budget process simply does not work any more.

Frankly, the process is out of control. It has gone haywire—and the system itself is to blame. There is not sufficient time to consider the thousands of complex issues within the Federal budget. The budget simply has grown too large to be effectively managed over a 12-month period.

The problem is not a new one. Only once in the past 5 years have all 13 appropriations bills been enacted by the start of a fiscal year. Even then a continuing resolution was needed to fund some programs. Continuing resolutions have become an unwelcome fixture in the Federal budget process.

The frustration is nothing new either, but it is about to reach the breaking point.

The past week has been a difficult one for all of us, with long days and numerous amendments, as we tried to finish action on the continuing resolution.

For no one has the past week been more exasperating or difficult than the majority leader, and he has my appreciation and sympathy. Two days ago in a very candid reflection on the Senate floor, he accurately summarized our current dilemma.

He said:

> We simply cannot do this country's work this way. * * * I do not know what we are going to do to try to put this right, and it is too late to do anything this year. However, next year we are going to have to give some careful attention to what independent action the Senate can take to try to move the appropriations process without waiting for the House of Representatives as this body has done for 200 years. * * * One way or the other, next year, we must get our way out of this business of trying to do the appropriations of this country in such a brief time late in the session and against an adjournment deadline. I do not think we have any alternative.

Mr. President, I commend the majority leader on a most throughtful and correct analysis. I hope that my colleagues will heed his words carefully.

And, Mr. President, I hope that the majority leader will give the concept of a 2-year budget cycle a close and serious look.

Earlier this year, my colleague from Indiana (Mr. QUAYLE) and I merged separate measures we had introduced providing for a 2-year budget into a single piece of legislation. We hoped that this merger would encourage bipartisan support—and it has—and we also hoped that it would serve as a vehicle for change.

Our bill has been the focal point of several recent hearings before both the Senate and House Budget Committees and I feel that interest in this approach is growing.

It is too late in this session to make any major improvement in the current process. But change should and must be made a top priority early in the next session, so that the spectacle of furious activity in a rush to beat the clock that we are just now completing will not have to be our constant way of life.

IN MEMORIAL TO MARINE CORP. DAVID LEE REAGAN

Mr. WARNER. Mr. President, over 4 months ago the tragic situation in Lebanon erupted into a full-scale war. After nearly 3 months of fighting, an agreement was reached allowing troops from France, Italy, and the United States to enter Lebanon and act as a peace-keeping force.

All of us were relieved when the U.S. contingent of 800 marines left Lebanon last month with no casualties; their mission successfully completed.

Unfortunately, following news of the tragic killing in the Palestine refugee camps last week, our marines were again called upon to enter Beirut to assist the French and Italians in peace-keeping efforts and to protect the civilian population.

As we are painfully aware, yesterday a young Virginia marine, Corp. David Lee Reagan, gave his life in this effort.

I did not know Corporal Reagan personally, but as a former marine, I know what he felt as he landed on that foreign beach. His was a mission of mercy, an opportunity to help bring order out of chaos. After all, this is what being a marine is all about—it is what he had been trained to do.

His was duty, honor, country. His was to accomplish the mission assigned no matter what the cost. He had trained since he went to boot camp at Parris Island, S.C., in July 1979, for this day.

Yet, he did not expect to die, but he knew it could happen and was willing to do so if it was necessary. His was a profession that often resulted in death while attempting to keep the peace. His was a profession that was misunderstood by so many until his services were required. As Rudyard Kipling wrote:

> It's Tommy this, an' Tommy that, an' Chuck 'Im out, the brute!
> But it's "Saviour of 'is country," when the guns begin to shoot.

The 17th century poet, Richard Lovelace, penned a poignant passage that may serve to ease the pain being felt by Corporal Reagan's wife, Rhonda, of Chesapeake, Va., and his mother, Peggy A. Bailey of Creswell, N.C., over the loss of their husband and son. They are the heartfelt words of a man trying to explain to his loved one how, and why, he must temporarily abandon the priceless sanctity of her love to face the dangers of defending a cause. The decision is agonizing, a contradiction of desire against devotion, but ulitmately his course is clear.

> Yet this inconstancy is such
> As you, too, shall adore;
> I could not love thee, dear, so much
> Loved I not Honor more."

Corporal Reagan gave his life in service to his country. His example and his inspiration shall always remain.

To his loved ones, I hope that the prayers and love expressed by those of us who share their grief will help sustain them through these difficult days.

THE IMMIGRATION REFORM AND CONTROL ACT

Mr. ARMSTRONG. Mr. President, in August I voted against final passage of S. 2222, the Immigration Reform and Control Act. I did so for two principal reasons: The reform provisions were inadequate to protect constitutional rights and the control provisions were inadequate to limit immigration in a way that is both workable and fair.

When the other body has completed its work on a companion measure and the matter has gone to conference, I intend to study the conference report carefully and determine whether these fundamental deficiences have been cured. At that time, I hope to support the bill.

It is essential for this country to come to grips with its burgeoning immigration problems. Control of the Nation's borders is one of the most basic attributes of sovereignty and we are running a very serious risk of losing that control altogether. Most commentators agree that our 30-year old immigration law is hopelessly out

of date for solving the problems of a bountiful country in the troubled world of the 1980's. The urgency of immigration reform is not lost on the average American, who demands decisive action. A recent Roper poll showed 91 percent of Americans in favor of an all-out effort to stop illegal immigration; 80 percent also in favor of curbing legal immigration.

After listening to literally hundreds of witnesses and studying the issue in considerable detail, the Senate Judiciary Committee painted a bleak picture indeed. It concluded that immigration to the United States is out of control and that our immigration law is no longer adequate to deal with modern conditions. The following facts were established:

Total legal admissions to the United States in 1965 stood at 300,000; in 1980 that number had increased 167 percent to 800,000 annually.

In the last 5 years, the unrestricted immigration category of immediate relatives of U.S. citizens grew 40 percent from 114,000 to 152,000 annually.

Refugee admissions rose from only 5,000 in 1977 to a staggering 200,000 in 1980.

The United States today is accepting over twice as many refugees and legal residents for permanent settlement than the rest of the world combined.

The estimated annual inflow of illegal immigrants is 500,000 every year, despite the fact that over 1 million people are apprehended and turned away annually.

The total number of immigrants illegally in the country has been estimated at between 6 and 10 million.

Estimates vary as to the percentage of illegal immigrants holding jobs that currently unemployed Americans could perform, but the Congressional Budget Office has said each 1 percent job displacement of this kind costs $420,000 a year in unemployment benefits.

Combined legal and illegal immigration accounts for 30 to 50 percent of our annual population increase of about 2 million people.

Added to these facets of the problem is the general American attitude toward immigration. We are, as it is often said, a Nation of immigrants and this nation has been enriched by the diverse cultural legacies of all the countries of the world. Americans are proud of their wealth of opportunity and political freedom and are generous enough to want to share them with homeless and oppressed of the troubled world. Whose pulse does not quicken on hearing the words that are etched on the Statue of Liberty, who would want to extinguish that beacon of comfort?

This, then, was the dilemma that was faced by Senator SIMPSON and the Immigration Subcommittee he leads with such skill and competence. After long deliberation of the critical and complex set of problems before it, the subcommittee produced a reform bill that is a classic political compromise of difficult issues and competing interests. In my opinion, however, the compromises that resulted in S. 2222 have fashioned an immigration bill which, although well-intentioned, cannot work in practice. Although I have some serious reservations about the two essential components of the reform package—amnesty for illegal aliens and employer sanctions—I would be willing to adopt a measure constructed on this foundation, if doing so would solve our immigration problem one and for all. However, I believe these two fundamental provisions have been distorted by the political compromise process and do not reflect a workable approach for solving this difficult problem.

Some form of an amnesty program for illegal aliens can be justified, where they have long-established equitable claims and are settled, productive members of their communities. Such a program would not only be in their interest, but also in the interest of citizens in general. A large undocumented population is an easily exploitable subclass of our society that fears to report crimes and illnesses that threaten the public as a whole.

Nor do I favor a massive roundup of illegal aliens. Such an effort is beyond the resources of the Immigration and Naturalization Service and would not in any case be worth the expense in terms of dollars, the potential abuse of human and constitutional rights, or disruption of our communities. Last April, we had a limited example of such a program in the form of operation jobs, which could by no means be called a success in the Denver metropolitan area. That experience in fact, and the fear and indignation it inspired in Colorado's Hispanic community, caused me to amend S. 2222 with a measure protecting the constitutional rights, personal safety, and human dignity of citizens and aliens alike. In my view, any amnesty program should be workable and consistent with our national interests, and should not in any way encourage further undocumented migration. The amnesty provision in S. 2222 does not pass these tests. I do not see how the already overw~rked INS can properly screen the millions of likely applicants for amnesty. Moreover, the bill does not eliminate the possibility of attracting more illegal immigrants; I believe we have put the cart before the horse—we should stop the flow of illegal migration before we implement any amnesty program.

Bad as the problem of illegal migration currently is, we may be witnessing only the thin edge of the wedge. Global population will pass the 6 billion mark by the end of the century, and 90 percent of new births will occur in poor, underdeveloped countries. Mexico, a country with one of the highest birth rates in the world, shares a long border with the United States that is patrolled by only 350 officers at any given time. Mexico's population today is 70 million people and, according to the United Nations, will be 174 million by the year 2025. Unemployment in that country fluctuates around the rate of 50 percent. Nothing in this bill provides an assurance that the flow of illegal immigration will end; nothing in the bill calls for a Mexican/American joint effort to stem this flow.

The other major provision of the reform package that troubles me relates to employer sanctions. My objections to this provision are three.

First, the employer sanctions program of S. 2222 would impose a heavy regulatory and paperwork burden on America's already beleaguered and depressed businesses. It is not by any means clear how the INS is going to find the wherewithal to enforce this program or, indeed, even to make spot checks for compliance.

Second, existing identification documents are easily forged, cheaply and readily available, and inadequate for implementing this employment eligibility system. The present system simply is not secure. S. 2222 itself relies on a secure system of identification, but does not set forth the particulars. It expressly contemplates a national ID card for employment eligibility, and there is speculation that this would become a national ID card or kind of internal passport. Even the possibility of such a development is anathema to me, as it should be to all free men and women.

Third, and perhaps most important, I was especially concerned that the employer sanctions provision in the bill would lead to discrimination against Hispanics and other minorities. Joaquin Avila, president of the Mexican American Legal Defense and Educational Fund, has voiced his reservation this way:

> No one willingly chooses to be on the hot seat of governmental inspection. One way to avoid inviting both inspections and raids is not to employ too many Hispanics. Contrary to the claims made by the bill's supporters, employer sanctions would be burdensome indeed.

In conclusion, Mr. President, this country urgently needs to come to grips with this difficult and serious problem. Like most Senators, I am eager to support a reform bill that will restore order, commonsense, and fairness to America's immigration policy. If amnesty and employer sanctions are essential ingredients in that solution, I am even willing to support such controversial programs. But S. 2222, in my opinion, does not present a workable plan for addressing these issues and

solving these problems It was primarily for the reasons I have set out that I have opposed Senate passage of S. 2222; it is for those same reasons that I will be reading the conference report on the immigration reform bill closely and with great interest, in the hope that these fundamental deficiencies have been cured and that we can move forward at long last to reform that is both workable and fair.

GI BILL

Mr. ARMSTRONG. Mr. President, I shall soon send to the desk to be introduced as separate legislation the Armstrong-Cohen-Hollings-Matsunaga GI bill, with a request that it be referred to the Armed Services Committee. We are joined in sponsoring this legislation by our colleagues Senator ANDREWS, Senator CANNON, Senator GARN, Senator HAWKINS, Senator INOUYE, and Senator TSONGAS.

It is still our intention to offer the Armstrong-Cohen-Hollings-Matsunaga GI bill as an amendment to S. 2936, the military pay authorization bill for fiscal year 1983. But it seems apparent now that this measure will not come to the floor prior to the convening of the lameduck session.

I regret that it was not possible to bring S. 2936 to floor for action before we go into recess. I believe the Senate is prepared now to vote to reinstate GI bill education benefits for our service men and women. Now this happy day shall have to be postponed until November.

But there is one benefit to this delay. The staff of the Armed Services Committee now will have about 6 weeks in which to review the 2,207 pages of testimony taken in 22 previous hearings on the GI bill before three separate committees of Congress over the last 3 years. More than 250 witnesses were heard from at these hearings. They included Members of Congress; officials of the Department of Defense and the Veterans' Administration; military personnel ranging from three-star generals to privates; analysts from the Congressional Budget Office and the General Accounting Office; experts from academia; representatives from service organizations including the Association of the U.S. Army, the Air Force Association, the Reserve Officers Association, the National Guard Association, and the Non-Commissioned Officers Association; spokesmen for veterans groups including the American Legion, the Veterans of Foreign Wars, the Disabled American Veterans, AmVets, and the Paralyzed Veterans Association; and representatives of national associations of institutions of higher learning, including the American Association of Community Colleges, the National Association of State Universities and Land Grant Colleges, and the American Association of State Colleges and Universities. More than 90 percent of these witnesses—most with great vigor and enthusiasm—endorsed reinstitution of GI education benefits.

We are certain that anyone who reviews these 2,207 pages of testimony—and it could take the entire recess just to do that—will share our conclusion that reinstitution of the GI bill is the single most effective and cost-effective step that we can take, not simply to strengthen our national defense, but to put the dream of a college education within reach of all of our young people. Our purpose in introducing the Armstrong-Cohen-Hollings-Matsunaga amendment as separate legislation is to give those members of the Armed Services Committee who have not yet signed on as cosponsors to come to the only conclusion we think can be made after a conscientious examination of this overwhelming mass of testimony and evidence.

If, after a review of this voluminous evidence, the Armed Services Committee should choose to mark up and report to the floor a GI bill proposal of its own prior to bringing the military pay authorization bill to the floor, that would be perfectly all right with us. We proposed our GI bill as an amendment only after it was clear this was the only way to bring this critically important measure before the full Senate.

Frankly, we do not believe the Armed Services Committee could draft a better GI bill than the one provided for in our amendment. It was drafted after close consultation with knowledgeable people in the Armed Forces, chiefly the Army, and it combines the best features of S. 25, the GI bill I introduced with 20 cosponsors; S. 742, the GI bill introduced by Senator COHEN; and S. 899, which was introduced by Senator HOLLINGS. But the Armed Services Committee is certainly welcome to try.

If the Armed Services Committee should choose not to mark up a GI bill of its own and report it to the floor in a timely manner, we are prepared to offer our bill as an amendment to S. 2936, as already proposed, or to any other measure that might emerge from the Armed Services or Veterans' Affairs Committees during the lameduck session. One way or the other, the full Senate will have the opportunity to be heard on the GI bill before the 97th Congress passes into history.

● Mr. HOLLINGS. Mr. President, we have a crisis where military manpower is concerned. We are spending billions of dollars in defense on O&M, weapons procurement, and R&D. But, we are not getting the high quality, trainable personnel through the All-Volunteer Force that we need in order to operate our new and advanced-technology systems.

The DOD publicizes how it is more than meeting its recruiting objectives. That success is based on one sad fact. The economy is in total disarray. Teenage unemployment is at 24 percent; for black teenagers, unemployment is 52 percent. The administration offers nothing in the way of hope for hundreds of thousands of our citizens. But the DOD incredibly boasts that it is successful in meeting personnel goals as if the pains of idleness and unemployment had nothing to do with the situation.

This view of success overlooks the broadening need for the highest quality and educated recruit for our future Army. The percent of recruits that score the category I and category II in the Armed Forces qualification test is much lower today than the percent of draftees scoring in the same category in 1964, the last prewar year before Vietnam; 33.7 percent of our draftees scored in these highest categories in 1964; in 1981 only 23.6 percent scored in category I and II.

We must continue to search for ways to upgrade the quality of the Armed Forces and reward those that sacrifice for our national security. I believe a new GI bill is the most effective, and cost-effective step we can take to improve the number and quality of recruits for our Armed Forces. To meet this goal, Senators ARMSTRONG, COHEN, MATSUNAGA, and I are pleased to introduce a new GI bill program for our Armed Forces.

Mr. President, we must recruit more high quality, highly motivated young men and women. Our manning problems will become quite severe in future years when the pool of young, service-age people is diminished and, if our economy improves. I believe, and sincerely hope, that the educational benefits provided by a new GI bill will attract increased numbers of high school graduates into the services and will assist the services in retaining the career middle-grade noncommissioned officers needed to train and lead our fighting men.

Under the provisions of the new GI bill, veterans could receive education assistance payments of up to $300 per month for up to a total of 36 months while attending an approved educational institution. Eligibility for benefits at this level would be attained through a number of active duty and Reserve service options. For example, a young man could enlist for 2 years of active duty and agree to serve 2 years of Selected Reserve service and 2 years of individual Ready Reserve service and become eligible for the maximum benefits commencing at the time he is honorably discharged from active duty. A longer period of active duty would reduce the Reserve obligation.

A unique feature of the bill is that it also provides educational benefits for

persons who serve in the Reserve Forces without having served on active duty. While the benefits for eligible reservists are one-half of what is provided to active service veterans, they are still substantial and should prove to be an attractive recruitment incentive. The Reserves are experiencing even greater difficulties in filling their ranks with quality people than the Active forces. I believe that this bill can go a long way toward providing the needed incentives to draw young men and women into the Reserve Forces.

Active duty personnel eligible for benefits under this program receive monthly payments commensurate with the percentage of an academic course load that they pursue. If, for example, a soldier at Fort Jackson, S.C., attends college classes on a part-time basis at the University of South Carolina in Columbia and takes 25 percent of a full academic load, he or she would receive $75 per month, or 25 percent of the maximum monthly entitlement. They could commence such a program after 1 year of active duty.

I believe, however, that the feature of this bill which will have the greatest appeal to our career military people is a provision which provides for transferability of benefits. As written, the bill would enable a person eligible for education benefits to transfer these benefits to one or more of his dependents—but not to exceed the 36-month/$300 level. I believe that this will provide an extremely valuable retention incentive for many of the very important middle-grade noncommissioned officers. An alarmingly large number of these small unit leaders are presently leaving the services because they cannot afford to send their children to college on the military pay they receive. This bill can provide them the assistance they need to educate their children while continuing in a career that most of them prefer.

Mr. President, Congress has moved decisively in recent years to provide our military forces with the modern, high technology equipment they need to at least keep abreast of the Soviets in a material sense. But, as we all know, we are now at a point where we must significantly improve the quality of our military manpower. I believe that we must now move resolutely to remedy this problem if the security of this Nation is to be assured. I believe a new GI bill can be a major step in that direction. I am very pleased to join with my colleagues today in introducing this vital legislation.●

● Mr. COHEN. Mr President, I am honored to join with Senators ARMSTONG, HOLLINS, MATSUNAGA, and my other colleagues in introducing legislation to reinstitute the GI bill education benefits.

As you know, we had intended to propose this measure as an amendment to S. 2936, the Uniformed Services Pay Act of 1982, which had been scheduled to come before the Senate for consideration this week. I deeply regret that we were not given the opportunity to consider the pay bill—and the GI bill amendment—before recessing.

There is ample evidence that a GI bill would be of real benefit to the services as they seek to attract high quality recruits. The importance of this is clear. Not only will the services experience reduced costs through lower attrition rates and improved trainability, but unit performance will be enhanced as well.

In the October 4 edition of Army Times, an article cites a recent study conducted for the Army Recruiting Command which concludes that there is a direct link between a tank commander's mental apptitude—as measured on the Armed Forces Qualification Test—and the performance of his tank crew during gunnery and simulated combat drills. The study found that a platoon of tanks commanded by Mental Category II tank commanders will have a combat exchange ratio of 7.45 enemy killed to one tank lost. The exchange ratio for tanks commanded by those in Mental Category IV is only 1.33 to 1—an 82-percent degradation in performance.

The significance of this is that, while the services are having virtually unparalleled recruiting success, they are still not bringing in as many individuals in the top two mental categories as they would like. Educational incentives for service would improve their ability to attract these top quality recruits.

As I was preparing to introduce the GI bill proposal, I received a number of calls from people inside the Pentagon telling me that while the official Defense Department position was in opposition to this legislation, they were strongly in favor of it. Their unsolicited offers of support meant a lot, especially in light of the full court press undertaken by some Defense Department manpower officials to squelch our amendment.

I was particularly impressed with some information I received which confirmed that the approach Senators ARMSTRONG, HOLLINGS, MATSUNAGA, and I are taking is the correct one. There are, I am told, two clearly identified types of recruits.

The first is one who is likely to sign up for 4 years. He is attracted by the $5,000 bonus, is unlikely to take advantage of educational benefits, and is likely to be married. Of those eligible to reenlist, 61 percent of this type of recruit do.

The second, noncareer-oriented type signs up for 2 or 3 years. He or she gets no bonus, and 80 percent of the 2-year enlistees say they joined for the educational benefits. They are more highly trainable, reducing costs for the Army. Only 30 percent who are eligible to reenlist do.

This is the type of individual that the services today are getting in insufficient numbers. And it is the type of individual who would be attracted by a GI bill proposal of the sort we are proposing today.

I have heard DOD manpower officials and some of my colleagues say that we do not need this because of the success we are having in recruiting today. But I fear this view is shortsighted.

The difficulties faced by the services only a few years ago seem to be forgotten. So do the events which led to those problems—the end of the GI bill in 1976, caps on military pay, and reduced advertising and recruiting budgets.

Today's high unemployment, coupled with significant improvements in military pay over the past 2 years, plays an important part in the recruiting success the services are now having. We should not forget the difficulty Senator ARMSTRONG, in particular, had in convincing some Members of this body and the Nation that those pay raises were essential if we were to raise many members of our military above the poverty level.

The debate we are having now on whether or not to reinstitute GI bill education benefits is not unlike the one we had on improving pay. The Senate Armed Services Committee can take pride in having responded to the calls for better pay and in taking the lead in helping our service personnel who were encountering real hardship.

As a member of the committee, it is my hope that many of my colleagues will join in the effort to again give GI bill educational assistance to these brave men and women. Those benefits will more than pay for themselves, and they will prove increasingly important as we enter a period of declining available manpower through the decade of the eighties.

The Army Research Institute has produced a study which concludes:

> If the jobless rate declines as fast as the administration projects, without corresponding increases in military pay or education incentives, the Army could miss its recruiting goal for male high school graduates by 34,000 (or about 35 percent) by fiscal year 1986.

The institute sees "problems ahead for the services in attracting sufficient numbers of high school graduates once the Nation's economy turns around."

There is, then, I believe, a convincing case for restoring GI bill education benefits. As Army Chief of Staff Edward Meyer told the House Veterans' Affairs Committee in testimony last year:

> I believe that Army readiness will be improved today and tomorrow with a GI bill

which supports the Active and the Reserve, the first-termer and the careerist.

This bill, I believe, responds to General Meyer's concerns in every way. It will, I hope, receive prompt, positive consideration when we return in November.●

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the bill itself be concurrently referred to the Committee on Armed Services and to the Committee on Veterans' Affairs. I advise Senators that I have cleared this request with the chairmen of these respective committees.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I do not want to object, that request has not been cleared, it is my understanding, on this side.

Mr. ARMSTRONG. Mr. President, I shall be happy to withhold.

Mr. ROBERT C. BYRD. If the Senator will momentarily withdraw that.

Mr. ARMSTRONG. I shall be happy to do that.

DISABILITY PAYMENT REFORM

Mr. DOMENICI. Mr. President, this afternoon, H.R. 7093, a bill which included some disability payment reform, was considered for a few moments for unanimous consent, which was objected to. I was not on the floor and could not be here. Had I been here, I would have joined with the distinguished Senator from Louisiana in his statement with reference to the social security disability fund.

While I think that we have gone administratively far too far in attempting to reanalyze and reevaluate those who are on the disability list and receiving compensation, I would have joined him in suggesting that we are going too far in the other direction in the bill for which unanimous consent was sought for consideration. I believe we have to fix that, but I believe we would have invited appeals in every case. I believe we would have clogged the administrative appeal process and I really do not think it would have ended up in any reform at all, either on the side of saving money or ultimately on the side of convincing the Congress and the American people that that kind of disability adjudications are being handled properly.

I was sorry I could not be here to join the distinguished Senator from Louisiana (Mr. LONG), but I do so here tonight.

I yield the floor.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MILITARY CONSTRUCTION APPROPRIATIONS — CONFERENCE REPORT

Mr. BAKER. Mr. President, I am told that there is a conference report on H.R. 6968, the military construction appropriations bill at the desk. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, would the minority leader be in a position to permit me to proceed to the consideration of that item at this time?

Mr. ROBERT C. BYRD. This is the military construction appropriation conference report?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. We have no objection.

Mr. BAKER. Mr. President, I ask the Chair lay before the Senate the conference report on H.R. 6968.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6968) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the Record of today, October 1, 1982.)

Mr. LAXALT. Mr. President, I submit a report of the committee of conference on H.R. 6968, and ask for its immediate consideration.

Mr. President, I am pleased to support the conference report on H.R. 6968 making appropriations for military construction for fiscal year 1983.

The conferees have agreed to provide $7,043,040,000 for military construction and military family housing requirements during the fiscal year which started today. The conference agreement represents a decrease from the Senate passed bill of about $56 million and an increase to the House passed bill of about $43 million. The bill is $1.17 billion below the President's request and is below the subcommittee's allocations for budget authority and outlays. While the bill is slightly below last year's appropriation, it represents one of the largest military construction appropriations bills passed by the Congress.

As I mentioned in my statement on this bill when it passed the Senate last Monday, the reductions taken represent the recommendation of the Defense Department that the military construction account be reduced to help in the overall budget process as it applied to the national defense amount.

Mr. President, I believe we have provided for the most vital of the projects requested. In addition, the bill gives the Defense Department most of the facilities requested to improve the quality of life of our military personnel.

At this point, let me provide some highlights of the conference agreement—

With regard to the MX missile, the conferees approved $16.7 million for facilities at Hill Air Force Base, Utah, and Newark Air Force Station, Ohio. These facilities, while in support of the missile, are not directly related to any basing mode. It should be noted, however, that the conferees agreed to include report language which restricts the funds for these projects until after the President's basing mode decision which is scheduled for December 1, 1982.

Concerning the funds for the contingency base at Ras Banas, Egypt; the conferees, after extended debate, agreed to provide $91 million for Air Force projects at Ras Banas. Additionally, the conferees have included report language requiring assurances from the Government of Egypt and the Defense Department as to usage of the base. On this particular project, I feel strongly that the Senate was able to get the best possible compromise.

The conferees agreed to provide $33 million for the land lease proposal in the Northern Mariana Islands. Again, this item was discussed in some detail with the conferees agreeing on the $33 million and language requesting that the Defense Department consider a fee simple purchase of the property.

The conferees have provided the funds added by the House Appropriations Committee for Guard and Reserve projects. As always, the Senate supports strongly facilities for the Guard and Reserve.

The House had included about $250 million in projects not requested by the President. Many of these projects are important and need to be accomplished quickly. The conferees have agreed, consistent with the authorization conference, that these facilities can be constructed using any available cost savings.

The Senate, due to budgetary constraints, deferred without prejudice funding for projects which were felt not to have a direct bearing on readiness. However, because of the monetary differences between the bills, the conferees were able to provide appropriations for the majority of the gymnasiums, child-care centers, family service centers, and other quality of life facilities.

The conferees agreed to defer without prejudice the funding for the colo-

cated operating bases (COBS) requested by the Air Force at $28 million. These facilities are very important and are supported by the conferees; however, they are eligible for funding through the NATO infrastructure account. In light of the tremendous amount of money which the United States is spending throughout the world in support of our allies, the conferees agree that the Defense Department must obtain more from NATO to pay for these facilities.

I would like to clarify one issue for the record that is not addressed in the formal conference report. Both the House and Senate provided funding for the Consolidated Space Operations Center (CSOC) in Colorado. Both bodies also included extensive report language. In the military construction appropriations conference report, it is stated that if only one body makes mention of an item and the other does not object, then the item is approved by the conferees. In the case of CSOC, the Senate language is more restrictive. It is the intent of the conferees that the Senate language prevail on this matter.

The conference report provides detailed tables which show the outcome of individual projects. These tables, I believe, can provide any further information necessary; and of course, the staff or myself will be pleased to clarify the outcome of any project if necessary.

Mr. President, I believe that the Senate conferees have agreed to a bill which provides an excellent, well-rounded program for military construction during this new fiscal year. I urge my colleagues to support this conference agreement.

Mr. SASSER. Mr. President, I am pleased to join with my distinguished colleague from Nevada in urging swift passage of the military construction appropriations bill, H.R. 6968, which recommends a total of $7.04 billion for fiscal year 1983.

This bill provides necessary funding for the planning, design, construction, alteration, and improvement of military facilities, both for Reserve and Active Forces, worldwide. The bill finances the construction, alteration, improvement, operation, and maintenance of all military family housing. Through the efforts of the conference committee, funding for some of the niceties such as gymnasiums, religious centers, child-care centers, recreation, and education facilities, and defense schools was provided. Additionally, the military construction bill is the source for the U.S. share of NATO infrastructure construction costs.

Our subcommittee and the full Senate Appropriations Committee, as well as our counterparts in the House of Representatives, are aware of and concerned about the backlog of construction requirements. Although progress has been made, the committee believes that the Defense Department should stop using military construction as the account to reduce when no one is willing to take a reduction in the weapons systems accounts. Military construction is comparatively a small account when compared with the procurement of weaponry, but without the infrastructure that is indispensable to a strong military—the docks, runways, hangars, launching sites, and maintenance facilities—the immense sums spent on these systems would be of no use. Whereas all of the newer systems require the best personnel available to operate and maintain them, these personnel deserve the best facilities possible in which to work and live. Thus, military construction funding can provide these facilities, but only if the Defense Department is willing to guard the account with the fervor given other areas.

Mr. LAXALT. Mr. President, if there is no further discussion, I ask that the conference report on H.R. 6968 be agreed to.

The conference report was agreed to.

Mr. LAXALT. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INCREASE IN DISTRICT OF COLUMBIA—CONFERENCE REPORT APPROPRIATION

Mr. BAKER. There is another conference report I would like to do, which I believe can be done very promptly, and that is the conference report on S. 2457, the District of Columbia Self-Government and Government Reorganization Act. If that is cleared, I will be prepared to go to it now. If it is not, I will desist.

Mr. ROBERT C. BYRD. Mr. President, we are ready to proceed.

Mr. BAKER. I thank the Senator.

I ask the Chair lay before the Senate a conference report on S. 2457.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2457) to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 1, 1982.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, there are a number of other items, but unless we are in a position to clear others at this time of an urgent nature, I am going to ask that the Chair lay before the Senate the continuing resolution.

Mr. WARNER. Mr. President, could we inquire about the Wolftrap bill, H.R. 6875?

Mr. ROBERT C. BYRD. Mr. President, that matter has not been cleared at this point, I am sorry to say.

Mr. WARNER. I thank the Senator.

Mr. ROBERT C. BYRD. It is not my personal objection.

Mr. WARNER. I understand. I thank the Senator.

Mr. BAKER. Mr. President, I wonder if the minority leader would advise me as to whether we might delay a few minutes to see if some of these items are cleared or if that would seem not worth the investment of time.

Mr. ROBERT C. BYRD. I certainly want to cooperate with the majority leader in every way I can because he has been most cooperative with the minority throughout the year.

I hope, however, that we could get to the continuing resolution—

I know he shares that hope—as soon as possible.

Mr. BAKER. Yes, Mr. President.

Mr. ROBERT C. BYRD. Because a good many Senators are waiting around.

Mr. BAKER. Mr. President, I am told that a House message on H.R. 3787 is here and approved for action on both sides. Could I inquire of the minority leader if he is prepared to proceed to that item at this time?

Mr. ROBERT C. BYRD. Will the Senator withhold for just a moment?

Mr. BAKER. Yes.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, there is at the desk a conference report from the House on the continuing resolution making appropriations for the fiscal year 1983, is there not?

Mr. STENNIS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BAKER. Mr. President, I should like to make a statement before I ask the Chair to lay that message before the Senate.

There are a number of other items that are of urgent importance and which are tantalizingly close to clearance on both sides of the aisle. I am going to ask the Chair in a moment to lay before the Senate the conference report on the continuing resolution, but I hope the minority leader will accommodate me as we proceed, and if we find that some of these items have been cleared on both sides, I hope we can lay aside the continuing resolution debate for a few moments to take care of those items.

Mr. ROBERT C. BYRD. Mr. President, would the majority leader indulge me to make a countersuggestion?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. That we proceed with the continuing resolution, because several Senators have been waiting, and they are wondering whether or not there will be a rollcall vote. I suggest that we dispose of the continuing resolution so that they can leave and not be kept around. I will be as accommodating as I can be with respect to the unanimous-consent request.

Mr. BAKER. Mr. President, I understand the minority leader's view. I am afraid that if we do not move before we finish the continuing resolution, there will be no possibility that the House will not act on some of these measures. So I hope he will not object if at some point I ask unanimous consent for a brief time to clear certain items.

Mr. ROBERT C. BYRD. All right.

CONTINUING APPROPRIATIONS, 1983—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on House Joint Resolution 599 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate joint resolution (H.J. Res. 599) making continuing appropriations for the fiscal year 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, October 1, 1982.)

Mr. STEVENS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. HATFIELD. Mr. President, the committee of conference met yesterday on House Joint Resolution 599, the continuing resolution for fiscal year 1983. Even though the Senate brought to the conference 100 amendments to the House-passed measure, we were able to complete our work in relatively short order and reach an acceptable agreement. All 28 Senate conferees signed the conference report, and only 1 of the 21 House conferees did not. That near-unanimous support is a demonstration that we have a sound product. We should deal with it expeditiously and send it on to the President to be signed into law. There is no doubt in my mind that the President will do so. We have an official statement of administration policy indicating there is no objection to this joint resolution as an interim spending measure.

So that we can move along quickly on this continuing resolution, I will be brief in summarizing the major actions of the conference. On the matter of defense spending, the conference agreed to a level of $228.7 billion in obligational authority, considerably more than the current level proposed by the House and only a few billion dollars below the amount recommended by the committee in its reported version of the fiscal year 1983 defense appropriations bill. On foreign assistance, the conferees agreed to a spending rate at the current rate or the budget request, whichever is lower, which was the position of the House. This will reduce foreign assistance funding below the level the Senate would prefer, but only for the duration of the resolution.

For military construction, the conferees agreed to set the spending rate at the level provided in the conference agreement on that bill, filed yesterday in the House, instead of the lower of formula originally proposed by the Senate. Since the HUD-independent agencies bill was signed into law yesterday, it was dropped out of the CONGRESSIONAL RECORD entirely. For energy and water appropriations, the conferees agreed to the Senate position of current rate, and the legislative bill, with Senate items included, was made effective for the full year.

These were the principal results of the conference relative to spending rates. Rather than attempt to relate the conferees' action on each of the 100 amendments, I will wait and respond to Senators' specific questions as they arise.

Finally, the conferees changed the expiration date of the resolution from December 22 as proposed by the Senate to December 17, which is a Friday. I hope this will allow us sufficient time to move regular fiscal year 1983 bills when we return from the post-election session.

Mr. President, the military construction measure has already been passed, so we have only 11 of the 13 bills to do during the lameduck session.

I yield to my distinguished ranking minority member, who has been a stalwart in these rather tedious days in getting this conference report completed. I appreciate very much his support.

Mr. PROXMIRE. Mr. President, the conference report we have before us today is a very complex piece of legislation, and the chairman of our Appropriations Committee, the distinguished Senator from Oregon (Mr. HATFIELD) deserves a great deal of credit for handling 50 or 60 amendments on the Senate floor and in conference over 22 hours. We would have been here into next week, in my judgment, if it were not for his expeditious and fair handling of all these amendments.

I recognize the fact that the continuing resolution does not meet all the problems that have been created by our inability to pass 1983 appropriations bills. This would have been impossible. But I do believe that on balance the conferees and the resolution did about as good a job as they could be expected to do and hope we will move to pass the resolution quickly so that the normal operations of the Federal Government can resume as soon as possible.

We should recognize that it has been almost 24 hours that the agencies of our Government have been without official funding. So we must move and move fast.

Mr. President, I yield the floor.

Several Senators addressed the Chair.

Mr. STENNIS. Mr. President, may I have 2 minutes?

The PRESIDING OFFICER. The Senator from Mississippi is recognized.

Mr. STENNIS. Mr. President, the conferees on House Joint Resolution 599, continuing appropriations for 1983, met yesterday and agreement has been reached. There were many important issues to be resolved, and it was essential to conclude the conference in a timely manner to insure continuation of funding for ongoing essential Government operations.

As in any conference committee, it is necessary to agree with a number of items during the negotiation process that many members do not necessarily agree with.

One item particularly is worthy of being mentioned. The conference report specifically prohibits availability of funding for initial production of the MX intercontinental ballistic missile until December 17, 1982.

Members will recall that a similar amendment was tabled during Senate consideration of the continuing resolution by a vote of 50 to 46.

I addressed the seriousness of the issue at that time, and I believe it necessary to mention once more the potential serious consequences of the conference provision relative to delaying the production of the MX missile.

S. 2951, the Department of Defense appropriations bill, 1983, includes $830 million to procure the initial five MX missiles. In addition, $158 million was included for basing and support equipment. These funds in support of the basing mode were properly "fenced" by language in the Department of Defense Authorization Act, 1983, to insure that the funds were not committed or obligated prior to a decision on long-term basing of the missile by the President on December 1, 1982.

This country has been working on the MX missile since 1974—a period of 8 years. It is a most important element of the Triad with the manned strategic bomber and the submarine-launched missile. There is little doubt concerning the capability of this missile or the improvement to our land-based ICBM force in terms of survivability and accuracy. The only question has been the proper basing mode, and this matter has been taken care of by the authorization act.

I submit the action of the conference committee could send an unfortunate signal to the Soviet Union at the worst possible time. The President is embarking on most important negotiations with the Soviet Union relative to the need to constrain further increases in nuclear arms. Strategic arms control is probably the most critical national security challenge today.

The business of negotiating a strategic arms reduction treaty with the Soviet Union is most serious. A review of our previous negotiations with the Soviet Union indicates that the only way to assure a successful conclusion is through a posture of strength and determination. In my opinion, the continued delay in producing these missiles can only be viewed from a perspective of weakness and uncertainty and will seriously undermine the President's efforts to secure a meaningful arms reduction.

Some have argued that the delay of approximately 70 days in initiating production of the missiles will not endanger the introduction to operational capability (IOC) date of 1986. Similarly, others have argued that it is improper to initiate production of the missiles when a basing mode has not been selected.

I submit that a potential delay in achieving the IOC date is very real, and there is little logic to the latter argument as we have to start the missile production now to insure this availability in 1986. The real impact is the weakening of the President's position when the START negotiations resume on October 6, 1982.

In summary, Mr. President, I believe the action of the conference committee is ill-advised. However, in the spirit of compromise, I must recommend that the conference report be adopted to insure that the essential operations of government are carried forward until the annual appropriation bills are enacted. I sincerely hope that the Defense appropriations bill for 1983 can be enacted prior to the end of this continuing resolution and a similar restrictive provision relative to the MX missile will not be required.

Mr. President, I yield the floor.

Mr. President, after a good debate night before last, we voted by a margin of four votes not to put restrictions on the amount of money that we had in the bill for production of the MX missile itself.

The main reason was that it was right on the eve of resumption of the negotiations that the President of the United States and his appointees are carrying on with reference to the possibility of achieving a meaningful arms limitation agreement.

I regret that we were unable to sustain the Senate position fully in the conference, but there are certain problems that the House conferees were confronted with. This bill is for approximately a 70-day period only. So I yield in the interest of the problem of continuing the operations of the Government. I hope it can be resolved within the 70 days. I regret that we have this question mark attached to this highly important item at this time.

Mr. President, I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, it is my opinion that the defense section of this continuing resolution provides what I consider to be a workable agreement on 1983 funding rates. It is far better than the severely restrained rate originally proposed by the House of Representatives, and it provides ample spending authority for the program expansion proposed by the President. It is certainly not as good as enacting a regular appropriation bill, but we have a commitment from the House of Representatives that they will return a week before Congress reconvenes and mark up the regular appropriation bill, and we are hopeful that we will be considering the full bill for 1983 fiscal year by the first week of December.

I am confident that this continuing resolution will support effective program levels for the Defense Department and avoid most of the costly, damaging disruptions until we can take up the regular bill next December.

We did find it necessary to accommodate the concerns of the conferees on the item just mentioned by the Senator from Mississippi, the MX missile procurement, and one of the two nuclear-powered aircraft carriers.

However, the funding limitation is only on new procurement of the MX and on the second carrier until December 17 without any further condition. I wish to point that out.

I have heard the comment from the Senator from Mississippi that the Senate did vote against a concept of not starting the MX. What we have done is to preserve until December 17 the option of the House of Representatives to bring us a bill and state its position on the MX. We have not fenced the MX. We have not stopped the MX. We have not taken action contrary to what the Senate did.

We were faced with the position from the Appropriations Committee in the other body that they had not had a chance to review the MX procurement in the House of Representatives and that they wanted an opportunity to review it before they agreed to our decision to fund it as is reported to the Senate in our appropriation bill.

Now I am told that the Air Force has indicated this will not create any program slowdown on the MX.

The agreement on the carrier I think keeps alive the two-carrier option that will save more than $750 million in construction cost by assuring the continued long-lead time procurement and initial production for the first carrier.

Mr. President, there are some questions about wide-bodied transport procurement, and I wish to settle that. I think the Senator from Georgia here has asked me the question, What is the situation on the C-5B and the B-1 which were suggested to be the items that were specifically stated to be solved and not be subject to any go-ahead on procurement until the end of this continuing resolution or until the date that the new 1983 fiscal appropriation bill is enacted into law.

We rejected any stop on the C-5B and the B-1 and the House of Representatives has agreed with us that the only specific delay is on the one carrier and on the MX procurement.

I call the attention of the Members who wish to look at the managers' report to the statement that is contained on page 13 which reads as follows:

The managers were of the opinion that a more complete program list of funding prohibitions should not be included, therefore allowing needed flexibility for both the Congress and the Executive Branch. However, the managers direct the Department of Defense to consult with the Appropriation Committees of Congress on any funding decisions where there is a question as to the

propriety of proceeding with such funding during the operation of this continuing resolution.

Mr. President, it was specifically agreed with regard to the C-5B and those items that were funded in the 1983 bill and whether these new higher levels would be allowed to continue. The C-5B would be permitted, in my judgment, and any other item that was funded in 1982 would be able to continue at the new level subject to the reduction that is prescribed in the Senate-reported Defense bill.

There are many items that are covered by that. We did not have a complete list of prohibitions. It is my opinion that the wide body procurement of the 747's using moneys that were authorized and appropriated in 1982 can continue and that the only thing unfortunately that did not come through was the decision of the Appropriations Committee to accelerate funding of the R&D on the C-17. That is a new decision and unfortunately, but there is prior money for the C-17 until we get the regular appropriations bills.

I am hopeful that it will be the decision of Congress that the C-17 will be funded. But I wish the record to be clear that while there is nothing in this bill that was stated specifically in the conference report for the C-17, there is the stated flexibility I mentioned earlier.

I invite other members of the Appropriations Committee to confirm it, and I remind the Senate that I opposed C-5B production, but I wish to make sure in the interest of fairness that everyone understands that there is no restriction on the funding of the C-5B under this continuing resolution. Nor is there any restriction on spending the existing money for wide-bodied aircraft procurement. That is not completely approved yet for the full purchase of the wide bodied. But I do hope that that statement in the RECORD will satisfy my good friend from Georgia and that there will be no question as to the C-5B.

I say to the chairman if there are any questions concerning our section I shall be happy to answer them.

I strongly urge the support of this continuing resolution, although I have rather severe feelings about any delay in the MX, even a delay until December 17.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado is recognized.

Mr. ARMSTRONG. Mr. President, I note with dismay that the committee on conference was not able to sustain a Senate amendment which I offered related to the community services block grant program, and I fear that the action of the conferees did not fully take into account the consequences for some 14 States that will, if the conference action is sustained, be preempted. The States involved, and I invite the attention of the Senators from these States because I expect they will be hearing rather promptly about it, are Arizona, Ohio, Georgia, Texas, Illinois, West Virginia, Missouri, Wisconsin, Alabama, Pennsylvania, North Carolina, Washington, Utah, Montana, and of course Colorado.

The background of it is this: The 1981 Reconciliation Act instructed the States to pass through community services block grant moneys for fiscal year 1983 to local political subdivisions; that is, to counties and States. Fifteen States which I have just mentioned have moved to comply with the current law by submitting plans to the department which involves passing the money through to the political subdivisions. Most of the planning has been devoted to developing these plans. Some States passed laws to provide various forms of enabling legislation pursuant to the Reconciliation Act.

Mr. President, with that in mind, I was surprised when I learned that the Appropriations Committee had reported in the continuing resolution section 135 of the continuing resolution which reversed the decision of the Reconciliation Act and in doing so brought to the floor a provision which clearly was legislation on an appropriations bill which was contrary to the authorization statute which was opposed by the administration, was opposed by the chairman of the authorizing committee and was opposed by the chairman of the subcommittee.

Therefore, I offered an amendment which said simply this, that this preemption contained in section 135 would not be effective with respect to those States which had submitted plans to the department prior to the start of the fiscal year, in other words, rather than having the money pass through as section 135 suggested for all States that at least those States which had complied with the law would be permitted to go forward.

For reasons which are simply not clear to me at all the conference committee did not go along with the Senate amendment. My initial disposition was to offer an amendment to the conference report, and it is my understanding that such an amendment would, in fact, be in order on some of the amendments which are brought back in disagreement. I am not so sure I am going to do that, and I simply call this to the attention of the Senators from the 15 States involved and to ask what they would like to do about this.

For my part, I have determined that Colorado will be able to receive the money notwithstanding the action of the conference committee. But legal counsel advises that is not true for all of the States involved. At least one State has come to my attention in which the State legislature has acted in reliance on the provisions of the 1981 reconciliation, and has done so in a way which in the opinion of counsel will make it impossible for them to receive money under either system. That is the system outlined in the 1981 Reconciliation Act or the system now contained in section 135 of the bill.

I seriously doubt if it was the intention of the conferees to create this catch-22 situation, but for that matter I cannot understand why the conferees would desire to preempt the States, overrule the action of the Senate, which was not controversial in the first place.

So, Mr. President, let me just state my own position, and then I leave it to the decision of other Senators as to what they would like to do.

First, I think the Senate was right in the amendment we adopted. Second, at some point in time, either tonight or the next time we have a continuing resolution before us, I intend to again introduce an appropriate amendment. Third, I have determined that my own State, while it will be inconvenienced, will not lose any money as a result of the action of the conferees. Fourth, I am advised by legal counsel that other States are not so fortunate and, in fact, will lose their funding altogehter by the action of the conferees.

If anybody wants to know whether or not his State is one of those which may be in such a situation I will be happy to consult with him privately.

Mr. SCHMITT addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. It is my disappointment that the Senator's amendment could not be sustained by the Senate conferees. The House was absolutely insistent that we recede on that point and, as the Senator knows, in any continuing resolution if one body wants to be absolutely insistent, usually it gets its way.

Now, I would say though in response to the Senator's suggestion that there may be some States that would not receive their funds as a result of existing State law, it is my understanding that other counsel believe that the money can in fact be passed to the Governor so long as it passed through directly to the individual community actions agencies, and the Governor can adhere to whatever requirements he or the legislature may set so long as the money is passed through.

This is conceivably going to be a battle of lawyers on this issue, but it is the subcommittee's, at least, present opinion that no State need run into a problem so far as the funds are concerned. One State, and I believe the Senator has that in mind, does have a statute that requires the money to go to the counties. This statute would preempt that. The Governor still would get the money. It would have to go to the agencies, although he could

apply the same restrictions as the counties might apply.

I would also remind the Senator from Colorado that we will revisit this issue on the regular bill, where I have made a commitment to my chairman, the House, and everyone, we are going to do something about having a regular bill on the floor of the Senate. I cannot make a commitment when the Senate works its will and the conference then works its will that the President will sign the bill for Labor, Health and Human Services and related agencies, but we are sure going to give it a try.

We can, if it turns out in the intervening time that the final judgment of the appropriate counsel, whoever they may be, is that certain States cannot receive this money we will certainly take that into account and do something about it.

Our current information is that no State need be deprived of the money. there may be a problem under State law or because of the preemption of State law of going directly to the counties as the State law might provide.

Mr. ARMSTRONG. Mr. President, if the Senator will yield to me——

Mr. SCHMITT. I would be happy to yield.

Mr. ARMSTRONG. I wonder if he would tell us who the legal counsel is who has given this assurance?

Mr. SCHMITT. The legislative counsel.

Mr. ARMSTRONG. Mr. President, I am reassured to know that and, for the record, let me just state the concern which I have expressed comes to me from Don Heirch, who is the associate general counsel for legislation in HHS. Lawyers make a living by disagreeing, but it is my understanding that one or more States, I know of one specifically and maybe others, have passed a statute saying that these funds have to be distributed in a certain way.

I do not see myself—I am not a lawyer, but I do not see myself—how a Federal statute can preempt that other than to simply establish the conditions under which a grant may be received.

So it does appear to me that at least there is a potential catch-22.

My initial interest in this, however, does not arise from the legal considerations but from a policy issue. We wisely in the 1981 Reconciliation Act established a new system for distributing these block grants. A number of States, 15 of them, went along with that and moved to comply with the law, and then at the 11th hour and 59th minute we turned around and have preempted it. So for policy reasons at the right moment I am going to offer an amendment. In the meantime, it would be my hope that no State is seriously inconvenienced or has its funds cut off, and the Senator's assurance proved to be well founded.

Mr. SCHMITT. I appreciate the Senator's comments. Yes; he is correct that legal counsel are bound to argue with each other apparently, but the legislative counsel of the Senate feels very strongly that the language in this bill does preempt State law and that the money would flow to the Governor and then to the individual community action agencies.

If that proves not to be the case, and even if it does, we will be looking at this very hard in the regular bill. The Senator has brought it to our attention, and we appreciate that very much, and we will resolve it one way or the other.

I would also say that the Senator from New Mexico as the chairman of the subcommittee is equally concerned about the policy implications and the primary reason we even address this issue with the 90-percent passthrough provisions in the Senate bill and then amended by the Senator from Colorado was because the States, for the most part, had not been able to use the fiscal year 1982 as the transition period for which it was intended, and we felt that one more year of transition—and it turns out in this case a couple months more of transition—and we assume that this may be continued in the regular bill to include one more year of transition—is important to make sure the States are fully prepared to assume the responsibility previously exercised by the Federal Government.

Mr. ARMSTRONG. Mr. President, I thank the Senator and I appreciate his interest in the problem and I trust we can work it out at an appropriate moment.

Mr. SCHMITT. I have all the confidence in the world we can work it out.

Mr. DANFORTH. Mr. President, I would like to address an inquiry to the distinguished Senator from North Dakota (Mr. ANDREWS) who is chairman of the Transportation Subcommittee of the Appropriations Committee.

As the Senator knows, we included in the bill here in the Senate a provision relating to ADAP, and the thrust of the provision was to make things that were unused or specific purposes under the ADAP program available to the Secretary of transportation for his discretinary fund. It was the purpose of the Senator from Missouri in offering this amendment to make available some further discretionary funds for use in the construction work now being done at Lambert-St. Louis International Airport.

I wonder if the Senator from North Dakota could explain to the Senate the intent of the conferees in including this provision in the conference report.

Mr. ANDREWS. Mr. President, if the Senator would yield, let me point out that, obviously, this provision was introduced as an amendment by the Senator from Missouri (Mr. DANFORTH), with the intent that it would provide the Department of Transportation with sufficient discretionary funds to make an $18 million grant to Lambert-St. Louis International Airport for modernization and expansion. The committee accepted the amendment and, in fact, it was the Senator from Missouri who offered it. We recognized the importance of the Lambert project to our national air transportation system.

The minor modifications made to Senator DANFORTH's original language during the House-Senate conference on this bill in no way reflect any change in the intent of purpose of Senator DANFORTH's provision. Rather, they are perfecting amendments made by the conferees in an effort to better accomplish the goals of the Senator from Missouri.

The upgrading of Lambert is, indeed, a national priority. It is fair to say that the conferees recognized the special circumstances surrounding the Lambert expansion and agreed that the availability of these new discretionary funds will give DOT the ability to provide meaningful help.

The PRESIDING OFFICER (Mr. CHAFEE). It is very difficult to hear the speaker. Will the Senate please be in order so that we might hear the colloquy being exchanged? It is necessary that we keep the noise down because this is very important and all Senators wish to hear it.

Mr. ANDREWS. I thank the Chair.

It is fair to say, Mr. President, that the conferees recognized the special circumstances surrounding the Lambert expansion and agreed that the availability of these new discretionary funds put in by Senator DANFORTH's amendment will give DOT the ability to provide meaningful help to Lambert officials in finishing this project—the largest airport improvement project in the Nation—as expeditiously as possible.

Mr. DANFORTH. I thank the Senator from North Dakota for his explanation.

Mr. MATHIAS addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. MATHIAS. Mr. President, I am wondering if the managers of the resolution would yield for a question.

Mr. HATFIELD. Mr. President, I am happy to respond.

Mr. MATHIAS. Mr. President, I have not seen a copy of the conference report. I am advised they are not available. But I am told that the conferees receded to the amendment of the Senator from Alaska (Mr. STEVENS), which deleted the garnishment provision for

Federal employees' pay. I am wondering if the managers could advise the Senator whether or not that is accurate.

Mr. HATFIELD. That is correct, I would say to the Senator from Maryland.

Mr. MATHIAS. If Federal pay can be garnished, can the managers tell us under what conditions they could be garnished?

Mr. HATFIELD. Mr. President, let me refer to page 24 of the bill, line 21.

as determined by a court of the United States in an action or suit brought against such employee by the United States, the amount of the indebtedness may be collected in monthly installments, or at officially established regular pay period intervals, by deduction in reasonable amounts from the current pay account of the individual. The deductions may be made only from basic pay, special pay, incentive pay, or, in the case of an individual not entitled to basic pay, other authorized pay. Collection shall be made over a period not greater than the anticipated period of employment.

Mr. MATHIAS. Mr. President, I am wondering if the managers can tell us, can a Federal worker's pay be garnisheed if a judgment is rendered against him in some lower court, or does it have to be carried through to appeal and final judgment by the ultimately court of appeals, ultimately by the Supreme Court?

From what the Senator has read, I would assume that the minute a judgment was obtained, someone in the Government, it is not quite clear who, but someone could simply send an order down to the paymaster of that particular employee's shop and say, "Cut off his water."

Mr. HATFIELD. I think the Senator is probably correct. If there is a judgment rendered, until that judgment is either appealed or not appealed, it would be very difficult to make a blanket prediction of what would happen.

Mr. MATHIAS. Suppose it was on appeal?

Mr. HATFIELD. But once a judgment was rendered by a court, I would imagine that the employing authority, if that judgment by that lower court is on appeal, would withhold any action until that appeal is settled. I think it would be a matter of just the reasonable men doctrine applying there.

Mr. MATHIAS. I think the Senator from Oregon is a reasonable man. I think it is important he say that in this proceeding because that is not what the resolution says. The resolution says if a court renders a judgment.

Mr. HATCH. I think the background of this is we wanted it to be an action by the court after an appropriate hearing rather than by an arbitrary action by, say, an agency director.

Mr. MATHIAS. As the Senator knows, you do not normally execute on a judgment or attempt to levy on a judgment unless there is some procedure for execution.

The PRESIDING OFFICER. Could we please have quiet in the Chamber? There are innumerable conversations taking place. Will those conversations please take place in the cloakroom? It is very difficult to hear the colloquy. Would those Senators who are conversing please move to the cloakroom? This is an important colloquy in which both Senators and others are interested.

Mr. HATFIELD. Let me say to the Senator, we are on a continuing resolution that has a life expectancy of December 17. The regular Treasury appropriation bill will give us an opportunity at that point to define that more clearly without any question remaining. But I do believe that we can say at this point that the number of judgments that might be rendered in this period of time between now and December 15 or 17 would be probably very improbable or very few. But, let me indicate that what we want to make clear is that this would have to be rendered by an action after a hearing by a court of law and thereby set that court into a mediating or a judgment role rather than this being determined purely by the employing authority.

Mr. MATHIAS. My concern here is that there is no provision for any kind of a garnishing proceeding or executing on the judgment in which the employee would even have notice that his pay was about to be docked.

Mr. STEVENS. Will the Senator yield?

Mr. MATHIAS. Surely.

Mr. STEVENS. Mr. President, it was my amendment that deleted the House provision that originally started this concept. And we had hoped the House would accede to that request that we approach this in a different manner, because it appears to place on Government employees, because of their employer, the Federal Government, a different relationship than employers in the private sector or non-Government sector would have on their employers. And it gives the Federal Government, as an employer, an extra advantage, you might say, over any debt that is owed by the employee to withhold from wages.

It has to be under a decision of the district court but it does seem that ought to come about as a result of an overall statute dealing with debt owed to the Federal Government and not just in the particular case of debt owed to the Federal Government by employees.

But the House refused to accede. I do agree with the chairman. Again, I see nothing in this that makes it permanent law. It is governed by the continuing resolution date, is it not? Is this continuing law?

Mr. HATFIELD. No, it is not, I would say to the Senator from Alaska. We do have the opportunity to supersede this action by the passage of a bill we could take up in the lameduck session.

Mr. STEVENS. May we have order?

The PRESIDING OFFICER. The Senator's point is well taken. It is very difficult for those participating and others in the Chamber to hear. Will the staff in the back of the room and others desist in the talking and repair to the cloakroom if they wish to converse?

The Senator from Alaska.

Mr. STEVENS. Mr. President, I have been directed, because of the initial language of this amendment that says notwithstanding any other provision of the joint resolution, which would include the provision that sets the date, to say that this language could, then, extend beyond December 15 and it makes it imperative that we either correct in the regular appropriations bill or in the next continuing resolution.

I will state to my friend from Maryland that, as chairman of the Subcommittee on Civil Service and Postal Services, I will ask my staff to prepare an amendment to restore the same protections for Government employees that exist throughout the economy with regard to debts owed to employees in general.

As I understand it, the House has acted on it and the item has been restored with the original House amendment. It is not in disagreement with the House, but they have refused to accept the amendment of the Senate. Is that correct?

Mr. HATFIELD. That is correct. I will join with the Senator from Alaska and the Senator from Maryland in saying that this matter will be urgent priority in our committee session.

Mr. MATHIAS. I thank the Senator. As a member of the Civil Service Subcommittee, I will keep in mind his enthusiastic support. As this resolution stands, there is a denial of due process to a substantial number of American citizens. I think that is a situation that needs to be rectified.

Mr. HATFIELD. May we say that for at least whatever role legislative history might play, we want to make certain that it is not the intent of the committee or the conference to do that which the Senator has raised. I think with appropriate language it can be taken care of and nailed down.

Mr. MATHIAS. It should be nailed down. There is no reason why honest mistakes should not be corrected but it should be done in accordance with the established procedures of law.

Mr. ROBERT C. BYRD. Mr. President, once again we are faced with the necessity of passing a joint resolution to continue the operation of the Federal Government. Only one appropriation bill, the HUD-independent agencies for fiscal year 1983, which in-

cludes funding for veterans programs, has been sent to the President at this time. Without this continuing resolution, the functions of all those agencies not funded in the HUD bill would terminate on September 30, 1982. We witnessed the disruption that such a termination can cause last November when the President vetoed the continuing resolution and temporarily closed Government offices. That disruption in service to the American people was neither efficient nor practical. I sincerely hope that such a situation will not be repeated this year.

Passage of this continuing resolution will permit the ongoing operations of many programs which are important to the people of West Virginia. This resolution provides continued funding for rural housing loans, social security payments, black lung benefits, and assistance to unemployed workers as well as jobs for older Americans. The resolution also continues operations of the locks and dams on the Monongahela, Ohio, and Kanawha Rivers, a system of waterways essential to the transportation of coal and for other commerce. Construction on the Weirton-Steubenville and East Huntington Bridges as well as flood control projects on the Tug Fork will continue under this resolution. The Elkins weather station and the Cardinal passenger train are among other items which are supported. The resolution also insures that operations in the Monongahela National Forest and Harpers Ferry National Historical Park, including the police force, will be maintained at current levels.

I am pleased to note that this resolution also contains language requiring foreign steel imported into the United States to have an export license or similar documentation from the producing nation. This provision will permit closer monitoring and enforcement of trade agreements by the U.S. Government.

This joint resolution, which the Congress is sending to the President today, will continue all of these important matters until December 17, 1982. The Congress will return in November to resume work on the remaining appropriation measures.

Mr. KASTEN. Mr. President, the conference agreement as it affects foreign assistance can only be described as an irresponsible action, necessitated by the intransigence of the other body, and the pressures of time with the beginning of the new fiscal year.

The Senate conferees, while we receded to the House position on foreign assistance, did so only because we were running up against the deadline, and because we were dealing with a situation among the House conferees where there was no inclination to negotiate. The overall effect of this action is that foreign assistance under the continuing resolution is $2.2 billion below the current level. The Senate conferees were faced with arguments the equivalent of which are 2+2=5, and night is day. Somehow the House saw the Senate position, which totaled $11.152 billion as an increase in foreign aid, despite the fact that the current level is $12 billion.

We were also faced with arguments against the Senate position on the basis of legislation currently before the Senate Finance Committee and the House Ways and Means Committee, completely irrelevant to either the House or the Senate continuing resolutions. Unfortunately, we have faced similar situations in the past, although this time seemed to be worse, and it does not bode well for the future of U.S. foreign policy, especially as it is reflected in the very important foreign assistance and related programs appropriations bill.

Until rational and reasonable forces take control on this issue in the House, I am afraid we will be in for further editions of what happened yesterday. My very distinguished ranking member, the senior Senator from Hawaii, and I will continue in a bipartisan manner to try and provide the United States with a coherent and adequate foreign assistance policy.

Let me detail a few of the results of the House insistence on its position:

Funds for UNICEF—programs helping women and children—will be cut by 37 percent.

The United Nations Development Program—probably the primary United Nations program of interest to the United States—will be cut by 17 percent.

American schools and hospitals abroad program—of interest to many Members—will be cut by 63 percent.

The $50 million that would have been made available for Lebanon reconstruction and rehabilitation is out completely.

The Peace Corps, which for 20 years has received bipartisan, conservative and liberal support, will be cut by 7 percent.

The Inter-American Foundation, a creature of Congress and probably the best single development assistance program we fund, will be cut by 12 percent.

The military assistance programs, going to such countries as Greece, Portugal, Spain, Turkey, Jordan, Yemen, Egypt, Israel, Morocco, Pakistan, Liberia, Senegal, the Sudan, Zaire, the Philippines—will be cut by 12 percent.

And the Eximbank, again an item with wide bipartisan and philosophical support, will be cut by 13 percent.

COMMUNITY SERVICES BLOCK GRANT

Mr. DENTON. Mr. President, as chairman of the Aging, Family and Human Services Subcommittee, which authorizes the community services block grant, I join my colleague from Colorado in expressing dismay at the reinstatement of section 135 of the continuing resolution, which instructs States about the disbursement of CSBG money.

My colleagues may recall that the Senate Appropriations Committee added language to the original House resolution mandating that States pass 90 percent of their CSBG allotment to already existing Community Action agencies for fiscal year 1983. This is absolutely contrary to the authorizing language for the CSBG as contained in the Budget Reconciliation Act passed last year, which instructed States to pass money down to political subdivisions (counties and cities) in fiscal year 1983. I object to this practice of legislating on an appropriations bill because it usurps the responsibility of the authorizing committee and undermines the intent of block grant legislation.

As Senator ARMSTRONG points out, several States, including Colorado, drafted plans that conform to the reconciliation statute. Some States even passed laws that governed disbursement of the block grant funds. Many of these plans and laws would be overturned by this 11th hour change, and all the money spent for the months of planning completely wasted.

Senator ARMSTRONG and I proposed on Wednesday what we believed, and apparently the entire Senate believed, was an equitable compromise. It granted more time to States that are not quite ready to assume control of the block grant, while at the same time, allowing those States that have drafted plans to proceed with implementation without delay. The amendment passed by unanimous consent, and Senator SCHMITT, chairman of the HHS Appropriations Committee stated his support for it. No Senator objected to the amendment, and for good reason. It addresses the concerns of States that have not had experience with administering the block grant, and it does not penalize those States like Colorado and Utah that labored long and hard to conform to Federal law.

Mr. President, it appears that the reinstatement of the restrictive language will preclude at least one State, Montana, from receiving CSBG funds because their State law mandates distribution of money to counties. The State will not receive any money until the State legislature enacts conforming legislation, and the poverty community will suffer.

Mr. President, this is an example of what happens when the Congress abruptly changes course at the last moment possible. This provision has not had the benefit of close scrutiny, with the result that many States have been penalized for their hard work and at least one State has been shut out completely by virtue of complying with the authorization statute.

I emphasize again that the Armstrong amendment, which significantly altered the original Senate language, passed by unanimous consent. To drop this amendment in conference binds the Senate to the very language that was repudiated by this body on Wednesday. This makes no sense whatsoever.

By dropping the amendment, we have handed the States a serious setback and retarded unnecessarily the implementation of the community services block grant.

Mr. MATTINGLY. Mr. President, as chairman of the Appropriations Subcommittee on the Legislative Branch, I want to be sure my colleagues know what this continuing resolution means for the legislative branch.

The message is a mixed one. On the positive side, I am very proud of the funding record of the subcommittee. The conferees have agreed to a funding level for the legislative branch, including independent agencies such as the Library of Congress, the Government Printing Office, and the General Accounting Office, of approximately $1.336 billion. Compare this to the President's budget request of $1.410 billion, and the fiscal year 1982 total of $1.365 billion. We are $75 million under the President's request, and $30 million under the fiscal year 1982 level. Even if compensation accounts are included which were contained in last year's totals but are now subject to a permanent appropriation, we would still be $75 million under the President's request. And costs of the legislative branch would rise only $6 million from last fiscal year to this—less than one one-hundredth of 1 percent.

Mr. Speaker, the Senate has borne its share of the effort to hold down Federal spending. Of the 17 accounts which fund the salaries of Senate employees, 14 were held to the 1982 level, including supplementals. I want to express my appreciation to these offices for their cooperation.

While I am pleased with the spending totals of the legislative branch for fiscal year 1983, I am unhappy with the funding mechanism. For this continuing resolution funds the legislative branch for the entire fiscal year. As a result, for the fourth year in a row, there will not be a regular appropriation bill enacted for the legislative branch. During that hiatus, every other one of the 13 regular appropriation bills has been enacted at least once, most of them every year. In the 4 years since we have had a regular bill for the legislative branch, twice it has not been brought to the House floor, once it passed the House but was not reported by the Senate Committee, and once the bill was actually defeated on the House floor.

Clearly, Mr. President, there is a feeling that we are better off not forcing Members to vote on their own appropriations. But I feel we cheat the American people when we take the easy way out, and do not face up squarely to this issue. While the Senate receded to the House in allowing full year funding on this resolution, I would like to call to the attention of this Chamber the language used in the conference report on House Joint Resolution 599. Regarding the relevant amendment, No. 14, the conference report states "It is the intention of the conferees that fiscal year 1984 legislative branch funding will be acted upon in regular order by both Houses." Mr. President, this language clearly envisages that we will have consideration of the fiscal year 1984 legislative branch bill on the floor of both Houses. It is my intention to press for this, even if it means bringing a Senate-initiated bill to this Chamber, and passing it.

Finally, Mr. President, the legislative branch appropriation bill has become the annual vehicle for the Federal pay cap. While the balance of the legislative branch bill extends for the entire fiscal year, the pay cap provisions extend only for the duration of the continuing resolution—December 17, 1982. Because the cap covers all Federal employees, not just those of the legislative branch, I believe this is appropriate. But I want to be sure that my colleagues know that this is an issue which will have to be dealt with again later this year.

Mr. GORTON. Mr. President, I would like to make special note of an amendment to the continuing resolution which was offered by my distinguished colleague from Idaho, Senator McCLURE, on behalf of himself, Senator HATFIELD, Senator SASSER, Senator JACKSON, and myself, and which was retained in the conference report to the continuing resolution. This amendment prohibits the funding of an administration study of the hydroelectric power pricing policies of the Federal power marketing administrations.

I was stunned to learn of this study through the press. The proposal being studied would alter the congressionally mandated policy of marketing Federal hydroelectric power at cost. It would shift this policy to a market price method of pricing. The long established policy of marketing power at cost has been reaffirmed several times by Congress, and it has never been the intention of Congress to change this policy.

The idea of raising revenues for the Federal Government by transforming Federal power marketing administrations into profitmaking organizations is foolish and completely contrary to the continuing position of Congress and the existing statutory pricing directives. Such a shift in pricing methods would have a catastrophic effect in the Northwest. My State is suffering from unemployment rates as high as 30 percent in some places, and has already been subject to recent large rate increases. A rate increase resulting from an enactment of the proposal under study would be intolerable.

I am overwhelmingly pleased that the amendment offered by my colleague and friend from Idaho has remained in the conference report to the continuing resolution, and I would like to extend my deepest thanks to Senator McCLURE and to all those who were instrumental in the acceptance of this legislation.

Mr. HATFIELD. Mr. President, if no other Senator wishes to debate, I urge the Senate to adopt the conference report.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the conference report.

The conference report was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. PROXMIRE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator's point is well taken. It is extremely difficult to hear.

The Senator from Oregon.

Mr. HATFIELD. Mr. President, I ask unanimous consent—and this has been cleared on both sides of the aisle—that the amendments reported in disagreement be considered en bloc.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, will the clerk report the amendments in disagreement.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The legislative clerk read as follows:

Resolved, That the House agree to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the resolution (H.J. Res. 599) entitled "Joint resolution making continuing appropriations for the fiscal year 1983, and for other purposes."

Resolved, That the House recede from its disagreement to the amendments of the Senate numbered 83, 85, and 86 to the aforesaid resolution, and concur therein.
